**TARIFF SCHEDULES
OF THE UNITED STATES
ANNOTATED (1963)**

The pages in this supplement are to be substituted for the corresponding pages in the *Tariff Schedules of the United States Annotated (1963)*. These pages contain changes made in certain provisions of the legal text and in certain of the statistical annotations. In addition, some changes are made to correct errors in the original publication. The provisions in which changes have been made are identified with the number symbol

This supplement also includes a new feature of the annotated schedules entitled "Explanatory Key to Supplementary Changes" which is to be added at the end of the volume.

GENERAL HEADNOTES AND RULES OF INTERPRETATION

3

1. Tariff Treatment of Imported Articles. All articles imported into the customs territory of the United States from outside thereof are subject to duty or exempt therefrom as prescribed in general headnote 3.

2. Customs Territory of the United States. The term "customs territory of the United States", as used in the schedules, includes only the States, the District of Columbia, and Puerto Rico.

3. Rates of Duty. The rates of duty in the "Rates of Duty" columns numbered 1 and 2 of the schedules apply to articles imported into the customs territory of the United States as hereinafter provided in this headnote:

(a) Products of Insular Possessions.

(i) Articles imported from insular possessions of the United States which are outside the customs territory of the United States are subject to the rates of duty set forth in column numbered 1 of the schedules, except that all articles the growth or product of any such possession, or manufactured or produced in any such possession from materials the growth, product, or manufacture of any such possession or of the customs territory of the United States, or of both, which do not contain foreign materials to the value of more than 50 percent of their total value, coming to the customs territory of the United States directly from any such possession, and all articles previously imported into the customs territory of the United States with payment of all applicable duties and taxes imposed upon or by reason of importation which were shipped from the United States, without remission, refund, or drawback of such duties or taxes, directly to the possession from which they are being returned by direct shipment, are exempt from duty.

(ii) In determining whether an article produced or manufactured in any such insular possession contains foreign materials to the value of more than 50 percent, no material shall be considered foreign which, at the time such article is entered, may be imported into the customs territory from a foreign country, other than Cuba or the Philippine Republic, and entered free of duty.

(b) Products of Cuba. Products of Cuba imported into the customs territory of the United States, whether imported directly or indirectly, are subject to the rates of duty set forth in column numbered 1 of the schedules. Preferential rates of duty for such products apply only as shown in the said column 1. ^{1/}

(c) Products of the Philippine Republic.

(i) Products of the Philippine Republic imported into the customs territory of the United States, whether imported directly or indirectly, are subject to the rates of duty which are set forth in column numbered 1 of the schedules or to fractional parts of the rates in the said column 1, as hereinafter prescribed in subdivisions (c)(ii) and (c)(iii) of this headnote.

(ii) Except as otherwise prescribed in the schedules, a Philippine article, as defined in subdivision (c)(iv) of this headnote, imported into the customs territory of the United States and entered on or before July 3, 1974, is subject to that rate which results

^{1/} By virtue of section 401 of the Tariff Classification Act of 1962, the application to products of Cuba of either a preferential or other reduced rate of duty in column 1 is suspended. See general headnote 3(d), *infra*. The provisions for preferential Cuban rates continue to be reflected in the schedules because, under section 401, the rates therefor in column 1 still form the bases for determining the rates of duty applicable to certain products, including "Philippine articles".

from the application of the following percentages to the most favorable rate of duty (i.e., including a preferential rate prescribed for any product of Cuba) set forth in column numbered 1 of the schedules:

(A) 20 percent, during calendar years

1963 through 1964,

(B) 40 percent, during calendar years

1965 through 1967,

(C) 60 percent, during calendar years

1968 through 1970,

(D) 80 percent, during calendar years

1971 through 1973,

(E) 100 percent, during the period from

January 1, 1974, through July 3, 1974.

(iii) Except as otherwise prescribed in the schedules, products of the Philippine Republic, other than Philippine articles, are subject to the rates of duty (except any preferential rates prescribed for products of Cuba) set forth in column numbered 1 of the schedules.

(iv) The term "Philippine article", as used in the schedules, means an article which is the product of the Philippines, but does not include any article produced with the use of materials imported into the Philippines which are products of any foreign country (except materials produced within the customs territory of the United States) if the aggregate value of such imported materials when landed at the Philippine port of entry, exclusive of any landing cost and Philippine duty, was more than 20 percent of the appraised customs value of the article imported into the customs territory of the United States.

(d) Products of Communist Countries. Notwithstanding any of the foregoing provisions of this headnote, the rates of duty shown in column numbered 2 shall apply to products, whether imported directly or indirectly, of the following countries and areas pursuant to section 401 of the Tariff Classification Act of 1962, to section 231 or 257(a)(2) of the Trade Expansion Act of 1962, or to action taken by the President thereunder:

Albania

Bulgaria

China (any part of which may be under Communist domination or control)

Cuba ^{2/}

Czechoslovakia

Estonia

Germany (the Soviet zone and the Soviet sector of Berlin)

Hungary

Indochina (any part of Cambodia, Laos, or Vietnam which may be under Communist domination or control)

Korea (any part which may be under Communist domination or control)

Kurile Islands

Latvia

Lithuania

Outer Mongolia

Rumania

Southern Sakhalin

Tanna Tuva

Tibet

Union of Soviet Socialist Republics and the area in East Prussia under the provisional administration of the Union of Soviet Socialist Republics.

^{2/} In Proclamation 3447, dated February 3, 1962, the President, acting under authority of section 620(a) of the Foreign Assistance Act of 1961 (75 Stat. 445), as amended, prohibited the importation into the United States of all goods of Cuban origin and all goods imported from or through Cuba, subject to such exceptions as the Secretary of the Treasury determines to be consistent with the effective operation of the embargo.

General Headnotes and Rules of Interpretation

4

(e) Products of All Other Countries. Products of all countries not previously mentioned in this headnote imported into the customs territory of the United States are subject to the rates of duty set forth in column numbered 1 of the schedules.

(f) Effective Date; Exceptions - Staged Rates of Duty. Except as specified below or as may be specified elsewhere, pursuant to section 501(a) of the Tariff Classification Act of 1962 (P.L. 87-456, approved May 24, 1962), the rates of duty in columns numbered 1 and 2 become effective with respect to articles entered on or after the 10th day following the date of the President's proclamation provided for in section 102 of the said Act. If, in column numbered 1, any rate of duty or part thereof is set forth in parentheses, the effective date shall be governed as follows:

(i) If the rate in column numbered 1 has only one part (i.e., 8¢ (10¢) per lb.), the parenthetical rate (viz., 10¢ per lb.) shall be effective as to articles entered before July 1, 1964, and the other rate (viz. 8¢ per lb.) shall be effective as to articles entered on or after July 1, 1964.

(ii) If the rate in column numbered 1 has two or more parts (i.e., 5¢ per lb. + 50% ad val.) and has a parenthetical rate for either or both parts, each part of the rate shall be governed as if it were a one-part rate. For example, if a rate is expressed as "4¢ (4.5¢) per lb. + 8% (9%) ad val.", the rate applicable to articles entered before July 1, 1964, would be "4.5¢ per lb. + 9% ad val."; the rate applicable to articles entered on or after July 1, 1964, would be "4¢ per lb. + 8% ad val."

(iii) If the rate in column numbered 1 is marked with an asterisk (*), the foregoing provisions of (i) and (ii) shall apply except that "January 1, 1964" shall be substituted for "July 1, 1964", wherever this latter date appears.

4. Modification or Amendment of Rates of Duty. Except as otherwise provided in the Appendix to the Tariff Schedules --

(a) a statutory rate of duty supersedes and terminates the existing rates of duty in both column numbered 1 and column numbered 2 unless otherwise specified in the amending statute;

(b) a rate of duty proclaimed pursuant to a concession granted in a trade agreement shall be reflected in column numbered 1 and, if higher than the then existing rate in column numbered 2, also in the latter column, and shall supersede but not terminate the then existing rate (or rates) in such column (or columns);

(c) a rate of duty proclaimed pursuant to section 336 of the Tariff Act of 1930 shall be reflected in both column numbered 1 and column numbered 2 and shall supersede but not terminate the then existing rates in such columns; and

(d) whenever a proclaimed rate is terminated or suspended, the rate shall revert, unless otherwise provided, to the next intervening proclaimed rate previously superseded but not terminated or, if none, to the statutory rate.

5. Intangibles. For the purposes of headnote 1 --

(a) corpses, together with their coffins and accompanying flowers,

(b) currency (metal or paper) in current circulation in any country and imported for monetary purposes,

(c) electricity,

(d) securities and similar evidences of value, and

(e) vessels which are not "yachts or pleasure boats" within the purview of subpart D, part 6, of schedule 6,

are not articles subject to the provisions of these schedules.

6. Containers or Holders for Imported Merchandise.

For the purposes of the tariff schedules, containers or holders are subject to tariff treatment as follows:

(a) Imported Empty: Containers or holders if imported empty are subject to tariff treatment as imported articles and as such are subject to duty unless they are within the purview of a provision which specifically exempts them from duty.

(b) Not Imported Empty: Containers or holders if imported containing or holding articles are subject to tariff treatment as follows:

(i) The usual or ordinary types of shipping or transportation containers or holders, if not designed for, or capable of, reuse, are not subject to treatment as imported articles. Their cost, however, is, under section 402 or section 402a of the tariff act, a part of the value of their contents and if their contents are subject to an ad valorem rate of duty such containers or holders are, in effect, dutiable at the same rate as their contents, except that their cost is deductible from dutiable value upon submission of satisfactory proof that they are products of the United States which are being returned without having been advanced in value or improved in condition by any means while abroad.

(ii) The usual or ordinary types of shipping or transportation containers or holders, if designed for, or capable of, reuse, are subject to treatment as imported articles separate and distinct from their contents. Such holders or containers are not part of the dutiable value of their contents and are separately subject to duty upon each and every importation into the customs territory of the United States unless within the scope of a provision specifically exempting them from duty.

(iii) In the absence of context which requires otherwise, all other containers or holders are subject to the same treatment as specified in (ii) above for usual or ordinary types of shipping or transportation containers or holders designed for, or capable of, reuse.

7. Commingling of Articles. (a) Whenever articles subject to different rates of duty are so packed together or mingled that the quantity or value of each class of articles cannot be readily ascertained by customs officers (without physical segregation of the shipment or the contents of any entire package thereof), by one or more of the following means:

(i) sampling,

(ii) verification of packing lists or other documents filed at the time of entry, or

(iii) evidence showing performance of commercial settlement tests generally accepted in the trade and filed in such time and manner as may be prescribed by regulations of the Secretary of the Treasury, the commingled articles shall be subject to the highest rate of duty applicable to any part thereof unless the consignee or his agent segregates the articles pursuant to subdivision (b) hereof.

(b) Every segregation of articles made pursuant to this headnote shall be accomplished by the consignee or his agent at the risk and expense of the consignee within 30 days (unless the Secretary authorizes in writing a longer time) after the date of personal delivery or mailing, by such employee as the Secretary of the Treasury shall designate, of written notice to the consignee that the articles are commingled and that the quantity or value of each class of articles cannot be readily ascertained by customs officers. Every such segregation shall be accomplished under customs supervision, and the compensation and expenses of the supervising customs officers shall be reimbursed to the Government by the consignee under such regulations as the Secretary of the Treasury may prescribe.

General Headnotes and Rules of Interpretation

(c) The foregoing provisions of this headnote do not apply with respect to any part of a shipment if the consignee or his agent furnishes, in such time and manner as may be prescribed by regulations of the Secretary of the Treasury, satisfactory proof —

- (i) that such part (A) is commercially negligible,
- (B) is not capable of segregation without excessive cost, and (C) will not be segregated prior to its use in a manufacturing process or otherwise, and
- (ii) that the commingling was not intended to avoid the payment of lawful duties.

Any article with respect to which such proof is furnished shall be considered for all customs purposes as a part of the article, subject to the next lower rate of duty, with which it is commingled.

(d) The foregoing provisions of this headnote do not apply with respect to any shipment if the consignee or his agent shall furnish, in such time and manner as may be prescribed by regulations of the Secretary of the Treasury, satisfactory proof —

- (i) that the value of the commingled articles is less than the aggregate value would be if the shipment were segregated;
- (ii) that the shipment is not capable of segregation without excessive cost and will not be segregated prior to its use in a manufacturing process or otherwise; and
- (iii) that the commingling was not intended to avoid the payment of lawful duties.

Any merchandise with respect to which such proof is furnished shall be considered for all customs purposes to be dutiable at the rate applicable to the material present in greater quantity than any other material.

(e) The provisions of this headnote shall apply only in cases where the schedules do not expressly provide a particular tariff treatment for commingled articles.

8. Abbreviations. In the schedules the following symbols and abbreviations are used with the meanings respectively indicated below:

\$	-	dollars
¢	-	cents
%	-	percent
+	-	plus
ad val.	-	ad valorem
bu.	-	bushel
cu.	-	cubic
doz.	-	dozen
ft.	-	feet
gal.	-	gallon
in.	-	inches
lb.	-	pounds
oz.	-	ounces
sq.	-	square
wt.	-	weight
yd.	-	yard
pcs.	-	pieces
prs.	-	pairs
lin.	-	linear
I.R.C.	-	Internal Revenue Code

9. Definitions. For the purposes of the schedules, unless the context otherwise requires —

- (a) the term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States;
- (b) the term "entered for consumption" does not include withdrawals from warehouse for consumption;
- (c) the term "withdrawn for consumption" means withdrawn from warehouse for consumption and does not include articles entered for consumption;

(d) the term "rate of duty" includes a free rate of duty; rates of duty proclaimed by the President shall be referred to as "proclaimed" rates of duty; rates of duty enacted by the Congress shall be referred to as "statutory" rates of duty; and the rates of duty in column numbered 2 at the time the schedules become effective shall be referred to as "original statutory" rates of duty;

(e) the term "ton" means 2,240 pounds, and the term "short ton" means 2,000 pounds;

(f) the terms "of", "wholly of", "almost wholly of", "in part of" and "containing", when used between the description of an article and a material (e.g., "furniture of wood", "woven fabrics, wholly of cotton", etc.), have the following meanings:

- (i) "of" means that the article is wholly or in chief value of the named material;
- (ii) "wholly of" means that the article is, except for negligible or insignificant quantities of some other material or materials, composed completely of the named material;
- (iii) "almost wholly of" means that the essential character of the article is imparted by the named material, notwithstanding the fact that significant quantities of some other material or materials may be present; and
- (iv) "in part of" or "containing" mean that the article contains a significant quantity of the named material.

With regard to the application of the quantitative concepts specified in subparagraphs (ii) and (iv) above, it is intended that the de minimus rule apply.

10. General Interpretative Rules. For the purposes of these schedules —

(a) the general, schedule, part, and subpart headnotes, and the provisions describing the classes of imported articles and specifying the rates of duty or other import restrictions to be imposed thereon are subject to the rules of interpretation set forth herein and to such other rules of statutory interpretation, not inconsistent therewith, as have been or may be developed under administrative or judicial rulings;

(b) the titles of the various schedules, parts, and subparts and the footnotes therein are intended for convenience in reference only and have no legal or interpretative significance;

(c) an imported article which is described in two or more provisions of the schedules is classifiable in the provision which most specifically describes it; but, in applying this rule of interpretation, the following considerations shall govern:

(i) a superior heading cannot be enlarged by inferior headings indented under it but can be limited thereby;

(ii) comparisons are to be made only between provisions of coordinate or equal status, i.e., between the primary or main superior headings of the schedules or between coordinate inferior headings which are subordinate to the same superior heading;

(d) if two or more tariff descriptions are equally applicable to an article, such article shall be subject to duty under the description for which the original statutory rate is highest, and, should the highest original statutory rate be applicable to two or more of such descriptions, the article shall be subject to duty under that one of such descriptions which first appears in the schedules;

(e) in the absence of special language or context which otherwise requires —

(i) a tariff classification controlled by use (other than actual use) is to be determined in accordance with the use in the United States at, or immediately prior to,

General Headnotes and Rules of Interpretation

6

the date of importation, of articles of that class or kind to which the imported articles belong, and the controlling use is the chief use, i.e., the use which exceeds all other uses (if any) combined;

(iii) a tariff classification controlled by the actual use to which an imported article is put in the United States is satisfied only if such use is intended at the time of importation, the article is so used, and proof thereof is furnished within 3 years after the date the article is entered;

(f) an article is in chief value of a material if such material exceeds in value each other single component material of the article;

(g) a headnote provision which enumerates articles not included in a schedule, part, or subpart is not necessarily exhaustive, and the absence of a particular article from such headnote provision shall not be given weight in determining the relative specificity of competing provisions which describe such article;

(h) unless the context requires otherwise, a tariff description for an article covers such article, whether assembled or not assembled, and whether finished or not finished;

(i) a provision for "parts" of an article covers a product solely or chiefly used as a part of such article, but does not prevail over a specific provision for such part.

11. Issuance of Rules and Regulations. The Secretary of the Treasury is hereby authorized to issue rules and regulations governing the admission of articles under the provisions of the schedules. The allowance of an importer's claim for classification, under any of the provisions of the schedules which provide for total or partial relief from duty or other import restrictions on the basis of facts which are not determinable from an examination of the article itself in its condition as imported, is dependent upon his complying with any rules or regulations which may be issued pursuant to this headnote.

12. The Secretary of the Treasury is authorized to prescribe methods of analyzing, testing, sampling, weighing, gauging, measuring, or other methods of ascertainment whenever he finds that such methods are necessary to determine the physical, chemical, or other properties or characteristics of articles for purposes of any law administered by the Customs Service.

General statistical headnotes:

1. Statistical Requirements for Imported Articles.

Persons making customs entry or withdrawal of articles imported into the customs territory of the United States shall complete the entry or withdrawal forms, as provided herein and in regulations issued pursuant to law, to provide for statistical purposes information as follows:

(a) the number of the Customs district and of the part where the articles are being entered for consumption or warehouse, as shown in Statistical Annex A of these schedules;

(b) the name of the carrier or the means of transportation by which the articles were transported to the first port of unloading in the United States;

(c) the foreign port of lading;

(d) the United States port of unloading;

(e) the date of importation;

(f) the country of origin of the articles expressed in terms of the designation therefor in Statistical Annex B of these schedules;

(g) a description of the articles in sufficient detail to permit the classification thereof under the proper statistical reporting number in these schedules;

(h) the statistical reporting number under which the articles are classifiable;

(i) gross weight in pounds for the articles covered by each reporting number when imported in vessels or aircraft;

(k) the net quantity in the units specified herein for the classification involved; and

(l) such other information with respect to the imported articles as is provided for elsewhere in these schedules.

2. Statistical Annotations. (a) The statistical annotations to the Tariff Schedules of the United States consist of--

(i) the 2-digit statistical suffixes,

(ii) the indicated units of quantity,

(iii) the statistical headnotes and annexes, and

(iv) the italicized article descriptions.

(b) The legal text of the Tariff Schedules of the United States consists of the remaining text as more specifically identified in headnote 10(a) of the general headnotes and rules of interpretation.

(c) The statistical annotations are subordinate to the provisions of the legal text and cannot change their scope.

3. Statistical Reporting Number. (a) General Rule: Except as provided in paragraph (b) of this headnote, and in the absence of specific instructions to the contrary elsewhere, the statistical reporting number for an article consists of the 7-digit number formed by combining the 5-digit item number with the appropriate 2-digit statistical suffix. Thus, the statistical reporting number for live monkeys dutiable under item 100.95 is "100.9520".

(b) Wherever in the tariff schedules an article is classifiable under a provision which derives its rate of duty from a different provision, the statistical reporting number is, in the absence of specific instructions to the contrary elsewhere, the 7-digit number for the basic provision followed by the item number of the provision from which the rate is derived. Thus, the statistical reporting number of mixed apple and grape juices, not containing over 1.0 percent of ethyl alcohol by volume, is "165.6500-165.40".

4. Abbreviations. (a) The following symbols and abbreviations are used with the meanings respectively indicated below:

s. ton	-	short ton
Cwt.	-	100 lbs.
mg.	-	milligram
M.	-	1,000
bd. ft.	-	board feet
M. bd. ft.	-	1,000 board feet
mc.	-	millicurie
cord	-	128 cubic feet
square	-	amount to cover 100 square feet of surface
sup. ft.	-	superficial foot
oz.	-	ounces avoirdupois
fl. oz.	-	fluid ounce
oz. troy	-	troy ounce
pf. gal.	-	proof gallon

(b) An "X" appearing in the column for units of quantity means that no quantity (other than gross weight) is to be reported.

(c) Whenever two separate units of quantity are shown for the same article, the superior "v" against one of such units means that the value of the article is to be reported with that quantity.

Subpart C. - Wool and Related Animal Hair					
Subpart C headnotes:					
<p>1. For the purposes of this subpart —</p> <p>(a) the term "hair" is limited to hair of the camel, and to hair of the alpaca, cashmere goat, angora goat, and like hair of other animals including the llama, the vicuna, and the angora rabbit;</p> <p>(b) the term "clean lb." in the rate columns means pound of clean yield;</p> <p>(c) the term "clean yield", in the foregoing headnote, means the absolute clean content (i.e., all that portion of the merchandise which consists exclusively of wool or hair free of all vegetable and other foreign material, containing by weight 12 percent of moisture and 1.5 percent of material removable from the wool or hair by extraction with alcohol, and having an ash content of not over 0.5 percent by weight), less an allowance, equal by weight to 0.5 percent of the absolute clean content plus 60 percent of the vegetable matter present, but not exceeding 15 percent by weight of the absolute clean content, for wool or hair that would ordinarily be lost during commercial cleaning operations;</p>

		<p align="center">PART 3. - WOVEN FABRICS</p> <p><u>Part 3 headnote:</u></p> <p>1. This part covers all woven fabrics in the piece, of any width and with or without fast edges, including gauze and leno-woven fabrics, but does not include --</p> <p>(i) any woven fabrics which are specially provided for in the provisions of part 4 of this schedule;</p> <p>(ii) certain wool fabric samples (see part 7A of this schedule); or</p> <p>(iii) woven fabrics in item 749.10 of part 7B of schedule 7.</p> <p align="center">②</p> <p align="center">Subpart A. - Woven Fabrics, of Cotton</p> <p><u>Subpart A headnotes:</u></p> <p>1. (a) In the ascertainment of the condition of the fabrics or yarns upon which the duties imposed upon cotton fabrics are made to depend, the entire fabric and all parts thereof shall be included.</p> <p>(b) The term "number", as applied to woven fabrics of cotton, means the average yarn number of the yarns contained therein. In computing the average yarn number, the length of the yarn is considered to be equal to the distance covered by it in the fabric in the condition as imported, with all clipped yarn being measured as if continuous, and with the count being taken of the total single yarns in the fabric including the single yarns in any plied yarns. The weight shall be taken after any excessive sizing is removed by boiling or other suitable process. Any one of the following formulas can be used to determine the average yarn number for tariff purposes:</p> $N = \frac{8YT}{840}, \text{ or } \frac{24T}{35Z}, \text{ or } \frac{2BT}{105Z}, \text{ or } \frac{3ST}{70}$ <p>when:</p> <p>N is the average yarn number, B is the breadth (width) of the fabric in inches, Y is the yards (linear) of fabric per pound, T is the total single yarns per square inch, S is the square yards of fabric per pound, Z is the ounces per linear yard of fabric, and Z' is the ounces per square yard of fabric.</p> <p>2. In this subpart, each of the rates of duty provided for fabric, wholly of cotton, not fancy or figured, and not bleached and not colored (items 320.01 through 320.98, inclusive) is also the "base rate" for fabrics of the same average yarn number covered by items 321.-- through 331.--, inclusive. For citation purposes, the two blanks on the end of each of the latter item numbers shall be filled in with the last two digits of the item number for the applicable base rate. Thus, "item 324.45" would be the citation for woven fabrics, wholly of cotton, of number 45, fancy or figured, and bleached but not colored.</p> <p>3. The term "fancy or figured", as used in this subpart in relation to fabrics, means fabrics which have been woven with 2 or more colors or kinds of filling; with 8 or more harnesses; or with jacquard, lappet, or swivel attachments; or by any combination of these weaving methods.</p>

		<p>4. None of the ad valorem rates of duty, or the ad valorem parts of the compound rates of duty, set forth in the Rates of Duty columns for Items 320.01 through 320.98 shall be less than the equivalent of 0.3 cents per number per pound in rate column 1, or less than 0.55 cents per number per pound in rate column 2.</p> <p><u>Subpart A statistical headnotes:</u></p> <p>1. For the purposes of this schedule, the following terms relating to fabrics of cotton have the meanings hereby assigned to them. (The average yarn number referred to in certain of the definitions is the "number" ascertained by the method set forth in headnote 1 of this subpart. The yarn number (before weaving) referred to in certain of the definitions is the yarn number of the yarn before it is prepared for weaving):</p> <p>(a) <u>Duck</u>: Plain-woven fabrics made of carded yarns, not napped, woven with less than 8 harnesses and without the use of jacquard, lappet, or swivel attachments, the warp and/or filling of which consists of plied yarns or of 2 or more single yarns woven as one, having an average yarn number not over 15, weighing 5 ounces or more per square yard.</p> <p>(b) <u>Gingham</u>: Plain-woven and fancy yarn-dyed fabrics having two or more colors in the warp and/or in the filling. Include checked and plaid ginghams, gingham stripes, cloth of "haircord" construction (i.e., cloth having cord stripes in the warp which are formed by yarns woven from an extra beam), and "poplin" type fabrics with a difference in picks per inch and ends per inch of less than 40 (e.g., 90 x 60). Excluded are yarn-dyed handkerchief fabrics made in box looms. The following are examples:</p> <table border="1"> <thead> <tr> <th colspan="2">Yarn number (before weaving)</th> <th colspan="2">Yarns per inch</th> </tr> <tr> <th>Warp</th> <th>Filling</th> <th>Warp</th> <th>Filling</th> </tr> </thead> <tbody> <tr><td>20s</td><td>20s</td><td>62</td><td>50</td></tr> <tr><td>40s</td><td>40s</td><td>80</td><td>70</td></tr> <tr><td>40s</td><td>40s</td><td>90</td><td>60</td></tr> <tr><td>40s</td><td>40s</td><td>70</td><td>60</td></tr> <tr><td>30s</td><td>30s</td><td>70</td><td>60</td></tr> <tr><td>30s</td><td>30s</td><td>76</td><td>64</td></tr> <tr><td>30s</td><td>40s</td><td>73</td><td>66</td></tr> <tr><td>30s</td><td>40s</td><td>90</td><td>60</td></tr> </tbody> </table> <p>(c) <u>Lawns</u>: Plain-woven fabrics, not napped, in which the total yarns per square inch is over 148 but not over 220 and having an average yarn number over 60 but not over 120.</p> <p>(d) <u>Poplin and broadcloth</u>: Plain-woven fabrics, not napped, not fancy or figured, having at least 40 more warp yarns than filling yarn per inch, and having a more or less pronounced horizontal rib formed by using a heavier filling yarn than warp and/or with about half as many picks per inch as ends. May be made with either singles or ply yarns in warp and filling. The average yarn number usually ranges between 20 and 100. PART 3. - DRUGS AND RELATED PRODUCTS					
<u>Part 3 headnotes:</u>					
<p>1. Any product described in this part which is a mixture containing as an ingredient any product described in part 1 of this schedule remains classifiable in part 3 unless the part 1 ingredient, as used in the mixture, imparts therapeutic or medicinal properties thereto. Notwithstanding the provisions of part 1 of this schedule, niacin, niacinamide, meso-inositol hexanicotinate, and pyridoxine (vitamin B₆), regardless of source, are classifiable in part 3 of this schedule.</p> <p>2. For the purposes of the tariff schedules, the term "<u>drugs</u>" means those substances, whether natural or synthetic, having therapeutic or medicinal properties and chiefly used as medicines or as ingredients in medicines.</p> <p>3. For the purposes of this part — (a) "<u>natural substances</u>" are those substances found in nature which comprise whole plants and herbs, anatomical parts thereof, vegetable saps, extracts, secretions and other constituents thereof; whole animals, anatomical parts thereof, glands or other animal organs, extracts, secretions and other constituents thereof, and which have not had changes made in their molecular structure as found in nature; (b) a "<u>synthetic substance</u>" is a chemical compound made by the artificial combination of elements or radicals by any physical or chemical process; (c) the term "<u>crude</u>", as used in relation to natural products, means any product which has not been advanced in value or improved in condition by shredding, grinding, chipping, crushing, distilling, evaporating, extracting, by artificial mixing with other substances or by any other process or treatment beyond that which is essential to its proper packing and the prevention of decay or deterioration pending manufacture; and (d) the term "<u>advanced</u>"; as used in relation to natural products, means any product which has been advanced in value or improved in condition from its crude state by any mechanical or physical process whatever beyond that which is essential to its proper packing and the prevention of decay or deterioration pending manufacture, but does not include any product which has been artificially mixed with other substances or the molecular structure of which as found in nature has been changed.</p>

The term "<u>slabs</u>" (items 514.61 and 514.65) embraces flat stone pieces, not over 2 inches in thickness, having a facial area of 4 square inches or more, whether or not cut to size and whether or not one or both surfaces have been rubbed or polished, the edges of which have not been beveled, rounded or otherwise processed except such processing as may be needed to facilitate installation as tiling or veneering in building construction.</p>					
<u>Subpart C statistical headnote:</u>					
(1) For the purposes of this subpart the term " <u>Superficial foot</u> " refers to a unit of quantity designating the area of the largest face of a slab in terms of square feet.

		<p><i>Subpart B statistical headnotes:</i> ②</p> <p>1. For the purpose of this subpart-- (a) the term "tool steel" refers to alloy steel which contains the following combinations of elements in the quantity, by weight, respectively indicated: (i) not less than 1.0% carbon and over 11.0% chromium; or (ii) not less than 0.3% carbon and 1.25% to 11.0% inclusive chromium; or (iii) not less than 0.85% carbon and 1% to 1.8% inclusive manganese; or (iv) 0.9% to 1.2% inclusive chromium and 0.9% to 1.4% inclusive molybdenum; or (v) not less than 0.5% carbon and not less than 3.5% molybdenum; or not less than 0.5% carbon and not less than 5.5% tungsten; (b) the term "high speed tool steel" refers to all tool steel which meets the requirements of statistical headnote 1(a)(v), <i>supra</i>; and (c) the term "heat-resisting steel" refers to alloy steel which contains by weight less than 0.3% carbon and 4.0% to 11.5% inclusive, chromium.</p> <p>2. For purposes of this subpart the determination of the carbon content of articles provided for under items 609.40 and 609.42 shall be made by excluding any coating or plating which may be present.</p> <p>3. For purposes of items 607.01, 607.02, 607.03, and 607.04 report quantity only. Total value should be shown opposite the appropriate reporting number for the article involved.</p> <p>Iron or steel products containing any of the following metals in the quantity respectively specified (see headnote 4 of this subpart):</p>			
607.01		<p>Containing over 0.2 percent by weight of chromium.....</p>	Additional duty of 1.5¢ per lb. on chromium content in excess of 0.2%	Additional duty of 3¢ per lb. on chromium content in excess of 0.2%

		<p style="text-align: center;">Subpart C. - Copper^{1/}</p> <p><u>Subpart C headnotes:</u></p> <p>1. This subpart covers copper, its alloys, and their so-called basic shapes and forms, and in addition covers copper waste and scrap.</p> <p>2. For the purposes of the tariff schedules, the following terms have the meanings indicated:</p> <p>(a) <u>Alloys of copper:</u> Copper-base alloys or metals in which the copper content is, by weight, less than 99.3 percent, but not less than any other metallic element. For the purposes of this subpart --</p> <p>(i) <u>nickel silver</u> is an alloy of copper which contains by weight 5 percent or more of zinc and 5 percent or more of nickel, with or without small quantities of other elements;</p> <p>(ii) <u>brass</u> is an alloy of copper (not including nickel silver) in which zinc is the principal alloying element, with or without small quantities of other elements;</p> <p>(iii) <u>cuoro-nickel</u> is an alloy of copper in which nickel is the principal alloying element and which does not contain by weight over 2 percent of any other single element.</p> <p>In the absence of context which requires otherwise, the term "<u>copper</u>", wherever used in the tariff schedules, includes alloys of copper. ②</p> <p>(b) <u>Master alloys:</u> Alloys of copper with other materials in any proportion, not usefully malleable and commonly used as raw material in the manufacture of other alloys or as de-oxidants, de-sulphurizing agents or for similar uses in the metallurgy of nonferrous metals. For the purposes of this subpart --</p> <p>(i) <u>manganese copper</u> is a master alloy which contains copper and manganese, in which the manganese content ranges by weight from 5 to 45 percent, with copper the balance; and</p> <p>(ii) <u>phosphor copper</u> is a master alloy which contains phosphorus and copper, in which the phosphorus content ranges by weight from 5 to 16 percent, with copper the balance.</p> <p>3. For the purposes of this subpart, the following terms have the meanings indicated:</p> <p>(a) <u>Bars and plate:</u> Products of solid rectangular cross section over 0.188 inch in thickness, in coils or cut to length, whether or not corrugated or crimped. Bars are not over 12 inches in width and plates are over 12 inches in width.</p> <p>(b) <u>Sheets and strips:</u> Products of solid rectangular cross section not over 0.188 inch but over 0.006 inch in thickness, in coils or cut to length, whether or not corrugated or crimped. Sheets are over 20 inches in width; strips are not over 20 inches in width and do not include flat wire, as defined in (d) below. ②</p> <p>^{1/} Copper waste and scrap and certain copper articles are the subject of temporary legislation. 		<p>(c) <u>Rods</u>: Products of round, half-round, quarter-round, oval, half-oval, triangular, pentagonal, hexagonal, octagonal, or decagonal solid cross section, in straight lengths or in coils, and which if in coils is over 0.375 inch in maximum cross-sectional dimension.</p> <p>(d) <u>Wire</u>: A non-tubular product of any cross-sectional configuration, which if flat is in coils or straight lengths, not over 1.25 inches in width, not over 0.188 inch in thickness, and has all surfaces rolled or drawn, and which if not flat is not over 0.375 inch in maximum cross-sectional dimension and is in coils.</p> <p>(e) <u>Angles, shapes, and sections</u>: Products which do not conform completely to the respective definitions set forth in this headnote for bars, plates, sheets, strip, rods, or wire, and do not include any tubular products.</p> <p>4. For the purposes of this subpart, any continuous cast product, whether or not machined or otherwise processed, which is substantially comparable to, and suitable for the same general purposes as, a wrought product provided for in this subpart shall be classified under the same provision and at the same rate as such wrought product, notwithstanding the provisions of headnotes 3(a) and 3(c) of this part.</p> <p>5. <u>Determination of Market Price of Copper for Rate of Duty Purposes</u>.--(a) In this subpart, column 1 of the Rates of Duty columns has been divided into two columns, viz., 1-a and 1-b. The rates of duty in column 1-a apply when the market price of copper is 24 cents or more per pound, and the rates of duty in column 1-b apply when the market price of copper is under 24 cents per pound.</p> <p>(b) For the purposes of the provisions in part 1 of this schedule relating to copper-bearing materials covered by headnote 5 of said part 1, and of the provisions of this subpart, the market price of copper is the average market price per pound for one calendar month of electrolytic copper in standard shapes and sizes, delivered Connecticut Valley, as determined by the United States Tariff Commission and reported to the Secretary of the Treasury in accordance with procedures set forth below.</p> <p>(c) The market price of copper, as defined above, shall be considered to be below 24 cents per pound only on and after the 20th day after the date of a report by the United States Tariff Commission to the Secretary of the Treasury that it has determined that the said market price has been below 24 cents per pound for one calendar month.</p> <p>(d) After any report by the United States Tariff Commission to the Secretary of the Treasury as provided for in (b) above, the said market price shall be considered as not being below 24 cents per pound only on and after the 20th day after the date of a report by the said Commission to the said Secretary that it has determined that the said market price has been 24 cents or more per pound for one calendar month.</p> <p>(e) Determinations by the said Commission of the market price of electrolytic copper shall be based upon sources commonly resorted to by the buyers of copper in the usual channels of commerce, including, but not limited to, quotations of the market price for electrolytic copper, in standard shapes and sizes, delivered Connecticut Valley, reported by the Engineering and Mining Journal's "Metal and Mineral Markets".</p>

		<p>(c) In this subpart, each of the rates of duty provided for watch movements, having no jewels or not over 17 jewels, not adjusted, not self-winding, and not constructed or designed to operate for a period in excess of 47 hours without rewinding (items 716.10 through 716.36, inclusive) is also the "base rate" for watch movements having the same width and number of jewels covered by items 717.—, 718.—, and 719.—. For citation purposes, the two blanks on the end of each of the latter item numbers shall be filled in with the last two digits of the item number for the applicable base rate. Thus, "item 717.31" would be the citation for an adjusted watch movement, 0.7 inch wide, having 17 jewels, but not self-winding and not constructed or designed to operate for a period in excess of 47 hours without rewinding.</p> <p>(d) The width of a watch or clock movement, as defined in headnote 2(b) and (c) of this subpart, is the shortest surface dimension through the center of the pillar or bottom plate, or its equivalent, not including in the measurement any portion not essential to the functioning of the movement; and the thickness of a "watch movement", as so defined, is the maximum thickness between the outside surfaces of the plate and bridges, or their equivalents.</p> <p>(e) The additional duty for adjustments to watch movements applies to each adjustment of whatever kind (treating adjustment to temperature as two adjustments), in accordance with the marking as hereinafter provided for.</p> <p>(f) Bimetallic balance wheels which are not part of balance assemblies, and mainsprings with riveted ends, are each to be considered as one part or piece, for the purposes of assessing duties on assemblies and subassemblies provided for in items 720.75, 720.80, 720.92, 720.94, and 720.86.</p> <p>4. <u>Special Marking Requirements:</u> Any movement, case, or dial provided for in this subpart, whether imported separately or attached to an article provided for in this subpart, shall not be permitted to be entered unless conspicuously and indelibly marked by cutting, die-sinking, engraving, or stamping, as specified below:</p> <p>(a) Watch movements shall be marked on one or more of the bridges or top plates to show —</p> <ul style="list-style-type: none"> (i) the name of the country of manufacture, (ii) the name of the manufacturer or purchaser, (iii) in Arabic numerals and in words, the number of jewels, if any, serving a mechanical purpose as frictional bearings; and (iv) in Arabic numerals and in words, the number and classes of adjustments, or, if unadjusted, the word "unadjusted". <p>(b) Clock movements shall be marked on the most visible part of the front or back plate to show —</p> <ul style="list-style-type: none"> (i) the name of the country of manufacture, (ii) the name of the manufacturer or purchaser, and (iii) the number of jewels, if any. <p>(c) Watch cases shall be marked on the inside or outside of the back cover to show —</p> <ul style="list-style-type: none"> (i) the name of the country of manufacture, and (ii) the name of the manufacturer or purchaser.

(a) The statistical reporting numbers for watches (item 715.05) and for clocks containing movements measuring less than 1.77 inches in width (item 715.15) are a combination of three 7-digit numbers, viz., the 7-digit number for the imported watch (715.0500) or clock (715.1500), and the 7-digit numbers which would have applied to the movement and to the case if they had been imported separately. Thus, the correct reporting number for a watch with a 15-jewel adjusted but not self-winding movement not over 0.6 inch in width and a gold case is "715.0500-933.3020-720.2000".</p> <p>(b) The number and value of imported watches or clocks, and of their movements and cases must be reported separately with their respective 7-digit numbers.</p> <p>(c) For the statistical reporting of watch movements under items 716.30-.36 the 2-digit statistical suffix shall be the actual number of jewels in the movement. Tariff Schedules of the United States Annotated (1963)

EXPLANATORY KEY TO SUPPLEMENTARY CHANGES

EXPLANATORY KEY TO SUPPLEMENTARY CHANGES

This key shows the changes made in this publication after the effective date of the Tariff Schedules of the United States, i.e., August 31, 1963. Therefore, this does not show the changes made by Supplement 1 which was issued prior to the effective date, but will include all changes made in supplements issued subsequent thereto.

It is intended, as future supplements are issued, that the changes made therein will be inserted in this key in the order in which the provisions appear in the annotated schedules. Each change will be identified by its special symbol, e.g. ②, showing the supplement in which it appeared. The effective date and, in appropriate cases, the authority therefor will also be shown. Thus, this key will show the chronological development of the provisions, both legal and statistical.
