Kenneth R. Mason, Secretary to the Commission
United States International Trade Commission
Washington, DC 20436

PREFACE

This is the final report to the United States Trade Representative (USTR) pertaining to the U.S. International Trade Commission investigation No. 332-322, Certain Pharmaceuticals and Intermediate Chemicals: Identification of Applicable 6-Digit HS Subheadings for Products Covered by the Proposed Uruguay Round Pharmaceutical Agreement. The investigation was instituted following receipt of a letter from the USTR on January 27, 1992, requesting that the Commission conduct an investigation under section 332(g) of the Tariff Act of 1930.¹ The USTR asked that the Commission make its work available to the USTR and the public on a flow basis. The Commission was requested to submit its final report on this investigation to the USTR by June 1, 1992.

The purpose of the investigation was to provide a listing of the 6-digit Harmonized Commodity Description and Coding System (HS) subheadings for those pharmaceuticals having an International Nonproprietary Name (INN) and for certain intermediate chemical products (used primarily in the production of pharmaceuticals), as specified by the USTR, to be covered under the proposed "zero-for-zero" initiative on pharmaceuticals. This initiative is currently being negotiated under the Uruguay Round market access negotiations. The Commission was also asked to identify each instance where there is a known difference in opinion among countries on the classification of a product. The USTR requested the Commissioner of the U.S. Customs Service to provide Commission staff with any necessary technical assistance.

No public hearing was held in connection with this investigation. As indicated in the Commission's notice of institution, however, reproduced in appendix B as published in the Federal Register, the Commission released two interim reports to the public for comment. Interested parties were requested to submit written statements to the Commission regarding any perceived discrepancies between their current classifications for the chemicals under consideration and the classifications presented by the Commission.

The Commission worked with Customs personnel to resolve any classification discrepancies presented by interested parties. The classifications presented in the Commission's report(s) are not intended to be, and will not be, binding upon Customs and should not be considered as formal or informal rulings or advice.

¹ See appendix A for a copy of the USTR's request.

B. Copy of the Commission's notice of institution of investigation, as published in the <u>Federal Register</u>	B-1

Purpose

This report to the USTR provides the six-digit HS subheadings for the 6,358 pharmaceuticals and intermediate chemicals covered by the USTR request for Commission classification assistance. In indicating the classifications for these products, the Commission took into account relevant comments received from interested parties regarding the two interim reports to the public, as well as comments from the U.S. Customs Service regarding said reports. Per the request of the USTR, Customs personnel have provided special assistance in the preparation of this report. Customs, as the legal authority for the classification of U.S. imports, assessed the likely classifications for these products, both on an ongoing basis and for the entire report. Given the time frame involved, the number of products presented, and the absence of a complete description of the products, it was not possible for each of the products to be covered in detail or for Customs to issue rulings or any binding determination with respect to the classification of the products concerned.² Therefore, the classifications presented in the Commission's reports on this investigation are preliminary, intended at this time for advisory purposes. They should not be considered formal or informal Customs rulings or advice. Per the USTR request, this report also indicates instances in which there is a known difference in opinion among countries on the classification of a product.³

Approach and Organization of Report

For the purposes of this investigation, the six-digit HS classifications were determined on the assumption that the chemical names provided represent separate chemically defined compounds. Certain known exceptions were treated accordingly. Most of the pharmaceuticals and intermediate chemicals covered under the proposed initiative are classifiable in either chapter 29 or chapter 30 of the HS, or both, depending on their composition or on the form in which they are imported (i.e., in bulk, in dosage form, or packaged for retail). In those cases in which the product can be classified in both chapter 29 and chapter 30, the classification provided is that for chapter 29.

Most separate chemically defined pharmaceuticals or intermediate chemicals imported in bulk form are classifiable in chapter 29. Within chapter 29, the classification depends primarily on the product's chemical structure and end use, as enumerated in the legal notes to that chapter. Pharmaceuticals imported either as mixtures or as finished products in dosage

² Letter to Chairman Newquist, dated Mar. 13, 1992, from the Commissioner of the U.S. Customs Service.

³ To date, through the assistance of the Office of the USTR, the Commission has received lists of HS classifications from the EC and Sweden for purposes of comparison. The list from the EC contains over 90 percent of the INNs covered under the request from the USTR with corresponding HS numbers for a majority of the items. The Swedish list is abbreviated, addressing differences in classification of 19 INNs, based on comparison with the original EC list.

form or packaged for retail sale are generally classified in chapter 30. In some cases, certain products were classified in chapters other than 29 or 30. Examples include glycerol (chapter 15); 4-(6-fluoro-2-methylinden-3-ylmethyl)phenylmethyl sulphide in the form of a solution in toluene (chapter 38); and certain polymerisation products of acrylic acid (chapter 39).

This report includes two tables. The first table lists the INNs, sorted alphabetically, and their corresponding HS classifications. The HS classifications for approximately 125 of the INNs, as noted in the list, were not included in the two reports to the public because the chemical structures for the products were not available when the reports were released and, as such, no classification could be presented. Those parties interested in indicating any perceived discrepancies in the classifications for these products should submit written statements to the Director, Tariff Affairs/GATT Affairs, Room 507, Office of the United States Trade Representative, 600 17th Street, NW., Washington, DC 20506. Instances in which there is a known difference in opinion among countries on the classification of a product are also indicated on this table.

The second table lists 273 intermediate chemicals (designated by the USTR for purposes of this study) and their HS classifications, sorted numerically by HS subheading. One of the HS classifications included in this list was not included in the two reports to the public. To date, the Commission has not received any lists of HS classifications for these intermediates from other countries for purposes of comparison.

Differing naming conventions were used by the various companies that submitted the names of the intermediate chemicals to the USTR for inclusion in the agreement; however, to avoid possible confusion for the public, the Commission has not attempted to amend any of them to conform to a single convention. Further, the Commission has not altered the spellings of the INNs or chemical intermediate names from those contained in the incoming request.

We would like to express our appreciation to the following groups for the assistance they provided: the U.S. Customs Service, particularly the Office of Laboratories and Scientific Services; the Directorate-General XXI, Customs and Indirect Taxation, the Commission of the European Communities, for providing copies of the most recent version of the European Customs Inventory of Chemicals; and the World Health Organization, for providing, through the USTR's office, the most recent listing of INNs.

3823.90	Cholic acid and 3-alpha,12-alpha-dihydroxy-5-beta-cholan-24-oic acid (deoxycholic acid), crude
3906.90	Polymerisation products of acrylic acid with small quantities of a polyunsaturated monomer for use in the manufacture of medicaments of heading no. 3003 or 3004

**APPENDIX A
COPY OF THE LETTER OF REQUEST
FROM THE
UNITED STATES TRADE REPRESENTATIVE**

THE UNITED STATES TRADE REPRESENTATIVE
RECEIVED Executive Office of the President
Washington, D.C. 20506
DISTRIBUTION

The Honorable Don E. Newquist
Chairman
U.S. International Trade Commission
500 E Street SW
Washington, D.C. 20436

Dear Chairman Newquist:

An important element in the Uruguay Round market access negotiations is the U.S. "zero-for-zero" initiative. This initiative provides for reciprocal duty-free treatment among major trading partners in several product sectors. The pharmaceuticals sector is one of the most promising in this initiative. To successfully conclude the agreement on pharmaceuticals, however, technical assistance is urgently needed from the Commission and the U.S. Customs Service.

The pharmaceuticals agreement contemplates providing duty-free treatment for all pharmaceutical products having an International Nonproprietary Name (INN) assigned by the World Health Organization, the salts and esters of those products, and specified intermediate chemicals used principally in the production of pharmaceuticals. Currently about 7,000 pharmaceuticals have an INN.

For reasons of international transparency, and to facilitate the implementation and monitoring of the agreement, it is intended that all INN products covered by the agreement will be listed in an annex to the agreement, together with the applicable 6-digit subheading of the Harmonized System (HS) in which each of the products is classified. It is in this area that the technical expertise of the staffs of the Commission and the Customs Service is required.

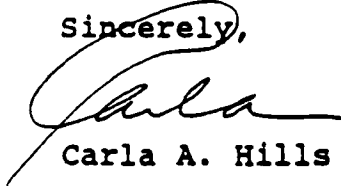

Under authority delegated by the President, pursuant to section 332 (g) of the Tariff Act of 1930, I request that the Commission institute an investigation for the purpose of providing my office with a report listing the 6-digit HS subheading for each pharmaceutical currently having an INN and each intermediate chemical product to be covered by the proposed pharmaceutical agreement. The report should identify each instance where there is a known difference in opinion among countries on the correct classification of a product. I have already provided a data tape of INN products to your staff.

Our negotiating partners in the pharmaceuticals sector are engaged in a similar review, based principally upon work that has been done by the European Community, with a view to achieving the best possible common understanding on the classification of the products included in the agreement. To facilitate our multilateral procedures, and particularly the resolution of any differences among countries on the classification of products, the results of the Commission's work in this investigation should be provided to my office, and also made available to the public, on a flow basis, as separable segments of the work are completed. It is important for our schedule that the final report be submitted no later than June 1, 1992.

In order to carry out this request, it is understood that the Commission staff will have to work closely with the U.S. Customs Service. I am therefore requesting the Commissioner of Customs to provide whatever technical assistance the Commission requires to accomplish this task.

Your assistance in this work is greatly appreciated.

Sincerely,

Carla A. Hills

CAH:ebj

APPENDIX B
COPY OF THE COMMISSION'S NOTICE OF
INSTITUTION OF INVESTIGATION,
AS PUBLISHED IN THE
FEDERAL REGISTER

provisions of the Federal Advisory Committees Act.
John M. Morehead,
Regional Director.

INTERNATIONAL TRADE COMMISSION

(Investigation No. 337-TA-335)

Certain Dynamic Sequential Gradient Devices; Designation of Additional Commission Investigative Attorney

Notice is hereby given that, as of this date, Linda C. Odom, Esq. and Sarah C. Middleton, Esq. of the Office of Unfair Import Investigations are designated as the Commission investigative attorneys in the above-cited investigation instead of Linda C. Odom, Esq.

The Secretary is requested to publish this Notice in the Federal Register.

Dated: February 19, 1992.

Lynn I. Levine,
Director, Office of Unfair Import Investigations.

[FR Doc. 92-4388 Filed 2-25-92; 8:45 am]
BILLING CODE 7030-00-01

(Investigation No. 332-322)

Certain Pharmaceuticals and Intermediate Chemicals: Identification of Applicable 6-Digit HS Subheadings for Products Covered by the Proposed Uruguay Round Pharmaceutical Agreement

AGENCY: United States International Trade Commission.

ACTION: Institution of investigation.

EFFECTIVE DATE: February 14, 1992.
FOR FURTHER INFORMATION CONTACT: General inquiries regarding the investigation may be directed to Ms. Elizabeth R. Nesbitt (202) 205-3353, Energy and Chemicals Division, Office of Industries, U.S. International Trade Commission, Washington, DC 20438. For information on legal aspects of the investigation contact Mr. William Gearhart of the Commission's Office of the General Counsel (202) 205-3091.
SUMMARY: Following receipt on January 27, 1992, of a request from the United States Trade Representative (USTR), the Commission instituted investigation No. 332-322 under section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)) for the purpose of providing a report listing the 6-digit Harmonized System (HS) subheading for each pharmaceutical product currently having an International Non-proprietary Name

(INN) and certain intermediate chemicals (used primarily in the production of pharmaceuticals) to be covered in the proposed "zero-for-zero" initiative on pharmaceuticals currently being negotiated in the Uruguay Round market access negotiations. In her request letter, the USTR asked the Commission to make its work available both to her office and the public on a flow basis. Per the USTR's request, the following intermediate chemicals will be considered in this investigation:

1,1'-(4-Chlorobutylidene)bis(4-fluorobenzene)
m-Chlorobenzyl chloride
4-Chloro-3-nitrotrifluoromethylbenzene
Isophytol
Sodium 4-chloro-1-hydroxy-1-butane sulphonate
2-Bromo-6-methoxynaphthalene
3-Chloropropyl-2,5-xylyl ether
Oxirane[4-(2-methoxyethyl)phenoxy)methyl]-
Diisopropoxycyclohexane
9,10-Ethanoanthracene-9(10H)-acrolein
6-Methoxy-2-naphthaldehyde
Isobutyl acetophenone
4-Chloro-1-(4-fluorophenyl)-1-butanone
5-H-Dibenzo-[a,d]-cyclohepten-5-one
2-Chloro-1-(2,4-dichlorophenyl) ethanone
10,11-Dihydro-5H-dibenzo-[a,d]-cyclohepten-5-one
Pregna-1,4-diene-3,20-dione, 11,17,21-trihydroxy-16-methyl-, (11. alpha., 18. beta.)
9. beta. 11. beta-Epoxy 17-alpha, 21-dihydroxy-16-beta-methylpregna-1,4-diene-3,20-dione (9,11-epoxide)
21-Acetoxy-17-alpha-hydroxy-16-beta-methylpregna-1,4,9-triene-3,20-dione
D-(-)-3-Acetylthio-2-methyl propanoic acid
Methyl-(R)-(-)-3-hydroxybutyrate
Isobutyl-3,4-epoxybutanoate
alpha-(2-Bromoethyl)-alpha-phenylbenzeneacetic acid
2-Chloro-4,5-difluorobenzoic acid
[(2-Methyl 1-) 1-oxyl propoxy] (propoxy)-(4-phenylbutyl 1)-phosphinyl] cinchonidine salt
[(2-Methyl-1)-1-oxyl propoxy] (propoxy)-(4-phenylbutyl 1)-phosphinyl] acetate
Mono-4-nitrobenzyl malonate magnesium salt dihydrate
Monophenyl phenyl malonate
D(-)alpha-Formyloxy-alpha-phenylacetyl chloride
Calcium lactate gluconate
8(S)-(2,2-dimethyl-1-oxobutoxy)-1,2,6,7,8,8-alpha(R), hexahydro-beta(R), delta (R)-dihydroxy-2(S), 6(R)-dimethyl-1(S)-naphthaleneheptanoic acid, ammonium salt
1,2,6,7,8,8-alpha-Hexahydro beta, beta, delta, beta-dihydroxy-2 beta, 6 alpha-dimethyl-8 alpha-(2 beta-methyl-1-

oxobutoxy-1 beta-naphthaleneheptanoic acid, ammonium salt
3-(2-Chloro-4,5-difluorophenyl)-3-oxopropionic acid ethyl ester
Ethyl-2-oxo-4-phenylbutanoate
16-alpha-Methyl-1,4-pregnadiene-17-alpha, 21-diol-3,20-dione, 21 acetate
(6-alpha, 11-beta, 16-alpha, 17-alpha)-6,9-Difluoro-11,17-dihydroxy-16-methyl-3-oxoandrost-1,4-diene-17-carboxylic acid
21-Acetoxy-17-alpha-hydroxy-16-beta-methylpregna-1,4-diene-3,20-dione
Pregna-1,4-diene-3,20-dione, 21-[(ethoxycarbonyl)oxy]-17-hydroxy-16-methyl-11-[(methylsulfonyl)oxy]-, (11-alpha-, 16-beta)
Pregna-1,4,9-(11)-triene-3,20-dione, 21-[(ethoxycarbonyl)oxy]-17-hydroxy-16-methyl-, (16-beta)
Diethyl ethoxymethylene malonate
Dihydro phenyl glycine
Ethyl-2-(2-chloro-4,5-difluoro-benzoyl)-3-(2,4-difluoro phenyl-amino)-2-acrylate
alpha', alpha', alpha'-Trifluoro-2,3-xylylidine
1-Naphthaleneamine, 4-(3,4-dichlorophenyl)-1,2,3,4-tetrahydro-N-methyl-hydrochloride, trans-(+,-)
N-Benzylmethylamine
1-Deoxy-1-(octylamino)-D-glucitol
2(S,3R)-(+)-4-Dimethylamino-3-methyl-1,2-diphenyl-2-butanol
2-(3,4-Dimethoxyphenyl)ethylamine
2-Amino-2'-chloro-5-nitrobenzophenone (S,S)-H-(1-Carboethoxy-3-phenyl-propyl)alanine
4-Amino butric acid
Benzenacetic acid, alpha-methyl-4-(2-methylpropyl)-(S)-, compound with L-lysine (1:1)
Sodium D(-)-alpha-[(3-methoxy-1-methyl-3-oxo-1-propenyl)-amino]-phenyl acetate
Potassium D(-)-alpha-[(methoxy-1-methyl-3-oxo-1-propenyl)-amino]-phenyl acetate
trans-4-Cyclohexyl-L-proline hydrochloride
2-Butenoic acid, 3-amino-, methyl ester
Potassium D(-)-alpha [(3-methoxy-1-methyl-3-oxo-1-propenyl)-amino]-4-hydroxy phenyl acetate
Sodium D(-)-alpha-[(3-methoxy-1-methyl-3-oxo-1-propenyl)-amino]-4-hydroxyphenyl acetate
D(-)-4-Hydroxyphenyl glycine
N-Benzyl-N-tert-butyl-2-hydroxy-2-(3'-hydroxymethyl-4'-hydroxyphenyl)ethylamine
Benzene-ethanamine-3,4-dimethoxy-beta-methyl
4-Hydroxy-alpha-1-[(6-(4-phenylbutoxy)hexyl)-amino)methyl]-1,3-benzenedimethanol
D(-)-alpha-Phenylglycine

- 4-Amino-5-chloro-2-methoxybenzoic acid
2-(N-Benzyl-N-tert-butylamino)-4'-hydroxy-3'-hydroxymethylacetophenone hydrochloride
(2S,3R)-(+)-2-(1S)-Hydroxyethyl-3-amino-1,5-pentane-dioic acid-5 methyl ester
2-(Aminooxy)-2-methylpropanoic acid, monohydrochloride
N-(2-Hydroxyethyl)lactamide
2,2-Dimethylcyclopropylcarboxamide
5-(N,N-Dibenzylglycyl)salicylamide
3-[(Dimethylamino)methyl]-1,2,3,9-tetrahydro-9-methyl-4H-carbazol-4-one
1,2,3,9-Tetrahydro-9-methyl-3-[(2-methyl-1H-imidazol-1-yl)methyl]-4H-carbazolone
Methyl 3-chloro-4-acetamido-8-methoxybenzoate
N-(Benzyl oxycarbonyl)-DL-valine
1,2,3,9-Tetrahydro-9-methyl-4H-carbazol-4-one N-Acetylsulfanilyl chloride
2-[4-(2-Hydroxy-3-isopropylaminopropoxy)phenyl]acetamide
2-Methyl-N-[3-(trifluoromethyl)phenyl]propanamide
Formylisopropylamide
2,6-Piperidinedione 4-(4-chlorophenyl)
Ethyl ethoxymethylene cyanoacetate
(1)-N-(alpha-Cyano-4-hydroxy-3-methoxy-alpha methylphenethyl)acetamide
alpha-Isopropyl-3,4,5-trimethoxybenzyl cyanide
2-(3-Phenoxyphenyl)propionitrile
1-(4-Fluorophenyl)-4-oxocyclohexanecarbonitrile
Alpha-Isopropyl-3,4-dimethoxybenzylcyanide
N-para-Chlorobenzoyl-N-para-methoxyphenylhydrazine
Dimethyl N-cyanodithioiminocarbonate
2-Naphthylchlorothioformate
cis-5-Fluoro-2-methyl-1-(para-methylthiobenzylidene)-indo-3-acetic acid
N,N-Dimethylaminothioacetamide hydrochloride
N-Methyl-1-(methylthio)-2-nitroethanamine
4-Amino-N-methylbenzenemethanesulphonamide hydrochloride
N-(2-Mercaptoethyl)-propanamide
Tertiarybutyl (triphenylphosphoranylidene) acetate
N-[2-[(5-Dimethylamino)methyl]-2-furanylmethyl]thio-ethyl-N-methyl-2-nitro-1,1-ethenediamine
5[(2-Aminoethyl)thio]methyl-N,N-dimethyl-2-furan methanamide diamine
DL-Dihydro-3-hydroxy-4,4-dimethyl-2(3H)-furanone
D-(-)-Dihydro-3-hydroxy-4,4-dimethyl-2(3H)-furanone
alpha-[2,4-Dichlorophenyl]-1H-imidazole-1-ethanol
Calcium-bromide lactobionate
Calcium lactobionate dihydrate
Lactobionic acid
N-[Dihydro-3,3-diphenyl-2(3H)-furanylidene]-N-methylmethanaminium bromide
Anthra[1,9-cd]pyrazol-6(2H)-one, 7,10-dihydroxy-2-[2-[(2-hydroxyethyl)amino]ethyl]-5-[(2-methylamino)ethyl]amino
1,2-Diphenyl-4-(2-phenylthioethyl)-3,5-pyrazolidinedione
2-Propyl-4(5)-carbomethoxy-5(4)-pentafluoroethyl imidazole
1-(3-Chloropropyl)-2,6-dimethylpiperidine hydrochloride
2-Methyl-4(or 5)-nitro-imidazole
4-Methylimidazole
2-Chloronicotinic acid
2,6-Dichloro-5-fluoronicotinic acid
3,5-Dimethyl-2-hydroxymethyl-4-methoxypyridine
1H-Imidazole-4-carboxaldehyde, 2-butyle-5-chloro-(+/-)-cis-4-Amino-5-chloro-N-[1-[3-(4-fluorophenoxy)propyl]-3-methoxy-4-piperidinyl]-2-methoxybenzamide methanol (1:1)

 4-(2-Aminoethylthiomethyl)-1,3-thiazol-2-ylmethyl dimethylamine, in the form of a solution in toluene
 Crude bile acids
 Intermediate products of the antibiotics manufacturing process, obtained from the fermentation of *Streptomyces tenebrarius*, whether or not dried, for use in the manufacture of human medicaments of No. 3004(a)
 Potassium clavulanate/sucrose (1:1)
 Potassium clavulanate/silicon dioxide (1:1)
 Potassium clavulanate/microcrystalline cellulose (1:1)
 Cholic acid and 3-alpha,12-alpha-dihydroxy-5-beta-cholan-24-oic acid (deoxycholic acid), crude
 Polymerisation products of acrylic acid with small quantities of a polyunsaturated monomer for use in the manufacture of medicaments of heading no. 3003 or 3004

The Commission was also asked to identify each instance where there is a known difference in opinion among countries on the classification of a product. USTR has requested the Commissioner of Customs to provide Commission staff with any necessary technical assistance. The USTR requested that the Commission submit its report no later than June 1, 1992.

WRITTEN SUBMISSIONS: In response to the USTR's request that the Commission make its work available to the public on a flow basis, the Commission plans to make available two interim reports on March 13, 1992, and April 24, 1992. Each interim report will contain a listing of the classifications completed by that phase of the investigation. Anyone wishing to be put on a distribution list to be compiled should write or fax ((202) 205-2186) the Office of the Secretary as soon as possible and provide a mailing address. Interested parties may also obtain copies of the reports on or after

the above-mentioned dates from the Office of the Secretary either in person or via a fax request to that Office. Copies of these reports will also be provided to the Pharmaceutical Manufacturers Association, the Synthetic Organic Chemical Manufacturers Association, and the Chemical Manufacturers Association.

Interested parties are requested to submit written statements to the Commission regarding any discrepancies between their current classifications for the chemicals under consideration and the classifications presented by the Commission. Only submissions regarding product classifications will be considered in the Commission's report. Proof of such classification conflicts are requested either in the form of official rulings provided by the U.S. Customs Service (Customs) or in the form of copies of prior communications with Customs on this issue. The Commission will work with Customs personnel to resolve any classification conflicts. No confidential information is requested. No requests to modify the list of products under consideration will be considered by the Commission.

To be given consideration, comments on the first report must be received by close of business (5:15 pm) on March 27, 1992. The deadline for the receipt of comments on the second interim report will be close of business May 8, 1992. Although confidential information is not required, information which a submitter desires the Commission to treat as confidential must be submitted on separate sheets of paper, each marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of § 201.6 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.6). All written submissions, except for confidential business information, will be available for inspection by interested persons. All submissions should be addressed to the Secretary at the Commission's office in Washington, D.C.

Hearing impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205-1810.

Issued: February 19, 1992.

By order of the Commission.

Kenneth R. Mason,

Secretary.

[FR Doc. 92-4391 Filed 2-25-92; 8:45 am]

BILLING CODE 7030-03-01

(Investigations Nos. 731-TA-542-544 (Preliminary))

Potassium Hydroxide From Canada, Italy, and the United Kingdom

Determinations

On the basis of the record¹ developed in the subject investigations, the Commission determines,² pursuant to section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)), that there is no reasonable indication that an industry in the United States is materially injured or threatened with material injury, or that the establishment of an industry in the United States is materially retarded, by reason of imports from Canada, Italy, and the United Kingdom of potassium hydroxide, provided for in subheading 2815.20.00 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value (LTFV).

Background

On January 2, 1992, a petition was filed with the Commission and the Department of Commerce by Linchem, Inc., Ashtabula, OH, alleging that an industry in the United States is materially injured or threatened with material injury by reason of LTFV imports of potassium hydroxide from Canada, Italy, and the United Kingdom. Accordingly, effective January 2, 1992, the Commission instituted antidumping investigations Nos. 731-TA-542-544 (Preliminary).

Notice of the institution of the Commission's investigations and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the *Federal Register* of January 9, 1992 (57 FR 924). The conference was held in Washington, DC, on January 23, 1992, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determinations in these investigations to the Secretary of Commerce on February 18, 1992. The views of the Commission are contained in USITC Publication 2482 (February 1992), entitled "Potassium Hydroxide from Canada, Italy, and the United Kingdom: Determinations of the Commission in Investigations Nos. 731-TA-542-544 (Preliminary) Under the Tariff Act of 1930, Together With the

¹ The record is defined in sec. 207.2(f) of the Commission's *Rules of Practice and Procedure* (19 CFR 207.2(f)).

² Commissioner Watson not participating.
