Preface

This is the twelfth annual compilation of motor vehicle trade statistics; the first was prepared by the United States International Trade Commission (formerly the United States Tariff Commission) in 1971 in response to an informal request from the Congress.

In prior years, the Commission published two separate annual reports-- "Series A", covering data on motor vehicles, and "Series B", encompassing statistical information only on passenger automobiles. Beginning with this annual report, the Commission has consolidated the data comprising the two separate annual reports into one, as a cost savings measure and for the convenience of the users of such data.

The material presented in this report provides information on U.S. factory sales, imports, exports, apparent consumption, retail sales, manufacturers' suggested retail list prices, registrations, and bilateral trade balances for new passenger automobiles, automobile trucks, truck chassis and cabs, motor buses, snowmobiles, miscellaneous motor vehicles, and motor-vehicle parts for the years 1964-81. Unless otherwise indicated, annual data are for the calendar years, and dollar amounts are in U.S. dollars, unadjusted for inflation.

The data presented herein was obtained from official statistics of the U.S. Department of Commerce, Ward's Automotive Yearbooks, Automotive News, the Motor Vehicle Manufacturers' Association, and calculations made by the Commission's staff on the basis of materials obtained from these sources.

Material was also derived from the Commission's annual reports, "Series A" and "Series B" mentioned above. 1/

Overview

Highlights

During 1981, compared with 1980--

- o APPARENT U.S. CONSUMPTION of passenger automobiles, based on U.S. factory sales, declined 3.4 percent to 8.6 million units (table 1). Based on U.S. retail sales to the consumer, apparent consumption declined 4.5 percent (table 5).
- o U.S. FACTORY SALES of passenger automobiles decreased by 1.6 percent to 6.3 million units (table 1).
- o U.S. RETAIL SALES of domestic automobiles (including automobiles imported from Canada under the APTA) declined 6.1 percent to 6.2 million units (table 5).
- o U.S. IMPORTS of passenger automobiles from all sources decreased 6.5 percent to 2.9 million units, amounting to 33 percent of total U.S. consumption, compared with 35 percent in 1980 (table 1). The value of U.S. imports of all motor vehicles from all sources increased 17.5 percent to \$22 billion (table 68). U.S. imports of motor-vehicle parts were valued at \$8.4 billion in 1981, down from \$9.5 billion in 1980 (table 71). Imports of all automotive products increased from \$28.3 billion in 1980 to \$30.6 billion in 1981 (table 82).
- o U.S. EXPORTS of passenger automobiles declined 11 percent to 545,164 units (table 1). The value of U.S. exports of all motor vehicles increased 4 percent to \$7 billion (table 69). U.S. exports of motor-vehicle parts were valued at \$11.3 billion in 1981, compared to \$8.8 billion in 1980 (table 72). Exports of all automotive products increased from \$15.8 billion in 1980 to \$18.5 billion in 1981 (table 85).
- o U.S. TRADE BALANCE in passenger automobiles with all countries registered a deficit of 2.3 million units, valued at \$13.8 billion, in 1981 compared with 2.5 million units, valued at \$12.8 billion, in 1980 (table 91). The value of the net trade deficit for all motor vehicles increased 25 percent to \$15 billion (table 69). In 1981, the United States experienced a net trade surplus of \$2.8 billion in motor-vehicle parts (table 73) and an overall net trade deficit of \$12.1 billion in all automotive products (table 90).

Summary

U.S. factory sales of passenger automobiles decreased from 6.4 million units produced in 1980 to 6.3 million units produced in 1981 (1.6 percent). Although imports from all sources decreased from 3.1 million units in 1980 to 2.9 million units in 1981, exports also declined slightly, from 612,723 in 1980 to 545,164 in 1981. Thus, apparent U.S. consumption of passenger automobiles declined from 8.9 million units in 1980 to 8.6 million units in 1981 and import penetration decreased from 35 percent in 1980 to 33 percent in 1981.

Retail sales.--Retail sales of domestic autos, which includes automobiles built in Canada and imported into the United States under the provisions of the U.S./Canadian Automotive Agreement, declined from 6.6 million units in 1980 to 6.2 million units in 1981, or by 6.1 percent.

U.S. imports.--The United States imported 2.9 million passenger automobiles, valued at \$17.7 billion, in 1981 compared with 3.1 million units, valued at \$16.7 billion, in 1980. In 1981, 1.9 million of these automobiles, valued at \$9.5 billion, originated from Japan. The second and third largest suppliers in 1981 were Canada and West Germany, totaling 563,943 units, valued at \$4.3 billion, and 234,052 units, valued at \$2.6 billion, respectively. The five remaining principal sources of imported passenger automobiles in 1981 were Sweden, France, Italy, the United Kingdom, and Belgium, all of which accounted for 144,948 units, valued at \$1.3 billion.

The United States imported motor vehicles valued at \$22.1 billion and motor-vehicle parts valued at \$8.4 billion in 1981, compared with imports valued at \$18.8 billion and \$9.5 billion, respectively, in 1980. Japan was the leading source of all motor vehicle imports, accounting for \$11.5

billion. Canada and West Germany were the second and third largest sources of all motor vehicles in 1981, accounting for \$6.6 billion and \$2.7 billion, respectively. Canada led the suppliers of motor-vehicle parts with \$3.9 billion, followed by Japan (\$1.8 billion) and West Germany (\$0.6 billion).

Japan was the chief source of U.S. imports of all automotive products in 1981, accounting for \$13.3 billion; imports of all automotive products from Canada and West Germany were valued at \$10.5 billion and \$3.3 billion, respectively.

U.S. exports.--U.S. exports of passenger automobiles to all countries declined from 612,723 units, valued at \$3.9 billion, in 1980 to 545,164 units, valued at \$3.9 billion, in 1981. The largest market continued to be Canada, which accounted for 469,280 units, valued at \$3.2 billion, in 1981 compared with 507,413 units, valued at \$3.0 billion, in 1980. Although the quantity of U.S. exports to Canada decreased by 38,133 units, the value increased by almost \$200 million. This increase in value is due mainly to price increases in the various models exported. The United States exported motor vehicles valued at \$7.2 billion in 1981, compared with exports valued at \$6.9 billion in 1980. Canada was the principal market for U.S. exports, accounting for \$3.9 billion, or 54 percent. The United States exported motor-vehicle parts valued at \$11.3 billion in 1981, compared to \$8.4 billion in 1980. U.S. exports of all automotive products in 1981 were valued at \$18.5 billion, compared with \$15.8 billion in 1980.

U.S. trade balance.--The United States experienced a net trade deficit in passenger automobiles of 2.3 million units, valued at \$13.8 billion, in 1981. This deficit represents a 192,603-unit decrease (valued at \$1.0 billion) from the 2.5 million-unit deficit (valued at \$12.8 billion) of 1980. This trade deficit, in value, has continued uninterrupted since 1957, when the deficit was approximately \$2.0 million.

The net trade deficit for all motor vehicles in 1981 was \$14.9 billion, an increase of 25 percent over the net trade deficit of \$11.9 billion in 1980. The annual net trade deficit for all motor vehicles has continued since 1965, when the deficit was \$137.6 million. The United States experienced a net trade surplus of \$2.8 billion for motor-vehicle parts in 1981, compared to a trade deficit of \$0.6 billion in 1980. The net trade deficit for all automotive products in 1981 was \$12.1 billion, a 3-percent decline from the 1980 deficit of \$12.5 billion.

Note.—Data for West Germany and Belgium are combined since both countries produced Opels for export to the United States during the 1964-76 period. Although Belgium has produced Saabs and Volvos for export to the United States and although Canada has also produced Volvos for export to the United States, for the purpose of this table all Saabs and Volvos are considered to be Swedish. Small quantities of the Volkswagen Thing were produced in Mexico for export to the United States during the 1972-76 period; for the purpose of this table, however, the Thing is considered to be West German.

1/ Because R. L. Polk does not report registrations of U.S.-produced Volkswagens separately, but includes these automobiles under miscellaneous (which are almost exclusively imported automobiles), import registrations and the resulting ratio of imports to total sales are slightly overstated.

Note.--The data in this table do not include vehicles registered with the U.S. Government, vehicles registered during April-December 1971 in Connecticut, or vehicles registered after April 1, 1969, in Oklahoma.

^{1/} Data include light weight cab/chassis which were reclassified as unfinished trucks (692.02) during 1980 by the U.S. Customs Service.

Source: Compiled from official statistics of the U.S. Department of Commerce, except as noted.

Note.—U.S. items 692.02 and 692.03. Until August 1980, most imports of automobile trucks from Japan entered the United States by means of the separate importation of chassis cabs and their cargo boxes or flatbeds (U.S. item 692.20). See tables 47 and 48 for total truck and chassis-cab imports.

1/ Until August 1980 virtually all imports from Japan in this category were chassis cabs and their cargo boxes; however, due to a 1980 U.S. Customs ruling, lightweight cab/chassis were reclassified as unfinished trucks (692.02).

2/ Total includes imports from Japan, Canada, and all other countries.

Source: Official statistics of the U.S. Department of Commerce, except as noted.

Note.--For the period 1968-77, the data shown above under TSUSA items 692.20 and 692.21 were obtained by dividing the data officially reported by the U.S. Department of Commerce by 2 in order to account for separate importation of chassis cabs and their cargo boxes or flatbeds. After 1977 the actual number of chassis imported have been used.
