of the 109th Congress¹**

[Date approved: August 2, 2006]²

Bill No. and sponsor: S. 2776 (Mrs. Kay Bailey Hutchison of Texas).

Proponent name, location: Uniden, Fort Worth, TX.

Other bills on product (109th Congress only): None.

Nature of bill: Extension of existing temporary duty suspension through December 31, 2009.

Retroactive effect: None.

Suggested article description(s) for enactment (including appropriate HTS subheading(s)):

Electrical radiobroadcast receivers designed to receive and monitor publicly transmitted radio communications, valued at over \$40 each, that are combined with a clock, and that are either mounted on a base or designed for use in an automobile or boat (provided for in subheading 8527.32.50).

Check one: Same as that in bill as introduced.
 Different from that in bill as introduced (see Technical comments section).

Product information, including uses/applications and source(s) of imports:

A scanner is a radio receiver that has the ability to scan pre-programmed frequencies as well as the ability to search for new ones. A scanner typically is capable of tuning in frequencies outside the usual consumer radiobroadcast frequencies, including noncommercial frequencies such as those used by police and fire departments. Scanners in this category are incapable of operating without an external source of power and contain a clock. The bill would continue the duty-free treatment of scanners other than table-top models, particularly those for use in motor vehicles or on boats.

Malaysia, China, and Japan are the principal sources of U.S. imports of these goods.
