Preface

This is the thirteenth annual compilation of automotive trade statistics; the first was prepared by the United States International Trade Commission (formerly the United States Tariff Commission) in 1971 in response to an informal request from the Congress.

Prior to 1982, the Commission published two separate annual reports-- "Series A," covering data on motor vehicles, and "Series B," encompassing statistical information only on passenger automobiles. Beginning in 1982, the Commission consolidated the data comprising the two separate annual reports into one, as a cost savings measure and for the convenience of the users of such data.

The material presented in these tables provides information on U.S. factory sales, imports, exports, apparent consumption, retail sales, manufacturers' suggested retail list prices, registrations, and bilateral trade balances for new passenger automobiles, automobile trucks, truck chassis and cabs, motor buses, snowmobiles, miscellaneous motor vehicles, and motor-vehicle parts for the years 1964-82. Unless otherwise indicated, annual data are for the calendar years, and dollar amounts are in U.S. dollars, unadjusted for inflation.

The data presented herein was obtained from previous editions of the Commission's annual reports on automotive trade statistics, official statistics of the U.S. Department of Commerce, Ward's Automotive Yearbooks, Automotive News, the Motor Vehicle Manufacturer's Association, and calculations made by the Commission's staff on the basis of materials obtained from these sources.

Overview

Highlights

During 1982, compared with 1981--

- o APPARENT CONSUMPTION of passenger automobiles, based on U.S. factory sales, declined 11.6 percent to 7.6 million units (table 1). Based on U.S. retail sales to the consumer, apparent consumption declined 6.4 percent (table 5).
- o U.S. FACTORY SALES of passenger automobiles decreased by 20.6 percent to 5.0 million units (table 1).
- o U.S. RETAIL SALES of domestic automobiles (including automobiles imported from Canada under APTA) declined 6.5 percent to 5.8 million units (table 5).
- o U.S. IMPORTS of passenger automobiles from all sources totaled 2.9 million units in both 1981 and 1982, amounting to 39 percent of total U.S. consumption, compared with 33 percent in 1981 (table 1). The value of U.S. imports of all motor vehicles from all sources increased 13.1 percent to \$25 billion (table 68). U.S. imports of motor-vehicle parts were valued at \$9.1 billion in 1982, up from \$8.4 billion in 1981 (table 71). Imports of all automotive products increased from \$30.6 billion in 1981 to \$34.1 billion in 1982 (table 82).
- o U.S. EXPORTS of passenger automobiles declined 31 percent to 376,524 units (table 1). The value of U.S. exports of all motor vehicles decreased 21 percent to \$5.7 billion (table 68). U.S. exports of motor-vehicle parts were valued at \$10.6 billion in 1982, compared with \$11.3 billion in 1981 (table 72). Exports of all automotive products decreased from \$18.5 billion in 1981 to \$16.4 billion in 1982 (table 85).
- o U.S. TRADE BALANCE in passenger automobiles with all countries registered a deficit of 2.5 million units, valued at \$17.3 billion, in 1982 compared with 2.3 million units, valued at \$13.8 billion, in 1981 (table 90). The value of the net trade deficit for all motor vehicles increased 29.5 percent to 19.0 billion (table 68). In 1982, the United States experienced a net trade surplus of \$1.5 billion in motor-vehicle parts (table 73) and an overall net trade deficit of \$17.8 billion in all automotive products (table 90).

Summary

U.S. factory sales of passenger automobiles decreased from 6.3 million units produced in 1981 to 5.0 million units produced in 1982, or by 20.6 percent. U.S. imports from all sources remained at 2.9 million units in 1982,

while exports declined from 545,164 in 1981 to 376,524 in 1982. Thus, apparent U.S. consumption of passenger automobiles declined from 8.6 million units in 1981 to 7.6 million units in 1982, and import penetration increased from 33 percent in 1981 to 39 percent in 1982.

Retail sales.--Retail sales of domestic autos, which include automobiles built in Canada and imported into the United States under the provisions of the U.S./Canadian Automotive Agreement, declined from 6.2 million in 1981 to 5.8 million in 1982, or by 6.5 percent.

U.S. imports.--The United States imported 2.9 million passenger automobiles in both 1981 and 1982. Imports were valued at \$20.2 billion 1982, compared with \$17.7 billion in 1981. In 1982, almost 1.8 million of these automobiles, valued at \$9.6 billion, originated from Japan. The second and third largest suppliers in 1982 were Canada and West Germany, accounting for 702,495 units, valued at \$5.8 billion, and 259,385 units, valued at \$3.2 billion, respectively. The five remaining principal sources of imported passenger automobiles in 1982 were Sweden, France, the United Kingdom, Italy, and Belgium, all of which accounted for 162,513 units, valued at \$1.6 billion.

The United States imported motor vehicles valued at \$25.0 billion and motor-vehicle parts valued at \$9.1 billion in 1982, compared with imports valued at \$22.1 billion and \$8.4 billion, respectively, in 1981. In 1982, Japan was the leading source of all motor-vehicle imports, accounting for \$11.4 billion; Canada and West Germany were the second and third largest sources, accounting for \$8.8 billion and \$3.2 billion, respectively. Canada led the suppliers of motor-vehicle parts with \$4.5 billion, followed by Japan (\$1.8 billion) and West Germany (\$0.5 billion).

Canada was the principal source of U.S. imports of all automotive products in 1982, accounting for \$13.3 billion; imports of all automotive

products from Japan and West Germany were valued at \$13.2 billion and \$3.8 billion, respectively.

U.S. exports.--U.S. exports of passenger automobiles to all countries declined from 545,164 units, valued at \$3.9 billion, in 1981 to 376,524 units, valued at \$2.9 billion, in 1982. The largest market continued to be Canada, which accounted for 332,781 units, valued at \$2.3 billion, in 1982 compared with 469,280 units, valued at \$3.2 billion, in 1981. The United States exported motor vehicles valued at \$5.7 billion in 1982, compared with exports valued at \$7.2 billion in 1981. Canada was the principal market for U.S. exports, accounting for \$2.9 billion, or 51 percent. The United States exported motor-vehicle parts valued at \$10.6 billion in 1982, compared with \$11.3 billion in 1981. U.S. exports of all automotive products in 1982 were valued at \$16.4 billion, compared with \$18.5 billion in 1981.

U.S. trade balance.--The United States experienced a net trade deficit in passenger automobiles of 2.5 million units, valued at \$17.3 billion, in 1982. This deficit represents a 238,761-unit increase (valued at \$3.5 billion) from the 2.3-million unit deficit (valued at \$13.8 billion) in 1981. This trade deficit, in value, has continued uninterrupted since 1957, when the deficit was approximately \$2.0 million.

The net trade deficit for all motor vehicles in 1982 was \$19.3 billion, an increase of 30 percent over the net trade deficit of \$14.9 billion in 1981. The annual net trade deficit for all motor vehicles has continued since 1965, when the deficit was \$137.6 million. The United States experienced a net trade surplus of \$1.5 billion for motor-vehicle parts in 1982, compared with \$2.8 billion in 1981. The net trade deficit for all automotive products in 1982 was \$17.8 billion, a 47-percent increase from the 1981 deficit of \$12.1 billion.

Note.--Data for West Germany and Belgium are combined since both countries produced Opels for export to the United States during the 1964-76 period. Although Belgium has produced Saabs and Volvos for export to the United States and although Canada has also produced Volvos for export to the United States, for the purpose of this table all Saabs and Volvos are considered to be Swedish. Small quantities of the Volkswagen Thing were produced in Mexico for export to the United States during the 1972-76 period; for the purpose of this table, however, the Thing is considered to be West German.

Note.--All prices are manufacturers' suggested retail prices in effect in the spring of the model years listed. The prices are port-of-entry prices on the east coast of the United States and do not include surface transportation costs in the United States. U.S. excise taxes and import duties are included, but State and local taxes and the cost of optional equipment are not.

1/ Because R. L. Polk does not report registrations of U.S.-produced Volkswagens separately, but includes these automobiles under miscellaneous (which are almost exclusively imported automobiles), import registrations and the resulting ratio of imports to total sales are slightly overstated.

Source: Compiled from data presented in tables 46-50 of this report.

Note.—The data in this table do not include vehicles registered with the U.S. Government, vehicles registered during April-December 1971 in Connecticut, or vehicles registered after April 1, 1969, in Oklahoma.

1/ Until August 1980 virtually all imports from Japan in this category were chassis cabs and their cargo boxes; however, due to a 1980 U.S. Customs ruling, lightweight cab/chassis were reclassified as unfinished trucks (692.02).

2/ Data for 1982 includes TSUS item 692.29.

3/ Data for 1982 includes TSUS item 692.31.

4/ Total includes imports from Japan, Canada, and all other countries.

Source: Official statistics of the U.S. Department of Commerce, except as noted.

Note.--For the period 1968-77, the data shown above under TSUSA items 692.20 and 692.21 were obtained by dividing the data officially reported by the U.S. Department of Commerce by 2 in order to account for separate importation of chassis cabs and their cargo boxes or flatbeds. After 1977 the actual number of chassis imported have been used.

1/ Until August 1980, virtually all imports from Japan in this category were chassis cabs and their cargo boxes; however due to a 1980 U.S. Customs ruling, lightweight cab/chassis were reclassified as unfinished trucks (692.02).

2/ Data for 1982 include TSUS item 692.29.

3/ Data for 1982 include TSUS item 692.31.

4/ Total includes imports from Japan, Canada, and all other countries.
