## Preface to Second Edition

October 22, 1965

The Tariff Schedules of the United States Annotated (1965) is the second edition of a compilation published pursuant to section 201, Tariff Classification Act of 1962 1/ embracing the legal text of the Tariff Schedules of the United States as amended and modified 2/ together with statistical annotations formulated pursuant to section 484(e), Tariff Act of 1930. 3/ These statistical annotations prescribe the statistical information to be supplied on customs entry and withdrawal forms with respect to articles imported into the customs territory of the United States. Thus, this publication is designed to enable importers, customs brokers, customs officers and other interested persons to determine (1) the rates of duty applicable to imported articles, and (2) the requirements for reporting statistical data with respect to such imports.

Under authority of section 484(e) of the tariff act, a committee comprised of staff members of the Tariff Commission, Treasury Department (Bureau of Customs), and Department of Commerce (Bureau of the Census) has been established to consider and decide, subject to Commission and Departmental approval, all questions in regard to the statistical annotation of the Tariff Schedules of the United States.

Requests from interested parties for changes in any of the requirements for statistical reporting should be prepared in quadruplicate and submitted to:

The Chairman  
Committee for Statistical Annotation  
of Tariff Schedules  
United States Tariff Commission  
Washington, D.C. 20436

Such requests should in every instance indicate precisely the nature of the desired changes and give detailed reasons in support of the request.

---

1/ "Sec. 201. The Commission is authorized to issue, at appropriate intervals, and to keep up to date, a publication containing current tariff schedules and related matters, including such matter as may be needed for reporting statistics." The first edition (1963) consisted of the original publication and five supplements thereto.

2/ This 1965 edition includes amendments and modifications made on or after August 31, 1963 and before October 22, 1965. All such changes are listed in the Supplementary Key (see table of contents).

3/ "Sec. 484. \* \* \* (e) The Secretary of the Treasury, the Secretary of Commerce, and the Chairman of the United States Tariff Commission are authorized and directed to establish from time to time for statistical purposes an enumeration of articles in such detail as in their judgment may be necessary, comprehending all merchandise imported into the United States, and as a part of the entry there shall be attached thereto or included therein an accurate statement specifying, in terms of such detailed enumeration, the kinds and quantities of all merchandise imported and the value of the total quantity of each kind of article."

## GENERAL HEADNOTES AND RULES OF INTERPRETATION

3

1. Tariff Treatment of Imported Articles. All articles imported into the customs territory of the United States from outside thereof are subject to duty or exempt therefrom as prescribed in general headnote 3.

2. Customs Territory of the United States. The term "customs territory of the United States", as used in the schedules, includes only the States, the District of Columbia, and Puerto Rico.

3. Rates of Duty. The rates of duty in the "Rates of Duty" columns numbered 1 and 2 of the schedules apply to articles imported into the customs territory of the United States as hereinafter provided in this headnote:

(a) Products of Insular Possessions.

(i) Articles imported from insular possessions of the United States which are outside the customs territory of the United States are subject to the rates of duty set forth in column numbered 1 of the schedules, except that all articles the growth or product of any such possession, or manufactured or produced in any such possession from materials the growth, product, or manufacture of any such possession or of the customs territory of the United States, or of both, which do not contain foreign materials to the value of more than 50 percent of their total value, coming to the customs territory of the United States directly from any such possession, and all articles previously imported into the customs territory of the United States with payment of all applicable duties and taxes imposed upon or by reason of importation which were shipped from the United States, without remission, refund, or drawback of such duties or taxes, directly to the possession from which they are being returned by direct shipment, are exempt from duty.

(ii) In determining whether an article produced or manufactured in any such insular possession contains foreign materials to the value of more than 50 percent, no material shall be considered foreign which, at the time such article is entered, may be imported into the customs territory from a foreign country, other than Cuba or the Philippine Republic, and entered free of duty.

(b) Products of Cuba. Products of Cuba imported into the customs territory of the United States, whether imported directly or indirectly, are subject to the rates of duty set forth in column numbered 1 of the schedules. Preferential rates of duty for such products apply only as shown in the said column 1. <sup>1/</sup>

(c) Products of the Philippine Republic.

(i) Products of the Philippine Republic imported into the customs territory of the United States, whether imported directly or indirectly, are subject to the rates of duty which are set forth in column numbered 1 of the schedules or to fractional parts of the rates in the said column 1, as hereinafter prescribed in subdivisions (c)(ii) and (c)(iii) of this headnote.

(ii) Except as otherwise prescribed in the schedules, a Philippine article, as defined in subdivision (c)(iv) of this headnote, imported into the customs territory of the United States and entered on or before July 3, 1974, is subject to that rate which results

from the application of the following percentages to the most favorable rate of duty (i.e., including a preferential rate prescribed for any product of Cuba) set forth in column numbered 1 of the schedules:

(A) 20 percent, during calendar years 1963 through 1964,

(B) 40 percent, during calendar years 1965 through 1967,

(C) 60 percent, during calendar years 1968 through 1970,

(D) 80 percent, during calendar years 1971 through 1973,

(E) 100 percent, during the period from January 1, 1974, through July 3, 1974.

(iii) Except as otherwise prescribed in the schedules, products of the Philippine Republic, other than Philippine articles, are subject to the rates of duty (except any preferential rates prescribed for products of Cuba) set forth in column numbered 1 of the schedules.

(iv) The term "Philippine article", as used in the schedules, means an article which is the product of the Philippines, but does not include any article produced with the use of materials imported into the Philippines which are products of any foreign country (except materials produced within the customs territory of the United States) if the aggregate value of such imported materials when landed at the Philippine port of entry, exclusive of any landing cost and Philippine duty, was more than 20 percent of the appraised customs value of the article imported into the customs territory of the United States.

(d) Products of Canada.

(i) Products of Canada imported into the customs territory of the United States, whether imported directly or indirectly, are subject to the rates of duty set forth in column numbered 1 of the schedules. The rates of duty for a Canadian article, as defined in subdivision (d)(ii) of this headnote, apply only as shown in the said column numbered 1.

(ii) The term "Canadian article", as used in the schedules, means an article which is the product of Canada, but does not include any article produced with the use of materials imported into Canada which are products of any foreign country (except materials produced within the customs territory of the United States), if the aggregate value of such imported materials when landed at the Canadian port of entry (that is, the actual purchase price, or if not purchased, the export value, of such materials, plus, if not included therein, the cost of transporting such materials to Canada but exclusive of any landing cost and Canadian duty) was —

(A) with regard to any motor vehicle or automobile truck tractor entered on or before December 31, 1967, more than 60 percent of the appraised value of the article imported into the customs territory of the United States; and

(B) with regard to any other article (including any motor vehicle or automobile truck tractor entered after December 31, 1967), more than 50 percent of the appraised value of the article imported into the customs territory of the United States.

<sup>1/</sup> By virtue of section 401 of the Tariff Classification Act of 1962, the application to products of Cuba of either a preferential or other reduced rate of duty in column 1 is suspended. See general headnote 3(d), *infra*. The provisions for preferential Cuban rates continue to be reflected in the schedules because, under section 401, the rates therefor in column 1 still form the bases for determining the rates of duty applicable to certain products, including "Philippine articles".

Union of Soviet Socialist Republics and the area in East Prussia under the provisional administration of the Union of Soviet Socialist Republics.

(f) Products of All Other Countries. Products of all countries not previously mentioned in this headnote imported into the customs territory of the United States are subject to the rates of duty set forth in column numbered 1 of the schedules.

(g) Effective Date; Exceptions - Staged Rates of Duty. Except as specified below or as may be specified elsewhere, pursuant to section 501(a) of the Tariff Classification Act of 1962 (P.L. 87-456, approved May 24, 1962), the rates of duty in columns numbered 1 and 2 become effective with respect to articles entered on or after the 10th day following the date of the President's proclamation provided for in section 102 of the said Act. If, in column numbered 1, any rate of duty or part thereof is set forth in parenthesis, the effective date shall be governed as follows:

(i) If the rate in column numbered 1 has only one part (i.e., 8¢ (10¢) per lb.), the parenthetical rate (viz., 10¢ per lb.) shall be effective as to articles entered before July 1, 1964, and the other rate (viz., 8¢ per lb.) shall be effective as to articles entered on or after July 1, 1964.

(ii) If the rate in column numbered 1 has two or more parts (i.e., 5¢ per lb. + 50% ad val.) and has a parenthetical rate for either or both parts, each part of the rate shall be governed as if it were a one-part rate. For example, if a rate is expressed as "4¢ (4.5¢) per lb. + 8% (9%) ad val.", the rate applicable to articles entered before July 1, 1964, would be "4.5¢ per lb. + 9% ad val."; the rate applicable to articles entered on or after July 1, 1964, would be "4¢ per lb. + 8% ad val."

(iii) If the rate in column numbered 1 is marked with an asterisk (\*), the foregoing provisions of (i) and (ii) shall apply except that "January 1, 1964" shall be substituted for "July 1, 1964", wherever this latter date appears.

<sup>1/</sup> In Proclamation 3447, dated February 3, 1962, the President, acting under authority of section 620(a) of the Foreign Assistance Act of 1961 (75 Stat. 445), as amended, prohibited the importation into the United States of all goods of Cuban origin and all goods imported from or through Cuba, subject to such exceptions as the Secretary of the Treasury determines to be consistent with the effective operation of the embargo.

4. Modification or Amendment of Rates of Duty. Except as otherwise provided in the Appendix to the Tariff Schedules --

(a) a statutory rate of duty supersedes and terminates the existing rates of duty in both column numbered 1 and column numbered 2 unless otherwise specified in the amending statute;

(b) a rate of duty proclaimed pursuant to a concession granted in a trade agreement shall be reflected in column numbered 1 and, if higher than the then existing rate in column numbered 2, also in the latter column; and shall supersede but not terminate the then existing rate (or rates) in such column (or columns);

(c) a rate of duty proclaimed pursuant to section 336 of the Tariff Act of 1930 shall be reflected in both column numbered 1 and column numbered 2 and shall supersede but not terminate the then existing rates in such columns; and

(d) whenever a proclaimed rate is terminated or suspended, the rate shall revert, unless otherwise provided, to the next intervening proclaimed rate previously superseded but not terminated or, if none, to the statutory rate.

5. Intangibles. For the purposes of headnote 1 --

(a) corpses, together with their coffins and accompanying flowers,

(b) currency (metal or paper) in current circulation in any country and imported for monetary purposes,

(c) electricity,

(d) securities and similar evidences of value, and

(e) vessels which are not "yachts or pleasure boats" within the purview of subpart D, part 6, of schedule 6,

are not articles subject to the provisions of these schedules.

6. Containers or Holders for Imported Merchandise.

For the purposes of the tariff schedules, containers or holders are subject to tariff treatment as follows:

(a) Imported Empty: Containers or holders if imported empty are subject to tariff treatment as imported articles and as such are subject to duty unless they are within the purview of a provision which specifically exempts them from duty.

(b) Not Imported Empty: Containers or holders if imported containing or holding articles are subject to tariff treatment as follows:

(i) The usual or ordinary types of shipping or transportation containers or holders, if not designed for, or capable of, reuse, and containers of usual types ordinarily sold at retail with their contents, are not subject to treatment as imported articles. Their cost, however, is, under section 402 or section 402a of the tariff act, a part of the value of their contents and if their contents are subject to an ad valorem rate of duty such containers or holders are, in effect, dutiable at the same rate as their contents, except that their cost is deductible from dutiable value upon submission of satisfactory proof that they are products of the United States which are being returned without having been advanced in value or improved in condition by any means while abroad.

(ii) The usual or ordinary types of shipping or transportation containers or holders, if designed for, or capable of, reuse, are subject to treatment as imported articles separate and distinct from their contents. Such holders or containers are not part of the dutiable value of their contents and are separately subject to duty upon each and every importation into the customs territory of the United States unless within the scope of a provision specifically exempting them from duty.

(iii) In the absence of context which requires otherwise, all other containers or holders are subject to the same treatment as specified in (ii) above for usual or ordinary types of shipping or transportation containers or holders designed for, or capable of, reuse.

## General Headnotes and Rules of Interpretation

5

7. Commingling of Articles. (a) Whenever articles subject to different rates of duty are so packed together or mingled that the quantity or value of each class of articles cannot be readily ascertained by customs officers (without physical segregation of the shipment or the contents of any entire package thereof), by one or more of the following means:

(i) sampling,  
(ii) verification of packing lists or other documents filed at the time of entry, or  
(iii) evidence showing performance of commercial settlement tests generally accepted in the trade and filed in such time and manner as may be prescribed by regulations of the Secretary of the Treasury,  
the commingled articles shall be subject to the highest rate of duty applicable to any part thereof unless the consignee or his agent segregates the articles pursuant to subdivision (b) hereof.

(b) Every segregation of articles made pursuant to this headnote shall be accomplished by the consignee or his agent at the risk and expense of the consignee within 30 days (unless the Secretary authorizes in writing a longer time) after the date of personal delivery or mailing, by such employee as the Secretary of the Treasury shall designate, of written notice to the consignee that the articles are commingled and that the quantity or value of each class of articles cannot be readily ascertained by customs officers. Every such segregation shall be accomplished under customs supervision, and the compensation and expenses of the supervising customs officers shall be reimbursed to the Government by the consignee under such regulations as the Secretary of the Treasury may prescribe.

(c) The foregoing provisions of this headnote do not apply with respect to any part of a shipment if the consignee or his agent furnishes, in such time and manner as may be prescribed by regulations of the Secretary of the Treasury, satisfactory proof —

(i) that such part (A) is commercially negligible,  
(B) is not capable of segregation without excessive cost, and (C) will not be segregated prior to its use in a manufacturing process or otherwise, and

(ii) that the commingling was not intended to avoid the payment of lawful duties.

Any article with respect to which such proof is furnished shall be considered for all customs purposes as a part of the article, subject to the next lower rate of duty, with which it is commingled.

(d) The foregoing provisions of this headnote do not apply with respect to any shipment if the consignee or his agent shall furnish, in such time and manner as may be prescribed by regulations of the Secretary of the Treasury, satisfactory proof —

(i) that the value of the commingled articles is less than the aggregate value would be if the shipment were segregated;

(ii) that the shipment is not capable of segregation without excessive cost and will not be segregated prior to its use in a manufacturing process or otherwise; and

(iii) that the commingling was not intended to avoid the payment of lawful duties.

Any merchandise with respect to which such proof is furnished shall be considered for all customs purposes to be dutiable at the rate applicable to the material present in greater quantity than any other material.

(e) The provisions of this headnote shall apply only in cases where the schedules do not expressly provide a particular tariff treatment for commingled articles.

8. Abbreviations. In the schedules the following symbols and abbreviations are used with the meanings respectively indicated below:

\$	-	dollars

9. Definitions. For the purposes of the schedules, unless the context otherwise requires —

(a) the term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States;

(b) the term "entered for consumption" does not include withdrawals from warehouse for consumption;

(c) the term "withdrawn for consumption" means withdrawn from warehouse for consumption and does not include articles entered for consumption;

(d) the term "rate of duty" includes a free rate of duty; rates of duty proclaimed by the President shall be referred to as "proclaimed" rates of duty; rates of duty enacted by the Congress shall be referred to as "statutory" rates of duty; and the rates of duty in column numbered 2 at the time the schedules become effective shall be referred to as "original statutory" rates of duty;

(e) the term "ton" means 2,240 pounds, and the term "short ton" means 2,000 pounds;

(f) the terms "of", "wholly of", "almost wholly of", "in part of" and "containing", when used between the description of an article and a material (e.g., "furniture of wood", "woven fabrics, wholly of cotton", etc.), have the following meanings:

(i) "of" means that the article is wholly or in chief value of the named material;

(ii) "wholly of" means that the article is, except for negligible or insignificant quantities of some other material or materials, composed completely of the named material;

(iii) "almost wholly of" means that the essential character of the article is imparted by the named material, notwithstanding the fact that significant quantities of some other material or materials may be present; and

(iv) "in part of" or "containing" mean that the article contains a significant quantity of the named material.

With regard to the application of the quantitative concepts specified in subparagraphs (ii) and (iv) above, it is intended that the de minimis rule apply.

10. General Interpretative Rules. For the purposes of these schedules --

(a) the general, schedule, part, and subpart headnotes, and the provisions describing the classes of imported articles and specifying the rates of duty or other import restrictions to be imposed thereon are subject to the rules of interpretation set forth herein and to such other rules of statutory interpretation, not inconsistent therewith, as have been or may be developed under administrative or judicial rulings;

(b) the titles of the various schedules, parts, and subparts and the footnotes therein are intended for convenience in reference only and have no legal or interpretative significance;

(c) an imported article which is described in two or more provisions of the schedules is classifiable in the provision which most specifically describes it; but, in applying this rule of interpretation, the following considerations shall govern:

(i) a superior heading cannot be enlarged by inferior headings indented under it but can be limited thereby;

(ii) comparisons are to be made only between provisions of coordinate or equal status, i.e., between the primary or main superior headings of the schedules or between coordinate inferior headings which are subordinate to the same superior heading;

(d) if two or more tariff descriptions are equally applicable to an article, such article shall be subject to duty under the description for which the original statutory rate is highest, and, should the highest original statutory rate be applicable to two or more of such descriptions, the article shall be subject to duty under that one of such descriptions which first appears in the schedules;

(e) in the absence of special language or context which otherwise requires --

(i) a tariff classification controlled by use (other than actual use) is to be determined in accordance with the use in the United States at, or immediately prior to, the date of importation, of articles of that class or kind to which the imported articles belong, and the controlling use is the chief use, i.e., the use which exceeds all other uses (if any) combined;

(ii) a tariff classification controlled by the actual use to which an imported article is put in the United States is satisfied only if such use is intended at the time of importation, the article is so used, and proof thereof is furnished within 3 years after the date the article is entered;

(f) an article is in chief value of a material if such material exceeds in value each other single component material of the article;

(g) a headnote provision which enumerates articles not included in a schedule, part, or subpart is not necessarily exhaustive, and the absence of a particular article from such headnote provision shall not be given weight in determining the relative specificity of competing provisions which describe such article;

(h) unless the context requires otherwise, a tariff description for an article covers such article, whether assembled or not assembled, and whether finished or not finished;

(i) a provision for "parts" of an article covers a product solely or chiefly used as a part of such article, but does not prevail over a specific provision for such part.

11. Issuance of Rules and Regulations. The Secretary of the Treasury is hereby authorized to issue rules and regulations governing the admission of articles under the provisions of the schedules. The allowance of an importer's claim for classification, under any of the provisions of the schedules which provide for total or partial relief from duty or other import restrictions on the basis of facts which are not determinable from an examination of the article itself in its condition as imported, is dependent upon his complying with any rules or regulations which may be issued pursuant to this headnote.

12. The Secretary of the Treasury is authorized to prescribe methods of analyzing, testing, sampling, weighing, gauging, measuring, or other methods of ascertainment whenever he finds that such methods are necessary to determine the physical, chemical, or other properties or characteristics of articles for purposes of any law administered by the Customs Service.

#### General statistical headnotes:

1. Statistical Requirements for Imported Articles. Persons making customs entry or withdrawal of articles imported into the customs territory of the United States shall complete the entry or withdrawal forms, as provided herein and in regulations issued pursuant to law, to provide for statistical purposes information as follows:

(b) the name of the carrier or the means of transportation by which the articles were transported to the first port of unloading in the United States;

(c) the foreign port of lading

(d) the United States port of unloading

(e) the date of importation;

(f) the country of origin of the articles expressed in terms of the designation therefor in Statistical Annex B of these schedules;

(g) a description of the articles in sufficient detail to permit the classification thereof under the proper statistical reporting number in these schedules;

(h) the statistical reporting number under which the articles are classifiable;

(i) gross weight in pounds for the articles covered by each reporting number when imported in vessels or aircraft;

(k) the net quantity in the units specified herein for the classification involved;

(l) the U.S. dollar value in accordance with the definition in Section 402 or 402a of the Tariff Act of 1930, as amended, for all merchandise including that free of duty or dutiable at specific rates; and

(m) such other information with respect to the imported articles as is provided for elsewhere in these schedules.

2. Statistical Annotations. (a) *The statistical annotations to the Tariff Schedules of the United States consist of--*

- (i) *the 2-digit statistical suffixes,*
- (ii) *the indicated units of quantity,*
- (iii) *the statistical headnotes and annexes, and*
- (iv) *the italicized article descriptions.*

(b) *The legal text of the Tariff Schedules of the United States consists of the remaining text as more specifically identified in headnote 10(a) of the general headnotes and rules of interpretation.*

(c) *The statistical annotations are subordinate to the provisions of the legal text and cannot change their scope.*

3. Statistical Reporting Number. (a) General Rule: *Except as provided in paragraph (b) of this headnote, and in the absence of specific instructions to the contrary elsewhere, the statistical reporting number for an article consists of the 7-digit number formed by combining the 5-digit item number with the appropriate 2-digit statistical suffix. Thus, the statistical reporting number for live monkeys dutiable under item 100.95 is "100.9520".*

(b) *Wherever in the tariff schedules an article is classifiable under a provision which derives its rate of duty from a different provision, the statistical reporting number is, in the absence of specific instructions to the contrary elsewhere, the 7-digit number for the basic provision followed by the item number of the provision from which the rate is derived. Thus, the statistical reporting number of mixed apple and grape juices, not containing over 1.0 percent of ethyl alcohol by volume, is "165.6500-165.40".*

This part covers only products which are fit for use as beverages or for beverage purposes.</p> <p>2. Each and every gauge or wine gallon of measurement is counted as at least one proof gallon; and the standard for determining the proof of brandy and other spirits or liquors of any kind when imported is the same as that which is defined in the laws relating to internal revenue. The Secretary of the Treasury, in his discretion, may authorize the ascertainment of the proof of wines, cordials, or other liquors and fruit juices by distillation or otherwise, when it is impracticable to ascertain such proof by the means prescribed by existing law or regulations.</p> <p>3. The duties prescribed on products covered by this part are in addition to the internal-revenue taxes imposed under existing law or any subsequent Act. The duties imposed on products covered by this part which are subject also to internal-revenue taxes are imposed only on the quantities subject to such taxes.</p> <p>4. 		<p>Subpart B. - Lumber, Flooring, and Moldings</p> <p><u>Subpart B headnotes:</u></p> <p>1. This subpart covers lumber, wood siding, wood flooring, wood moldings, and certain wood carvings and ornaments, including such products when they have been drilled or treated.</p> <p>2. For the purposes of this part, the following terms have the meanings hereby assigned to them:</p> <p>(a) <u>Lumber</u>: A product of a sawmill or sawmill and planing mill derived from a log by lengthwise sawing which, in its original sawed condition, has at least 2 approximately parallel flat longitudinal sawed surfaces, and which may be rough, dressed, or worked, as set forth below:</p> <p>(i) <u>rough lumber</u> is lumber just as it comes from the saw, whether in the original sawed size or edged, resawn, crosscut, or trimmed to smaller sizes;</p> <p>(ii) <u>dressed lumber</u> is lumber which has been dressed or surfaced by planing on at least one edge or face; and</p> <p>(iii) <u>worked lumber</u> is lumber which has been matched (provided with a tongued-and-grooved joint at the edges or ends), shiplapped (provided with a rabbeted or lapped joint at the edges), or patterned (shaped at the edges or on the faces to a patterned or molded form) on a matching machine, sticker, or molder.</p> <p>Edge-glued or end-glued wood over 6 feet in length and not over 15 inches in width shall be classified as lumber if such wood as a solid piece without glue joints would be deemed to be lumber as defined above.</p> <p>(b) <u>Softwood</u>: Wood from trees of coniferous species (order Coniferae).</p> <p>(c) <u>Hardwood</u>: Wood from trees of non-coniferous species.</p> <p>(d) <u>Drilled or treated</u>: Drilled at intervals for nails, screws, or bolts, sanded or otherwise surface processed in lieu of, or in addition to, planing or working, or treated with creosote or other wood preservatives, or with fillers, sealers, waxes, oils, stains, varnishes, paints, or enamels, but not including anti-stain or other temporary applications mentioned in headnote 4 of this subpart.</p> <p>(e) <u>Standard wood moldings</u>: Wood moldings worked to a pattern and having the same profile in cross section throughout their length.</p> <p>3. Lumber, including certain flooring provided for in this subpart, is dutiable on the basis of "board measure" for which the unit of measurement is the board foot. For the purposes of this subpart, a board foot is the quantity of lumber contained in, or derived (by drying, dressing, or working, or any combination of these processes) from, a piece of rough green lumber 1 inch in thickness, 12 inches in width, and 1 foot in length, or the equivalent of such piece in other dimensions.</p> <p>4. The treatment of lumber or other products provided for in this subpart with anti-stain or other temporary applications which serve only for the purpose of maintaining the products in their rough, dressed, or worked condition until installation or further manufacture shall not affect their classification under any of the provisions of this subpart.</p>

		<p><b>PART 1. - TEXTILE FIBERS AND WASTES; YARNS AND THREADS</b></p> <p><u>Part 1 headnotes:</u></p> <p>1. For the purposes of this part --</p> <p>(a) the term "<u>waste</u>" means all fiber, yarn, and thread wastes, including wastes obtained in the production of continuous and noncontinuous fibers, yarns, and threads, such as gin motes, scutcher waste (including tow), picker waste, card waste, top waste, comber waste (including noils), hackling waste (including tow), silver waste, roving waste, ring waste, throwster (twister or pleyer) waste, fly, sweepings, and willowed wastes, and including fiber, yarn, and thread wastes obtained in the production of other textile products (i. e., products other than fibers, yarns, or threads) or otherwise obtained; and</p> <p>(b) the term "<u>advanced waste</u>" means any of the above-mentioned wastes which have been cleaned, bleached, colored, or otherwise advanced, and includes fibers recovered by cleaning (except willowing), degumming, carbonizing, cutting, pickering, garnetting or similar processes from any of the above-mentioned wastes or from textile clippings or articles, new or used, whether or not such fibers or the wastes from which recovered have also been otherwise advanced, but does not include fibers which have been carded, combed, or similarly processed, or reuseable yarns or threads.</p> <p>2. Rags and scrap cordage are covered in part 7C of this schedule.</p> <p style="text-align: center;">—————</p> <p style="text-align: center;"><b>Subpart A. - Cotton</b></p> <p><u>Subpart A headnotes:</u></p> <p>1. The term "<u>number</u>", as applied to yarns in this subpart, means the number of 840-yard hanks of yarn in 1 pound. To determine the number of any yarn, whether single or plied, the actual yards per pound shall be divided by 840 and the quotient thereof multiplied by the number of plies in such yarn. Fractions in the resulting yarn number shall be disregarded.</p> <p>2. In this subpart, each of the rates of duty provided for yarns, wholly of cotton, not bleached, mercerized, colored, combed or plied (Items 301.01 through 301.98, inclusive) is also the "base rate" for yarn of the same number covered by item 302.--. For citation purposes, the two blanks on the end of the latter item number shall be filled in with the last two digits of the item number for the applicable base rate. Thus, "item 302.28" would be the citation for bleached, mercerized, colored, combed, or plied yarns, wholly of cotton, of number 28.</p> <p>3. Under regulations prescribed by the Secretary of the Treasury, the staple length of cotton shall be determined for all customs purposes by application of the Official Cotton Standards of the United States for length of staple, as established by the Secretary of Agriculture and in effect when the determination is to be made.</p> <p style="text-align: center;">—————</p>

		<p align="center"><b>PART 3. - WOVEN FABRICS</b></p> <p><u>Part 3 headnote:</u></p> <p>1. This part covers all woven fabrics in the piece, of any width and with or without fast edges, including gauze and leno-woven fabrics, but does not include —</p> <p>(i) any woven fabrics which are specially provided for in the provisions of part 4 of this schedule;</p> <p>(ii) certain wool fabric samples (see part 7A of this schedule); or</p> <p>(iii) woven fabrics in item 749.10 of part 7B of schedule 7.</p> <p align="center">—</p> <p align="center"><b>Subpart A. - Woven Fabrics, of Cotton</b></p> <p><u>Subpart A headnotes:</u></p> <p>1. (a) In the ascertainment of the condition of the fabrics or yarns upon which the duties imposed upon cotton fabrics are made to depend, the entire fabric and all parts thereof shall be included.</p> <p>(b) The term "number", as applied to woven fabrics of cotton, means the average yarn number of the yarns contained therein. In computing the average yarn number, the length of the yarn is considered to be equal to the distance covered by it in the fabric in the condition as imported, with all clipped yarn being measured as if continuous, and with the count being taken of the total single yarns in the fabric including the single yarns in any plied yarns. The weight shall be taken after any excessive sizing is removed by boiling or other suitable process. Any one of the following formulas can be used to determine the average yarn number for tariff purposes:</p> $N = \frac{BYT}{840}, \text{ or } \frac{24T}{352}, \text{ or } \frac{28T}{1052}, \text{ or } \frac{35T}{70}$ <p>when:</p> <p>N is the average yarn number,</p> <p>B is the breadth (width) of the fabric in inches,</p> <p>Y is the yards (linear) of fabric per pound,</p> <p>T is the total single yarns per square inch,</p> <p>S is the square yards of fabric per pound,</p> <p>Z is the ounces per linear yard of fabric, and</p> <p>Z' is the ounces per square yard of fabric.</p> <p>2. In this subpart, each of the rates of duty provided for fabric, wholly of cotton, not fancy or figured, and not bleached and not colored (items 320.01 through 320.98, inclusive) is also the "base rate" for fabrics of the same average yarn number covered by items 321.— through 331.—, inclusive. For citation purposes, the two blanks on the end of each of the latter item numbers shall be filled in with the last two digits of the item number for the applicable base rate. Thus, "item 324.45" would be the citation for woven fabrics, wholly of cotton, of number 45, fancy or figured, and bleached but not colored.</p> <p>3. The term "fancy or figured", as used in this subpart in relation to fabrics, means fabrics which have been woven with 2 or more colors or kinds of filling; with 8 or more harnesses; or with jacquard, lappet, or swivel attachments; or by any combination of these weaving methods.</p>

		<p>4. None of the ad valorem rates of duty, or the ad valorem parts of the compound rates of duty, set forth in the Rates of Duty columns for items 320.01 through 320.98 shall be less than the equivalent of 0.3 cents per number per pound in rate column 1, or less than 0.55 cents per number per pound in rate column 2.</p> <p><u>Subpart A statistical headnotes:</u></p> <p>1. For the purposes of this schedule, the following terms relating to fabrics of cotton have the meanings hereby assigned to them. (The average yarn number referred to in certain of the definitions is the "number" ascertained by the method set forth in headnote 1 of this subpart. The yarn number (before weaving) referred to in certain of the definitions is the yarn number of the yarn before it is prepared for weaving):</p> <p>(a) <u>Duck</u>: Plain-woven fabrics made of carded yarns, not napped, woven with less than 8 harnesses and without the use of jacquard, lappet, or swivel attachments, the warp and/or filling of which consists of plied yarns or of 2 or more single yarns woven as one, having an average yarn number not over 15, weighing 5 ounces or more per square yard.</p> <p>(b) <u>Gingham</u>: Plain-woven and fancy yarn-dyed fabrics having two or more colors in the warp and/or in the filling. Include checked and plaid ginghams, gingham stripes, cloth of "haircord" construction (i.e., cloth having cord stripes in the warp which are formed by yarns woven from an extra beam), and "poplin" type fabrics with a difference in picks per inch and ends per inch of less than 40 (e.g., 90 x 60). Excluded are yarn-dyed handkerchief fabrics made in box looms. The following are examples:</p> <table><tr><th colspan="2">Yarn number (before weaving)</th><th colspan="2">Yarns per inch</th></tr><tr><th>Warp</th><th>Filling</th><th>Warp</th><th>Filling</th></tr><tr><td>20s</td><td>20s</td><td>62</td><td>50</td></tr><tr><td>40s</td><td>40s</td><td>80</td><td>70</td></tr><tr><td>40s</td><td>40s</td><td>90</td><td>60</td></tr><tr><td>40s</td><td>40s</td><td>70</td><td>60</td></tr><tr><td>30s</td><td>30s</td><td>70</td><td>60</td></tr><tr><td>30s</td><td>30s</td><td>76</td><td>64</td></tr><tr><td>30s</td><td>40s</td><td>73</td><td>66</td></tr><tr><td>30s</td><td>40s</td><td>90</td><td>60</td></tr></table> <p>(c) <u>Lawns</u>: Plain-woven fabrics, not napped, in which the total yarns per square inch is over 148 but not over 220 and having an average yarn number over 60 but not over 120.</p> <p>(d) <u>Poplin and broadcloth</u>: Plain-woven fabrics, not napped, not fancy or figured, having at least 40 more warp yarns than filling yarn per inch, and having a more or less pronounced horizontal rib formed by using a heavier filling yarn than warp and/or with about half as many picks per inch as ends. May be made with either singles or ply yarns in warp and filling. The average yarn number usually ranges between 20 and 100. The following are examples (for warp-loop fabrics the figures in parenthesis under warp yarn number are the yarn number of extra warp yarns, those under warp yarns per inch are ends of extra warp yarns per inch):</p> <table><tr><td colspan="2">Yarn number</td><td colspan="2">Yarns per inch</td></tr><tr><td colspan="2">(before weaving)</td><td>Warp</td><td>Filling</td></tr><tr><td>40s (20/2)</td><td>40s</td><td>74s (6)</td><td>70s</td></tr><tr><td>40s (40/2)</td><td>40s</td><td>79s (10)</td><td>60s</td></tr><tr><td>40s (40/2)</td><td>40s</td><td>72s (10)</td><td>75s</td></tr></table> <p>(h) <u>Table damask</u>: Cotton fabrics, not napped, woven with jacquard or dobby attachments characterized by elaborate decorative designs, usually of floral patterns. The designs are reversible and are formed by a warp-face satin weave and the ground by a filling-face satin weave. Table damask is generally all white, although it is sometimes made with colored stripes or in solid pastel shades.</p> <p>(ij) <u>Twills and sateens</u>:</p> <p><u>Twills</u>--Fabrics woven with a twill weave, not napped, having a more or less pronounced diagonal effect on the face of the cloth. They include fabrics, known as drills, warp twills, filling twills, jeans, filter twills, broken twills, herringbone twills, gabardines, denims, chinos, and tickings.</p> <p><u>Denims</u>--Three-harness or 4, harness twill fabrics, not fancy or figured, and not piece-colored, but the warp yarns of which are colored, made of singles yarn, and having an average yarn number over 3 but not over 16.</p> <p><u>Sateens</u>--Fabrics woven with a satin weave, not napped, in which the surface of the cloth consists almost entirely of warp or filling floats, that is, in the repeat of a weave pattern, each yarn of one system passes over several yarns of the other system before interlacing; they are sometimes woven with a twill weave but the diagonal effect in these is not ordinarily discernible on the face of the cloth. Schedule 4 headnotes:

1. This schedule does not include --
  - (i) any of the mineral products provided for in schedule 5;
  - (ii) metal-bearing ores and other metal-bearing materials, provided for in part 1 of schedule 6; or
  - (iii) metals provided for in part 2 of schedule 6.
2. (a) The term "compounds", as used in this schedule, means substances occurring naturally or produced artificially by the reaction of two or more ingredients, each compound --
  - (i) consisting of two or more elements,
  - (ii) having its own characteristic properties different from those of its elements and from those of other compounds, and
  - (iii) always consisting of the same elements united in the same proportions by weight with the same internal arrangement.

The presence of impurities which occur naturally or as an incident to production does not in itself affect the classification of a product as a compound.

(b) The term "compounds", as used in this schedule, includes a solution of a single compound in water, and, in determining the amount of duty on any such compound subject to duty in this schedule at a specific rate, an allowance in weight or volume, as the case may be, shall be made for the water in excess of any water of crystallization which may have been in the compound.
3. (a) The term "mixtures", as used in this schedule, means substances consisting of two or more ingredients (i.e., elements or compounds), whether occurring as such in nature, or whether artificially produced (i.e., brought about by mechanical, physical, or chemical means), which do not bear a fixed ratio to one another and which, however thoroughly commingled, retain their individual chemical properties and are not chemically united. The fact that the ingredients of a product are incapable of separation or have been commingled in definite proportions does not in itself affect the classification of such product as a mixture.
- (b) The term "mixtures", as used in this schedule, includes solutions, except solutions defined as compounds in headnote 2(b) of this schedule.

		<p align="center"><b>PART 1. - BENZENOID CHEMICALS AND PRODUCTS</b></p> <p><u>Part 1 headnotes:</u></p> <p>1. Except as specifically set forth in the headnotes to other parts of this schedule, all products described in this part shall be classified hereunder even if more specifically described elsewhere in this schedule. Any product described in both subparts B and C of this part shall be classified in subpart C.</p> <p>2. For the purposes of this part, the term "<u>modified benzenoid</u>" describes a molecular structure having at least one six-membered heterocyclic ring which contains at least four carbon atoms and having an arrangement of molecular bonds as in the benzene ring or in the quinone ring, but does not include any such molecular structure in which one or more pyrimidine rings are the only modified benzenoid rings present.</p> <p>3. With the exception of the natural products provided for in subpart C, this part does not cover cyclic organic chemical products (such as, but not limited to, tannic, gallic and pyrogalllic acids; estrone, estradiol, and corticosteroids; morphine, ergot, and cinchona alkaloids; rotenone; phenylalanine; tyrosine; epinephrine; and thymols) having a benzenoid, quinoid, or modified benzenoid structure, which are produced from animal or vegetable products in which such structure occurs naturally, unless such cyclic organic chemical products were obtained, derived, or manufactured in part from any product provided for in subpart A, B or C of this part.</p> <p>4. The ad valorem rates provided in this part shall be based upon the American selling price, as defined in section 402 or 402a of this Act, of any similar competitive article manufactured or produced in the United States. If there is no similar competitive article manufactured or produced in the United States then the ad valorem rate shall be based upon the United States value, as defined in the said section 402 or 402a.</p> <p>5. For the purposes of this part, any product provided for in this part shall be considered similar to, or competitive with, any imported product which accomplishes results substantially equal to those accomplished by the domestic product when used in substantially the same manner.</p>

For the purposes of this subpart, inorganic compounds containing only one kind of cation are classifiable according to the cation constituent as indicated in the alphabetical listing set forth in this subpart; and inorganic compounds containing two or more different kinds of cations are classifiable according to the cation constituent thereof first named in the alphabetical listing in this subpart. Inorganic compounds, having no cations or none of the cation constituents of which are named in this subpart, are covered by the provision for other inorganic compounds (item 423.00).

		<b>PART 4. - SYNTHETIC RESINS AND PLASTICS MATERIALS; RUBBER</b>			
		<b>Subpart A. - Synthetic Resins and Plastics Materials</b>			
		<u>Subpart A headnotes:</u>			
		1. This subpart does not cover synthetic plastics materials provided for in part 1C of this schedule, but the addition of any product described in part 1 of this schedule to a synthetic plastics material described in this subpart as an antioxidant, color, dispersing agent, emulsifier, extender, filler, pesticide, plasticizer, or stabilizer does not affect the classification of such synthetic plastics material in this subpart.			
		2. The term "synthetic plastics materials", in this subpart, embraces products formed by the condensation, polymerization, or copolymerization of organic chemicals and to which an antioxidant, color, dispersing agent, emulsifier, extender, filler, pesticide, plasticizer, or stabilizer may have been added. These products contain as an essential ingredient an organic substance of high molecular weight; are capable, at some stage during processing into finished articles, of being molded or shaped by flow; and are solid in the finished article. The term includes, but is not limited to, such products derived from esters of acrylic or methacrylic acid; vinyl acetate, vinyl chloride resins, polyvinyl alcohol, acetals, butyral, formal resins, polyvinyl ether and ester resins, and polyvinylidene chloride resins; urea and amino resins; polyethylene, polypropylene, and other polyalkene resins; siloxanes, silicones, and other organo-silicon resins; alkyd, acrylonitrile, allyl, and formaldehyde resins; and cellulosic plastics materials. These synthetic plastics materials may be in solid, semi-solid, or liquid condition such as flakes, powders, pellets, granules, solutions, emulsions, and other basic crude forms not further processed.

The provision in this subpart for artists', students', and children's pigments and paints assembled into sets (item 474.08) covers only pigments and paints assembled in such container and form, and with such assortment of articles, as to be suitable for sale at retail to artists, students, or children as a paint set, kit, or color outfit.</p> <p>2. The term "paints and enamel paints" in this subpart covers dispersions of pigments or pigment-like materials with a liquid (vehicle) which are suitable for application to surfaces as a thin layer, and which dry (harden) to an opaque, solid film. The vehicle of paints consists of drying oils or resins which bind the pigment particles together in the film; and the vehicle of enamel paints is principally varnish. Paints and enamel paints may also contain thinners, driers, plasticizers, or other agents.</p> <p>3. The term "varnishes" in this subpart covers liquid surface-coating products which contain no pigments or pigment-like materials, and which dry (harden) to a transparent or translucent film. Shellac varnishes are solutions of shellac or any other form of lac in a volatile solvent such as ethyl alcohol. Oleoresinous varnishes consist of resins dissolved in or reacted with a drying oil, to which thinners, driers, and plasticizers may be added. Cellulose-derivative varnishes (lacquers) are solutions of cellulose nitrate or other cellulose derivatives in a volatile solvent.</p> <p>4. The term "stains" in this subpart covers liquids containing transparent or semi-transparent pigments, dyes, or chemicals, chiefly used to deepen or otherwise alter the color of wood, but which will not obscure its grain, texture, or markings.</p>

- (d) in determining which of two or more equally specific provisions for articles "of iron or steel", "of copper", "of aluminum", or "of" other base metals applies to an article containing two or more base metals and wholly or in chief value thereof, the classification shall be made according to the base metal which predominates by weight over each of the other base metals rather than according to the base metal in chief value.

## Schedule 6 statistical headnote 1:

When refined or smelted products are withdrawn for exportation from bonded smelting or refining warehouses established under section 312, Tariff Act of 1930, as amended, that part of each such product which entered into a bonded smelting or refining warehouse as metal-bearing material without the payment of duty thereon, must be reported separately on the warehouse withdrawal form (CF 7512) to show the statistical reporting number for the imported metal-bearing material as reported on the warehouse entry form (CF 7502).

		<p>4. <u>Dutiable Metal Content of Ores and Other Materials:</u> (a) The specific rates of duty imposed under the provisions of this part on the metal content of ores and other materials shall apply to the quantity of metal contained therein as determined by chemical analysis without deductions, whether recovered as metals, as alloys, or as chemical compounds or used directly in the manufacture of articles, except as hereinafter provided in this headnote.</p> <p>(b) <u>Allowable Absolute Deductions for Losses on Copper, Lead, or Zinc Content:</u> With respect to ores or other materials provided for in this part which are subject to duty at specific rates on their copper, lead, or zinc content, absolute deductions from the respective quantities of each of such metal contents as determined by chemical analysis shall be allowed, except when losses which exceed such absolute deductions are allowable as provided in 4(c) of this headnote, as follows:</p> <p>(i) <u>Materials initially treated at copper plants:</u></p> <p>(A) From the copper content, 2 units</p> <p>(B) From the lead content, 2 units plus 50 percent by weight of any remaining lead content</p> <p>(C) From the zinc content, 100 percent by weight</p> <p>(ii) <u>Materials initially treated at lead plants:</u></p> <p>(A) From the copper content, 2 units</p> <p>(B) From the lead content, 2 units</p> <p>(C) From the zinc content, 2 units or 20 percent by weight of the zinc content, whichever is greater</p> <p>(iii) <u>Materials initially treated at zinc plants:</u></p> <p>(A) From the copper content, 2 units</p> <p>(B) From the lead content, 2 units</p> <p>(C) From the zinc content, 6 units</p> <p>(iv) <u>Materials initially treated at other plants:</u></p> <p>(A) From the copper content, 2 units</p> <p>(B) From the lead content, 2 units</p> <p>(C) From the zinc content, 2 units</p> <p>For the purposes of these provisions, one unit is 20 pounds of the respective metal per dry short ton of imported material.</p> <p>(c) <u>Allowable Deductions in lieu of Absolute Deductions on Copper, Lead, or Zinc Content:</u> With respect to ores or other materials provided for in this part which are subject to duty at specific rates on their copper, lead, or zinc content, if more than 90 percent by weight of —</p> <p>(i) the zinc content of the imported materials initially treated at any lead plant,</p> <p>(ii) the copper content of the imported materials initially treated at any zinc plant, or</p> <p>(iii) the copper, lead, or zinc content of the imported materials initially treated at any plant other than a copper, lead, or zinc plant,</p> <p>is lost in processing during the fiscal year at such plant, the rate of loss to be applied to the like content of materials imported during the 12-month period beginning on the first day of the calendar month nearest to 90 days after the close of the said fiscal year to be initially treated at such plant shall be the actual percentage by weight of such losses for such plant during the said fiscal year.</p>

		<p>(d) <u>Claims for Deductions</u>: The deductions provided for in 4(b) and 4(c), supra, do not apply to imported materials unless the importer, at the time entry for consumption or for warehouse is filed, makes claim therefor in writing and certifies as to the name, location, and status of the plant at which the materials are to be initially treated. If material with respect to which a certification has been filed is to be transferred to a plant for initial treatment other than the plant specified in the certification, the importer shall notify the collector at the port of entry in advance of the transfer of the material and the entry shall be liquidated or reliquidated on the basis of the allowable losses for the plant to which transfer is to be made. If the importer fails to so notify the collector or fails to transfer the material after having notified the collector of his intention to do so, no deductions shall be allowable on such material and liquidation or reliquidation of the entry shall be made accordingly.</p> <p>(e) <u>Statements of Losses</u>: If losses are to be claimed under headnote 4(c), supra, for a specific plant, the importer shall, not later than 60 days after the close of each fiscal year, file with the collector of customs of the customs collection district in which the plant is located, a statement of losses for said fiscal year for the plant involved and at the request of the importer said collector shall advise the collectors of customs at other ports designated by the importer of the rates of losses at the said plant.</p> <p>(f) <u>Maintenance of Plant Records</u>: Each plant for which any of the deductions provided for in this headnote are claimed shall maintain records showing the receipt and disposition of each shipment of materials received in the plant and, if losses are to be claimed under headnote 4(c), supra, a record of the losses experienced, and these records shall be made available for inspection by customs officers.</p> <p>5. When, under the procedures set forth in headnote 5 of part 2C of this schedule, the market price of copper is considered to be below 24 cents per pound, a duty of 2 cents per pound on copper content shall apply in lieu of the duty of 1.7 cents per pound on copper content in column 1 of the Rates of Duty columns of items 602.30, 603.50, and 603.55.</p> <p>6. When the classification of imported materials under any provision of this part is dependent on the percentage of metal content, such percentage shall be the ratio of the total quantity of the respective metal content to the total quantity of imported material when computed on a dry-weight basis, i.e., free of all uncombined moisture.</p>

		<p><u>Part 1 statistical headnotes:</u></p> <p>1. For the purposes of this part--</p> <p>(a) the statistical reporting requirements for lead-, zinc-, or copper-bearing ores differ from the usual requirements in that multiple numbers must be used to report a single commodity. In all cases where ores are dutiable on the metal content under one or more of the items 602.10-.31, one or more of the reporting numbers under items 601.03-.66 must also be shown on separate lines on the import entry form. For example, a shipment of zinc concentrates to be initially treated at a zinc plant and containing also lead and copper (in excess of 2 percent by weight, as determined by chemical analysis without deductions), and also gold and silver, shall be reported under the following eight reporting numbers:</p> <p>601.6621 (lead content), 601.6622 (zinc content), 601.6623 (copper content), 601.6624 (gold content), 601.6625 (silver content), 602.1021 (dutyable lead content), 602.2022 (dutyable zinc content), and 602.3023 (dutyable copper content);</p> <p>(b) the 7-digit reporting numbers under items 601.39, 601.66, 603.50, 603.55, and 603.65 are not mutually exclusive. For example, a material classifiable under item 603.55 and containing lead, copper, gold, and silver would require the numbers 603.5510 (lead content), 603.5530 (copper content), 603.5540 (gold content), and 603.5550 (silver content). The quantity and value of each component metal of the material should be shown with the corresponding 7-digit number;</p> <p>(c) the quantity of metal content to be reported shall be the assay quantity without deductions unless otherwise specified;</p> <p>(d) for lead-, copper-, or zinc-bearing ores separate values for each such metal shall be reported in connection with the quantities reported under items 602.10, 602.20, or 602.30. The value of the gold or silver content, if any, shall be reported in connection with the appropriate 7-digit number in item 601.39 or 601.66. The sum of the separate values shown shall be equal to the total value of the ore; and</p> <p>(e) for precious metal ores classifiable under item 601.39 and not containing dutiable amounts of lead, zinc, or copper separate values for gold, silver, or "other precious metal" content shall be reported in connection with the corresponding 7-digit item number found therein.</p>

Unless the context requires otherwise, the provisions of this part apply to the products described by whatever process made (i.e., whether rolled, forged, drawn, extruded, cast or sintered) and whether or not such products have been subjected to treatments to improve the properties or appearance of the metals or to protect them against rusting, corrosion or other deterioration. These treatments include annealing, tempering, case-hardening and similar heat-treatments or nitriding; descaling, pickling, scraping, scaling and other processes to remove oxidation scale and crust; rough coating with oil, tar, grease, red lead, or other material to prevent rusting; polishing, burnishing, glazing, artificial oxidation, phosphatizing, and other finishing treatments; metallization by cementation, by electroplating, by immersion in a bath of molten metal, or by other means; coating with enamel, paint, lacquer, or other non-metallic substances; and cladding. This part does not include —</p> <p>(i) insulated electric conductors (see part 5 of this schedule);</p> <p>(ii) milliners' wire and other wire covered with textile or other nonmetallic material (see part 3B of this schedule);</p> <p>(iii) leaf and foil (see part 3C of this schedule); or</p> <p>(iv) other articles specially provided for elsewhere in the tariff schedules, or parts of articles.</p> <p>2. <u>Alloys.</u> — (a) For the purposes of the tariff schedules, alloys are defined and classifiable as hereinafter set forth. Alloys are metallic substances consisting of two or more metals, or of one or more metals and one or more non-metals, intimately united, usually by having been fused together and which may or may not have been dissolved in each other when molten; they include sintered mixtures of metal powders and heterogeneous intimate mixtures obtained by fusion, but do not include substances in which the total weight of the metals does not equal or exceed the total weight of the non-metal components.</p> <p>(b) <u>Precious-metal alloys</u> are alloys which contain 2 percent or more by weight of one or more metals of the platinum group, of gold, or of silver. Precious-metal alloys are classifiable as —</p> <p>(i) alloys of platinum, if they contain 2 percent or more by weight of one or more metals of the platinum group;</p> <p>(ii) alloys of gold, if they contain 2 percent or more by weight of gold, but contain no metal of the platinum group or less than 2 percent by weight thereof; and</p> <p>(iii) alloys of silver, if they contain 2 percent or more by weight of silver, and are not alloys of platinum or alloys of gold, as defined in b(i) and b(ii), respectively, of this headnote.</p>

		<p>Subpart C. - Copper<sup>1/</sup></p> <p><u>Subpart C headnotes:</u></p> <p>1. This subpart covers copper, its alloys, and their so-called basic shapes and forms, and in addition covers copper waste and scrap.</p> <p>2. For the purposes of the tariff schedules, the following terms have the meanings indicated:</p> <p>(a) <u>Alloys of copper:</u> Copper-base alloys or metals in which the copper content is, by weight, less than 99.3 percent, but not less than any other metallic element. For the purposes of this subpart --</p> <p>(i) <u>nickel silver</u> is an alloy of copper which contains by weight 5 percent or more of zinc and 5 percent or more of nickel, with or without small quantities of other elements;</p> <p>(ii) <u>brass</u> is an alloy of copper (not including nickel silver) in which zinc is the principal alloying element, with or without small quantities of other elements;</p> <p>(iii) <u>cupro-nickel</u> is an alloy of copper in which nickel is the principal alloying element and which does not contain by weight over 2 percent of any other single element.</p> <p>In the absence of context which requires otherwise, the term "<u>copper</u>", wherever used in the tariff schedules, includes alloys of copper.</p> <p>(b) <u>Master alloys:</u> Alloys of copper with other materials in any proportion, not usefully malleable and commonly used as raw material in the manufacture of other alloys or as de-oxidants, de-sulphurizing agents or for similar uses in the metallurgy of nonferrous metals. For the purposes of this subpart --</p> <p>(i) <u>manganese copper</u> is a master alloy which contains copper and manganese, in which the manganese content ranges by weight from 5 to 45 percent, with copper the balance; and</p> <p>(ii) <u>phosphor copper</u> is a master alloy which contains phosphorus and copper, in which the phosphorus content ranges by weight from 5 to 16 percent, with copper the balance.</p> <p>3. For the purposes of this subpart, the following terms have the meanings indicated:</p> <p>(a) <u>Bars and plate:</u> Products of solid rectangular cross section over 0.188 inch in thickness, in coils or cut to length, whether or not corrugated or crimped. Bars are not over 12 inches in width and plates are over 12 inches in width.</p> <p>(b) <u>Sheets and strips:</u> Products of solid rectangular cross section not over 0.188 inch but over 0.006 inch in thickness, in coils or cut to length, whether or not corrugated or crimped. Sheets are over 20 inches in width; strips are not over 20 inches in width and do not include flat wire, as defined in (d) below.</p> <p><sup>1/</sup> Copper waste and scrap and certain copper articles are the subject of temporary legislation. See part 1B of the Appendix to the Tariff Schedules.</p>

		<p>(c) <u>Rods</u>: Products of round, half-round, quarter-round, oval, half-oval, triangular, pentagonal, hexagonal, octagonal, or decagonal solid cross section, in straight lengths or in coils, and which if in coils is over 0.375 inch in maximum cross-sectional dimension.</p> <p>(d) <u>Wire</u>: A non-tubular product of any cross-sectional configuration, which if flat is in coils or straight lengths, not over 1.25 inches in width, not over 0.188 inch in thickness, and has all surfaces rolled or drawn, and which if not flat is not over 0.375 inch in maximum cross-sectional dimension and is in coils.</p> <p>(e) <u>Angles, shapes, and sections</u>: Products which do not conform completely to the respective definitions set forth in this headnote for bars, plates, sheets, strip, rods, or wire, and do not include any tubular products.</p> <p>4. For the purposes of this subpart, any continuous cast product, whether or not machined or otherwise processed, which is substantially comparable to, and suitable for the same general purposes as, a wrought product provided for in this subpart shall be classified under the same provision and at the same rate as such wrought product, notwithstanding the provisions of headnotes 3(a) and 3(c) of this part.</p> <p>5. <u>Determination of Market Price of Copper for Rate of Duty Purposes.</u>—(a) In this subpart, column 1 of the Rates of Duty columns has been divided into two columns, viz., 1-a and 1-b. The rates of duty in column 1-a apply when the market price of copper is 24 cents or more per pound, and the rates of duty in column 1-b apply when the market price of copper is under 24 cents per pound.</p> <p>(b) For the purposes of the provisions in part 1 of this schedule relating to copper-bearing materials covered by headnote 5 of said part 1, and of the provisions of this subpart, the market price of copper is the average market price per pound for one calendar month of electrolytic copper in standard shapes and sizes, delivered Connecticut Valley, as determined by the United States Tariff Commission and reported to the Secretary of the Treasury in accordance with procedures set forth below.</p> <p>(c) The market price of copper, as defined above, shall be considered to be below 24 cents per pound only on and after the 20th day after the date of a report by the United States Tariff Commission to the Secretary of the Treasury that it has determined that the said market price has been below 24 cents per pound for one calendar month.</p> <p>(d) After any report by the United States Tariff Commission to the Secretary of the Treasury as provided for in (b) above, the said market price shall be considered as not being below 24 cents per pound only on and after the 20th day after the date of a report by the said Commission to the said Secretary that it has determined that the said market price has been 24 cents or more per pound for one calendar month.</p> <p>(e) Determinations by the said Commission of the market price of electrolytic copper shall be based upon sources commonly resorted to by the buyers of copper in the usual channels of commerce, including, but not limited to, quotations of the market price for electrolytic copper, in standard shapes and sizes, delivered Connecticut Valley, reported by the Engineering and Mining Journal's "Metal and Mineral Markets".</p>

<p><b>Subpart E. - Watches, Clocks, and Timing Apparatus</b></p> <p><u>Subpart E headnotes:</u></p> <p>1. This subpart covers watches and clocks, time switches and other timing apparatus with clock or watch movements, and parts of these articles. This subpart, however, does not cover —</p> <p>(i) synchronous or subsynchronous motors (see part 5 of schedule 6);</p> <p>(ii) screws, nuts, and bolts (see part 30 of schedule 6);</p> <p>(iii) music boxes and their mechanisms (see part 3 of schedule 7);</p> <p>(iv) combination articles provided for elsewhere in the tariff schedules; or</p> <p>2. For the purposes of this subpart —</p> <p>(a) the term "<u>watches</u>" embraces timepieces (including timepieces having special features, such as chronographs, calendar watches, stopwatches, and watches designed for use in skindiving) suitable for wearing or carrying on or about the person, whether or not the movement therein is within the definition of "watch movement" in headnote 2(b), below;</p> <p>(b) the term "<u>watch movement</u>" means a timepiece movement measuring less than 1.77 inches in width and less than 0.50 inch in thickness;</p> <p>(c) the term "<u>clock movement</u>" means any movement or mechanism, other than "watch movements" as defined in headnote 2(b), above, intended or suitable for measuring time;</p> <p>(d) the term "<u>cases</u>" embraces inner and outer cases, containers, and housings for movements, together with parts or pieces, such as, but not limited to, rings, feet, posts, bases, and outer frames, and any auxiliary or incidental features, which (with appropriate movements) serve to complete the watches, clocks, time switches, and other apparatus provided for in this subpart; and</p> <p>(e) the term "<u>jewels</u>" includes substitutes for jewels.</p> <p>3. (a) In this subpart, column 1 of the Rates of Duty columns with respect to watch movements having not over 7 jewels has been divided into two columns, viz., 1-a and 1-b. The rates of duty in columns 1-a apply to watch movements which have 7 jewels or which, if having less than 7 jewels, do not have a bushing or its equivalent (other than a substitute for a jewel) in any position customarily occupied by a jewel. The rates of duty in column 1-b apply to watch movements having under 7 jewels and having a bushing or its equivalent (other than a substitute for a jewel) in any position customarily occupied by a jewel.</p> <p>(b) The complete citation for watches covered by item 715.05 and clocks covered by item 715.15 shall be each of such item numbers, followed by the appropriate item numbers for the respective movements and cases comprising such watches or clocks. Thus, item 715.05-716.08-720.20 is the correct citation for a watch in a gold case having over 17 jewels.</p>

Item	Stat. Suf- fix	Articles	Units of Quantity	Rates of Duty

		<p>(c) In this subpart, each of the rates of duty provided for watch movements, having no jewels or not over 17 jewels, not adjusted, not self-winding, and not constructed or designed to operate for a period in excess of 47 hours without rewinding (items 716.10 through 716.36, inclusive) is also the "base rate" for watch movements having the same width and number of jewels covered by items 717.—, 718.—, and 719.—. For citation purposes, the two blanks on the end of each of the latter item numbers shall be filled in with the last two digits of the item number for the applicable base rate. Thus, "item 717.31" would be the citation for an adjusted watch movement, 0.7 inch wide, having 17 jewels, but not self-winding and not constructed or designed to operate for a period in excess of 47 hours without rewinding.</p> <p>(d) The width of a watch or clock movement, as defined in headnote 2(b) and (c) of this subpart, is the shortest surface dimension through the center of the pillar or bottom plate, or its equivalent, not including in the measurement any portion not essential to the functioning of the movement; and the thickness of a "watch movement", as so defined, is the maximum thickness between the outside surfaces of the plate and bridges, or their equivalents.</p> <p>(e) The additional duty for adjustments to watch movements applies to each adjustment of whatever kind (treating adjustment to temperature as two adjustments), in accordance with the marking as hereinafter provided for.</p> <p>(f) Bimetallic balance wheels which are not part of balance assemblies, and mainsprings with riveted ends, are each to be considered as one part or piece, for the purposes of assessing duties on assemblies and subassemblies provided for in items 720.75, 720.80, 720.82, 720.84, and 720.86.</p> <p>4. <u>Special Marking Requirements:</u> Any movement, case, or dial provided for in this subpart, whether imported separately or attached to an article provided for in this subpart, shall not be permitted to be entered unless conspicuously and indelibly marked by cutting, die-sinking, engraving, or stamping, as specified below:</p> <p>(a) Watch movements shall be marked on one or more of the bridges or top plates to show —</p> <p>(i) the name of the country of manufacture,</p> <p>(ii) the name of the manufacturer or purchaser,</p> <p>(iii) In Arabic numerals and in words, the number of jewels, if any, serving a mechanical purpose as frictional bearings; and</p> <p>(iv) In Arabic numerals and in words, the number and classes of adjustments, or, if unadjusted, the word "unadjusted".</p> <p>(b) Clock movements shall be marked on the most visible part of the front or back plate to show —</p> <p>(i) the name of the country of manufacture,</p> <p>(ii) the name of the manufacturer or purchaser, and</p> <p>(iii) the number of jewels, if any.</p> <p>(c) Watch cases shall be marked on the inside or outside of the back cover to show —</p> <p>(i) the name of the country of manufacture, and</p> <p>(ii) the name of the manufacturer or purchaser.</p>

		<p>(d) Clock cases and other cases provided for in this subpart shall be marked on the most visible part of the outside of the back to show the name of the country of manufacture; and</p> <p>(e) Dials shall be marked to show the name of the country of manufacture, which marking, if the dial is imported attached to any of the articles provided for in this part, shall be placed on the face of the dial in such manner as not to be obscured by any part of the case.</p> <p><b>① 5. Combination Articles Containing Watch or Clock Movements.</b>—A watch or clock movement (and its dial, if any) in a combination article is classifiable under the provision applicable to such combination article, but, in determining the duties on the combination article, the movement (and its dial, if any) shall be constructively separated therefrom and assessed with the same rate as would have applied if it had been imported separately. In such circumstances, the movement and its dial shall also be subject to the same marking requirements provided for in headnote 4 of this subpart. However, such separate assessment and special marking shall not be applicable to movements which, when imported, are installed as the usual equipment of vehicles or craft provided for in part 6 of schedule 6 or as integral and essential parts of laboratory, industrial, or commercial apparatus or equipment.</p> <p><u>Subpart E statistical headnotes:</u></p> <p>1. (a) The statistical reporting numbers for watches (item 715.05) and for clocks containing movements measuring less than 1.77 inches in width (item 715.15) are a combination of three 7-digit numbers, viz., the 7-digit number for the imported watch (715.0500) or clock (715.1500), and the 7-digit numbers which would have applied to the movement and to the case if they had been imported separately. Thus, the correct reporting number for a watch with a 15-jewel adjusted but not self-winding movement not over 0.6 inch in width and a gold case is "715.0500-933.3015-720.2000".</p> <p>(b) The number and value of imported watches or clocks, and of their movements and cases must be reported separately with their respective 7-digit numbers.</p> <p>(c) For the statistical reporting of watch movements under items 716.30-.36 the 2-digit statistical suffix shall be the actual number of jewels in the movement. For example, the suffix for a movement having 9 jewels would be "09"; similarly, the suffix for a 15 jewel movement would be "15".</p>

**Tariff Schedules of the United States Annotated (1965)****EXPLANATORY KEY TO CHANGES**

## EXPLANATORY KEY TO CHANGES

This key, which shows the chronological development of the provisions both legal and statistical, is designed to serve as a bridge between the Tariff Schedules of the United States Annotated (1963) and the current edition. The principal changes carried over from the first edition are, as indicated below, covered by a common symbol in this edition.

The changes appear in the key in the same order as the affected provisions appear in the annotated schedules. Each change is identified as follows:

- Open Star       - Changes carried over from TSUSA (1963).
- Dagger       - Changes made by the enactment of the "Tariff Schedules Technical Amendments Act of 1965" (TAA of 1965, P.L. 89-241).
- Open Palm       - Changes made by the enactment of the "Automotive Products Trade Act of 1965" (APTA of 1965, P.L. 89-283).
- Triangle       - All other changes which are shown for the first time in this edition.

The effective date of each change <sup>1/</sup> and, in appropriate cases, the authority therefor are shown in the effective date column. It is intended, when supplements are issued, that the changes therein will be inserted in this key and identified by its special symbol, e.g.,  showing the supplement in which it appears.

---

<sup>1/</sup> With respect to the TAA the effective date is governed by Sec. 2 of P.L. 89-241 which reads as follows:

## SEC. 2. EFFECTIVE DATE.

(a) Except as otherwise provided, the amendments and repeals made by this Act shall apply with respect to articles entered, or withdrawn from warehouse, for consumption after the 60th day after the date of the enactment of this Act.

(b) Upon request therefor filed with the collector of customs concerned on or before the 120th day after the date of the enactment of this Act, the entry or withdrawal of any article--

(1) which was made after August 30, 1963, and before the 61st day after the date of the enactment of this Act, and

(2) with respect to which the amount of duty would be smaller if the amendments and repeals made by this Act (other than the amendments made by sections 28(a), 53(a), 78 (a) and (b), and 87(a)) applied to such entry or withdrawal,

shall, notwithstanding the provisions of section 514 of the Tariff Act of 1930 or any other provision of law, be liquidated or reliquidated as though such entry or withdrawal had been made on the 61st day after the date of the enactment of this Act.

With respect to the APTA the effective date is governed by Sec. 201 which reads as follows:

Sec. 201. (a) The President is authorized to proclaim the modifications of the Tariff Schedules of the United States provided for in title IV of this Act.

(b) At any time after the issuance of the proclamation authorized by subsection (a), the President is authorized to proclaim further modifications of the Tariff Schedules of the United States to provide for the duty-free treatment of any Canadian article which is original motor-vehicle equipment (as defined by such Schedules as modified pursuant to subsection (a)) if he determines that the importation of such article is actually or potentially of commercial significance and that such duty-free treatment is required to carry out the Agreement.

The President on October 21, 1965 issued Proclamation

bringing the tariff modifications into force on December 20, 1965 but retroactive to January 18, 1965.
