Highlights

Fourth quarter 1980 U.S. production of color television receivers was 2.8 million sets, which was 9.3 percent greater than production in the corresponding quarter of 1979, and 300,000 more sets than in the third quarter of 1980. Exports of U.S.-made color sets amounted to 152,000 sets in the preceding quarter.

Ending December 1980 total inventories of U.S. producers were 42.1 percent higher than December 1979 levels. Inventories of all screen-size categories ranged from a 1.8 percent increase in the category of 20 inches and over to an 83.9 percent increase in the 18- and 19-inch screen-size category.

U.S. producers' shipments of all screen sizes in the fourth quarter of 1980 were 2.6 million sets, the same as in the corresponding 1979 period.

Shipments of sets 20 inches and over decreased by 9.7 percent, while shipments in the 18- and 19-inch screen-size category increased by 5.7 percent and those in the 17-inch-and-under category increased by 11.1 percent.

The number of all persons and of production and related workers employed by U.S. producers declined by 5.5 and 4.2 percent, respectively, in the fourth quarter of 1980, compared with the fourth quarter of 1979.

Average unit net selling prices rose for all screen sizes except the category of 14 through 17 inches. In the fourth quarter of 1980, as compared with the corresponding 1979 quarter, average quarterly prices in the 13-inch category increased by \$14.78 (6.6 percent), in the category of 18- and 19-inches by \$18.67 (6.4 percent), and in the 20 inches and over category by \$15.87 (3.2 percent). Average quarterly prices in the category of 14 through 17 inches decreased by \$16.24 (5.3 percent).

Capsulized Trend Analysis

U.S. production

U.S. production of color television receivers in the fourth quarter of 1980 was 2.8 million sets, 9.3 percent higher than production in the fourth quarter of 1979 and 27.8 percent higher than in the fourth quarter of 1978. Compared with the fourth quarter of 1979, production was higher in the categories of 17 inches and under and 18 and 19 inches, but lower for sets in the category of 20 inches and over. The share of production contributed by each of the three major screen-size categories changed minimally from the third quarter of 1980 to the fourth quarter of 1980.

U.S. producers' inventories

U.S. producers' inventories of color television receivers at the end of December 1980 were 741,321 units, 42.1 percent higher than the number in December 1979. Quarterly average inventories for the fourth quarter 1980 were 36.5 percent higher than inventories in the fourth quarter of 1979, but 6.2 percent lower than those in the fourth quarter of 1978. Stocks of sets 17 inches and under increased by an average of 49.5 percent, compared with the levels in the fourth quarter of 1979. In the category of 18 and 19 inches, average inventories increased by 74.8 percent, and in screen sizes of 20 inches and over, average inventories decreased by 0.2 percent, compared with fourth quarter 1979 levels. Compared with the inventories of the fourth quarter 1978, current average quarterly inventories for screen-size categories 17 inches and under were 9.1 percent higher; for 18 and 19 inches, 0.6 percent higher; and for 20 inches and over, 19.8 percent lower.

U.S. producers' shipments

U.S. producers' shipments of color television receivers in the fourth quarter of 1980 were 5.4 percent greater in quantity than those in the third quarter. In the fourth quarter of 1980, shipments amounted to 2.6 million sets, which were the same as those in the fourth quarter of 1979, but 20.1 percent higher than shipments in the fourth quarter of 1978. Compared with the fourth quarter of 1979, current shipments rose in all categories except in screen sizes of 20 inches and over, which decreased in quantity by 9.7 percent. Total shipments recorded a smaller increase over shipments in 1979 than that recorded between the corresponding periods of 1979 and 1978 (2.5 percent and 17.2 percent, respectively).

U.S. producers' exports

U.S. producers' exports of color television receivers mounted to 152,000 sets during the fourth quarter of 1980, compared with 246,000 sets during the preceding quarter. The category of 18 and 19 inches accounted for 82,000 sets, or 54.2 percent of total exports.

U.S. employment

Employment in U.S. producers' establishments maintained the slow, general decline in both production and related workers and in managerial employees. The average number of production and related workers employed during the fourth quarter 1980 was 21,975 persons, down 4.2 percent from 22,937 persons in the corresponding period of 1979. The average number of all workers was 25,076, down from 26,532 in the fourth quarter of 1979. Also, the number of man-hours worked by production and related workers was 11.0 million in the fourth quarter of 1980, down from 11.6 million in the corresponding period of 1979. This continuing decrease in employment and man-hours worked is believed

to be the result of increasing imports of major subassemblies and the increasing use of integrated circuits in color television receivers, both of which reduce the amount of assembly labor required.

Prices

Average unit net selling prices were higher for three of the four major screen-size categories during the fourth quarter of 1980, compared with those in the corresponding quarter of 1979. The average prices of the 13-inch size increased by \$14.78 (6.6 percent), those of the 14- through 17-inch sizes decreased by \$16.24 (5.3 percent), those of the 18- and 19-inch sizes increased by \$18.67 (6.4 percent), and those of the 20 inch and over sizes increased by \$15.87 (3.2 percent). These increases are well under the inflation rate as measured by the Consumer Price Index.

Screen sizes in the categories of 13 inches and 20 inches and over showed increased average quarterly prices in the fourth quarter of 1980 as compared with the third quarter. The 13-inch size increased by \$1.63, and the 20 inches and over sizes by \$3.26. The category of 14 through 17 inches decreased by \$10.69, and that of 18 and 19 inches by \$5.03.
