Summary Highlights of the Tenth Quarterly Survey of U.S. Producers
of Bolts, Nuts, and Large Screws of Iron or Steel

Production

U.S. production of bolts, nuts, and large screws during the second quarter of 1981 totaled 234 million pounds, which was 2 percent less than production during the second quarter of 1980, and only marginally greater than production during the first quarter of 1981.

U.S. producers' shipments

During the second quarter of 1981, U.S. producers' shipments of bolts, nuts, and large screws amounted to 215 million pounds, which was about 3 percent less than shipments in the second quarter of 1980 but about 8 percent greater than shipments during the first quarter of 1981.

U.S. imports

U.S. imports of bolts, nuts, and large screws totaled 168 million pounds in the second quarter of 1981, which was 13 percent less than imports in the second quarter of 1980, but 9 percent greater than imports in the first quarter of 1981.

U.S. exports

The quantity of bolts, nuts, and large screws exported during the second quarter of 1981 amounted to 38 million pounds, which was 33 percent greater than exports during the second quarter of 1980, and about the same as exports during the first quarter of 1981. During the second quarter of 1981, exports accounted for 16 percent of U.S. production of bolts, nuts, and large screws.

Apparent consumption

Apparent consumption of bolts, nuts, and large screws during the second quarter of 1981 totaled 345 million pounds, which was 11 percent less than apparent consumption in the second quarter of 1980, but 10 percent greater than the quantities consumed during the first quarter of 1981. The ratio of imports to consumption remained at 49 percent during the first and second quarters of 1981, which was one percentage point less than the ratio of imports to consumption during the second quarter of 1980.

Employment and man-hours

The average number of production and related workers engaged in the production of bolts, nuts, and large screws increased from 10,652 workers during the first quarter of 1981 to 10,846 workers during the second quarter of 1981. However, the average number of production and related workers reported during second quarter of 1981 was 15 percent less than the average number reported during the second quarter of 1980. The man-hours expended by these workers totaled 5,729,000 during the second quarter of 1981, which was 17 percent less than man-hours expended during the second quarter of 1980 and 7 percent less than man-hours expended during the first quarter of 1981.

Prices

The lowest net selling prices received by U.S. producers for six representative fastener products in the second quarter of 1981 averaged about 12 percent more than prices received during the second quarter of 1980 but were approximately 6 percent less than prices received during the first quarter of 1981.

^{1/} Prior to Jan. 1, 1978, exports include bolts, threaded rods and studs, nuts if nuts and bolts are in the same shipment, screws, rivets, washers, and similar articles. It is estimated by the staff of the U.S. International Trade Commission that bolts, nuts, and large screws of iron or steel accounted for approximately 80 percent of total exports.

Source: U.S. producers' shipments, compiled from data submitted in response to questionnaires of the U.S. International Trade Commission; imports and exports, compiled from official statistics of the U.S. Department of Commerce, except as noted.
