They may also include a portion of the protective housing of the goods in which they are to be used.”.

194. New subdivision (iv) is inserted in numerical order in note (9)(b), as redesignated in item 192, above:

“(iv) Multi-component integrated circuits (MCOs): a combination of one or more monolithic, hybrid, and multi-chip integrated circuits with at least one of the following components: silicon-based sensors, actuators, oscillators, resonators or combinations thereof, or components performing the functions of articles classifiable under heading 8532, 8533, 8541, or inductors classifiable under heading 8504, formed to all intents and purposes indivisibly into a single body like an integrated circuit, as a component of a kind used for assembly onto a printed circuit board (PCB) or other carrier, through the connecting of pins, leads, balls, lands, bumps, or pads.

For the purpose of this definition:

- (1) “Components” may be discrete, manufactured independently then assembled onto the rest of the MCO, or integrated into other components.
- (2) “Silicon based” means built on a silicon substrate, or made of silicon materials, or manufactured onto integrated circuit die.
- (3) (a) “Silicon based sensors” consist of microelectronic or mechanical structures that are created in the mass or on the surface of a semiconductor and that have the function of detecting physical or chemical quantities and transducing these into electric signals, caused by resulting variations in electric properties or displacement of a mechanical structure. “Physical or chemical quantities” relates to real world phenomena, such as pressure, acoustic waves, acceleration, vibration, movement, orientation, strain, magnetic field strength, electric field strength, light, radioactivity, humidity, flow, chemicals concentration, etc.
(b) “Silicon based actuators” consist of microelectronic and mechanical structures that are created in the mass or on the surface of a semiconductor and that have the function of converting electrical signals into physical movement.
(c) “Silicon based resonators” are components that consist of microelectronic and/or mechanical structures that are created in the mass or on the surface of a semiconductor and have the function of generating a mechanical or electrical oscillation of a predefined frequency that depends on the physical geometry of these structures in response to an external input.
(d) “Silicon-based oscillators” are active components that consist of microelectronic and/or mechanical structures that are created in the mass or on the surface of a semiconductor and that have the function of generating a mechanical or electrical oscillation of a predefined frequency that depends on the physical geometry of these structures.”.

EXECUTIVE OFFICE OF THE PRESIDENT
THE UNITED STATES TRADE REPRESENTATIVE
WASHINGTON, D.C. 20508

December 2, 2016

The Honorable Irving A. Williamson
Chairman
U.S. International Trade Commission 500 E Street, SW
Washington, DC 20436

Dear Chairman Williamson:

The U.S. International Trade Commission (USITC) plays a critical role in facilitating U.S. trade by reviewing and recommending to the President modifications to the Harmonized Tariff Schedule of the United States (HTS) that are necessary or appropriate to conform the HTS to the International Convention on the Harmonized Commodity and Coding System (the Convention). We greatly appreciate the significant, ongoing effort the USITC invests in this massive project.

To carry out U.S. obligations under the Convention and to include other adjustments to the HTS resulting from implementing the Convention, President Obama will be proclaiming changes to the HTS. These modifications will be based on the USITC's recommendations in its final report in investigation No. 1205-11, "Recommended Modifications to the Harmonized Tariff Schedule to Conform with Amendments of the Harmonized System Recommended by the World Customs Organization, and to Address Other Matters," provided to me under 19 U.S.C. 3005, and modifications necessary to maintain current tariff treatment of goods under certain free trade agreements.

My staff has been working with the USITC staff on annexes to a proposed Presidential proclamation that would implement U.S. obligations under the Convention and make other changes to the HTS resulting from implementing the Convention. I have enclosed with this letter the complete text of those changes.

I request the USITC to publish as a formal USITC document those changes to the HTS that the President proclaims to implement the Convention, including consequential changes necessary to maintain current tariff treatment of goods, and to provide copies to USTR staff, as quickly as possible. I understand that after the proclamation is signed, the USITC will make the document available to the public and will also post a copy on the USITC's website. In addition, I understand that copies of the document will be provided to the Federal Depository Libraries.

I appreciate the USITC's willingness to assist the Administration in employing the most efficient and cost effective means of informing the public of the changes to be made in the HTS as we implement the Convention.

Sincerely,

Ambassador Michael B.G. Froman

CHAIRMAN

UNITED STATES INTERNATIONAL TRADE COMMISSION

WASHINGTON, DC 20436

December 5, 2016

The Honorable Michael Froman
United States Trade Representative

Thank you for your letter of November 30, 2016, requesting that the Commission publish the text of the modifications to the Harmonized Tariff schedule of the United States that the President will proclaim in connection with the recommendations made by the World Customs Organization and codified in Commission Investigation 1205-11.

We will publish the text of these annexes as USITC Publication No. 4536 and will place the publication on the Commission's internet site as soon as possible. The Commission will also make the document available to U.S. Government depository libraries, as you have requested.

If we may be of further assistance in this matter, please do not hesitate to contact us.
