Product Summary

Following is a discussion of the President's decision to extend import relief on certain specialty steel products.

Background

On July 19, 1983, the President, by Presidential Proclamation 5074, imposed import relief for a period of four years for certain specialty steel products. This resulted from an investigation under Section 201 of the Trade Act of 1984 in which the Commission determined that the domestic industry producing certain specialty steel products was seriously injured by imports of such products. The import relief, which was in the form of increased duties on stainless steel plates and stainless steel sheets and strip, and quotas on imports of stainless steel bars, stainless steel wire rods, and certain alloy tool steel products was scheduled to expire on July 19, 1987.

On January 14, 1987, the Specialty Steel Industry of the United States and the United Steelworkers of America (AFL-CIO) filed a petition requesting that the Commission conduct an investigation to determine the probable economic effect on the domestic specialty steel industry of the termination of the import relief program. Acting on this request, the Commission initiated an investigation, the results of which are contained in a report which was transmitted to the President in May 1987.^{1/}

As a result of information obtained in the investigation, the Commission majority advised the President that the import relief program for stainless steel sheet and strip, and stainless steel plate would not have an adverse economic effect on the industries producing these products, assuming the continued administration of the VRA's at present levels. The Commission majority also advised that termination of the import relief program would have an adverse effect on the industries producing stainless steel bar, stainless steel wire rod, and alloy tool steel.

Presidential determination

On July 16, 1987, the President announced his decision to extend import relief as provided for under Proclamation 5074, and as subsequently modified. The import relief is to be extended in the form currently in effect for a period from July 20, 1987 through September 30, 1989, "in order to provide time for the specialty steel industry to complete important investment projects, improve productivity, and regain profitability." The form of the extended relief is as follows: for the flat-rolled products (stainless steel sheet and strip and stainless steel plate), tariffs will be decreased from 3 percent ad valorem in the first year, to 2 percent ad valorem in the second year, and to 1 percent in the final period (July 20, 1989, to September 30, 1989). "In

recognition of the weaker competitive position of the stainless steel bar, rod, and alloy tool steel sectors," the President proclaimed an extension of global quotas for these products.

The extension of relief will not affect the limits on imports of specialty steel products under the voluntary restraint arrangements (VRA's). Under the steel VRA's, in return for their agreement to limit exports of stainless steel plates and sheets and strip to the United States, the VRA countries were exempted from having to pay additional duties, (with the exception of Finland, whose VRA does not include stainless steel flat-rolled products). Quotas were unaffected by the VRA's for all countries except the EC-10, which negotiated limits on stainless rods and bars, and alloy tool steel as part of its VRA, and Austria, which included alloy tool steel in its VRA. In 1986, 83 percent of total imports of stainless steel flat-rolled products, by volume, were imported from countries that negotiated steel agreements affecting stainless flat-rolled imports into the United States. In 1986, imports of alloy tool steel from countries with VRA's affecting tool steel accounted for 39 percent of imports. VRA coverage for imports of stainless steel wire rod and stainless steel bars (i.e., imports from the EC) agreement was 25 and 20 percent, respectively, in 1986.

Preface

On April 9, 1986, at the request of the Subcommittee on Trade, Committee on Ways and Means, U.S. House of Representatives, and in accordance with the provisions of section 332(b) of the Tariff Act of 1930 (19 U.S.C. 1332(b)), the United States International Trade Commission instituted investigation No. 332-226, Monthly Reports on the Status of the Steel Industry. The purpose of the reports is to monitor developments in the steel industry through September 1989, which corresponds with the President's program of voluntary restraint arrangements (VRA's) with certain countries and regions which export steel to the United States.

Background of VRA's

On September 18, 1984, the President determined, under section 202(b)(1) of the Trade Act of 1974, that taking "escape clause" action was not in the national economic interest (49 Federal Register 36813). The decision followed an investigation conducted by the Commission in which imports of certain steel products ^{1/} were found to be a substantial cause of serious injury, or threat thereof, to certain domestic industries (investigation No. TA-201-51). Instead of taking action under the statute, the President established a nine-point policy to address the concerns of the industry. Under this policy, the President directed the United States Trade Representative to negotiate voluntary restraint arrangements to cover a five year period (from October 1, 1984 through September 30, 1989) with countries whose exports to the United States had increased significantly in recent years due to an unfair surge in imports. These measures were expected to return the share of imports in the U.S. market to a more normal level of approximately 18.5 percent, excluding semifinished steel (which, subsequent Administration statements indicate, would be limited to about 1.7 million tons per year).

Specialty steel

On July 19, 1983, the President announced his decision to grant import relief to the specialty steel industry for a period of 4 years (48 Federal Register 33233). The relief was scheduled to expire on July 19, 1987. Under the relief, quotas were put on imports of stainless steel bars, stainless steel wire rods, and certain alloy tool steel products; increased duties were imposed on stainless steel plates and stainless steel sheets and strip. On July 16, 1987, the President announced his decision to extend the import relief in the form currently in effect for a period from July 20, 1987 through September 30, 1989. Under the steel VRA's, in return for their agreement to limit exports of stainless steel plates and sheets and strip, the VRA

countries were exempted from having to pay additional duties (with the exception of Finland, whose VRA does not include stainless steel flat-rolled products); quotas were unaffected by the VRA's for all countries except the EC-10, which negotiated limits on rods, bars, and alloy tool steel as part of its VRA, and Austria, which included alloy tool steel in its VRA.

In this report trade data are reported in a similar format for all product categories; in the case of stainless steel bars, stainless steel rods, and certain alloy tool steel products, however, it should be noted that, except for the EC-10 and Austria, all countries are bound by quotas (see App. B for a description of the specialty steel relief provisions and implementation of modifications in specialty steel import relief).

Current Status of VRA's

To date VRA's have been negotiated with 18 countries and the EC (excluding Portugal and Spain, which negotiated separate agreements). The agreements have taken the form of market share arrangements and quotas, or a combination thereof. The agreements are tailored to each country, with considerable variation in the number of individual product categories subject to limitation. Following is a list of countries subject to the VRA's and estimates of their respective overall limitations on a market share basis.

1/ Including semifinished steel for all countries. Does not include adjustments for overages in 1986.

2/ Steel imports from South Africa in 1987 are reduced by the Comprehensive Anti-Apartheid Act of 1986 which embargoes certain steel products.

3/ Including semifinished steel, except as noted. Does not include adjustments for overages in 1986.

4/ Excluding semifinished steel.

5/ Includes approximately 200,000 tons which may be imported at the discretion of the U.S. Trade Representative.

Structure of the Report

- o Table 1 provides data on key items, including raw steel production, capability utilization, employment, wages, shipments, trade, and financial performance.
- o Tables 2-6 provide data on shipments, imports, exports, apparent consumption, and imports as a percent of apparent consumption by major product for all grades of steel, plus carbon and specialty products separately.
- o Table 7 provides quantity and value data on imports of total steel mill products and certain fabricated products. The EC and each VRA country are specified, as are the top 10 non-VRA suppliers.
- o Table 8 provides data on the quantity of steel other than semifinished steel, which is being imported from the EC, each VRA country, and the top non-VRA suppliers, and the market penetration of each country. The table can be used to measure the extent to which penetration is approaching the levels anticipated under the President's steel policy.
- o Table 9 provides data on the quantity of semifinished steel imported from the EC, each VRA country, and the top non-VRA suppliers, and presents the 1986 semifinished import restraint level of each VRA country.
- o Tables 10-29 provide data on the quantity and value of major carbon and specialty steel imports on a product-by-product basis. The EC, each VRA country, and the top non-VRA suppliers are specified.
- o Table 30 provides data on the unit values of selected imports of carbon and specialty steel products.
- o Table 31 provides data on imports of selected carbon and specialty steel products. The table also provides information which permits an examination of the extent to which shifts in product mix within major product categories is occurring.
- o Tables 32-37 provide data on imports of steel mill products and certain fabricated products, by U.S. customs area.

Notes on Product Coverage and Methodology

Data on foreign trade imports and exports and domestic shipments are compiled from official statistics of the U.S. Department of Commerce, and statistics of the American Iron and Steel Institute (AISI), respectively.

The products on which foreign trade data are collected correspond to those covered by the VRA's with the exception of fabricated wire nails (TSUS item 646.3040, 646.3200, and 646.3600), stainless steel wire strand (TSUS item 642.0800), stainless steel wire rope (TSUS item 642.1400), and offshore oil platforms (TSUS item 652.700)), and those subject to limitation under separate specialty steel measures. Since the VRA's include certain fabricated products, the data may exceed that compiled by other organizations such as the AISI. The additional tonnage, however, is relatively small. In 1985 AISI reported imports of 24.3 million tons, which compares to the 24.9 million tons indicated in this report. The product categories most affected are structural shapes and units (which includes fabricated structurals in this report) and wire and wire products (which includes wire rope and wire strand).

The term EC in this report does not include Portugal and Spain, which are subject to separate VRA's.

Unit values are calculated using unrounded data. Import values are customs value. Trade data include imports under section 806.30 and 807.00 of the Tariff Schedules; the 806.30 and 807.00 provisions apply to U.S. merchandise which is exported, processed, and reimported into the United States.
