## Introduction

During the Multilateral Trade Negotiations concluded in 1979 under the auspices of the General Agreement on Tariffs and Trade, the United States agreed to apply more favorable duty treatment to certain chemicals, classifiable in 47 specific basket categories of the Tariff Schedules of the United States (TSUS), if those chemicals were of a type which had neither been imported into the United States before January 1, 1978, nor produced in the United States before May 1, 1978.

In order to make the determinations necessary to implement these concessions the President requested the United States International Trade Commission (USITC) to prepare a list of those chemicals in the 47 categories which had been imported, or produced in the United States, before the stipulated dates.

This list was prepared by the USITC and submitted to the President. Pursuant to Presidential Proclamation, this list of chemicals and products will be made the Chemical Appendix to the Tariff Schedules of the United States and the 47 categories subject to concession will be divided into new TSUS provisions which read:

"Products provided for in the Chemical Appendix  
to the Tariff Schedules"

and

"Other"

Products classifiable in one of these 47 provisions for "Other", receive the more favorable duty treatment agreed to in the MTN.

This publication lists the CAS registry numbers from the Chemical Appendix, numerically, and provides several corresponding chemical names or trade names for each CAS registry number listed.
