Technical comments:⁴

It is suggested that the description be modified slightly as shown on page 1 for grammatical clarity; it is the finished instruments or apparatus, rather than the subassemblies, that are specially designed for telecommunications.

⁴ The Commission may express an opinion on the HTS classification of a product to facilitate consideration of the bill. However, by law, only the U.S. Customs Service is authorized to issue a binding ruling on this matter. The Commission believes that the U.S. Customs Service should be consulted prior to enactment of the bill.
