of Tariff Schedules

United States International Trade Commission

Washington, DC 20436

Such requests should precisely indicate the nature of each desired change and give detailed reasons in support of the request.

^{1/} Sec. 484(e), as amended, reads as follows:

[&]quot;(e) Statistical Enumeration. -- The Secretary of the Treasury, the Secretary of Commerce, and the United States International Trade Commission are authorized and directed to establish from time to time for statistical purposes an enumeration of articles in such detail as in their judgment may be necessary, comprehending all merchandise imported into the United States and exported from the United States, and shall seek, in conjunction with statistical programs for domestic production and programs for achieving international harmonization of trade statistics, to establish the comparability thereof with such enumeration of articles. GENERAL NOTES

- 1. <u>Tariff Treatment of Imported Goods</u>. All goods provided for in this schedule and imported into the customs territory of the United States from outside thereof are subject to duty or exempt therefrom as prescribed in general notes 3 and 4.
- Customs Territory of the United States. The term "customs territory of the United States", as used in the tariff schedule, includes only the States, the District of Columbia and Puerto Rico.
- 3. Rates of Duty. The rates of duty in the "Rates of Duty" columns designated 1 ("General" and "Special") and 2 of the tariff schedule apply to goods imported into the customs territory of the United States as hereinafter provided in this note:

(a) Rate of Duty Column 1.

- (i) Except as provided in subparagraph (iv) of this paragraph, the rates of duty in column 1 are rates which are applicable to all products other than those of countries enumerated in paragraph (b) of this note. Column 1 is divided into two subcolumns, "General" and "Special", which are applicable as provided below.
- (ii) The "General" subcolumn sets forth the general most-favored-nation (MFN) rates which are applicable to products of those countries described in subparagraph (i) above which are not entitled to special tariff treatment as set forth below.
- (iii) The "Special" subcolumn reflects rates of duty under one or more special tariff treatment programs described in paragraph (c) of this note and identified in parentheses immediately following the duty rate specified in such subcolumn. These rates apply to those products which are properly classified under a provision for which a special rate is indicated and for which all of the legal requirements for eligibility for such program or programs have been met. Where a product is eligible for special treatment under more than one program, the lowest rate of duty provided for any applicable program shall be imposed. Where no special rate of duty is provided for a provision, or where the country from which a product otherwise eligible for special treatment was imported is not designated as a beneficiary country under a program appearing with the appropriate provision, the rates of duty in the "General" subcolumn of column 1 shall apply.

(iv) Products of Insular Possessions.

- (A) Except as provided in additional U.S. note 5 of chapter 91 and except as provided in additional U.S. note 3 of chapter 96, and except as provided in section 423 of the Tax Reform Act of 1986, goods imported from insular possessions of the United States which are outside the customs territory of the United States are subject to the rates of duty set forth in column 1 of the tariff schedule, except that all such goods the growth or product of any such possession, or manufactured or produced in any such possession from materials the growth, product or manufacture of any such possession or of the customs territory of the United States, or of both, which do not contain foreign materials to the value of more than 70 percent of their total value (or more than 50 percent of their total value with respect to goods described in section 213(b) of the Caribbean Basin Economic Recovery Act), coming to the customs territory of the United States directly from any such possession, and all goods previously imported into the customs territory of the United States with payment of all applicable duties and taxes imposed upon or by reason of importation which were shipped from the United States, without remission, refund or drawback of such duties or taxes, directly to the possession from which they are being returned by direct shipment, are exempt from duty.
- (B) In determining whether goods produced or manufactured in any such insular possession contain foreign materials to the value of more than 70 percent, no material shall be considered foreign which either--
 - (1) at the time such goods are entered, or
 - (2) at the time such material is imported into the insular possession,

may be imported into the customs territory from a foreign country, and entered free of duty; except that no goods containing material to which (2) of this subparagraph applies shall be exempt from duty under subparagraph (A) unless adequate documentation is supplied to show that the material has been incorporated into such goods during the 18-month period after the date on which such material is imported into the insular possession.

 - (i) sampling,
 - (ii) verification of packing lists or other documents filed at the time of entry, or
 - (iii) evidence showing performance of commercial settlement tests generally accepted in the trade and filed in such time and manner as may be prescribed by regulations of the Secretary of the Treasury,

- (b) Every segregation of goods made pursuant to this note shall be accomplished by the consignee or his agent at the risk and expense of the consignee within 30 days (unless the Secretary authorizes in writing a longer time) after the date of personal delivery or mailing, by such employee as the Secretary of the Treasury shall designate, of written notice to the consignee that the goods are commingled and that the quantity or value of each class of goods cannot be readily ascertained by customs officers. Any goods with respect to which such proof is furnished shall be considered for all customs purposes to be dutiable at the rate applicable to the material present in greater quantity than any other material.

- 8. <u>Issuance of Rules and Regulations</u>. The Secretary of the Treasury is hereby authorized to issue rules and regulations governing the admission of articles under the provisions of the tariff schedule. The allowance of an importer's claim for classification, under any of the provisions of the tariff schedule which provides for total or partial relief from duty or other import restrictions on the basis of facts which are not determinable from an examination of the article itself in its condition as imported, is dependent upon his complying with any rules or regulations which may be issued pursuant to this note.
- 9. Methods of Ascertainment. The Secretary of the Treasury is authorized to prescribe methods of analyzing, testing, sampling, weighing, gauging, measuring or other methods of ascertainment whenever he finds that such methods are necessary to determine the physical, chemical or other properties or characteristics of articles for purposes of any law administered by the Customs Service.

GENERAL RULES OF INTERPRETATION

Classification of goods in the tariff schedule shall be governed by the following principles:

- The table of contents, alphabetical index, and titles of sections, chapters and sub-chapters are provided for ease of reference only; for legal purposes, classification shall be determined according to the terms of the headings and any relative section or chapter notes and, provided such headings or notes do not otherwise require, according to the following provisions:
- 2. (a) Any reference in a heading to an article shall be taken to include a reference to that article incomplete or unfinished, provided that, as entered, the incomplete or unfinished article has the essential character of the complete or finished article. It shall also include a reference to that article complete or finished (or falling to be classified as complete or finished by virtue of this rule), entered unassembled or disassembled.
 - (b) Any reference in a heading to a material or substance shall be taken to include a reference to mixtures or combinations of that material or substance with other materials or substances. Any reference to goods of a given material or substance shall be taken to include a reference to goods consisting wholly or partly of such material or substance. The classification of goods consisting of more than one material or substance shall be according to the principles of rule 3.
- 3. When, by application of rule 2(b) or for any other reason, goods are, *prima facie*, classifiable under two or more headings, classification shall be effected as follows:
 - (a) The heading which provides the most specific description shall be preferred to headings providing a more general description. However, when two or more headings each refer to part only of the materials or substances contained in mixed or composite goods or to part only of the items in a set put up for retail sale, those headings are to be regarded as equally specific in relation to those goods, even if one of them gives a more complete or precise description of the goods.
 - (b) Mixtures, composite goods consisting of different materials or made up of different components, and goods put up in sets for retail sale, which cannot be classified by reference to 3(a), shall be classified as if they consisted of the material or component which gives them their essential character, insofar as this criterion is applicable.
 - (c) When goods cannot be classified by reference to 3(a) or 3(b), they shall be classified under the heading which occurs last in numerical order among those which equally merit consideration.
- 4. Goods which cannot be classified in accordance with the above rules shall be classified under the heading appropriate to the goods to which they are most akin.
- 5. In addition to the foregoing provisions, the following rules shall apply in respect of the goods referred to therein:
 - (a) Camera cases, musical instrument cases, gun cases, drawing instrument cases, necklace cases and similar containers, specially shaped or fitted to contain a specific article or set of articles, suitable for long-term use and entered with the articles for which they are intended, shall be classified with such articles when of a kind normally sold therewith. This rule does not, however, apply to containers which give the whole its essential character;
 - (b) Subject to the provisions of rule 5(a) above, packing materials and packing containers entered with the goods therein shall be classified with the goods if they are of a kind normally used for packing such goods. However, this provision does not apply when such packing materials or packing containers are clearly suitable for repetitive use.
- 6. For legal purposes, the classification of goods in the subheadings of a heading shall be determined according to the terms of those subheadings and any related subheading notes and, *mutatis mutandis*, to the above rules, on the understanding that only subheadings at the same level are comparable. For the purposes of this rule, the relative section, chapter and subchapter notes also apply, unless the context otherwise requires.

ADDITIONAL U.S. RULES OF INTERPRETATION

- 1. In the absence of special language or context which otherwise requires--
 - (a) a tariff classification controlled by use (other than actual use) is to be determined in accordance with the use in the United States at, or immediately prior to, the date of importation, of goods of that class or kind to which the imported goods belong, and the controlling use is the principal use;
 - (b) a tariff classification controlled by the actual use to which the imported goods are put in the United States is satisfied only if such use is intended at the time of importation, the goods are so used and proof thereof is furnished within 3 years after the date the goods are entered;
 - (c) a provision for parts of an article covers products solely or principally used as a part of such articles but a provision for "parts" or "parts and accessories" shall not prevail over a specific provision for such part or accessory; and
 - (d) the principles of section XI regarding mixtures of two or more textile materials shall apply to the classification of goods in any provision in which a textile material is named.

GENERAL STATISTICAL NOTES

1. Statistical Requirements for Imported Goods.

- (a) Persons making customs entry or withdrawal of goods imported into the customs territory of the United States shall complete the entry summary or withdrawal forms, as provided herein and in regulations issued pursuant to law, to provided for statistical purposes information as follows:
 - (i) the number of the Customs district and of the port where the goods are being entered for consumption or warehouse, as shown in Statistical Annex A of the tariff schedule;
 - (ii) the name of the vessel or the name of the airline, or in the case of shipment by other than vessel or air, the means of transportation by which the goods first arrived in the United States;
 - (iii) the foreign port of lading;
 - (iv) the U.S. port of unlading for vessel and air shipments;
 - (v) the date of importation;
 - (vi) the country of origin of the goods expressed in terms of the designation therefor in Statistical Annex B of the tariff schedule;
 - (vii) the country of exportation expressed in terms of the designation therefor in Statistical Annex B of the tariff schedule;
 - (viii) the date of exportation;
 - (ix) a description of the goods in sufficient detail to permit the classification thereof under the proper statistical reporting number in the tariff schedule;
 - (x) the statistical reporting number under which the goods are classifiable, including the appropriate check digit placed as a suffix to each 10-digit number and the appropriate symbol placed as a prefix to the statistical reporting number when claiming special tariff treatment as provided for in general note 3(c)(i) (asterisks, however, are not to be reported with or in place of the symbol prefix, e.g. for the Generalized System of Preferences only the "A" and not the asterisk shall be reported);
 - (xi) gross weight in kilograms for the goods covered by each reporting number for all modes of transportation;
 - (xii) the net quantity in the units specified herein for the classification involved and with the units noted;
 - (xiii) the U.S. dollar value in accordance with the definition of section 402 of the Tariff Act of 1930, as amended, for all merchandise including that free of duty or dutiable at specific rates;
 - (xiv) the aggregate cost (not including U.S. import duty, if any), in U.S. dollars, of freight, insurance and all other charges, costs and expenses (each of which charges, costs and expenses shall be separately itemized on or attached to the related invoice) incurred (except as provided below) in bringing the merchandise from alongside the carrier at the port of exportation in the country of exportation and placing it alongside the carrier at the first U.S. port of entry. In the case of overland shipments originating in Canada or Mexico, such costs shall include freight, insurance, and all other charges, costs and expenses incurred in bringing the merchandise from the point of origin (where the merchandise begins its journey to the United States) in Canada or Mexico to the first U.S. port of entry; and
 - (xv) such other information with respect to the imported goods as is provided for elsewhere in the tariff schedule.
- (b) For the purpose of paragraph (a), the following provisions shall govern:
 - (i) the country of exportation shall be the country of origin except when the merchandise while located in a third country is the subject of a new purchase in which event the third country shall be regarded and reported as the country of exportation, and the date of exportation from the third country shall be regarded and reported as the date of exportation; and
 - (ii) in the event that information for the purposes of subparagraph (xiv) of paragraph (a) cannot be readily obtained, the person making the entry or withdrawal shall provide reasonable estimates of such information. The acceptance of an estimate for a particular transaction does not necessarily relieve the person making the entry or withdrawal from obtaining the necessary information for similar future transactions.

2. Statistical Annotations.

- (a) The statistical annotations to the Harmonized Tariff Schedule of the United States consist of-
 - (i) the 2-digit statistical suffixes and any article descriptions applicable thereto,
 - (ii) the check digits,
 - (iii) the indicated units of quantity, and
 - (iv) the statistical notes and annexes.
- (b) The legal text of the Harmonized Tariff Schedule of the Unites States consists of the remaining text as more specifically identified in the general rules of interpretation.

3. Statistical Reporting Number.

- (a) Except as provided in paragraph (b) of this note, and in the absence of specific instructions to the contrary elsewhere, the statistical reporting number for an article consists of the 10-digit number formed by combining the 8-digit subheading number with the appropriate 2-digit statistical suffix. Thus, the statistical reporting number for live monkeys dutiable under subheading 0106.00.50 is "0106.00.5010". As explained in note 1(a)(x) above, the appropriate check digit is to be added as a suffix to this 10-digit statistical reporting number when completing entry summary or withdrawal forms.
- (b) Whenever in the tariff schedule an article is classifiable under a provision which derives its rate of duty from a different provision, the statistical reporting number is, in the absence of specific instructions to the contrary elsewhere, the 10-digit number for the basic provision followed by the 10-digit subheading number of the provision from which the rate is derived. Thus, the statistical reporting number of mountings for optical telescopes is "9005.90.0000-9005.80.4040". As explained in note 1(a)(x) above, the appropriate check digit is to be added as a suffix to the 10-digit number under which the goods are classified when completing entry summary or withdrawal forms. If multiple statistical reporting numbers are shown for the subheading from which the duty rate is derived and the shipment contains articles covered by more than one statistical reporting number from the subheading, then report the last applicable statistical reporting number only.

4. Abbreviations.

- (a) An "X" appearing in the column for units of quantity means that no quantity (other than gross weight) is to be reported.
- (b) Whenever two separate units of quantity are shown for the same article, the "v" following one of such units means that the value of the article is to be reported with that quantity.
- (c) The following symbols and abbreviations are used with the meanings respectively indicated below:

gr. containers - gross containers
ISIS - Institute of Scrap Iron and Steel
ode - ozone depletion equivalent

5. Reporting of exports.

Except as noted below, the statistical reporting numbers for articles classified in chapters 1 through 97 of this schedule may be used in place of comparable Schedule B numbers on the Shipper's Export Declaration. Statistical reporting numbers for articles covered by chapters 98 and 99 of this schedule may only be used on import entries. Schedule B numbers may not be reported on import entries in place of HTS numbers. Statistical reporting numbers used on the Shipper's Export Declaration should not include any symbols in the form of prefixes used to denote special tariff treatment. For purposes of the Shipper's Export Declaration, the check digit should be reported along with either the HTS number or the Schedule B number.

NOTICE TO EXPORTERS

Through this notice, this publication may be used in place of the reporting codes of Schedule B for reporting exports on the Shipper's Export Declaration or under the program for electronic reporting of exports.

Except as noted below, the statistical reporting numbers (with the appropriate check digits, article descriptions and units of quantity) for articles falling in Chapters 1 through 97 may be used in place of those in Schedule B. The special prefix symbols which denote special tariff treatment should not be included.

MEAT AND EDIBLE MEAT OFFAL

I 2-1

Note

- 1. This chapter does not cover:
 - (a) Products of the kinds described in headings 0201 to 0208 or 0210, unfit or unsuitable for human consumption;
 - (b) Guts, bladders, or stomachs of animals (heading 0504) or animal blood (heading 0511 or 3002); or
 - (c) Animal fat, other than products of heading 0209 (chapter 15)

Additional U.S. Notes

- 1. For the purposes of this chapter--
 - (a) The term "processed" covers meats which have been ground or comminuted, diced or cut into sizes for stew meat or similar uses, rolled and skewered, or specially processed into fancy cuts, special shapes, or otherwise made ready for particular uses by the retail consumer.
 - (b) The term "high-quality beef cuts" means beef specially processed into fancy cuts, special shapes, or otherwise made ready for particular uses by the retail consumer (but not ground or comminuted, diced or cut into sizes for stew meat or similar uses, or rolled or skewered), which meets the specifications in regulations issued by the U.S. Department of Agriculture for Prime or Choice beef, and which has been so certified prior to exportation by an official of the government of the exporting country, in accordance with regulations issued by the Secretary of the Treasury after consultation with the Secretary of Agriculture.
- In assessing the duty on meats, no allowance shall be made for normal components thereof such as bones, fat, and hide or skin. The dutiable weight of meats in airtight containers subject to specific rates includes the entire contents of the containers.

CHAPTER 5

PRODUCTS OF ANIMAL ORIGIN, NOT ELSEWHERE SPECIFIED OR INCLUDED

I 1-1

Notes:

- 1. This chapter does not cover:
 - (a) Edible products (other than guts, bladders and stomachs of animals, whole and pieces thereof, and animal blood, liquid or dried);
 - (b) Hides or skins (including furskins) other than goods of heading 0505 and parings and simlar waste of raw hides or skins of heading 0511 (chapter 41 or 43);
 - (c) Animal textile materials, other than horsehair and horsehair waste (section XI); or
 - (d) Prepared knots or tufts for broom or brush making (heading 9603).
- For the purposes of heading 0501, the sorting of hair by length (provided the root ends and tip ends, respectively, are not arranged together) shall be deemed not to constitute working.
- Throughout the tariff schedule, elephant, walrus, narwhal and wild boar tusks, rhinoceros horns and the teeth of all animals are regarded as "<u>ivory</u>."
- 4. Throughout the tariff schedule, the expression "horsehair" means hair of the manes or tails of equine or bovine animals.

Additional U.S. Note

- (a) Except as provided in paragraphs (b) and (c) of this note, the importation of the feathers or skin of any bird is hereby prohibited. Such prohibition shall apply to the feathers or skin of any bird:
 - (i) Whether raw or processed;
 - (ii) Whether the whole plumage or skin or any part of either;
 - (iii) Whether or not attached to a whole bird or any part thereof; and
 - (iv) Whether or not forming part of another article.
 - (b) Paragraph (a) shall not apply:
 - (i) In respect of any of the following birds (other than any such bird which, whether or not raised in captivity, is a wild bird): chickens (including hens and roosters), turkeys, guineas, geese, ducks, pigeons, ostriches, rheas, English ring-necked pheasants and pea fowl;
 - (ii) To any importation for scientific or educational purposes;
 - (iii) To the importation of fully manufactured artificial flies used for fishing:
 - (iv) To the importation of birds which are classifiable under subheading 9804.00.55; and
 - (v) To the importation of live birds.
 - (c) Notwithstanding paragraph (a), there may be entered in each calendar year the following quotas of skins bearing feathers:
 - (i) For use in the manufacture of artificial flies used for fishing; (A) not more than 5,000 skins of grey jungle fowl (Gallus sonneratii), and (B) not more than 1,000 skins of mandarin duck (Dendronessa galericulata); and
 - (ii) For use in the manufacture of artificial flies used for fishing, or for millinery purposes, not more than 45,000 skins, in the aggregate, of the following species of pheasant: Lady Amherst pheasant (<u>Chrysolophus amerstiae</u>), golden pheasant (<u>Chrysolophus pictus</u>), silver pheasant (<u>Lophura nycthemera</u>), Reeves pheasant (<u>Syrmaticus reevesii</u>), blue-eared pheasant (<u>Crossoptilon auritum</u>) and brown-eared pheasant (<u>Crossoptilon mantchuricum</u>).

For the purposes of these quotas, any part of a skin which has been severed shall be considered to be a whole skin.

^{1/} Brown-eared pheasant added to the List of Endangered Foreign Fish and Wildlife, Appendix A of 50 CFR 17, Nov. 24, 1970, effective date Dec. 2, 1970 (35 F.R. 18319, 18321).

I 5-2

- (d) No article specified in paragraph (c) shall be entered except under a permit issued by the Secretary of the Interior. The Secretary of the Interior shall prescribe such regulations as may be necessary to carry out the purposes and provisions of paragraph (c) (including regulations providing for equitable allocation among qualified applicants of the import quotas established by such provisions). Whenever the Secretary of the Interior finds that the wild supply of any species mentioned in paragraph (c) is threatened with serious reduction or with extinction, he shall prescribe regulations which provide (to such extent and for such period as he deems necessary to meet such threat):
 - (i) In the case of grey jungle fowl or mandarin duck, for the reduction of the applicable import quota; or
 - (ii) In the case of any species of pheasant, for the reduction of the import quota established for pheasants, for the establishment of a subquota for such species of pheasant, or for the elimination of such species from the import quota for pheasant, or any combination thereof.

The authority granted to the Secretary of the Interior by the preceding sentence to reduce any import quota shall include authority to eliminate such quota.

- (e) Any article of a kind the importation of which is prohibited or subjected to a quota by paragraphs (a),(b) and (c) above, and which is in the United States shall be presumed for the purposes of seizure and forfeiture to have been imported in violation of law and shall be seized and forfeited under the customs laws unless such presumption is satisfactorily rebutted; except that such presumption shall not apply to articles in actual use for personal adornment or for scientific or educational purposes. Any article so forfeited may (in the discretion of the Secretary of the Treasury and under such regulations as he may prescribe) (1) be placed with any agency of the Federal Government or of any State government, or any society or museum for exhibition or scientific or educational purposes, or (2) be destroyed.
- (f) Nothing in this note shall be construed to repeal the provision of the act of March 4, 1913, chapter 145 (37 Stat. 847), or the act of July 3, 1918 (40 Stat. 755), or any other law of the United States, now of force, intended for the protection or preservation of birds within the United States. If on investigation by the district director of Customs before seizure, or before trial for forfeiture, or if at such trial if such seizure has been made, it shall be made to appear to the district director of Customs, or to the prosecuting officer of the Government, as the case may be, that no illegal importation of such feathers has been made, but that the possession, acquisition or purchase of such feathers is or has been made in violation of the provisions of the act of March 4, 1913, chapter 145 (37 Stat. 847), or the act of July 3, 1918 (40 Stat. 755), or any other law of the United States, now of force, intended for the protection or preservation of birds within the United States, it shall be the duty of the district director of Customs, or such prosecuting officer, as the case may be, to report the facts to the proper officials of the United States, or State or Territory charged with the duty of enforcing such laws.

Otherwise, they fall in heading 2302,

(B) Products falling within this chapter under the above provisions shall be classified in heading 1101 or 1102 if the percentage passing through a woven metal wire cloth sieve with the aperture indicated in column (4) or (5) is not less, by weight, than that shown against the cereal concerned.

Otherwise, they fall in heading 1103 or 1104.

SECTION IV

PREPARED FOODSTUFFS; BEVERAGES, SPIRITS AND VINEGAR; TOBACCO AND MANUFACTURED TOBACCO SUBSTITUTES

IV-1

<u>Note</u>

1. In this section the term "pellets" means products which have been agglomerated either directly by compression or by the addition of a binder in a proportion not exceeding 3 percent by weight.

Additional U.S. Note

1. In this section the term "canned" means preserved in airtight containers by heat processing to destroy or inactivate micro-organisms and enzymes that otherwise could cause spoilage.

Annotated for Statistical Reporting Purposes

CHAPTER 16

PREPARATIONS OF MEAT, OF FISH OR OF CRUSTACEANS, MOLLUSCS OR OTHER AQUATIC INVERTEBRATES

IV 16-1

Notes:

- 1. This chapter does not cover meat, meat offal, fish, crustaceans, molluscs or other aquatic invertebrates, prepared or preserved by the processes specified in chapter 2 or 3.
- 2. Food preparations fall in this chapter provided that they contain more than 20 percent by weight of sausage, meat, meat offal, blood, fish or crustaceans, molluscs or other aquatic invertebrates, or any combination thereof. In cases where the preparation contains two or more of the products mentioned above, it is classified in the heading of chapter 16 corresponding to the component or components which predominate by weight. These provisions do not apply to the stuffed products of heading 1902 or to the preparations of heading 2103 or 2104.

Subheading Notes

- 1. For the purposes of subheading 1602.10, the expression "homogenized preparations" means preparations of meat, meat offal or blood, finely homogenized, put up for retail sale as infant food or for dietetic purposes, in containers of a net weight content not exceeding 250 g. For the application of this definition no account is to be taken of small quantities of any ingredients which may have been added to the preparation for seasoning, preservation or other purposes. These preparations may contain a small quantity of visible pieces of meat or meat offal. This subheading takes precedence over all other subheadings of heading 1602.
- 2. The fish and crustaceans specified in the subheadings of heading 1604 or 1605 under their common names only, are of the same species as those mentioned in chapter 3 under the same name.

Additional U.S. Notes:

- 1. For the purposes of this chapter, the term "in oil" means packed in oil or fat, or in added oil or fat and other substances, whether such oil or fat was introduced at the time of packing or prior thereto.
- 2. In assessing the duty on meats, no allowance shall be made for normal components thereof such as bones, fat, and hide or skin. The dutiable weight of meats in airtight containers subject to specific rates includes the entire contents of the containers.

CHAPTER 17

SUGARS AND SUGAR CONFECTIONERY

IV 17-1

Note

- 1. This chapter does not cover:
 - (a) Sugar confectionery containing cocoa (heading 1806):
 - (b) Chemically pure sugars (other than sucrose, lactose, maltose, glucose and fructose) or other products of heading 2940; or
 - (c) Medicaments or other products of chapter 30.

Subheading Note

 For the purposes of subheadings 1701.11 and 1701.12, "raw sugar" means sugar whose content of sucrose by weight, in the dry state, corresponds to a polarimeter reading of less than 99.5 degrees.

Additional U.S. Notes

- The term "degree" as used in the "Rates of Duty" columns of this chapter means International Sugar Degree as determined by
 polarimetric test performed in accordance with procedures recognized by the International Commission for Uniform Methods
 of Sugar Analysis (ICUMSA).
- 2. The rates in column numbered 1 in subheadings 1701.11, 1701.12, 1701.91.20, 1701.99, 1702.90.30, 1702.90.40, 1806.10.40 and 2106.90.10, on January 1, 1968, shall be effective only during such time as title II of the Sugar Act of 1948 or substantially equivalent legislation is in effect in the United States, whether or not the quotas, or any of them, authorized by such legislation, are being applied or are suspended: Provided,
 - (a) That, if the President finds that a particular rate not lower than such January 1, 1968 rate, limited by a particular quota, may be established for any articles provided for in the above-mentioned subheadings, which will give due consideration to the interests in the U.S. sugar market of domestic producers and materially affected contracting parties to the General Agreement on Tariffs and Trade, he shall proclaim such particular rate and such quota limitation, to be effective not later than the 90th day following the termination of the effectiveness of such legislation:
 - (b) That any rate and quota limitation so established shall be modified if the President finds and proclaims that such modification is required or appropriate to give effect to the above considerations; and
 - (c) That the January 1, 1968 rates shall resume full effectiveness, subject to the provisions of this note, if legislation substantially equivalent to title II of the Sugar Act of 1948 should subsequently become effective.
- 3. (a)(i) The total amount of sugars, syrups and molasses described in subheadings 1701.11, 1701.12, 1701.91.20, 1701.99, 1702.90.30, 1702.90.40, 1806.10.40 and 2106.90.10, the products of all foreign countries, entered, or withdrawn from warehouse for consumption, during the period January 1, 1989 through December 31, 1989, shall not exceed in the aggregate 1,061,279 metric tons, raw value. Of this amount, the total amount permitted to be imported for purposes of paragraph (c)(i) of this note (the total base quota amount) shall be 1,053,000 metric tons, raw value; 1,815 metric tons, raw value, may only be used for the importation of "specialty sugars" as defined by the United States Trade Representative in accordance with paragraph (c)(ii) of this note; and the remaining 6,454 metric tons, raw value, may only be imported for the purposes specified in paragraph (c)(v) of this note (the quota adjustment amount).
 - (ii) Sugar entering the United States during a quota period may be charged to the previous quota period with the approval of the Secretary of Agriculture. The Secretary may only grant such approval if (A) the sugar was shipped in time to enter the United States during the provious quota period and (B) the sugar would have successfully entered the United States during the previous quota period but for forces beyond the control of the importer, including but not limited to engine failure of the transporting ocean carrier, unexpectedly severe weather conditions, and acts of God.
 - (b) Beginning with the third calendar quarter of 1982, the Secretary of Agriculture (hereinafter the Secretary) shall establish for each calendar quarter the total amount (expressed in terms of raw value) of sugars, syrups and molasses described in the above-mentioned subheadings, the products of all foreign countries, which may be entered, or withdrawn from warehouse for consumption, during such calendar quarter. The Secretary shall determine such amount, inform the Secretary of the Treasury of his determination, and file notice thereof with the <u>Federal Register</u> no later than the 15th day of the month immediately preceding the calendar quarter during which such determination shall be in effect. In determining such amounts the Secretary shall give due consideration to the interests in the U.S. sugar market of domestic producers and materially affected contracting parties to the General Agreement on Tariffs and Trade.

(c) (i) The total amounts of sugars, syrups and molasses permitted to be imported under paragraphs (a) and (b) of this note shall be allocated as follows (in percent) to the supplying countries or areas listed below:

NOTE 2: Beginning with the quota year beginning September 26, 1983, the quota allocations for Nicaragua, Costa Rica, El Salvador and Honduras shall be as follows:

Nicaragua-----5,443 metric tons, raw value.

El Salvador-----2.6 percent of the total base quota amount permitted to be imported under paragraphs (a) and (b) of this legal note plus 18 percent of the difference between 2.1 percent of the total base quota amount and 5,443 metric tons, raw value.

Notwithstanding the allocation provisions set forth above, the Secretary may, after consultation with the United States Trade Representative, the Department of State and the Department of the Treasury, issue regulations modifying the allocation provisions governing "Other specified countries and areas" if the Secretary determines that such modifications are appropriate to provide such countries and areas reasonable access to the U.S. sugar market. Such regulations may, among other things, provide for the establishment of minimum quota amounts, the establishment of quota periods other than quarterly periods, and the carrying forward of unused quota amounts into subsequent quota periods.

(ii) The total amount of specialty sugars permitted to be imported under paragraphs (a) and (b) of this note shall be allocated by providing each of the following countries an annual quota of 72 metric tons, raw value, for the importation of specialty sugars:

| Belgium | Indonesia |

- (iii) Notwithstanding any authority given to the United States Trade Representative under paragraphs (e) and (g) of this note, in allocating any limitation imposed under any paragraph of this note on the quantity of sugars, syrups, and molasses described in the subheadings cited under paragraph (a) of this note which may be entered --
 - (A) the percentage allocation made to the Phillipines under this paragraph may not be reduced, and
 - (B) no allocation may be made to the Republic of South Africa.
- (d) The Secretary, after consultation with the United States Trade Representative and the Department of State, may suspend the allocation provisions of paragraph (c), or may establish quantitative limitations for periods of time other than calendar quarters as provided in paragraph (b), if the Secretary determines that such action or actions are appropriate to give due consideration to the interests in the U.S. sugar market of domestic producers and materially affected contracting parties to the General Agreement on Tariffs and Trade. The Secretary may reinstate the allocation provisions of paragraph (c), or may amend any quantitative limitations (including the time period for which such limitations are applicable) which have previously been established under this paragraph or paragraph (b), if the Secretary determines that the considerations set forth in the previous sentence so warrant. The Secretary shall inform the Secretary of the Treasury of any determination made under this paragraph. Notice of such determinations shall be filed with the Federal Register, and such determinations shall not become effective until the day following the date of filing of such notice or such later date as may be specified by the Secretary.
- (e) The United States Trade Representative or his designee, after consultation with the Department of Agriculture and the Department of State, may modify the allocation provisions of paragraph (c) (including the deletion or addition of any country or area), and may prescribe further rules, limitations or prohibitions on the entry of sugar if he finds that such actions are appropriate to carry out the obligations of the United States under the International Sugar Agreement, 1977, or any successor agreement thereto, and that such actions give due consideration to the interests in the U.S. sugar market of domestic producers and materially affected contracting parties to the General Agreement on Tariffs and Trade. If the United States Trade Representative takes any such action, he shall so inform the Secretary of Agriculture and shall publish notice thereof in the FederalRegister. Such action shall not become effective until the day following the date of filing of such notice or such later date as may be specified by the United States Trade Representative.
- (f) The Secretary shall, in consultation with the United States Trade Representative, the Department of State and other concerned agencies, review the operation of this note prior to September 1 of each year. In making such review, the Secretary shall determine whether the continued operation of paragraphs (b), (c), (d) and (e) of this note gives due consideration to the interests in the U.S. sugar market of domestic producers and materially affected contracting parties to the General Agreement on Tariffs and Trade, and whether the operation of paragraph (g) of this note would give due consideration to such interests. The Secretary shall file a notice of such determinations in the Federal Register no later than September 1 of each year. If the Secretary determines that the continued operation of paragraphs (b), (c), (d) and (e) of this note would not give due consideration to the interests in the U.S. sugar market of domestic producers and materially affected contracting parties to the General Agreements on Tariffs and Trade, and that the provisions of paragraph (g) of this note would give due considerations to such interests, paragraphs (b), (c), (d) and (e) of this note shall terminate as of the first day of October following such determination
- (g) If paragraphs (b), (c), (d) and (e) of this note are terminated under the provisions of paragraph (f) of this note, the total amount of sugars, syrups and molasses described in the above-mentioned subheadings, the products of all foreign countries, entered, or withdrawn from warehouse for consumption, in any fiscal (October 1-September 30) year shall not exceed, in the aggregate, 6,259,576 metric tons, raw value. The United States Trade Representative or his designee may allocate this quantity among supplying countries or areas, and may prescribe further rules, regulations, limitations or prohibitions on the entry of sugar in accordance with the International Sugar Agreement, 1977, and Public Law 96-236. The United States Trade Representative or his designee shall inform the Commissioner of Customs of any such action regarding the importation of sugar, and shall publish notice thereof in the Federal Register.
- (h) For the purposes of this note, the term "raw value" means the equivalent of such articles in terms of ordinary commercial raw sugar testing 96 degrees by the polariscope as determined in accordance with regulations issued by the Secretary of the Treasury. Such regulations may, among other things, provide: (1) for the entry of such articles pending a final determination of polarity; and (2) that positive or negative adjustments for differences in preliminary and final raw values be made in the same or succeeding quota periods. The principal grades and types of sugar shall be translated into terms of raw value in the following manner ---
 - (i) For articles described in subheadings 1701.11, 1701.12, 1701.91.20, 1701.99, 1702.90.40, 1806.10.40 and 2106.90.10, by multiplying the number of kilograms thereof by the greater of 0.93, or 1.07 less 0.0175 for each degree of polarization under 100 degrees (and fractions of a degree in proportion).
 - (ii) For articles described in subheading 1702.90.30, by multiplying the number of kilograms of the total sugars thereof (the sum of the sucrose and reducing or invert sugars) by 1.07.
 - (iii) The Secretary of the Treasury shall establish methods for translating sugar into terms of raw value for any special grade or type of sugar for which he determines that the raw value cannot be measured adequately under the above provisions.
- (ij) The Secretary may exempt the entry of articles described in subheadings 1701.11, 1701.12, 1701.91.20, 1701.99, 1702.90.30, 1702.90.40, 1806.10.40 and 2106.90.10 from the requirements or limitations established pursuant to this note on the condition that such articles: (a) be used only for the production (other than by distillation) of polyhydric alcohols, except polyhydric alcohols for use as a substitute for sugar in human food consumption; or (2) be re-exported in refined form or in sugar-containing products. Such articles shall be entered under licenses issued pursuant to regulations promulgated by the Secretary. In promulgating such regulations, the Secretary shall give due consideration to the interests in the U.S. sugar market of domestic producers and materially affected contracting parties to the General Agreement on Tariffs and Trade. Such regulations may contain any terms, conditions, bonds or other limitations as the Secretary determines are appropriate to ensure that articles imported under license are used only for the purposes specified in this paragraph. This paragraph shall terminate whenever paragraphs (b), (c), (d) and (e) of this note are terminated under paragraph (f) of this note.

- 4. For such period as there is in effect a proclamation issued by the President pursuant to the authority vested in him by section 22 of the Agricultural Adjustment Act (7 U.S.C. 624) to protect a price-support program for sugar beets and sugar cane, the importation and duty-free treatment of sugars, syrups, and molasses, provided for in subheadings 1701.11, 1701.12, 1701.91.20, 1701.99, 1702.90.30, 1702.90.40, 1806.10.40 and 2106.90.10, in accordance with general note 3(c)(vi), shall be governed in the following manner:
 - (a) (i) For all beneficiary countries, except those subject to subparagraph (ii) and paragraph (b), duty-free treatment shall be provided in the same manner as it is provided pursuant to title V of the Trade Act of 1974 (19 U.S.C. 2461 et seq.), at the time of the effective date of the Caribbean Basin Economic Recovery Act; except that the President, upon the recommendation of the Secretary of Agriculture, may suspend or adjust upward the value limitation provided for in section 504(c)(1) of the Trade Act of 1974 on the duty-free treatment afforded to beneficiary countries under general note 3(c)(vi) if he finds that such adjustment will not interfere with the price support program for sugar beets and sugar cane and is appropriate in light of market conditions.
 - (ii) As an alternative to subparagraph (i), the President may, at the request of a beneficiary country not subject to paragraph (b) and upon the recommendation of the Secretary of Agriculture, elect to permit sugar, syrups, and molasses from that country to enter duty-free during a calendar year subject to quantitative limitations to be established by the President on the quantity of sugar, syrups, and molasses entered from that country.
 - (b) For the following countries whose exports of sugar, syrups, and molasses in 1981 were not eligible for duty-free treatment because of the operation of section 504(c)of the Trade Act of 1974, the quantity of sugar, syrups, and molasses which may be entered in any calendar year shall be limited to no more than the quantity specified below:

Dominican Republic 780,000 metric tons Guatemala 210,000 metric tons Panama 160,000 metric tons

- (c) The President, upon the recommendation of the Secretary of Agriculture, may suspend or adjust upward the quantitative limitations imposed under paragraph (a)(ii) or (b) if he determines such action will not interfere with the price-support program for sugar beets and sugar cane and is appropriate in light of market conditions. The President, upon the recommendation of the Secretary of Agriculture, may suspend the duty-free treatment for all or part of the quantity of sugar, syrups, and molasses permitted to be entered by paragraphs (a)(ii) and (b) if such action is necessary to protect the price-support program for sugar beets and sugar cane.
- (d) Any quantitative limitation imposed on a beneficiary country under paragraphs (a)(ii) and (b) shall apply only to the extent that such limitation permits a lesser quantity of sugar, syrups, and molasses to be entered from that country than the quantity that would be permitted to be entered under any other provision of law.
- 5. Heading 1703 does not include products derived from sugar cane or sugar beet and containing soluble non-sugar solids (excluding any foreign substance that may have been added or developed in the product) equal to 6 percent or less by weight of the total soluble solids.

 - (c) The term "<u>Brix value</u>" means the refractometric sucrose value of the juice, adjusted to compensate for the effect of any added sweetening materials, and thereafter corrected for acid.
- 2. In determining the number of liters of reconstituted fruit juice which can be obtained from a concentrate, the degree of concentration shall be calculated on a volume basis to the nearest 0.5 degree, as determined by the ratio of the Brix value of the imported concentrated juice to that of the reconstituted juice, corrected for differences of specific gravity of the juices. Any juice having a degree of concentration of less than 1.5 (as determined before correction to the nearest 0.5 degree) shall be regarded as a natural unconcentrated juice.
- 3. In determining the degree of concentration of mixed fruit juices, the mixture shall be considered as being wholly of the component juice having the lowest Brix value.
- 4. The rates of duty set forth in subheadings 0711.20.15 and 2005.70.13 apply to the first 4,400 metric tons of olives, green in color, not pitted, in a saline solution, in containers each holding more than 8 kg, drained weight, certified by the importer to be used for repacking or sale as green olives, the foregoing entered under both subheadings combined in any calendar year.

Statistical Note

 For the purposes of statistical reporting in heading 2009, the term "<u>liters</u>" in the "Units of Quantity" column of the provisions applicable to fruit juices means liters of natural unconcentrated juice or liters of reconstituted juice (as defined in additional U.S. note 1(b) above).

 - (a) Sea water (heading 2501);
 - (b) Distilled or conductivity water or water of similar purity (heading 2851):
 - (c) Acetic acid of a concentration exceeding 10 percent by weight of acetic acid (heading 2915):
 - (d) Medicaments of heading 3003 or 3004; or
 - (e) Perfumery or toilet preparations (chapter 33).
- For the purposes of this chapter and of chapters 20 and 21, the "alcoholic strength by volume" shall be determined at a temperature of 20°C.
- For the purposes of heading 2202 the term "nonalcoholic beverages" means beverages of an alcoholic strength
 by volume not exceeding 0.5 percent vol. Alcoholic beverages are classified in headings 2203 to 2206 or
 heading 2208 as appropriate.

Subheading Note

 For the purposes of subheading 2204.10 the expression "<u>sparkling wine</u>" means wine which, when kept at a temperature of 20°C in closed containers, has an excess pressure of not less than 3 bars.

Additional U.S. Notes

- 1. The duties prescribed on products covered by this chapter are in addition to the internal-revenue taxes imposed under existing law or any subsequent act. The duties imposed on products covered by this chapter which are subject also to internal-revenue taxes are imposed only on the quantities subject to such taxes; except that, in the case of distilled spirits transferred to the bonded premises of a distilled spirits plant under the provisions of section 5232 of the Internal Revenue Code of 1954, the duties are imposed on the quantity withdrawn from customs custody.
- Dutiable quantities of alcoholic juices (including grape must) classified in heading 2204, 2206 or 2208 shall be calculated in accordance with additional U.S. notes 1, 2 and 3 in chapter 20.
- 3. The term "effervescent wine" means wine other than sparkling wine which contains in excess of 0.392 grams of carbon dioxide per 100 milliliters of wine.
- 4. Where in heading 2204, 2206, 2207 or 2208, the rates shown in the rates of duty columns are in terms of a proof liter, proof liter shall mean a liter of liquid at 15.56°C (60°F) which contains 50 percent (100 proof) by volume of ethyl alcohol having a specific gravity of 0.7939 at 15.56°C (60°F) referred to water at 15.56°C (60°F) as unity or the alcoholic equivalent thereof.
- 5. Where in heading 2204, 2206, 2207 or 2208, the rates of duty are assessed on a proof liter basis, the rates shown indicate the amount of duty which shall be collected on each liter of an imported product at 100 proof. The amount of duty which shall be collected for each liter of a product which is imported at more than or less than 100 proof shall bear the same ratio to the applicable rate of duty as the proof of the imported product bears to 100 proof.
- 6. The standard for determining the proof of brandy and other spirits or liquors of any kind when imported is the same as that which is defined in the laws relating to internal revenue. The Secretary of the Treasury, at his discretion, may authorize the ascertainment of the proof of wines, cordials or other liquors and fruit juices by distillation or otherwise, when it is impracticable to ascertain such proof by the means prescribed by existing law or regulations.
- Provisions for the free entry of certain samples of alcoholic beverages are covered by subheading 9811.00.20 of chapter 98.

CHAPTER 24

TOBACCO AND MANUFACTURED TOBACCO SUBSTITUTES

IV 24-1

Note

1. This chapter does not cover medicinal cigarettes (chapter 30).

Additional U.S. Notes

- The term "wrapper tobacco", as used in this chapter, means that quality of leaf tobacco which has the requisite color, texture and burn, and is of sufficient size for cigar wrappers, and the term "filler tobacco" means all other leaf tobacco.
- 2. The percentage of wrapper tobacco in a bale, box, package or other shipping unit is the ratio of the number of leaves of wrapper tobacco in such unit to the total number of leaves therein. In determining such percentage for classification purposes, the district director of customs shall examine at least 10 hands, and shall count the leaves in at least 2 hands, from each shipping unit designated for examination.
- 3. The dutiable weight of cigars and cigarettes includes the weight of all materials which are integral parts thereof.
- 4. Certain samples of tobacco products provided for in this chapter are entitled to duty-free treatment (chapter 98).

CHAPTER 25

SALT; SULFUR; EARTHS AND STONE; PLASTERING MATERIALS, LIME AND CEMENT

> V 25-1

<u>Notes</u>

1. Except where their context or note 4 to this chapter otherwise requires, the headings of this chapter cover only products which are in the crude state or which have been washed (even with chemical substances eliminating the impurities without changing the structure of the product), crushed, ground, powdered, levigated, sifted, screened, concentrated by flotation, magnetic separation or other mechanical or physical processes (except crystallization), but not products which have been roasted, calcined, obtained by mixing or subjected to processing beyond that mentioned in each heading.

The products of this chapter may contain an added antidusting agent, provided that such addition does not render the product particularly suitable for a specific use rather than for general use.

- 2. This chapter does not cover:
 - (a) Sublimed sulfur, precipitated sulfur or colloidal sulfur (heading 2802);
 - (b) Earth colors containing 70 percent or more by weight of combined iron evaluated as Fe₂O₃ (heading 2821);
 - (c) Medicaments or other products of chapter 30;
 - (d) Perfumery, cosmetic or toilet preparations (chapter 33);
 - (e) Setts, curbstones or flagstones (heading 6801); mosaic cubes and the like (heading 6802); roofing, facing or damp course slates (heading 6803);
 - (f) Precious or semiprecious stones (heading 7102 or 7103);
 - (g) Cultured crystals (other than optical elements) weighing not less than 2.5 g each, of sodium chloride or of magnesium oxide, of heading 3823; optical elements of sodium chloride or of magnesium oxide (heading 9001);
 - (h) Billiard chalks (heading 9504); or
 - (ij) Writing or drawing chalks or tailors' chalks (heading 9609).
- Any products classifiable in heading 2517 and any other heading of the chapter are to be classified in heading 2517.
- 4. Heading 2530 applies, inter alia, to: vermiculite, perlite and chlorites, unexpanded; earth colors, whether or not calcined or mixed together; natural micaceous iron oxides; meerschaum (whether or not in polished pieces); amber; agglomerated meerschaum and agglomerated amber, in plates, rods, sticks or similar forms, not worked after molding; jet; strontianite (whether or not calcined), other than strontium oxide; broken pottery.

Statistical Note

- 1. For the purposes of heading 2525:
 - (a) The term "split block mica" means mica, not exceeding 0.508 mm in thickness, that has been split and selected within a tolerance of 0.203 mm, but which has not been cut or stamped to dimensions, shape or form;
 - (b) The term "mica splittings" means mica laminae in book-form or book-pack, or in loose pack, suitable for use in the manufacture of agglomerated (built-up) mica included in heading 6815.

CHAPTER 26

ORES, SLAG AND ASH

V 26-1

<u>Notes</u>

- 1. This chapter does not cover:
 - (a) Slag or similar industrial waste prepared as macadam (heading 2517);
 - (b) Natural magnesium carbonate (magnesite), whether or not calcined (heading 2519);
 - (c) Basic slag of chapter 31;
 - (d) Slag wool, rock wool or similar mineral wools (heading 6806);
 - (e) Waste or scrap of precious metal or of metal clad with precious metal (heading 7112); or
 - (f) Copper, nickel or cobalt matter produced by any process of smelting (section XV).
- 2. For the purposes of headings 2601 to 2617, the term "ores" means minerals of mineralogical species actually used in the metallurgical industry for the extraction of mercury, of the metals of heading 2844 or of the metals of section XIV or XV, even if they are intended for nonmetallurgical purposes. Headings 2601 to 2617 do not, however, include minerals which have been submitted to processes not normal to the metallurgical industry.
- 3. Heading 2620 applies only to ash and residues of a kind used in industry either for the extraction of metals or as a basis for the manufacture of chemical compounds of metals.

Additional U.S. Notes

- 1. The specific rates of duty imposed under the headings of this chapter on the metal content of ores and other materials shall apply to the assay quantity of metal contained therein, whether recovered as metals, as alloys or as chemical compounds or used directly in the manufacture of articles, except that with respect to ores or other materials provided for in this chapter which are subject to duty at specific rates on their copper, lead or zinc content, an absolute deduction for losses of 18 kg per dry metric ton from the respective quantities of each of such metal contents shall be allowed.
- 2. When the classification of imported materials under any provision of this chapter is dependent on the percentage of metal content, such percentage shall be the ratio of the total quantity of the respective metal content to the total quantity of imported material when computed on a dry-weight basis; i.e., free of all uncombined moisture.

Statistical Note

- 1. The quantity of metal content to be reported shall be the assay quantity without deductions.
- For the purposes of subheading 2601.11.0060, the term "coarse" refers to iron ores with a majority of individual particles
 having a diameter exceeding 4.75 mm.

CHAPTER 27

MINERAL FUELS, MINERAL OILS AND PRODUCTS OF THEIR DISTILLATION; BITUMINOUS SUBSTANCES; MINERAL WAXES

> V 27-1

Notes

- 1. This chapter does not cover:
 - (a) Separate chemically defined organic compounds, other than pure methane and propane which are to be classified in heading 2711;
 - (b) Medicaments of heading 3003 or 3004; or
 - (c) Mixed unsaturated hydrocarbons of heading 3301, 3302 or 3805.
- References in heading 2710 to "petroleum oils and oils obtained from bituminous minerals" include not only petroleum oils
 and oils obtained from bituminous minerals, but also similar oils, as well as those consisting mainly of mixed unsaturated
 hydrocarbons, obtained by any process, provided that the weight of the nonaromatic constituents exceeds that of the
 aromatic constituents.

However, the references do not include liquid synthetic polyolefins of which less than 60 percent by volume distills at 300°C, after conversion to 1,013 millibars when a reduced-pressure distillation method is used (chapter 39).

Subheading Notes

- For the purposes of subheading 2701.11, "anthracite" means coal having a volatile matter limit (on a dry, mineral-matter-free basis) not exceeding 14 percent.
- For the purposes of subheading 2701.12, "bituminous coal" means coal having a volatile matter limit (on a dry,
 mineral-matter-free basis) exceeding 14 percent and a calorific value limit (on a moist, mineral-matter-free basis) equal
 to or greater than 5,833 kcal/kg.
- 3. For the purposes of subheadings 2707.10, 2707.20, 2707.30, 2707.40 and 2707.60, the terms "benzene," "toluene," "xylene," "naphthalene" and "phenols" apply to products which contain more than 50 percent by weight of benzene, toluene, xylene, naphthalene or phenols, respectively.

Additional U.S. Notes

- 1. (a) Crude petroleum oils, crude oils obtained from bituminous minerals and reconstituted crude petroleum shall, if products of Canada, be admitted free of duty and any entry therefor shall be liquidated or reliquidated accordingly if, on or before the 180th day after the date of entry, documentation is filed with the customs officer concerned establishing that, pursuant to a commercial exchange agreement between the United States and Canadian refiners which has been approved by the Secretary of Energy--
 - (i) An import license for the products covered by such entry has been issued by the Secretary; and
 - (ii) An equivalent amount of domestic or duty-paid foreign crude petroleum oils, crude oils obtained from bituminous minerals or reconstituted crude petroleum have, pursuant to such commercial exchange agreement and to an export license issued by the Secretary of Commerce, been exported from the United States to Canada and have not previously been used to effect the duty-free entry of like Canadian products under this U.S. note.
 - (b) The Secretary of the Treasury, after consulting with the Secretary of Commerce and the Secretary of Energy, shall issue such rules or regulations as may be necessary governing the admission of Canadian products pursuant to the provisions of this U.S. note.
- 2. For the purposes of heading 2710, "petroleum oils" includes only products having:
 - (a) A Congealing Point (ASTM D 938) of less than 30°C; or
 - (b) If the Congealing Point is not less than 30°C:
 - (i) A density at 70° C of less than 0.942 and a Worked Cone Penetration (ASTM D 217) or a Cone Penetration (ASTM D 937) at 25°C of not less than 350; or
 - (ii) If the density at 70°C is not less than 0.942 having a Needle Penetration (ASTM D 5) at 25°C of not less than 400.
- 3. For the purposes of subheading 2710.00.15, "motor fuel" is any product derived primarily from petroleum, shale or natural gas, whether or not containing additives, which is principally used as a fuel in internal-combustion or other engines.

Annotated for Statistical Reporting Purposes

V 27-2

- 4. For the purposes of subheading 2710.00.18, "motor fuel blending stock" means any product (except naphthas of subheading 2710.00.25) derived primarily from petroleum, shale oil or natural gas, whether or not containing additives, to be used for direct blending in the manufacture of motor fuel.
- 5. In determining the relative weights of components of the mixtures provided for in subheading 2710.00.45, naphtha and other petroleum derivatives which may be present in such mixtures as solvents shall be disregarded.
- 6. For the purposes of heading 2716:
 - (a) The term "electrical energy" does not include electrical energy transmitted as a medium of communication; and
 - (b) Electrical energy shall not be subject to the entry requirements for imported merchandise set forth in section 484 of the Tariff Act of 1930, as amended, (19 U.S.C. 1484), but shall be entered on a periodic basis in accordance with regulations to be prescribed by the Secretary of the Treasury.
- 7. For the purposes of this chapter, the term barrel (bbl) means a barrel of 158.98 liters measured at 15.6°C.

PRODUCTS OF THE CHEMICAL OR ALLIED INDUSTRIES

VI-1

<u>Notes</u>

- (a) Goods (other than radioactive ores) answering to a description in heading 2844 or 2845 are to be classified in those headings and in no other heading of the tariff schedule.
 - (b) Subject to paragraph (a) above, goods answering to a description in heading 2843 or 2846 are to be classified in those headings and in no other heading of this section.
- Subject to note 1 above, goods classifiable in heading 3004, 3005, 3006, 3212, 3303, 3304, 3305, 3306, 3307, 3506, 3707 or 3808 by reason of being put up in measured doses or for retail sale are to be classified in those headings and in no other heading of the tariff schedule.
- 3. Goods put up in sets consisting of two or more separate constituents, some or all of which fall in this section and are intended to be mixed together to obtain a product of section VI or VII, are to be classified in the heading appropriate to that product, provided that the constituents are:
 - (a) Having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;
 - (b) Entered together; and
 - (c) Identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.

Additional U.S. Notes

- 1. In determining the amount of duty applicable to a solution of a single compound in water subject to duty in this section at a specific rate, an allowance in weight or volume, as the case may be, shall be made for the water in excess of any water of crystallization which may be present in the undissolved compound.
- 2. For the purposes of the tariff schedule:
 - (a) The term "aromatic" as applied to any chemical compound refers to such compound containing one or more fused or unfused benzene rings;
 - (b) The term "modified aromatic" describes a molecular structure having at least one six-membered heterocyclic ring which contains at least four carbon atoms and having an arrangement of molecular bonds as in the benzene ring or in the quinone ring, but does not include any such molecular structure in which one or more pyrimidine rings are the only modified aromatic rings present;
 - (c) For the purposes of headings 2902, 2907 and 3817, the term "alkyl" describes any saturated acyclic hydrocarbon group having six or more carbon atoms or, subject to note 1 to chapter 29, any mixtures of such groups averaging six or more carbon atoms.
- 3. The term "products described in additional U.S. note 3 to section VI" refers to any product not listed in the Chemical Appendix to the Tariff Schedule and--
 - (a) For which the importer furnishes the Chemical Abstracts Service (C.A.S.) registry number and certifies that such registry number is not listed in the Chemical Appendix to the Tariff Schedule; or
 - (b) Which the importer certifies not to have a C.A.S. registry number and not to be listed in the Chemical Appendix to the Tarriff Schedule, either under the name used to make Customs entry or under any other name by which it may be known

CHAPTER 28

INORGANIC CHEMICALS; ORGANIC OR INORGANIC COMPOUNDS OF FRECIOUS METALS, OF RARE-EARTH METALS, OF RADIOACTIVE ELEMENTS OR OF ISOTOPES

VI 28-1

Notes

- 1. Except where the context otherwise requires, the headings of this chapter apply only to:
 - (a) Separate chemical elements and separate chemically defined compounds, whether or not containing impurities:
 - (b) The products mentioned in (a) above dissolved in water;
 - (c) The products mentioned in (a) above dissolved in other solvents provided that the solution constitutes a normal and necessary method of putting up these products adopted solely for reasons of safety or for transport and that the solvent does not render the product particularly suitable for specific use rather than for general use;
 - (d) The products mentioned in (a), (b) or (c) above with an added stabilizer necessary for their preservation or transport;
 - (e) The products mentioned in (a), (b), (c) or (d) above with an added antidusting agent or a coloring substance added to facilitate their identification or for safety reasons, provided that the additions do not render the product particularly suitable for specific use rather than for general use.
- 2. In addition to dithionites and sulfoxylates, stabilized with organic substances (heading 2831), carbonates and peroxocarbonates of inorganic bases (heading 2836), cyanides, cyanide oxides and complex cyanides of inorganic bases (heading 2837), fulminates, cyanates and thiocyanates, of inorganic bases (heading 2838), organic products included in headings 2843 to 2846, and carbides (heading 2849), only the following compounds of carbon are to be classified in this chapter:
 - (a) Oxides of carbon, hydrogen cyanide and fulminic, isocyanic, thiocyanic and other simple or complex cyanogen acids (heading 2811);

- 4. Chemically defined complex acids consisting of a nonmetal acid of subchapter II and a metal acid of subchapter IV are to be classified in heading 2811.
- Headings 2826 to 2842 apply only to metal or ammonium salts or peroxysalts.
 - Except where the context otherwise requires, double or complex salts are to be classified in heading 2842.

Annotated for Statistical Reporting Purposes

VI 28-2

- 6. Heading 2844 applies only to:
 - (a) Technetium (atomic No. 43), promethium (atomic No. 61), polonium (atomic No. 84) and all elements with an atomic number greater than 84;
 - (b) Natural or artificial radioactive isotopes (including those of the precious metals or of the base metals of sections XIV and XV), whether or not mixed together;
 - (c) Compounds, inorganic or organic, of these elements or isotopes, whether or not chemically defined, whether or not mixed together;
 - (d) Alloys, dispersions (including cermets), ceramic products and mixtures containing these elements or isotopes or inorganic or organic compounds thereof and having a specific radioactivity exceeding 0.002 microcurie per gram;
 - (e) Spent (irradiated) fuel elements (cartridges) of nuclear reactors;
 - (f) Radioactive residues whether or not usable.

The term "isotopes", for the purposes of this note and of the wording of headings 2844 and 2845, refers to:

- (i) Individual nuclides, excluding, however, those existing in nature in the monoiosotopic state;
- (ii) Mixtures of isotopes of one and the same element, enriched in one or several of the said isotopes, that is, elements of which the natural isotopic composition has been artificially modified.
- 7. Heading 2848 includes copper phosphide (phosphor copper) containing more than 15 percent by weight of phosphorus.
- 8. Chemical elements (for example, silicon and selenium) doped for use in electronics are to be classified in this chapter, provided that they are in forms unworked as drawn, or in the form of cylinders or rods. When cut in the form of discs, wafers or similar forms, they fall in heading 3818.

Statistical Note

 For the purposes of heading 2804, the term "m³" (cubic meter) means a standard cubic meter measured at 21°C at 760 mm (1013 millibars) pressure.

CHAPTER 29

ORGANIC CHEMICALS

VI 20-1

Notes

- 1. Except where the context otherwise requires, the headings of this chapter apply only to:
 - (a) Separate chemically defined organic compounds, whether or not containing impurities;
 - (b) Mixtures of two or more isomers of the same organic compound (whether or not containing impurities), except mixtures of acyclic hydrocarbon isomers (other than stereoisomers), whether or not saturated (chapter 27);
 - (c) The products of headings 2936 to 2939 or the sugar ethers and sugar esters, and their salts, of heading 2940, or the products of heading 2941, whether or not chemically defined;
 - (d) Products mentioned in (a). (b) or (c) above dissolved in water:
 - (e) Products mentioned in (a), (b) or (c) above dissolved in other solvents provided that the solution constitutes a normal and necessary method of putting up these products adopted solely for reasons of safety or for transport and that the solvent does not render the product particularly suitable for specific use rather than for general use;
 - (f) The products mentioned in (a), (b), (c), (d) or (e) above with an added stabilizer necessary for their preservation or transport;
 - (g) The products mentioned in (a), (b), (c), (d), (e) or (f) above with an added antidusting agent or a coloring or odoriferous substance added to facilitate their identification or for safety reasons, provided that the additions do not render the product particularly suitable for specific use rather than for general use;
 - (h) The following products, diluted to standard strengths, for the production of azo dyes: diazonium salts, couplers used for these salts and diazotizable amines and their salts.
- 2. This chapter does not cover:
 - (a) Goods of heading 1504 or glycerol (heading 1520);
 - (b) Ethyl alcohol (heading 2207 or 2208);
 - (c) Methane or propane (heading 2711);
 - (d) The compounds of carbon mentioned in note 2 to chapter 28;
 - (e) Urea (heading 3102 or 3105);
 - (f) Coloring matter of vegetable or animal origin (heading 3203), synthetic organic coloring matter, synthetic organic products of a kind used as fluorescent brightening agents or as luminophores (heading 3204) and dyes or other coloring matter put up in forms or packings for retail sale (heading 3212);
 - (g) Enzymes (heading 3507);
 - (h) Metaldehyde, hexamethylenetetramine or similar substances put up in forms (for example, tablets, sticks or similar forms) for use as fuels, or liquid or liquefied-gas fuels in containers of a kind used for filling or refilling cigarette or similar lighters, and of a capacity not exceeding 300 cm³ (heading 3606);
 - (ij) Products put up as charges for fire extinguishers or put up in fire-extinguishing grenades, of heading 3813; ink removers put up in packings for retail sale, of heading 3823; or
 - (k) Optical elements, for example, of ethylenediamine tartrate (heading 9001).
- 3. Goods which could be included in two or more of the headings of this chapter are to be classified in that one of those headings which occurs last in numerical order.
- 4. In headings 2904 to 2906, 2908 to 2911 and 2913 to 2920, any reference to halogenated, sulfonated, nitrated or nitrosated derivatives includes a reference to compound derivatives, such as sulfohalogenated, nitrohalogenated, nitrosulfonated or nitrosulfohalogenated derivatives.

Nitro or nitroso groups are not to be taken as "nitrogen-functions" for the purposes of heading 2929.

For the purposes of headings 2911, 2912, 2914, 2918 and 2922, "oxygen-function" is to be restricted to the functions (the characteristic organic oxygen-containing groups) referred to in headings 2905 to 2920.

Annotated for Statistical Reporting Purposes

29-2

- (a) The esters of acid-function organic compounds of subchapters I to VII with organic compounds of these 5. subchapters are to be classified with that compound which is classified in the heading placed last in numerical order in these subchapters.
 - (b) Esters of ethyl alcohol or glycerol with acid-function organic compounds of subchapters I to VII are to be classified in the same heading as the corresponding acid-function compounds.
 - (c) Subject to note 1 to section VI and note 2 to chapter 28:
 - (1) Inorganic salts of organic compounds such as acid-, phenol- or enol-function compounds or organic bases, of subchapters I to X or heading 2942, are to be classified in the heading appropriate to the organic compound; and
 - (2) Salts formed between organic compounds of subchapters I to X or heading 2942 are to be classified in the heading appropriate to the base or to the acid (including phenol- or enol-function compounds) from which they are formed, whichever occurs last in numerical order in the chapter.
 - (d) Metal alcoholates are to be classified in the same heading as the corresponding alcohols except in the case of ethanol and glycerol (heading 2905).
 - (e) Halides of carboxylic acids are to be classified in the same heading as the corresponding acids.
- The compounds of headings 2930 and 2931 are organic compounds the molecules of which contain, in addition to atoms of hydrogen, oxygen or nitrogen, atoms of other nonmetals or of metals (such as sulfur, arsenic, mercury or lead) directly linked to carbon atoms.

Heading 2930 (organo-sulfur compounds) and heading 2931 (other organo-inorganic compounds) do not include sulfonated or halogenated derivatives (including compound derivatives) which, apart from hydrogen, oxygen and nitrogen, only have directly linked to carbon the atoms of sulfur or of a halogen which give them their nature of sulfonated or halogenated derivatives (or compound derivatives).

Headings 2932, 2933 and 2934 do not include epoxides with a three-membered ring, ketone peroxides, cyclic polymers of aldehydes or of thioaldehydes, anhydrides of polybasic carboxylic acids, cyclic esters of polyhydric alcohols or phenols with polybasic acids, or imides of polybasic acids.

These provisions apply only when the ring-position hetero-atoms are those resulting solely from the cyclizing function or functions here listed.

Subheading Note

Within any one heading of this chapter, derivatives of a chemical compound (or group of chemical compounds) are to be classified in the same subheading as that compound (or group of compounds) provided that they are not more specifically covered by any other subheading and that there is no residual subheading named "Other" in the series of subheadings

Statistical Note

For the purposes of statistical reporting numbers 2903.40.0020 and 2903.40.0025, the ozone depletion equivalent (ode) of a chemical is defined as its ozone depletion potential, expressed in terms of the depletion potential of trichlorofluoromethane (CFC-11). The ozone depletion equivalent of each chemical is calculated by multiplying its net weight, in kilograms, by the appropriate ozone depletion factor listed below:

| Chemical name Ozone de | oletion factor |
|--|----------------|
| Trichlorotrifluoroethane (CFC-113) | . 0.8 |
| Monochloropentafluoroethane (CFC-115) | . 0.6 |
| Bromochlorodifluoroethane (Halon 1211) | . 3.0 |
| Bromotrifluoroethylene (Halon 1301) | . 10.0 |
| Dibromotetrafluoroethane (Halon 2402) | |

TANNING OR DYEING EXTRACTS;
TANNINS AND THEIR DERIVATIVES; DYES,
PIGMENTS AND OTHER COLORING MATTER;
PAINTS AND VARNISHES: PUTTY AND OTHER MASTICS; INKS

VI 32-1

Notes

- 1. This chapter does not cover:
 - (a) Separate chemically defined elements or compounds (except those of heading 3203 or 3204, inorganic products of a kind used as luminophores (heading 3206), glass obtained from fused quartz or other fused silica in the forms provided for in heading 3207, and also does and other coloring matter put up in forms or packings for retail sale, of heading 3212);
 - (b) Tanmates or other tannin derivatives of products of headings 2936 to 2939, 2941 or 3501 to 3504; or
 - (c) Mastics of asphalt or other bituminous mastics (heading 2715).
- 2. Heading 3204 includes mixtures of stabilized diazonium salts and couplers for the production of azo dyes.
- 3. Headings 3203, 3204, 3205 and 3206 apply also to preparations based on coloring matter (including, in the case of heading 3206, coloring pigments of heading 2530 or chapter 28, metal flakes and metal powders), of a kind used for coloring any material or used as ingredients in the manufacture of coloring preparations. The headings do not apply, however, to pigments dispersed in nonaqueous media, in liquid or paste form, of a kind used in the manufacture of paints, including enamels (heading 3212), or to other preparations of heading 3207, 3208, 3209, 3210, 3212, 3213 or 3215.
- 4. Heading 3208 includes solutions (other than collodions) consisting of any of the products specified in headings 3901 to 3913 in volatile organic solvents when the weight of the solvent exceeds 50 percent of the weight of the solution.
- 5. The expression "coloring matter" in this chapter does not include products of a kind used as extenders in oil paints, whether or not they are also suitable for coloring distempers.
- 6. The expression "stamping foils" in heading 3212 applies only to thin sheets of a kind used for printing, for example, book covers or hat bands, and consisting of--
 - (a) Metallic powder (including powder of precious metal) or pigment, agglomerated with glue, gelatin or other binder; or
 - (b) Metal (including precious metal) or pigment, deposited on a supporting sheet of any material.

Additional U.S. Note

1. For the purposes of subheadings 3204.11.10, 3204.12.20 and 3204.16.20, the term "dyes containing, by weight" means those products which contain as the only dye components, the specified components listed therewith, each of which must be present in the product. A tolerance of plus or minus two percentage points from the named percentages is allowable.

Notes

- This chapter does not cover:
 - (a) Edible mixtures or preparations of animal or vegetable fats or oils of a kind used as mold release preparations (heading 1517);
 - (b) Separate chemically defined compounds; or
 - (c) Shampoos, dentifrices, shaving creams and foams or bath preparations, containing soap or other organic surface-active agents (heading 3305, 3306 or 3307).
- 2. For the purposes of heading 3401, the expression "soap" applies only to soap soluble in water. Soap and the other products of heading 3401 may contain added substances (for example, disinfectants, abrasive powders, fillers or medicaments). Products containing abrasive powders remain classified in heading 3401 only if in the form of bars, cakes or molded pieces or shapes. In other forms they are to be classified in heading 3405 as "scouring powders and similar preparations".
- 3. For the purposes of heading 3402, "organic surface-active agents" are products which when mixed with water at a concentration of 0.5 percent at 20°C and left to stand for one hour at the same temperature:
 - (a) Give a transparent or translucent liquid or stable emulsion without separation of insoluble matter; and
 - (b) Reduce the surface tension of water to 4.5×10^{-2} N/m (45 dyne/cm) or less.
- 4. In heading 3403 the expression "petroleum oils and oils obtained from bituminous minerals" applies to the products defined in note 2 to chapter 27.
- 5. In heading 3404, subject to the exclusions provided below, the expression "artificial waxes and prepared waxes" applies only to:
 - (a) Chemically produced organic products of a waxy character, whether or not water-soluble;
 - (b) Products obtained by mixing different waxes;
 - (c) Products of a waxy character with a basis of one or more waxes and containing fats, resins, mineral substances or other materials.

The heading does not apply to:

- (a) Goods of heading 1516, 1519 or 3402, even if having a waxy character;
- (b) Unmixed animal waxes or unmixed vegetable waxes, whether or not colored, of heading 1521;
- (c) Mineral waxes or similar products of heading 2712, whether or not intermixed or merely colored; or
- (d) Waxes mixed with, dispersed in or dissolved in a liquid medium (headings 3405, 3809, etc.).

SECTION VII

PLASTICS AND ARTICLES THEREOF; RUBBER AND ARTICLES THEREOF

VII-1

Notes

- Goods put up in sets consisting of two or more separate constituents, some or all of which fall in this section and are intended to be mixed together to obtain a product of section VI or VII, are to be classified in the heading appropriate to that product, provided that the constituents are:
 - (a) Having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;
 - (b) Entered together; and
 - (c) Identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.
- Except for the goods of heading 3918 or 3919, plastics, rubber and articles thereof, printed with motifs, characters or
 pictorial representations, which are not merely incidental to the primary use of the goods, fall in chapter 49.

CHAPTED 30

PLASTICS AND ARTICLES THEREOF

VII 39-1

Notes

 Throughout the tariff schedule the expression "plastics" means those materials of headings 3901 to 3914 which are or have been capable, either at the moment of polymerization or at some subsequent stage, of being formed under external influence (usually heat and pressure, if necessary with a solvent or plasticizer) by molding, casting, extruding, rolling or other process into shapes which are retained on the removal of the external influence.

Throughout the tariff schedule, any reference to "plastics" also includes vulcanized fiber. The expression, however, does not apply to materials regarded as textile materials of section XI.

- 2. This chapter does not cover:
 - (a) Waxes of heading 2712 or 3404;
 - (b) Separate chemically defined organic compounds (chapter 29):
 - (c) Heparin or its salts (heading 3001);
 - (d) Stamping foils of heading 3212;
 - (e) Organic surface-active agents or preparations of heading 3402;
 - (f) Run gums or ester gums (heading 3806);
 - (g) Synthetic rubber, as defined for the purposes of chapter 40, or articles thereof;
 - (h) Saddlery or harness (heading 4201) or trunks, suitcases, handbags or other containers of heading 4202;
 - (ij) Plaits, wickerwork or other articles of chapter 46;
 - (k) Wall coverings of heading 4814;
 - (1) Goods of section XI (textiles and textile articles);
 - (m) Articles of section XII (for example, footwear, headgear, umbrellas, sun umbrellas, walking-sticks, whips, riding-crops or parts thereof);
 - (n) Imitation jewelry of heading 7117;
 - (o) Articles of section XVI (machines and mechanical or electrical appliances);
 - (p) Parts of aircraft or vehicles of section XVII;
 - (q) Articles of chapter 90 (for example, optical elements, spectacle frames, drawing instruments);
 - (r) Articles of chapter 91 (for example, clock or watch cases);
 - (s) Articles of chapter 92 (for example, musical instruments or parts thereof);
 - (t) Articles of chapter 94 (for example, furniture, lamps and lighting fittings, illuminated signs, prefabricated buildings);
 - (u) Articles of chapter 95 (for example, toys, games, sports equipment); or
 - (v) Articles of chapter 96 (for example, brushes, buttons, slide fasteners, combs, mouthpieces or stems for smoking pipes, cigarette holders or the like, parts of vacuum flasks or the like, pens, mechanical pencils).
- 3. Headings 3901 to 3911 apply only to goods of a kind produced by chemical synthesis, falling in the following categories:
 - (a) Liquid synthetic polyolefins of which less than 60 percent by volume distills at 300°C, after conversion to 1,013 millibars when a reduced-pressure distillation method is used (headings 3901 and 3902);
 - (b) Resins, not highly polymerized, of the coumarone-indene type (heading 3911);
 - (c) Other synthetic polymers with an average of at least five monomer units;
 - (d) Silicones (heading 3910);
 - (e) Resols (heading 3909) and other prepolymers.

Annotated for Statistical Reporting Purposes

VII 39-2

4. For the purposes of this chapter, except where the context otherwise requires, copolymers (including co-polycondensates, co-polyaddition products, block copolymers and graft copolymers) and polymer blends are to be classified in the heading covering polymers of that comonomer which predominates by weight over every other single comonomer, comonomers whose polymers fall in the same heading being regarded as constituting a single comonomer.

If no single comonomer predominates, copolymers or polymer blends, as the case may be, are to be classified in the heading which occurs last in numerical order among those which equally merit consideration.

The expression "copolymers" covers all polymers in which no single monomer contributes 95 percent or more by weight to the total polymer content.

- 5. Chemically modified polymers, that is, those in which only appendages to the main polymer chain have been changed by chemical reaction, are to be classified in the heading appropriate to the unmodified polymer. This provision does not apply to graft copolymers.
- 6. In headings 3901 to 3914, the expression "primary forms" applies only to the following forms:
 - (a) Liquids and pastes, including dispersions (emulsions and suspensions) and solutions;
 - (b) Blocks of irregular shape, lumps, powders (including molding powders), granules, flakes and similar bulk forms.
- Heading 3915 does not apply to waste, parings and scrap of a single thermoplastic material, transformed into primary forms (headings 3901 to 3914).
- 8. For the purposes of heading 3917, the expression "tubes, pipes and hoses" means hollow products, whether semimanufactures or finished products, of a kind generally used for conveying, conducting or distributing gases or liquids (for example, ribbed garden hose, perforated tubes). This expression also includes sausage casings and other lay-flat tubing. However, except for the last mentioned, those having an internal cross section other than round, oval, rectangular (in which the length does not exceed 1.5 times the width) or in the shape of a regular polygon are not to be regarded as tubes, pipes and hoses, but as profile shapes.
- 9. For the purposes of heading 3918, the expression "wall or ceiling coverings of plastics" applies to products in rolls, of a width not less than 45 cm, suitable for wall or ceiling decoration, consisting of plastics fixed permanently on a backing of any material other than paper, the layer of plastics (on the face side) being grained, embossed, colored, design-printed or otherwise decorated.
- 10. In headings 3920 and 3921, the expression "<u>plates, sheets, film, foil and strip</u>" applies only to plates, sheets, film, foil and strip (other than those of chapter 54) and to blocks of regular geometric shape, whether or not printed or otherwise surface-worked, uncut or cut into rectangles (including squares) but not further worked (even if when so cut they become articles ready for use).
- 11. Heading 3925 applies only to the following articles, not being products covered by any of the earlier headings of subchapter II:
 - (a) Reservoirs, tanks (including septic tanks), vats and similar containers, of a capacity exceeding 300 liters;
 - (b) Structural elements used, for example, in floors, walls or partitions, ceilings or roofs;
 - (c) Gutters and fittings therefor;
 - (d) Doors, windows and their frames and thresholds for doors;
 - (e) Balconies, balustrades, fencing, gates and similar barriers;
 - (f) Shutters, blinds (including venetian blinds) and similar articles and parts and fittings thereof;
 - (g) Large-scale shelving for assembly and permanent installation, for example, in shops, workshops, warehouses;
 - (h) Ornamental architectural features, for example, flutings, cupolas, dovecotes; and
 - (ij) Fittings and mountings intended for permanent installation in or on doors, windows, staircases, walls or other parts of buildings, for example, knobs, handles, hooks, brackets, towel rails, switch plates and other protective plates.

Subheading Note

1. Within any one heading of this chapter, copolymers (including co-polycondensates, co-polyaddition products, block copolymers and graft copolymers) are to be classified in the same subheading as homopolymers of the predominant comonomer and chemically modified polymers of the kind specified in note 5 are to be classified in the same subheading as the unmodified polymer, provided that such copolymers or chemically modified polymers are not more specifically covered by any other subheading and that there is no residual subheading named "Other" in the series of subheadings concerned. Polymer blends are to be classified in the same subheading as copolymers (or homopolymers, as the case may be) of the same monomers in the same proportions.

VII 39-3

Additional U.S. Notes

- 1. For the purposes of this chapter, the term "elastomeric" means a plastics material which after cross-linking can be stretched at 20°C to at least three times its original length and that, after having been stretched to twice its original length and the stress removed, returns within five minutes to less than 150 percent of its original length. Elastomeric plastics may also contain fillers, extenders, pigments or rubber-processing chemicals, whether or not such plastics material, after the addition of such fillers, extenders, pigments or chemicals, can meet the tests specified in the first part of this note.
- For the purposes of heading 3916, the rate of duty "Free (B)" appearing in the "Special" subcolumn applies only to
 articles measuring not more than 38.1 cm in length.
- 3. For the purposes of heading 3917, with repect to tubes, pipes and hoses, the rate of duty "Free (C)" appearing in the "Special" subcolumn applies only to tubes, pipes and hoses having attached fittings.
- 4. For the purposes of heading 3921, the rate of duty "Free (B)" appearing in the "Special" subcolumn applies only to articles measuring not more than 38.1 cm in width and not more than 45.7 cm in length.

Statistical Note

For the purposes of statistical reporting number 3907.60.0010 the term "bottle-grade resins" refers to uncompounded resins
having an intrinsic viscosity of at least 0.68 but not more than 0.86 deciliters per gram, as determined by ASTM D2857-70.

 - (b) Blocks of irregular shape, lumps, bales, powders, granules, crumbs and similar bulk forms.
- 4. In note 1 to this chapter and in heading 4002, the expression "synthetic rubber" applies to:
 - (a) Unsaturated synthetic substances which can be irreversibly transformed by vulcanization with sulfur into non-thermoplastic substances which, at a temperature between 18°C and 29°C, will not break on being extended to three times their original length and will return, after being extended to twice their original length, within a period of 5 minutes, to a length not greater than 1-1/2 times their original length. For the purposes of this test, substances necessary for the cross-linking, such as vulcanizing activators or accelerators, may be added; the presence of substances as provided for by note 5(b)(ii) and (iii) is also permitted. However, the presence of any substances not necessary for the cross-linking, such as extenders, plasticizers and fillers, is not permitted;
 - (b) Thioplasts (TM); and
 - (c) Natural rubber modified by grafting or mixing with plastics, depolymerized natural rubber, mixtures of unsaturated synthetic substances with saturated synthetic high polymers provided that all the above-mentioned products comply with the requirements concerning vulcanization, elongation and recovery in (a) above.
- 5. (a) Headings 4001 and 4002 do not apply to any rubber or mixture of rubbers which has been compounded, before or after coagulation, with:
 - (i) Vulcanizing agents, accelerators, retarders or activators (other than those added for the preparation of prevulcanized rubber latex);
 - (ii) Pigments or other coloring matter other than those added solely for the purpose of identification;
 - (iii) Pasticizers or extenders (except mineral oil in the case of oil-extended rubber), fillers, reinforcing agents, organic solvents or any other substances, except those permitted under (b);
 - (b) The presence of the following substances in any rubber or mixture of rubbers shall not affect its classification in heading 4001 or 4002, as the case may be, provided that such rubber or mixture of rubbers retains its essential character as a raw material:
 - (i) Emulsifiers or antitack agents;
 - (ii) Small amounts of breakdown products of emulsifiers;
 - (iii) Very small amounts of the following: heat-sensitive agents (generally for obtaining thermosensitive rubber latexes), cationic surface-active agents (generally for obtaining electro-positive rubber latexes), antioxidants, coagulants, crumbling agents, freeze-resisting agents, peptizers, preservatives, stabilizers, viscosity-control agents or similar special-purpose additives.

VII 40-2

- 6. For the purposes of heading 4004 the expression "waste, parings and scrap" means rubber waste, parings and scrap from the manufacture or working of rubber and rubber goods definitely not usable as such because of cutting-up, wear or other reasons
- Thread wholly of vulcanized rubber, of which any cross-sectional dimension exceeds 5 mm, is to be classified as strip, rods or profile shapes, of heading 4008.
- 8. Heading 4010 includes conveyor or transmission belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated, coated, covered or sheathed with rubber.
- 9. In headings 4001, 4002, 4003, 4005 and 4008, the expressions "plates", "sheets" and "strip" apply only to plates, sheets and strip, and to blocks of regular geometric shape, uncut or simply cut to rectangular (including square) shape, whether or not having the character of articles and whether or not printed or otherwise surface-worked, but not otherwise cut to shape or further worked.

In heading 4008 the expressions "rods" and "profile shapes" apply only to such products, whether or not cut to length or surface-worked but not otherwise worked.

Additional U.S. notes

- 1. For the purposes of subheading 4008.21, the rate of duty "Free (B)" appearing in the "Special" subcolumn applies only to articles measuring not more than 38.1 cm in width and not more than 45.7 cm in length.
- 2. For the purposes of subheading 4008.29, the rate of duty "Free (C)" appearing in the "Special" subcolumn applies only to profile shapes that are cut to size.
- 3. For the purposes of heading 4017, the rate of duty "Free (C)" appearing in the "Special" subcolumn applies only to tubes and pipes having attached fittings.

Subject to note 3 of this chapter, heading 4901 does not cover publications which are essentially devoted to advertising (for example, brochures, pamphlets, leaflets, trade catalogs, yearbooks published by trade associations and tourist promotional literature). Such publications are to be classified in heading 4911.
- 6. For the purposes of heading 4903, the expression "children's picture books" means books for children in which the pictures form the principal interest and the text is subsidiary.

Additional U.S. Notes

- For the purposes of determining the classification of printed matter produced in whole or in part by a lithographic
 process, the thickness of such printed matter is that of the thinnest paper contained therein, except that the thickness
 of a permanently mounted lithograph is the combined thickness of the lithograph and its mounting.
- 2. Currency in current circulation in any country imported for monetary purposes and securities and similar evidences of value provided for in heading 4907 shall be admitted without formal customs consumption entry or the payment of duty. This does not affect any requirement under other provisions of law to the effect that transfers of monetary instruments into or through the United States, in an amount exceeding \$5,000 on any one occasion, shall be reported as prescribed therein.

Subheading Notes

 In this section and, where applicable, throughout the tariff schedule, the following expressions have the meanings hereby assigned to them:

(a) Elastomeric yarn

Filament yarn, including monofilament, of synthetic textile material, other than textured yarn, which does not break on being extended to three times its original length and which returns, after being extended to twice its original length, within a period of five minutes, to a length not greater than one and a half times its original length.

(b) Unbleached yarn

Yarn which:

- (i) Has the natural color of its constituent fibers and has not been bleached, dyed (whether or not in the mass) or printed; or
- (ii) Is of indeterminate color ("grey yarn"), manufactured from garnetted stock.

Such yarn may have been treated with a colorless dressing or fugitive dye (which disappears after simple washing with soap) and, in the case of man-made fibers, treated in the mass with delustering agents (for example, titanium dioxide).

Annotated for Statistical Reporting Purposes

XI-4

- (iii) Consists of unbleached and bleached yarn.

(g) Dyed woven fabric

Woven fabric which:

- (i) Is dyed a single uniform color other than white (unless the context otherwise requires) or has been treated with a colored finish other than white (unless the context otherwise requires), in the piece; or
- (ii) Consists of colored yarn of a single uniform color.

(h) Woven fabric of yarns of different colors

Woven fabric (other than printed woven fabric) which:

- (i) Consists of yarns of different colors or yarns of different shades of the same color (other than the natural color of the constituent fibers);
- (ii) Consists of unbleached or bleached yarn and colored yarn; or
- (iii) Consists of marl or mixture yarns.

XI-5

- 2. (A) Products of chapters 56 to 63 containing two or more textile materials are to be regarded as consisting wholly of that textile material which would be selected under note 2 to this section for the classification of a product of chapters 50 to 55 consisting of the same textile materials.
 - (B) For the application of this rule:
 - (a) Where appropriate, only the part which determines the classification under general interpretative rule 3 shall be taken into account;
 - (b) In the case of textile products consisting of a ground fabric and a pile or looped surface no account shall be taken of the ground fabric;
 - (c) In the case of embroidery of heading 5810 only the ground fabric shall be taken into account. However, embroidery without visible ground shall be classified with reference to the embroidering threads alone.

Additional U.S. Notes

- 1. In the case of each provision in the tariff schedule on which the United States has agreed to reduce the rate of duty, pursuant to a trade agreement entered into under section 101 of the Trade Act of 1974 before January 3, 1980, on any cotton, wool or man-made fiber textile product as defined in the Arrangement Regarding International Trade in Textiles, as extended on December 14, 1977 (the Arrangement), if the Arrangement, or a substitute arrangement, including unilateral import restrictions or bilateral agreements, determined by the President to be suitable, ceases to be in effect with respect to the United States before the total reduction in the rate of duty for such provision under sections 101 and 109 of the Trade Act of 1974 has become effective, then the President shall proclaim the rate of duty in rate column 1 for such provision existing on January 1, 1975, to be the rate of duty effective, with respect to articles entered or withdrawn from warehouse for consumption, within 30 days after such cessation and until the President proclaims the continuation of such reduction under the next sentence. If subsequently the Arrangement or a substitute arrangement, including unilateral import restrictions or bilateral agreements, determined by the President to be suitable, is in effect with respect to the United States, then the President shall proclaim the continuation of the reduction of such rate of duty pursuant to such trade agreement. For purposes of section 109(c)(2) of the Trade Act of 1974, any time when a rate of duty existing on January 1, 1975, is in effect under this note shall be time when part of such reduction is not in effect by reason of legislation of the United States or action thereumder.
- 2. The term "<u>Certified hand-loomed and folklore</u>" as used with respect to products provided for in the tariff schedule, refers to such products as have been certified, in accordance with procedures established by the United States Trade Representative pursuant to international understandings, by an official of a government agency of the country where the products were produced, to have been so made.

Statistical Notes

- 1. Restraints under the Arrangement regarding International Trade in Textiles may not apply to developing country exports of "hand-loomed and folklore products" which have been certified, in accordance with procedures established by the Committee for the Implementation of Textile Agreements pursuant to international understandings, by an offical of a government agency of the country where the products were produced, to have been so made. The importer is required to identify such certified products on the entry summary or withdrawal forms by placing the symbol "F" as a prefix to the appropriate 10-digit statistical reporting number.
- 2. For the purposes of the Tariff Schedule:
 - (a) The term "subject to cotton restraints" means articles in which:
 - (i) The cotton component equals or exceeds 50 percent by weight of all the component fibers thereof; or
 - (ii) The cotton and any wool, fine animal hair or man-made fibers in the aggregate equals or exceeds 50 percent by weight of all the component fibers thereof and the cotton component equals or exceeds the weight of each of the wool (including fine animal hair) and man-made fiber components.
 - (b) The term "<u>subject to wool restraints</u>" means articles not provided for in (a) above and in which the wool (including fine animal hair) component exceeds 17 percent by weight of all the component fibers thereof.
 - (c) The term "<u>subject to man-made fiber restraints</u>" means articles not provided for in (a) or (b) above and the man-made fiber component, or the man-made fibers and any cotton, wool or fine animal hair in the aggregate, equals or exceeds 50 percent by weight of all the component fibers thereof.

For the application of this note, where appropriate, only the part of the product which determines the classification under general interpretive rule 3 shall be taken into account.

- 3. The unit of measure to be used by Customs field offices when reporting imports of textiles to Customs Headquarters Quota Section shall be the first unit of quantity unless the second unit of quantity (if there is one) is underlined, in which case the second unit of quantity shall be reported.
- 4. As a convenient cross-reference, each of the textile categories (or groupings) used by the United States in monitoring shipments of these products and to administer the United States textile trade agreements programs is listed in the schedule following the appropriate 10-digit description.

CHAPTER 51

WOOL, FINE OR COARSE ANIMAL HAIR; HORSEHAIR YARN AND WOVEN FABRIC

XI 51-1

Note

- 1. Throughout the tariff schedule:
 - (a) "Wool" means the natural fiber grown by sheep or lambs:
 - (b) "Fine animal hair" means the hair of alpaca, llama, vicuna, camel, yak, Angora, Tibetan, Kashmir or similar goats (but not common goats), rabbit (including Angora rabbit), hare, beaver, nutria or muskrat; and
 - (c) "Coarse animal hair" means the hair of animals not mentioned above, excluding brush-making hair and bristles (heading 0502) and horsehair (heading 0503).

Additional U.S. Notes

- 1. For the purposes of headings 5101, 5102, 5103 and 5104, regarding any package containing wool or fine animal hair subject to different rates of duty, notwithstanding the rates of duty shown, the column 1 rate of duty is the highest column 1 rate applicable to any part of the contents of the package comprising not less than 10 percent thereof by weight and the column 2 rate of duty is the highest column 2 rate applicable to any part of the contents of the package comprising not less than 10 percent thereof by weight.
- 2. For the purposes of this chapter:
 - (a) The term "clean kg" in the rate columns means kilogram of clean yield;
 - (b) The term "clean yield," except for purposes of carbonized fibers, means the absolute clean content (i.e., all that portion of the merchandise which consists exclusively of wool or hair free of all vegetable and other foreign material, containing by weight 12 percent of moisture and 1.5 percent of material removeable from the wool or hair by extraction with alcohol, and having an ash content of not over 0.5 percent by weight), less an allowance, equal by weight to 0.5 percent of the absolute clean content plus 60 percent of the vegetable matter present, but not exceeding 15 percent by weight of the absolute clean content, for wool or hair that would ordinarily be lost during commercial cleaning operations;
 - (c) For purposes of carbonized fibers, the term "clean yield" means in the condition as entered;
 - (d) (i) The term "wool for special uses" means unimproved wool and other wool of whatever blood or origin not finer than 46s entered by a dealer, manufacturer or processor, and certified for use only in the manufacture of felt or knit boots, floor coverings, heavy fulled lumbermen's socks, press cloth, papermakers' felts or pressed felt for polishing plate and mirror glass;
 - (ii) Wool for special uses shall not be released from customs custody unless the dealer, manufacturer or processor files a bond to insure that any wool entered as wool for special uses shall be used only (except as provided below) in the manufacture of the articles enumerated in subparagraph (i) above;
 - (iii) A dealer, manufacturer or processor may be relieved of liability under his or her bond with respect to any wool entered as wool for special uses which is transferred in its imported or any other form to another dealer, manufacturer or processor who has filed a bond to insure that the merchandise so transferred shall be used only (except as provided below) in the manufacture of the articles enumerated in subparagraph (i) above;
 - (iv) When wool entered as wool for special uses is used, or transferred for use, otherwise than in the manufacture of the articles enumerated in subparagraph (i) above:
 - (A) the regular duties which would have been applicable to such wool in the condition as entered shall be paid by the dealer, manufacturer or processor whose bond is charged with the wool at the time of such use or transfer for such use, but such duties shall not be levied or collected on any waste or byproducts resulting from the usual course of manufacture of the articles enumerated in subparagraph (i) above or on any merchandise which is destroyed or exported;
 - (B) if prior to such use or transfer for such use there shall have been combined or mixed with such wool any other merchandise, the whole of the combination or mixture shall be regarded as being composed of wool entered as wool for special uses, unless the dealer, manufacturer or processor liable for the payment of the duties shall establish the quantity of bonded wool in such combination or mixture;
 - (C) every dealer, manufacturer or processor who has given a bond pursuant to the provisions for wool for special uses shall report any transfer or use of merchandise contrary to the terms of the bond, within 30 days after such transfer or use, to the district director of customs in whose district the bond is filed, and for failure to so report such dealer, manufacturer or processor shall be liable to a penalty (in addition to the duties provided for) equal to the value of the merchandise so transferred or used at the time and place of such transfer or use; and
 - (D) the clean yield of any wool shall be deemed to be 100 percent, unless the actual clean yield has been determined by suitable tests and such use or transfer for use occurs not later than 3 years after the date of entry of such wool;

XI 51-2

CHAPTER 52

COTTON

52-1

<u>Note</u>

For the purposes of subheadings 5209.42 and 5211.42, the expression "blue denim" means fabrics of 3-thread or 4-thread twill, including broken twill, warp faced, the warp yarns of which are dyed blue and the weft yarns of which are unbleached, bleached, dyed grey or colored a lighter shade of blue than that of the warp yarns.

Additional U.S. Notes

- Under regulations prescribed by the Secretary of the Treasury, the staple length of cotton shall be determined for all customs purposes by application of the Official Cotton Standards of the United States for length of staple, as established by the Secretary of Agriculture and in effect when the determination is to be made.
- For the purposes of classifying yarns of headings 5205 and 5206 the term "nm," as applied in these headings, means the number of 1,000-meter lengths of yarn in one kilogram. To determine the nm measurement of any yarn, whether single, multiple (folded) or cabled, the actual meters per kilogram shall be divided by 1,000 and the quotient thereof multiplied by the number of single yarns therein, including the single yarns used in manufacturing multiple (folded) or cabled yarns.
- For the purposes of the woven fabrics of chapter 52:
 - (a) The term "number," as applied to woven fabrics of cotton, means the average yarn number of the yarns contained therein. In computing the average yarn number, the length of the yarn is considered to be equal to the distance covered by it in the fabric in the condition as imported, with all clipped yarn being measured as if continuous and with the count being taken of the total single yarns in the fabric including the single yarns in any multiple (folded) or cabled yarns. The weight shall be taken after any excessive sizing is removed by boiling or other suitable process. Any one of the following formulas can be used to determine the average yarn number for tariff purposes-

$$N = \frac{BYT}{1.000}, \frac{100T}{Z'}, \frac{BT}{Z} \text{ or } \frac{ST}{10}$$

when:

N is the average yarn number,

B is the breadth (width) of the fabric in centimeters,

Y is the meters (linear) of the fabric per kilogram,

T is the total single yarns per square centimeter,

S is the square meters of fabric per kilogram, Z is the grams per linear meter of fabric, and

Z' is the grams per square meter of fabric.

Fractions in the resulting "number" shall be disregarded.

- (b) Unless the context otherwise requires, provisions relating to one or more weaves embrace only those fabrics which (excluding selvage) are wholly of the specified weave or weaves, including combinations exclusively thereof.
- For the purposes of heading 5208 and 5209, the term "certified hand-loomed fabrics" means fabrics made on a hand loom (i.e., a nonpower-driven loom) by a cottage industry and which prior to exportation have been certified by an official of a government agency of the country where the fabrics were produced to have been so made.

Statistical Note

- For the purposes of the woven fabrics of chapter 52;
 - (a) The term "poplin or broadcloth" means plain weave fabrics, not of square construction, whether or not napped, but does not include the following types:
 - Fabrics weighing not more than 200 grams per square meter, containing 33 or less warp ends and filling picks per square centimeter: and
 - (ii) Fabrics weighing more than 200 grams per square meter, of average yarn number 26 or lower number.
 - (b) The term "sheeting" means plain weave fabrics, whether or not napped, of the following types:
 - (i) Fabrics weighing not more than 200 grams per square meter, of square construction, containing more than 33 warp ends and filling picks per square centimeter, of average yarn number 68 or lower number, but not including printcloth; and
 - (ii) Fabrics weighing more than 200 grams per square meter, but does not include:
 - (A) Fabrics of which the warp or filling consists of multiple (folded) or cabled yarns, of average yarn number 26 or lower number; and
 - (B) Fabrics of average yarn number 27 or higher number, not of square construction.

XI 52-2

Statistical Note 1 (con.):

- (c) The term "cheesecloth" means plain weave fabrics, weighing not more than 200 grams per square meter, containing not more than 33 warp ends and filling picks per square centimeter, whether or not napped.
- (d) The term "printcloth" means plain weave fabrics, weighing not more than 200 grams per square meter, of average yarn numbers 43-68, containing more than 33 singles yarns per square centimeter and not containing multiple (folded) or cabled yarns, of square construction, not combed, whether or not napped.
- (e) The term "lawns, voiles or batistes" means plain weave fabrics, weighing not more than 200 grams per square meter, of average yarn number 69 or higher number, containing more than 33 warp ends and filling picks per square centimeter, of square construction, whether or not napped.
- (f) The term "sateens" means satin weave fabrics, whether or not napped.
- (g) The term "oxford cloth" means fabrics weighing not more than 200 grams per square meter, whether or not napped, woven as plain weave except that two or more warp ends are woven as one (taped warp). Oxford cloth is not to be classified as a plain weave fabric.
- (h) The term "duck" means fabrics weighing more than 200 grams per square meter, of average yarn number 26 or lower number, whether or not napped, of the following types:
 - (i) Plain weave, of which the warp or filling consists of multiple (folded) or cabled yarns; or
 - (ii) Woven as plain weave except that two or more warp ends are woven as one (taped warp), whether or not containing multiple (folded) or cabled yarns; this latter type of duck is not to be classified as a plain weave fabric.
- (ij) The term "square construction" means fabrics of the following types:
 - (i) Containing less than 79 warp ends and filling picks per square centimeter, of which the difference between the total count of warp ends per centimeter and the total count of filling picks per centimeter is less than 11; or
 - (ii) Containing 79 or more warp ends and filling picks per square centimeter, of which the total count of warp ends per centimeter and the total count of filling picks per centimeter are each less than 57 percent of the total count per square centimeter of such warp ends and filling picks.
 - (k) The term "napped" means fabrics with a fuzzy, fibrous surface produced by scratching or pricking the surface so that some of the fibers are raised from the body of the yarn. Napped fabrics are not to be confused with pile fabrics. Outing and canton flannel, moleskin, etc., are typical fabrics with a nap.
 - (1) The term "not combed" means fabrics wholly or in part of uncombed cotton, other vegetable textile fibers or wool or fine animal hair.
 - (m) The term "combed" means fabrics containing cotton, other vegetable textile fibers or wool or fine animal hair, in which such fibers are combed, whether or not containing other fibers.

CHAPTER 53

OTHER VEGETABLE TEXTILE FIBERS; PAPER YARN AND WOVEN FABRICS OF PAPER YARN

XI 53-1

Statistical Note

- 1. For the purposes of the woven fabrics of chapter 53:
 - (a) Unless the context otherwise requires, provisions relating to one or more weaves embrace only those fabrics which (excluding selvage) are wholly of the specified weave or weaves, including combinations exclusively thereof.
 - (b) The term "poplin or broadcloth" means plain weave fabrics, not of square construction, whether or not napped, but does not include the following types:
 - (i) Fabrics weighing not more than 200 grams per square meter, containing 33 or less warp ends and filling picks per square centimeter; and
 - (ii) Fabrics weighing more than 200 grams per square meter, of average yarn number 26 or lower number.
 - (c) The term "sheeting" means plain weave fabrics, whether or not napped, of the following types:
 - (i) Fabrics weighing not more than 200 grams per square meter, of square construction, containing more than 33 warp ends and filling picks per square centimeter, of average yarn number 68 or lower number, but not including printcloth; and
 - (ii) Fabrics weighing more than 200 grams per square meter, but does not include:
 - (A) Fabrics of which the warp or filling consists of multiple (folded) or cabled yarns, of average yarn number 26 or lower number; and
 - (B) Fabrics of average yarn number 27 or higher number, not of square construction.
 - (d) The term "printcloth" means plain weave fabrics, weighing not more than 200 grams per square meter, of average yarn numbers 43-58, containing more than 33 singles yarns per square centimeter and not containing multiple (folded) or cabled yarns, of square construction, not combed, whether or not napped.
 - (e) The term "square construction" means fabrics of the following types:
 - (i) Containing less than 79 warp ends and filling picks per square centimeter, of which the difference between the total count of warp ends per centimeter and the total count of filling picks per centimeter is less than 11; or
 - (ii) Containing 79 or more warp ends and filling picks per square centimeter, of which the total count of warp ends per centimeter and the total count of filling picks per centimeter are each less than 57 percent of the total count per square centimeter of such warp ends and filling picks.
 - (f) The term "napped" means fabrics with a fuzzy, fibrous surface produced by scratching or pricking the surface so that some of the fibers are raised from the body of the yarn. Napped fabrics are not to be confused with pile fabrics. Outing and canton flannel, moleskin, etc., are typical fabrics with a nap.
 - (g) The term "not combed" means fabrics wholly or in part of uncombed cotton, other vegetable textile fibers or wool or fine animal hair.
 - (h) The term "combed" means fabrics containing cotton, other vegetable textile fibers or wool or fine animal hair, in which such fibers are combed, whether or not containing other fibers.
 - (ij) The term "number," as applied to woven fabrics of chapter 53, means the average yarn number of the yarns contained therein. In computing the average yarn number, the length of the yarn is considered to be equal to the distance covered by it in the fabric in the condition as imported, with all clipped yarn being measured as if continuous and with the count being taken of the total single yarns in the fabric including the single yarns in any multiple (folded) or cabled yarns. The weight shall be taken after any excessive sizing is removed by boiling or other suitable process. Any one of the following formulas can be used to determine the average yarn number--

$$N = \frac{BYT}{1,000} , \frac{100T}{Z'} , \frac{BT}{Z} \text{ or } \frac{ST}{10}$$

when:

N is the average yarn number,

B is the breadth (width) of the fabric in centimeters,

Y is the meters (linear) of the fabric per kilogram,

T is the total single yarns per square centimeter,

S is the square meters of fabric per kilogram, Z is the grams per linear meter of fabric, and

Z' is the grams per square meter of fabric.

Fractions in the resulting "number" shall be disregarded.

CHAPTER 54

MAN-MADE FILAMENTS

XI 54-1

Notes

- Throughout the tariff schedule, the term "man-made fibers" means staple fibers and filaments of organic polymers produced by manufacturing processes, either:
 - (a) By polymerization of organic monomers, such as polyamides, polyesters, polyurethanes or polyvinyl derivatives; or
 - (b) By chemical transformation of natural organic polymers (for example, cellulose, casein, proteins or algae), such as viscose rayon, cellulose acetate, cupro or alginates.

The terms "synthetic" and "artificial", used in relation to fibers, mean: synthetic: fibers as defined at (a); artificial: fibers as defined at (b).

The terms "man-made", "synthetic" and "artificial" shall have the same meanings when used in relation to "textile materials".

2. Headings 5402 and 5403 do not apply to synthetic or artificial filament tow of chapter 55.

Statistical Note

- 1. For the purposes of the woven fabrics of chapter 54:
 - (a) Unless the context otherwise requires, provisions relating to one or more weaves embrace only those fabrics which (excluding selvage) are wholly of the specified weave or weaves, including combinations exclusively thereof.
 - (b) The term "flat fabrics" means fabrics not containing yarns twisted more than 472 turns per meter.
 - (c) The term "poplin or broadcloth" means plain weave fabrics, not of square construction, whether or not napped, but does not include the following types:
 - (i) Fabrics weighing not more than 170 grams per square meter, containing 33 or less warp ends and filling picks per square centimeter; and
 - (ii) Fabrics weighing more than 170 grams per square meter, of average yarn number 26 or lower number.
 - (d) The term "sheeting" means plain weave fabrics, whether or not napped, of the following types:
 - (i) Fabrics weighing not more than 170 grams per square meter, of square construction, containing more than 33 warp ends and filling picks per square centimeter, of average yarn number 68 or lower number, but not including printcloth; and
 - (ii) Fabrics weighing more than 170 grams per square meter, but does not include:
 - (A) Fabrics of which the warp or filling consists of multiple (folded) or cabled yarns, of average yarn number 26 or lower number; and
 - (B) Fabrics of average yarn number 27 or higher number, not of square construction.
 - (e) The term "printcloth" means plain weave fabrics, weighing not more than 170 grams per square meter, of average yarn numbers 43-68, containing more than 33 singles yarns per square centimeter and not containing multiple (folded) or cabled yarns, of square construction, whether or not napped, of the following types:
 - (i) Fabrics, not combed; and
 - (ii) Other fabrics, measuring less than 168 cm in width.
 - (f) The term "square construction" means fabrics of the following types:
 - (i) Containing less than 79 warp ends and filling picks per square centimeter, of which the difference between the total count of warp ends per centimeter and the total count of filling picks per centimeter is less than 11; or
 - (ii) Containing 79 or more warp ends and filling picks per square centimeter, of which the total count of warp ends per centimeter and the total count of filling picks per centimeter are each less than 57 percent of the total count per square centimeter of such warp ends and filling picks.

ΧI 54-2

Statistical Note 1 (con.)

- The term "napped" means fabrics with a fuzzy, fibrous surface produced by strucking or pricking the surface so that some of the fibers are raised from the body of the yarn. Napped fabrics are not to be confused with pile fabrics. Outing and canton flammel, moleskin, etc., are typical fabrics with a nap.
- (h) The term "not combed" means fabrics in part of uncombed cotton, other vegetable textile fibers or wool or fine animal
- (ij) The term "combed" means fabrics containing cotton, other vegetable textile fibers or wool or fine animal hair, in which such fibers are combed.
 - (k) The term "number," as applied to woven fabrics of man-made fibers, means the average yarn number of the yarns contained therein. In computing the average yarn number, the length of the yarn is considered to be equal to the distance covered by it in the fabric in the condition as imported, with all clipped yarn being measured as if continuous and with the count being taken of the total single yarns in the fabric including the single yarns in any multiple (folded) or cabled yarns. The weight shall be taken after any excessive sizing is removed by boiling or other suitable process. Any one of the following formulas can be used to determine the average yarn number--

$$N = \frac{BYT}{1,000}$$
, $\frac{100T}{Z'}$, $\frac{BT}{Z}$ or $\frac{ST}{10}$

when:

N is the average yarn number,
B is the breadth (width) of the fabric in centimeters,

Y is the meters (linear) of the fabric per kilogram,

I is the total single yarms per square centimeter, S is the square meters of fabric per kilogram, Z is the grams per linear meter of fabric, and

Z' is the grams per square meter of fabric.

Fractions in the resulting "number" shall be disregarded.

CHAPTER 55

MAN-MADE STAPLE FIBERS

XI 55-1

Note

- Headings 5501 and 5502 apply only to man-made filament tow, consisting of parallel filaments of a uniform length equal to the length of the tow, meeting the following specifications:
 - (a) Length of tow exceeding 2 m;
 - (b) Twist less than 5 turns per meter;
 - (c) Measuring per filament less than 67 decitex;
 - (d) Synthetic filament tow only: the tow must be drawn, that is to say, be incapable of being stretched by more than 100 percent of its length; and
 - (e) Total measurement of tow more than 20,000 decitex.

Tow of a length not exceeding 2 m is to be classified in heading 5503 or 5504.

Additional U.S. Note

 For the purposes of the woven fabrics of chapter 55, unless the context otherwise requires, provisions relating to one or more weaves embrace only those fabrics which (excluding selvage) are wholly of the specified weave or weaves, including combinations exclusively thereof.

Statistical Note

- 1. For the purposes of the woven fabrics of chapter 55:
 - (a) The term "poplin or broadcloth" means plain weave fabrics, not of square construction, whether or not napped, but does not include the following types:
 - (i) Fabrics weighing not more than 170 grams per square meter, containing 33 or less warp ends and filling picks per square centimeter; and
 - (ii) Fabrics weighing more than 170 grams per square meter, of average yarn nearest 26 or lower number.
 - (b) The term "sheeting" means plain weave fabrics, whether or not napped, of the : ... owing types:
 - (i) Fabrics weighing not more than 170 grams per square meter, of square construction, containing more than 33 warp ends and filling picks per square centimeter, of average yarn number 68 or lower number, but not including printcloth: and
 - (ii) Fabrics weighing more than 170 grams per square meter, but does not include:
 - (A) Fabrics of which the warp or filling consists of multiple (folded) or cabled yarns, of average yarn number 26 or lower number; and
 - (B) Fabrics of average yarn number 27 or higher number, not of square construction.
 - (c) The term "printcloth" means plain weave fabrics, weighing not more than 170 grams per square meter, of average yarn numbers 43-58, containing more than 33 singles yarns per square centimeter and not containing multiple (folded) or cabled yarns, of square construction, whether or not napped, of the following types:
 - (i) Fabrics, not combed; and
 - (ii) Other fabrics, measuring less than 168 cm in width.
 - (d) The term "cheesecloth" means plain weave fabrics, weighing not more than 170 grams per square meter, containing not more than 33 warp ends and filling picks per square centimeter, whether or not napped.
 - (e) The term "lawns, voiles or batistes" means plain weave fabrics, weighing not more than 170 grams per square meter, of average yarn number 69 or higher number, consisting of more than 33 warp ends and filling picks per square centimeter, of square construction, whether or not napped.
 - (f) The term "duck" means fabrics weighing more than 170 grams per square meter, of average yarn number 26 or lower number, whether or not napped, of the following types:
 - (i) Plain weave, of which the warp or filling consists of multiple (folded) or cabled yarns; or
 - (ii) Woven as plain weave except that two or more warp ends are woven as one (taped warp), whether or not containing multiple (folded) or cabled yarns; this latter type of duck is not to be classified as a plain weave fabric.

Annotated for Statistical Reporting Purposes

XI 55-2

Statistical Note 1 (con.)

- (g) The term "oxford cloth" means fabrics weighing not more than 170 grams per square meter, whether or not napped, woven as plain weave except that two or more warp ends are woven as one (taped warp). Oxford cloth is not to be classified as a plain weave fabric.
- (h) The term "blue denim" means fabrics weighing more than 170 grams per square meter, of 3-thread or 4-thread twill, including broken twill, warp faced, the warp yarns of which are dyed blue and the weft yarns of which are unbleached, bleached, dyed grey or colored a lighter shade of blue than that of the warp yarns.
- (ij) The term "square construction" means fabrics of the following types:
 - (i) Containing less than 79 warp ends and filling picks per square centimeter, of which the difference between the total count of warp ends per centimeter and the total count of filling picks per centimeter is less than 11; or
 - (ii) Containing 79 or more warp ends and filling picks per square centimeter, of which the total count of warp ends per centimeter and the total count of filling picks per centimeter are each less than 57 percent of the total count per square centimeter of such warp ends and filling picks.
 - (k) The term "napped" means fabrics with a fuzzy, fibrous surface produced by scratching or pricking the surface so that some of the fibers are raised from the body of the yarn. Napped fabrics are not to be confused with pile fabrics. Outing and canton flammel, moleskin, etc., are typical fabrics with a nap.
 - (1) The term "not combed" means fabrics in part of uncombed cotton, other vegetable textile fibers or wool or fine animal hair.
 - (m) The term "combed" means fabrics containing cotton, other vegetable textile fibers or wool or fine animal hair, in which such fibers are combed.
 - (n) The term "number," as applied to woven fabrics of man-made fibers, means the average yarn number of the yarns contained therein. In computing the average yarn number, the length of the yarn is considered to be equal to the distance covered by it in the fabric in the condition as imported, with all clipped yarn being measured as if continuous and with the count being taken of the total single yarns in the fabric including the single yarns in any multiple (folded) or cabled yarns. The weight shall be taken after any excessive sizing is removed by boiling or other suitable process. Any one of the following formulas can be used to determine the average yarn number--

$$N = \frac{BYT}{1,000} , \quad \frac{100T}{Z'} , \quad \frac{BT}{Z} \quad \text{or} \quad \frac{ST}{10}$$

when:

N is the average yarn number,

B is the breadth (width) of the fabric in centimeters,

Y is the meters (linear) of the fabric per kilogram,

T is the total single yarns per square centimeter,

S is the square meters of fabric per kilogram,

Z is the grams per linear meter of fabric, and Z' is the grams per square meter of fabric.

Fractions in the resulting "number" shall be disregarded.

CHAPTER 56

WADDING, FELT AND NONWOVENS; SPECIAL YARNS; TWINE, CORDAGE, ROPES AND CABLES AND ARTICLES THEREOF

> XI 56-1

Notes

- 1. This chapter does not cover:
 - (a) Wadding, felt or nonwovens, impregnated, coated or covered with substances or preparations (for example, perfumes or cosmetics of chapter 33, soaps or detergents of heading 3401, polishes, creams or similar preparations of heading 3405, fabric softeners of heading 3809) where the textile material is present merely as a carrying medium;
 - (b) Textile products of heading 5811;
 - (c) Natural or artificial abrasive powder or grain, on a backing of felt or nonwovens (heading 6805);
 - (d) Agglomerated or reconstituted mica, on a backing of felt or nonwovens (heading 6814); or
 - (e) Metal foil on a backing of felt or nonwovens (section XV).
- The term "felt" includes needleloom felt and fabrics consisting of a web of textile fibers the cohesion of which has been enhanced by a stitch-bonding process using fibers from the web itself.
- Headings 5602 and 5603 cover respectively felt and nonwovens, impregnated, coated, covered or laminated with plastics or rubber whatever the nature of these materials (compact or cellular).

Heading 5603 also includes nonwovens in which plastics or rubber forms the bonding substance.

Headings 5602 and 5603 do not, however, cover;

- (a) Felt impregnated, coated, covered or laminated with plastics or rubber, containing 50 percent or less by weight of textile material or felt completely embedded in plastics or rubber (chapter 39 or 40);
- (b) Nonwovens, either completely embedded in plastics or rubber, or entirely coated or covered on both sides with such materials, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of color (chapter 39 or 40); or
- (c) Plates, sheets or strip of cellular plastics or cellular rubber combined with felt or nonwovens, where the textile material is present merely for reinforcing purposes (chapter 39 or 40).
- 4. Heading 5604 does not cover textile yarm, or strip or the like of heading 5404 or 5405, in which the impregnation, coating or covering cannot be seen with the naked eye (usually chapters 50 to 55); for the purpose of this provision, no account should be taken of any resulting change of color.

Additional U.S. Notes

- The term "of wide nonfibrillated strip", as applied to twine, cordage, rope or cables of subheadings 5607.41.10 and
 5607.49.10, embraces products which contain more than 65 percent by weight of nonfibrillated polyethylene or polypropylene
 strip (whether folded, twisted or crimped) measuring more than 25.4 mm in width in unfolded, untwisted and uncrimped
- 2. Heading 5607 does not cover twine, cordage, rope or cables, of metal (section XV).

Statistical Note

1. The term "salmon gill netting, of nylon or other polyamides", as used in statistical reporting number 5608.19.1010, means fish netting, of nylon or other polyamide fibers, consisting of monofilament yarns measuring not more than 0.806 mm in maximum cross-sectional dimension or multifilament yarns measuring not more than 233 decitex, or a combination of the foregoing, of double- or triple-knot construction, colored, having a stretch mesh size of not less than 10.5 cm and not more than 21.6 cm.

- 4. Heading 5804 does not apply to knotted net fabrics of twine, cordage or rope, of heading 5608.
- 5. For the purposes of heading 5806, the expression "narrow woven fabrics" means:

CHAPTER 59

IMPREGNATED, COATED, COVERED OR LAMINATED TEXTILE FABRICS; TEXTILE ARTICLES OF A KIND SUITABLE FOR INDUSTRIAL USE

XI 59-1

<u>Notes</u>

- Except where the context otherwise requires, for the purposes of this chapter the expression "textile fabrics" applies
 only to the woven fabrics of chapters 50 to 55 and headings 5803 and 5806, the braids and ornamental trimmings in the
 piece of heading 5808 and the knitted or crocheted fabrics of heading 6002.
- 2. Heading 5903 applies to:
 - (a) Textile fabrics, impregnated, coated, covered or laminated with plastics, whatever the weight per square meter and whatever the nature of the plastic material (compact or cellular), other than:
 - (1) Fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually chapters 50 to 55, 58 or 60); for the purpose of this provision, no account should be taken of any resulting change of color;
 - (2) Products which cannot, without fracturing, be bent manually around a cylinder of a diameter of 7 mm, at a temperature between 15°C and 30°C (usually chapter 39);
 - (3) Products in which the textile fabric is either completely embedded in plastics or entirely coated or covered on both sides with such material, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of color (chapter 39);
 - (4) Fabrics partially coated or partially covered with plastics and bearing designs resulting from these treatments (usually chapters 50 to 55, 58 or 60);
 - (5) Plates, sheets or strip of cellular plastics, combined with textile fabric, where the textile fabric is present merely for reinforcing purposes (chapter 39); or
 - (6) Textile products of heading 5811.
 - (b) Fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with plastics, of heading 5604.
- 3. For the purposes of heading 5905, the expression "<u>textile wall coverings</u>" applies to products in rolls, of a width of not less than 45 cm, suitable for wall or ceiling decoration, consisting of a textile surface which has been fixed on a backing or has been treated on the back (impregnated or coated to permit pasting).

This heading does not, however, apply to wall coverings consisting of textile flock or dust fixed directly on a backing of paper (heading 4814) or on a textile backing (generally heading 5907).

- 4. For the purposes of heading 5906, the expression "rubberized textile fabrics" means:
 - (a) Textile fabrics impregnated, coated, covered or laminated with rubber:
 - (i) Weighing not more than 1,500 g/m2; or
 - (ii) Weighing more than 1,500 g/m2 and containing more than 50 percent by weight of textile material;
 - (b) Fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with rubber, of heading 5604;
 - (c) Fabrics composed of parallel textile yarns agglomerated with rubber, irrespective of their weight per square meter; and
 - (d) Plates, sheets or strip, of cellular rubber, combined with textile fabric, where the textile fabric is more than mere reinforcement, other than textile products of heading 5811.
- 5. Heading 5907 does not apply to:
 - (a) Fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually chapters 50 to 55, 58 or 60); for the purpose of this provision, no account should be taken of any resulting change of color;
 - (b) Fabrics painted with designs (other than painted canvas being theatrical scenery, studio back-cloths or the like);
 - (c) Fabrics partially covered with flock, dust, powdered cork or the like and bearing designs resulting from these treatments; however, imitation pile fabrics remain classified in this heading;
 - (d) Fabrics finished with normal dressings having a basis of amylaceous or similar substances;
 - (e) Wood veneered on a backing of textile fabrics (heading 4408);
 - (f) Natural or artificial abrasive powder or grain, on a backing of textile fabrics (heading 6805);
 - (g) Agglomerated or reconstituted mica, on a backing of textile fabrics (heading 6814); or
 - (h) Metal foil on a backing of textile fabrics (section XV).

XI 59-2

- 6. Heading 5910 does not apply to:
 - (a) Transmission or conveyor belting, of textile material, of a thickness of less than 3 mm; or
 - (b) Transmission or conveyor belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated, coated, covered or sheathed with rubber (heading 4010).
- 7. Heading 5911 applies to the following goods, which do not fall in any other heading of section XI:
 - (a) Textile products in the piece, cut to length or simply cut to rectangular (including square) shape (other than those having the character of the products of headings 5908 to 5910), the following only:
 - (i) Textile fabrics, felt and felt-lined woven fabrics, coated, covered or laminated with rubber, leather or other material, of a kind used for card clothing, and similar fabrics of a kind used for other technical purposes;
 - (ii) Bolting cloth:
 - (iii) Straining cloth of a kind used in oil presses or the like, of textile material or of human hair;
 - (iv) Flat woven textile fabric with multiple warp or weft, whether or not felted, impregnated or coated, of a kind used in machinery or for other technical purposes;
 - (v) Textile fabric reinforced with metal, of a kind used for technical purposes;
 - (vi) Cords, braids and the like, whether or not coated, impregnated or reinforced with metal, of a kind used in industry as packing or lubricating materials;
 - (b) Textile articles (other than those of headings 5908 to 5910) of a kind used for technical purposes (for example, textile fabrics and felts, endless or fitted with linking devices, of a kind used in papermaking or similar machines (for example, for pulp or asbestos-cement), gaskets, washers, polishing discs and other machinery parts).

CHAPTER 60

KNITTED OR CROCHETED FABRICS

XI 60-1

<u>Notes</u>

- 1. This chapter does not cover:
 - (a) Crochet lace of heading 5804;
 - (b) Labels, badges or similar articles, knitted or crocheted, of heading 5807; or
 - (c) Knitted or crocheted fabrics, impregnated, coated, covered or laminated, of chapter 59. However, knitted or crocheted pile fabrics, impregnated, coated, covered or laminated, remain classified in heading 6001.
- This chapter also includes fabrics made of metal thread and of a kind used in apparel, as furnishing fabrics or for similar purposes.
- Throughout the tariff schedule any reference to "knitted" goods includes a reference to stitch-bonded goods in which the chain stitches are formed of textile yarn.

Additional U.S. Note

- 1. For purposes of heading 6001, the term "long pile fabrics" refers to fabrics made by inserting fibers from card sliver into the loops of the ground fabric during knitting.
- For purposes of this chapter, the term "open-work fabrics" means fabrics with stable open meshes, whether or not containing inwrought designs.

Statistical Note

For purposes of statistical reporting numbers 6001.92.0010 and 6001.92.0030, the term "velour" refers to fabrics
containing 12 or more stitches per centimeter in the vertical direction.

CHAPTER 61

ARTICLES OF APPAREL AND CLOTHING ACCESSORIES, KNITTED OR CROCHETED

XI 61-1

Notes

- 1. This chapter applies only to made up knitted or crocheted articles.
- 2. This chapter does not cover:
 - (a) Goods of heading 6212;
 - (b) Worn clothing or other worn articles of heading 6309;
 - (c) Orthopedic appliances, surgical belts, trusses or the like (heading 9021).
- 3. For the purposes of headings 6103 and 6104:
 - (a) The term "suit" means a set of garments composed of two or three pieces made up in identical fabric and comprising:
 - one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt, having neither braces nor bibs, and
 - one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition.

All of the components of a suit must be of the same fabric construction, style, color and composition; they must also be of corresponding or compatible size. If several separate components to cover the lower part of the body are entered together (e.g., trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be the trousers, or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.

The term "suit" includes the following sets of garments whether or not they fulfill all the above conditions:

- morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers:
- evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind;
- dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.
- (b) The term "ensemble" means a set of garments (other than suits and articles of heading 6107, 6108 or 6109), composed of several pieces made up in identical fabric, put up for retail sale, and comprising:
 - one garment designed to cover the upper part of the body, with the exception of pullovers which may form a second upper garment in the sole context of twin sets, and of waistcoats which may also form a second upper garment, and
 - one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt.

All of the components of an ensemble must be of the same fabric construction, style, color and composition; they also must be of corresponding or compatible size. The term "ensemble" does not apply to track suits or ski-suits of heading 6112.

- 4. Headings 6105 and 6106 do not cover garments with pockets below the waist, with a ribbed waistband or other means of tightening at the bottom of the garment, or garments having an average of less than 10 stitches per linear centimeter in each direction counted on an area measuring at least 10 centimeters by 10 centimeters. Heading 6105 does not cover sleeveless garments.
- 5. For the purposes of heading 6111:
 - (a) The expression "<u>babies' garments and clothing accessories</u>" means articles for young children of a body height not exceeding 86 centimeters; it also covers babies' diapers;
 - (b) Articles which are, <u>prima facie</u>, classifiable both in heading 6111 and in other headings of this chapter are to be classified in heading 6111.

XI 61-2

- For the purposes of heading 6112, "<u>ski-suits</u>", means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist either
 - (a) A "ski overall," that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or footstraps; or
 - (b) A "ski ensemble," that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:
 - one garment such as an anorak, windbreaker or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and
 - one pair of trousers whether or not extending above waist level, one pair of breeches or one bib and brace overall.

The "ski ensemble" may also consist of an overall similar to the one mentioned in paragraph (a) above and a type of padded, sleeveless jacket worn over the overall.

All the components of a "ski ensemble" must be made up in a fabric of the same texture, style and composition whether or not of the same color; they also must be of corresponding or compatible size.

- Garments which are, <u>prima facie</u>, classifiable both in heading 6113 and in other headings of this chapter, excluding heading 6111, are to be classified in heading 6113.
- Articles of this chapter which cannot be identified as either men's or boys' garments or as women's or girls' garments are to be classified in the headings covering women's or girls' garments.
- 9. Articles of this chapter may be made of metal thread.

Additional U.S. Note

For the purpose of heading 6111, the term "sets" means two or more different garments of headings 6111, 6209 or 6505 imported together, of corresponding sizes and intended to be worn together by the same person.

Statistical Notes

- 1. Merchandise entered together and classified for customs purposes as an ensemble, under subheadings 6103.21.00, 6103.22.00, 6103.23.00, 6103.29.10, 6104.21.00, 6104.22.00, 6104.23.00 or 6104.29.10, or as a track suit under subheadings 6112.11.00, or 6112.12.00 shall be reported statistically as separate articles under the most appropriate 10-digit reporting number within the same 8-digit tariff subheading which provides for the ensemble or track suit, warm-up or jogging suit.
- For purposes of headings 6103, 6104 and 6112, statistical provisions for shirts refer to garments provided for in headings 6105, 6106 and 6110, other than sweaters, pullovers, vests or cardigans referred to in statistical note 3 below.
- For purposes of this chapter, statistical provisions for sweaters include garments, whether or not known as pullovers, vests or cardigans, which are constructed essentially with 9 or fewer stitches per 2 centimeters measured in the horizontal direction.
- 4. Imports of "made to measure" suits from Hong Kong, which do not accompany a returning traveler, are subject to a special agreement. Suits made to the specific measurements of a particular person require a "made to measure" export license from the government of Hong Kong. These "made to measure" suits of Hong Kong origin must be identified by the importer by the placing of the symbol "G" as a prefix to the appropriate tariff number.

CHAPTER 62

ARTICLES OF APPAREL AND CLOTHING ACCESSORIES, NOT KNITTED OR CROCHETED

XI 62-1

Notes

- This chapter applies only to made up articles of any textile fabric other than wadding, excluding knitted or crocheted articles (other than those of heading 6212).
- 2. This chapter does not cover:
 - (a) Worn clothing or other worn articles of heading 6309;
 - (b) Orthopedic appliances, surgical belts, trusses or the like (heading 9021).
- 3. For the purposes of headings 6203 and 6204:
 - (a) The term "suit" means a set of garments composed of two or three pieces made up in identical fabric and comprising:
 - one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt, having neither braces nor bibs, and
 - one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition.

All of the components of a suit must be of the same fabric construction, style, color and composition; they must also

be of corresponding or compatible size. If several separate components to cover the lower part of the body area entered together (e.g., trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be the trousers, or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.

The term "suit" includes the following sets of garments whether or not they fulfill all the above conditions:

- morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers;
- evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind;
- dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.
- (b) The term "ensemble" means a set of garments (other than suits and articles of heading 6207 or 6208) composed of several pieces made up in identical fabric, put up for retail sale, and comprising:
 - one garment designed to cover the upper part of the body, with the exception of waistcoats which may also form a second upper garment, and
 - one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt.

All of the components of an ensemble must be of the same fabric construction, style, color and composition; they also must be of corresponding or compatible size. The term "ensemble" does not apply to track suits or ski-suits of heading 6211.

- 4. For the purposes of heading 6209:
 - (a) The expression "babies' garments and clothing accessories" means articles for young children of a body height not exceeding 86 centimeters; it also covers babies' diapers;
 - (b) Articles which are, <u>prima facie</u>, classifiable both in heading 6209 and in other headings of this chapter are to be classified in heading 6209.
- Garments which are, <u>prima facie</u>, classifiable both in heading 6210 and in other headings of this chapter, excluding heading 6209, are to be classified in heading 6210.

Annotated for Statistical Reporting Purposes

XI 62-2

- 6. For the purposes of heading 6211, "<u>ski-suits</u>" means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist either of:
 - (a) A "ski overall," that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or footstraps; or
 - (b) A "ski ensemble," that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:
 - one garment such as an anorak, windbreaker or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and
 - one pair of trousers whether or not extending above waist level, one pair of breeches or one bib and brace

The "ski ensemble" may also consist of an overall similar to the one mentioned in paragraph (a) above and a type of padded, sleeveless jacket worn over the overall.

All the components of a "ski ensemble" must be made up in a fabric of the same texture, style and composition whether or not of the same color; they also must be of corresponding or compatible size.

- Scarves and articles of the scarf type, square or approximately square, of which no side exceeds 60 centimeters, are to be classified as handkerchiefs (heading 6213). Handkerchiefs of which any side exceeds 60 centimeters are to be classified in heading 6214.
- 8. Articles of this chapter which cannot be identified as either men's or boys' garments or as women's or girls' garments are to be classified in the headings covering women's or girls' garments.
- 9. Articles of this chapter may be made of metal thread.

Additional U.S. Notes

- For the purpose of heading 6209, the term "sets" means two or more different garments of headings 6111, 6209 or 6505 imported together, of corresponding sizes and intended to be worn together by the same person.
- 2. For the purposes of subheadings 6201.92.15, 6201.93.30, 6202.92.15, 6202.93.45, 6203.43.15, 6203.43.35, 6204.63.12, 6204.63.30 and 6211.20.15, the term "water resistant" means that garments classifiable in those subheadings must have a water resistance (see ASTM designations D 3600-81 and D 3781-79) such that, under a head pressure of 600 millimeters, not more than 1.0 gram of water penetrates after two minutes when tested in accordance with AATCC Test Method 35-1985. This water resistance must be the result of a rubber or plastics application to the outer shell, lining or inner lining.

Statistical Notes

- 1. For the purposes of subheadings 6203.21.00, 6203.22.30, 6203.23.00, 6203.29.20, 6204.21.00, 6204.22.30, 6204.23.00 and 6204.29.20, merchandise entered together and classified for customs purposes as an ensemble, shall be reported statistically as separate articles and reported under the most appropriate 10-digit reporting number within the same 8-digit tariff subheading which provides for the ensemble.
- 2. Imports of" <u>made to measure</u>" suits from Hong Kong, which do not accompany a returning traveler, are subject to a special agreement. Suits made to the specific measurements of a particular person require a "<u>made to measure</u>" export license from the government of Hong Kong. These "<u>made to measure</u>" suits of Hong Kong origin must be identified by the importer by the placing of the symbol "G" as a prefix to the appropriate tariff number.
- 3. Certain garments of chapter 62 assembled abroad from components formed and cut in the United States which, after assembly have been subject to bleaching, stone-washing, acid-washing or perma-pressing abroad, may be eligible for entry under a Special Access Program or Special Regime. Eligibility must be established under a bilateral agreement, and entry must be in compliance with procedures established by the Committee for the implementation of Textile Agreements. The importer is required to identify such garments on the entry summary or withdrawal forms by placing the symbol "H" as a prefix to the appropriate 10-digit chapter 62 tariff number.

ARTICLES OF STONE, PLASTER, CEMENT, ASBESTOS, MICA OR SIMILAR MATERIALS

XIII 68-1

Notes

- 1. This chapter does not cover:
 - (a) Goods of chapter 25;
 - (b) Coated, impregnated or covered paper of heading 4810 or 4811 (for example, paper coated with mica powder or graphite, bituminized or asphalted paper);
 - (c) Coated, impregnated or covered textile fabric of chapter 56 or 59 (for example, fabric coated or covered with mica powder, bituminized or asphalted fabric);
 - (d) Articles of chapter 71;
 - (e) Tools or parts of tools, of chapter 82;
 - (f) Lithographic stones of heading 8442;
 - (g) Electrical insulators (heading 8546) or fittings of insulating material of heading 8547;
 - (h) Dental burrs (heading 9018);
 - (ij) Articles of chapter 91 (for example, clocks and clock cases);
 - (k) Articles of chapter 94 (for example, furniture, lamps and lighting fittings, prefabricated buildings);
 - (1) Articles of chapter 95 (for example, toys, games and sports equipment);
 - (m) Articles of heading 9602, if made of materials specified in note 2(b) to chapter 96; or of heading 9606 (for example, buttons), 9609 (for example, slate pencils) or 9610 (for example, drawing slates); or
 - (n) Articles of chapter 97 (for example, works of art).
- In heading 6802 the expression "worked monumental or building stone" applies not only to the varieties of stone referred
 to in heading 2515 or 2516, but also to all other natural stone (for example, quartzite, flint, dolomite and steatite)
 similarly worked; it does not, however, apply to slate.

Additional U.S. Notes

- 1. For the purposes of heading 6802, the term "slabs" embraces flat stone pieces, not over 5.1 cm in thickness, having a facial area of 25.8 cm² or more, the edges of which have not been beveled, rounded or otherwise processed except such processing as may be needed to facilitate installation as tiling or veneering in building construction.
- 2. For the purposes of heading 6810, the term "tiles" does not include any article 3.2 cm or more in thickness.

CHAPTER 69

CERAMIC PRODUCTS

XIII

Notes

- This chapter applies only to ceramic products which have been fired after shaping. Headings 6904 to 6914 apply only to such products other than those classifiable in headings 6901 to 6903.
- 2. This chapter does not cover:
 - (a) Products of heading 2844:
 - (b) Articles of chapter 71 (for example, imitation jewelry);
 - (c) Cermets of heading 8113;
 - (d) Articles of chapter 82;
 - (e) Electrical insulators (heading 8546) or fittings of insulating material (heading 8547);
 - (f) Artificial teeth (heading 9021);
 - (g) Articles of chapter 91 (for example, clocks and clock cases);
 - (h) Articles of chapter 94 (for example, furniture, lamps and lighting fittings, prefabricated buildings);
 - (ij) Articles of chapter 95 (for example, toys, games and sports equipment);
 - (k) Articles of heading 9606 (for example, buttons) or of heading 9614 (for example, smoking pipes); or
 - (1) Articles of chapter 97 (for example, works of art).

Additional U.S. Notes

- For the purposes of this chapter, a "ceramic article" is a shaped article having a glazed or unglazed body of crystalline or substantially crystalline structure, the body of which is composed essentially of inorganic nonmetallic substances and is formed and subsequently hardened by such heat treatment that the body, if reheated to pyrometric cone 020, would not become more dense, harder, or less porous, but does not include any glass articles.
- 2. For the purposes of headings 6902 and 6903, the term "refractory" is applied to articles which have a pyrometric cone equivalent of at least 1500°C when heated at 60°C per hour (pyrometric cone 18). Refractory articles have special properties of strength and resistance to thermal shock and may also have, depending upon the particular uses for which designed, other special properties such as resistance to abrasion and corrosion.
- For the purposes of heading 6902, a brick which contains both chromium and magnesium is classifiable according to which of those components (expressed as Cr₂O₃ or MgO, respectively) is the greater by weight.
- For the purposes of headings 6905, 6907 and 6908, the term "tiles" does not include any article 3.2 cm or more in thickness.
- 5. For the purposes of headings 6909 through 6914:
 - (a) The terms "porcelain," "china" and "chinaware" embrace ceramic ware (other than stoneware), whether or not glazed or decorated, having a fired white body (unless artificially colored) which will not absorb more than 0.5 percent of its weight of water and is translucent in thicknesses of several millimeters. The term "stoneware" as used in this note, embraces ceramic ware which contains clay as an essential ingredient, is not commonly white, will absorb not more than 3 percent of its weight of water, and is naturally opaque (except in very thin pieces) even when absorption is less than 0.1 percent.
 - (b) The term "bone chinaware" embraces chinaware or porcelain the body of which contains 25 percent or more of calcined bone or tricalcium phosphate.
 - (c) The term "earthenware" embraces ceramic ware, whether or not glazed or decorated, having a fired body which contains clay as an essential ingredient, and will absorb more than 3 percent of its weight of water.
 - (d) The water absorption of a ceramic body shall be determined by ASTM test method designated C373 (except that test specimens may have a minimum weight of 10 g, and may have one large surface glazed).

Annotated for Statistical Reporting Purposes

XIII 69-2

- For the purposes of headings 6911 and 6912:
 - The term "available in specified sets" embraces plates, cups, saucers and other articles principally used for preparing, serving or storing food or beverages, or food or beverage ingredients, which are sold or offered for sale in the same pattern, but no article is classifiable as being "available in specified sets" unless it is of a pattern in which at least the articles listed below in (b) of this note are sold or offered for sale.
 - (b) If each of the following articles is sold or offered for sale in the same pattern, the classification hereunder in subheadings 6911.10.35, 6911.10.39, 6912.00.35 or 6912.00.39, of all articles of such pattern shall be governed by the aggregate value of the following articles in the quantities indicated, as determined by the appropriate customs officer under section 402 of the Tariff Act of 1930, as amended, whether or not such articles are imported in the same shipment:
 - 12 plates of the size nearest to 26.7 cm in maximum dimension, sold or offered for sale,
 - 12 plates of the size nearest to 15.3 cm in maximum dimension, sold or offered for sale,
 - 12 tea cups and their saucers, sold or offered for sale,
 - 12 soups of the size nearest to 17.8 cm in maximum dimension, sold or offered for sale, 12 fruits of the size nearest to 12.7 cm in maximum dimension, sold or offered for sale
 - 1 platter or chop dish of the size nearest to 38.1 cm in maximum dimension, sold or offered for sale, 1 open vegetable dish or bowl of the size nearest to 25.4 cm in maximum dimension, sold or offered for sale,

 - 1 sugar of largest capacity, sold or offered for sale,
 - 1 creamer of largest capacity, sold or offered for sale.

If either soups or fruits are not sold or offered for sale, 12 cereals of the size nearest to 15.3 cm in maximum dimension, sold or offered for sale, shall be substituted therefor.

- (c) The percentage of water absorption of cast and jiggered ceramic articles of the same pattern, which are "available in specified sets" and which are imported together in a ratio of at least 5 jiggered articles to 1 cast article in the same shipment shall be the average water absorption of such cast and jiggered articles, of the same pattern in the shipment, which average absorption shall be deemed to be equivalent to 5 percent of the water absorption of a representative sample of such cast articles plus 95 percent of the water absorption of a representative sample of such jiggered articles.
- For the purposes of headings 6911, 6912 and 6913, those provisions which classify merchandise according to the value of each "article," an article is a single tariff entity which may consist of more than one piece. For example, a vegetable dish and its cover, or a beverage pot and its lid, imported in the same shipment, constitute an article.

Statistical Notes

- For the purposes of headings 6904 and 6905, a "heat insulating" article, whether or not shaped, is one having a specific gravity of 1.2 or less and designed to impede or resist the flow of heat at temperatures above 870°C.
- For the purposes of subchapter I and statistical reporting numbers 6904.10.0010 and 6904.10.0030, a standard brick equivalent (sbe) shall be calculated on a volumetric basis, based on a brick measuring 11.43 cm by 6.35 cm by 22.86 cm.
- For the purposes of statistical reporting numbers 6904.10.0020 and 6904.10.0040, a standard brick equivalent (sbe) shall be calculated on a volumetric basis, based on a brick measuring 5.72 cm by 9.21 cm by 19.37 cm.
- For the purposes of heading 6904:
 - (a) The term "solid bricks" refers to bricks containing not more than 25 percent voids.
 - (b) The term "hollow bricks" refers to bricks containing more than 25 percent voids.

CHAPTER 70

GLASS AND GLASSWARE

XIII 70-1

Notes

- 1. This chapter does not cover:
 - (a) Goods of heading 3207 (for example, vitrifiable enamels and glazes, glass frit, other glass in the form of powder, granules or flakes):
 - (b) Articles of chapter 71 (for example, imitation jewelry);
 - (c) Optical fiber cables of heading 8544, electrical insulators (heading 8546) or fittings of insulating material of heading 8547;
 - (d) Optical fibers, optically worked optical elements, hypodermic syringes, artificial eyes, thermometers, barometers, hydrometers or other articles of chapter 90;
 - (e) Lamps or lighting fittings, illuminated signs, illuminated name-plates or the like, having a permanently fixed light source, or parts thereof of heading 9405;
 - (f) Toys, games, sports equipment, Christmas tree ornaments or other articles of chapter 95 (excluding glass eyes without mechanisms for dolls or for other articles of chapter 95); or
 - (g) Buttons, fitted vacuum flasks, scent or similar sprays or other articles of chapter 96.
- 2. For the purposes of headings 7003, 7004 and 7005:
 - (a) Glass is not regarded as "worked" by reason of any process it has undergone before amnealing;
 - (b) Cutting to shape does not affect the classification of glass in sheets;
 - (c) The expression "absorbent or reflecting layer" means a microscopically thin coating of metal or of a chemical compound (for example, metal oxide) which absorbs, for example, infrared light or improves the reflecting qualities of the glass while still allowing it to retain a degree of transparency or translucency.
- The products referred to in heading 7006 remain classified in that heading whether or not they have the character of articles.
- 4. For the purposes of heading 7019, the expression "glass wool" means:
 - (a) Mineral wools with a silica (SiO₂) content not less than 60 percent by weight;
 - (b) Mineral wools with a silica (SiO₂) content less than 60 percent but with an alkaline oxide (K₂O or Na₂O) content exceeding 5 percent by weight or a boric oxide (B₂O₃) content exceeding 2 percent by weight.

Mineral wools which do not comply with the above specifications fall in heading 6806.

5. Throughout the tariff schedule, the expression "glass" includes fused quartz and other fused silica.

Subheading Note

 For the purposes of subheadings 7013.21, 7013.31 and 7013.91, the expression "<u>lead crystal</u>" means only glass having a minimum lead monoxide (PbO) content by weight of 24 percent.

Annotated for Statistical Reporting Purposes

XIII 70-2

Additional U.S. Notes

- For the purposes of this chapter, the term "<u>fused quartz or other fused silica</u>" means glass containing more than 95 percent silica by weight.
- 2. For the purposes of headings 7003 through 7005, the expression "colored throughout the mass" refers to glass that has a transmittance of normally incident light of less than 66 percent at one or more wavelengths from 400 to 700 millimicrons, inclusive, or a transmittance of less than 80 percent at one or more wavelengths from 525 to 575 millimicrons, inclusive, for glass 6 mm in thickness, or of the equivalent transmittances for any other thickness, provided that, in determining such light transmittances, the effect of surface irregularities or configurations, or of other surface treatment (except flashing applied prior to solidification) and the effect of wire netting within the glass, shall be eliminated.
- For the purposes of headings 7003 and 7004, glass of the same size and thickness imported in any shipment in quantities
 over
 4.6 m² shall be denied entry unless it is--
 - (a) Packed in units containing, as nearly as the particular size permits, 4.6 m², or multiples thereof; or
 - (b) Packed in units containing multiples of the number of sheets of the same size and thickness which would be contained in a unit if packed to contain, as nearly as such size permits, 4.6 or 9.3 m²; or
 - (c) Otherwise packed in a manner which conforms to the packing practices of the domestic glass industry as determined and published from time to time by the Secretary of the Treasury.
- 4. For the purposes of heading 7005, the expression "<u>polished</u>," as used with reference to glass, refers to glass one or both of the surfaces of which have been made smooth and glossy, in whole or in part, by abrasive or chemical means or by floating the glass over molten metal.
- 5. For the purposes of subheading 7018.10.20, the term "<u>imitation precious or semiprecious stones</u>" means glass made into shapes suitable for use in jewelry or for other ornamental purposes in a manner similar to natural gemstones, whether or not in imitation thereof, but does not include natural gemstones, synthetic gemstones, reconstructed natural gemstones or imitation pearls.
- 6. For the purposes of subheading 7019.20, the expression "narrow fabrics" covers fabrics which meet the definition of "narrow woven fabrics" in note 5 to chapter 58.

Statistical Note

1. For the purposes of headings 7003 and 7004, in determining the surface area of cast or rolled glass having irregular surfaces (such as corrugated glass), superficial area shall be used.

XIV 71-2

- 5. For the purposes of this chapter, any alloy (including a sintered mixture and an inter-metallic compound) containing precious metal is to be treated as an alloy of precious metal if any one precious metal constitutes as much as 2 percent, by weight, of the alloy. Alloys of precious metal are to be classified according to the following rules:
 - (a) An alloy containing 2 percent or more, by weight, of platinum is to be treated as an alloy of platinum;
 - (b) An alloy containing 2 percent or more, by weight, of gold but no platinum, or less than 2 percent, by weight, of platinum, is to be treated as an alloy of gold;
 - (c) Other alloys containing 2 percent or more, by weight, of silver are to be treated as alloys of silver.
- 6. Except where the context otherwise requires, any reference in the tariff schedule to precious metal or to any particular precious metal includes a reference to alloys treated as alloys of precious metal or of the particular metal in accordance with the rules in note 5 above, but not to metal clad with precious metal or to base metal or non-metals plated with precious metal.
- 7. Throughout the tariff schedule the expression "metal clad with precious metal" means material made with a base of metal upon one or more surfaces of which there is affixed by soldering, brazing, welding, hot-rolling or similar mechanical means a covering of precious metal. Except where the context otherwise requires, the expression also covers base metal inlaid with precious metal.
- 8. For the purposes of heading 7113, the expression "articles of jewelry" means:
 - (a) Any small objects of personal adornment (gem-set or not) (for example, rings, bracelets, necklaces, brooches, earrings, watch chains, fobs, pendants, tie pins, cuff links, dress studs, religious or other medals and insignia); and
 - (b) Articles of personal use of a kind normally carried in the pocket, in the handbag or on the person (such as cigarette cases, powder boxes, chain purses or pill boxes).
- 9. For the purposes of heading 7114, the expression "articles of goldsmiths' or silversmiths' wares" includes such articles as ornaments, tableware, toilet-ware, smokers' articles and other articles of household, office or religious use.
- 10. For the purposes of heading 7117, the expression "<u>imitation jewelry</u>" means articles of jewelry within the meaning of paragraph (a) of note 8 above (but not including buttons or other articles of heading 9606, or dress combs, hair slides or the like, or hairpins, of heading 9615), not incorporating natural or cultured pearls, precious or semiprecious stones (natural, synthetic or reconstructed) nor (except as plating or as minor constituents) precious metal or metal clad with precious metal.

Subheading Notes

- For the purposes of subheadings 7106.10, 7108.11, 7110.11, 7110.21, 7110.31 and 7110.41, the expressions "powder" and "in powder form" mean products of which 90 percent or more by weight passes through a sieve having a mesh aperture of 0.5 mm.
- 2. Notwithstanding the provisions of note 4(b), for the purposes of subheadings 7110.11 and 7110.19, the expression "platinum" does not include iridium, osmium, palladium, rhodium or ruthenium.
- 3. For the classification of alloys in the subheadings of heading 7110, each alloy is to be classified with that metal, platinum, palladium, rhodium, iridium, osmium or ruthenium, which predominates by weight over each other of these metals.

Additional U.S. Notes

- 1. For the purposes of subchapter II, unless the context otherwise requires:
 - (a) The term "unwrought" refers to metals, whether or not refined, in the form of ingots, blocks, lumps, billets, cakes, slabs, pigs, cathodes, anodes, briquettes, cubes, sticks, grains, sponge, pellets, shot and similar manufactured primary forms, but does not cover rolled, forged, drawn or extruded products, tubular products or cast or sintered forms which have been machined or processed otherwise than by simple trimming, scalping or descaling;
 - (b) The term "<u>semimanufactured</u>" refers to wrought metal products in the form of bars, rods, sections, plates, sheets, strips, wire, tubes, pipes and hollow bars, and to powder (other than primary metals in powder form);
 - (c) The term "waste and scrap" refers to materials and articles of metals which are second-hand or waste or refuse, or are obsolete, defective or damaged, and which are fit only for the recovery of the metal content or for use in the manufacture of chemicals, and does not include metals in unwrought form or metal-bearing materials provided for in heading 2616.
- 2. Coin provided for in heading 7118 which is currently in circulation in any country and is imported for monetary purposes shall be admitted without formal customs consumption entry or the payment of duty. This does not affect any requirements under other provisions of law to the effect that transfers of coin into or through the United States, in an amount exceeding \$5,000 on any one occasion, shall be reported as described therein.
