Preface To Fourth Edition

December 1, 1968

The Tariff Schedules of the United States Annotated (1969) (TSUSA-1969) is the fourth edition of a compilation published pursuant to section 201, Tariff Classification Act of 1962 1/, embracing the legal text of the Tariff Schedules of the United States, as amended and modified, together with statistical annotations formulated pursuant to section 484(e), Tariff Act of 1930. 2/

The fourth edition contains a number of changes in the TSUSA, including changes made to reflect--

- (1) The third-stage duty reductions that became effective on October 1, 1968, pursuant to concessions granted by the United States in the compensatory trade agreement with Japan (Pres. Proc. 3744, as modified by Pres. Proc. 3818);
- (2) The fourth-stage duty reductions that became effective on January 1, 1969, pursuant to concessions granted by the United States in the compensatory trade agreement with Canada (Pres. Proc. 3694, as modified by Pres. Proc. 3818);
- (3) The second-stage duty reductions that became effective on January 1, 1969, pursuant to the concessions granted by the United States in the Kennedy Round trade agreement (Pres. Proc. 3822);
- (4) The emergency quotas for certain cheeses imposed pursuant to section 22 of the Agricultural Adjustment Act, as amended (Pres. Proc. 3870);
- (5) The continuation of the suspension of duty for certain electrodes (P.L. 90-571) and for certain alumina, bauxite, and copper (P.L. 90-615);
- (6) The decrease in the rate of duty for Chinese gooseberries (P.L. 90-564) and for certain cast iron parts (P.L. 90-638);

1/ "Sec. 201. The Commission is authorized to issue, at appropriate intervals, and to keep up to date, a publication containing current tariff schedules and related matters, including such matter as may be needed for reporting statistics." The first edition (1963) consisted of the original publication and five supplements; the second edition (1965) consisted of the original publication and nine supplements; and the third edition (1968) consisted of the original publication and two supplements.

2/ "Sec. 484. * * * (e) The Secretary of the Treasury, the Secretary of Commerce, and the Chairman of the United States Tariff Commission are authorized and directed to establish from time to time for statistical purposes an enumeration of articles in such detail as in their judgment may be necessary, comprehending all merchandise imported into the United States, and as a part of the entry there shall be attached thereto or included therein an accurate statement specifying, in terms of such detailed enumeration, the kinds and quantities of all merchandise imported and the value of the total quantity of each kind of article."

- (7) The exemption from duty for cellulosic plastics materials imported for use in artificial kidney machines (P.L. 90-615);
- (8) Changes in the classification of fabrics in chief weight, but not in chief value, of wool, and certain related rate changes (P.L. 90-638); and
- (9) Changes in statistical annotations.

These changes are documented in the TSUSA sections entitled "Staged Rates and Historical Notes", or simply "Historical Notes" where staged rates are not involved. These sections include all of the changes that have been made since August 31, 1963, in the legal text of the tariff schedules and in the statistical annotations, as well as prospective changes in the legal text.

The Staged Rates and Historical Notes are keyed to each of the parts of the tariff schedules and, as published, appear at the end of each such part. For the convenience of users, however, the pages of the staged rates and notes and the pages of the basic tariff schedules are separately numbered so that persons who so desire may remove the staged rates and notes and place them in a separate binder.

The statistical annotations contained in the TSUSA prescribe the statistical information to be supplied on customs entry and withdrawal forms with respect to articles imported into the customs territory of the United States. Thus, this publication is designed to enable importers, customs brokers, customs officers and other interested persons to determine (1) the classifications and rates of duty applicable to imported articles, and (2) the requirements for reporting statistical data with respect to such imports.

Requests from interested parties for changes in any of the requirements for statistical reporting should be prepared in quadruplicate and submitted to:

The Secretary
United States Tariff Commission
Washington, D.C. 20436

Such requests should in every instance indicate precisely the nature of the desired changes and give detailed reasons in support of the request.

Page 3

1. Tariff Treatment of Imported Articles. All articles imported into the customs territory of the United States from outside thereof are subject to duty or exempt therefrom as prescribed in general headnote 3.

2. Customs Territory of the United States. The term "customs territory of the United States", as used in the schedules, includes only the States, the District of Columbia, and Puerto Rico.

3. Rates of Duty. The rates of duty in the "Rates of Duty" columns numbered 1 and 2 of the schedules apply to articles imported into the customs territory of the United States as hereinafter provided in this headnote:

(a) Products of Insular Possessions.

(i) Except as provided in headnote 6 of schedule 7, part 2, subpart E, [and] except as provided in headnote 4 of schedule 7, part 7, subpart A, articles imported from insular possessions of the United States which are outside the customs territory of the United States are subject to the rates of duty set forth in column numbered 1 of the schedules, except that all such articles the growth or product of any such possession, or manufactured or produced in any such possession from materials the growth, product, or manufacture of any such possession or of the customs territory of the United States, or of both, which do not contain foreign materials to the value of more than 50 percent of their total value, coming to the customs territory of the United States directly from any such possession, and all articles previously imported into the customs territory of the United States with payment of all applicable duties and taxes imposed upon or by reason of importation which were shipped from the United States, without remission, refund, or drawback of such duties or taxes, directly to the possession from which they are being returned by direct shipment, are exempt from duty.

(ii) In determining whether an article produced or manufactured in any such insular possession contains foreign materials to the value of more than 50 percent, no material shall be considered foreign which, at the time such article is entered, may be imported into the customs territory from a foreign country, other than Cuba or the Philippine Republic, and entered free of duty.

(b) Products of Cuba. Products of Cuba imported into the customs territory of the United States, whether imported directly or indirectly, are subject to the rates of duty set forth in column numbered 1 of the schedules. Preferential rates of duty for such products apply only as shown in the said column 1. 1/

(c) Products of the Philippine Republic.

(i) Products of the Philippine Republic imported into the customs territory of the United States, whether imported directly or indirectly, are subject to the rates of duty which are set forth in column numbered 1 of the schedules or to fractional parts of the rates in the said column 1, as hereinafter prescribed in subdivisions (c)(ii) and (c)(iii) of this headnote.

(ii) Except as otherwise prescribed in the schedules, a Philippine article, as defined in subdivision (c)(iv) of this headnote, imported into the customs

1/ By virtue of section 401 of the Tariff Classification Act of 1962, the application to products of Cuba of either a preferential or other reduced rate of duty in column 1 is suspended. See general headnote 3(e), infra. The provisions for preferential Cuban rates continue to be reflected in the schedules because, under section 401, the rates therefor in column 1 still form the bases for determining the rates of duty applicable to certain products, including "Philippine articles".

territory of the United States and entered on or before July 3, 1974, is subject to that rate which results from the application of the following percentages to the most favorable rate of duty (i.e., including a preferential rate prescribed for any product of Cuba) set forth in column numbered 1 of the schedules:

(A) 20 percent, during calendar years

1963 through 1964,

(B) 40 percent, during calendar years

1965 through 1967,

(C) 60 percent, during calendar years

1968 through 1970,

(D) 80 percent, during calendar years

1971 through 1973,

(E) 100 percent, during the period from

January 1, 1974, through July 3, 1974.

(iii) Except as otherwise prescribed in the schedules, products of the Philippine Republic, other than Philippine articles, are subject to the rates of duty (except any preferential rates prescribed for products of Cuba) set forth in column numbered 1 of the schedules.

(iv) The term "Philippine article", as used in the schedules, means an article which is the product of the Philippines, but does not include any article produced with the use of materials imported into the Philippines which are products of any foreign country (except materials produced within the customs territory of the United States) if the aggregate value of such imported materials when landed at the Philippine port of entry, exclusive of any landing cost and Philippine duty, was more than 20 percent of the appraised customs value of the article imported into the customs territory of the United States.

(d) Products of Canada.

(i) Products of Canada imported into the customs territory of the United States, whether imported directly or indirectly, are subject to the rates of duty set forth in column numbered 1 of the schedules. The rates of duty for a Canadian article, as defined in subdivision (d)(ii) of this headnote, apply only as shown in the said column numbered 1.

(ii) The term "Canadian article", as used in the schedules, means an article which is the product of Canada, but does not include any article produced with the use of materials imported into Canada which are products of any foreign country (except materials produced within the customs territory of the United States), if the aggregate value of such imported materials when landed at the Canadian port of entry (that is, the actual purchase price, or if not purchased, the export value, of such materials, plus, if not included therein, the cost of transporting such materials to Canada but exclusive of any landing cost and Canadian duty) was --

(A) with regard to any motor vehicle or automobile truck tractor entered on or before December 31, 1967, more than 60 percent of the appraised value of the article imported into the customs territory of the United States; and

(B) with regard to any other article (including any motor vehicle or automobile truck tractor entered after December 31, 1967), more than 50 percent of the appraised value of the article imported into the customs territory of the United States.

(e) Products of Communist Countries. Notwithstanding any of the foregoing provisions of this headnote, the rates of duty shown in column numbered 2 shall apply to products, whether imported directly or indirectly, of the following countries and areas pursuant to section 401 of the Tariff Classification Act of 1962, to section 231 or 257(e) (2) of the Trade Expansion Act of 1962, or to

 Union of Soviet Socialist Republics and the area in East Prussia under the provisional administration of the Union of Soviet Socialist Republics.

(f) Products of All Other Countries. Products of all countries not previously mentioned in this headnote imported into the customs territory of the United States are subject to the rates of duty set forth in column numbered 1 of the schedules.

(g) Effective Date; Exceptions - Staged Rates of Duty. ^{2/} Except as specified below or as may be specified elsewhere, pursuant to section 501(a) of the Tariff Classification Act of 1962 (P.L. 87-456, approved May 24, 1962), the rates of duty in columns numbered 1 and 2 become effective with respect to articles entered on or after the 10th day following the date of the President's proclamation provided for in section 102 of the said Act. If, in column numbered 1, any rate of duty or part thereof is set forth in parenthesis, the effective date shall be governed as follows:

(i) If the rate in column numbered 1 has only one part (i.e., 8¢ (10¢) per lb.), the parenthetical rate (viz., 10¢ per lb.) shall be effective as to articles entered before July 1, 1964, and the other rate (viz., 8¢ per lb.) shall be effective as to articles entered on or after July 1, 1964.

(ii) If the rate in column numbered 1 has two or more parts (i.e., 5¢ per lb. + 50% ad val.) and has a parenthetical rate for either or both parts, each part of the rate shall be governed as if it were a one-part rate. For example, if a rate is expressed as "4¢ (4.5¢) per lb. + 8% (9%) ad val.", the rate applicable to articles entered before July 1, 1964, would be "4.5¢ per lb. + 9% ad val.", the rate applicable to articles entered on or after July 1, 1964, would be "4¢ per lb. + 8% ad val.".

(iii) If the rate in column numbered 1 is marked with an asterisk (*), the foregoing provisions of (i) and (ii) shall apply except that "January 1, 1964" shall be substituted for "July 1, 1964", wherever this latter date appears.

^{1/} In Proclamation 3447, dated February 3, 1962, the President, acting under authority of section 620(a) of the Foreign Assistance Act of 1961 (75 Stat. 445), as amended, prohibited the importation into the United States of all goods of Cuban origin and all goods imported from or through Cuba, subject to such exceptions as the Secretary of the Treasury determines to be consistent with the effective operation of the embargo.

^{2/} The purpose of headnote 3(g) was to provide for an effective date for the rates of duty initially contained in the Tariff Schedules of the United States. By Presidential Proclamation 3548 of August 21, 1963, these rates of duty, except as noted in subparagraphs (i), (iii), and (iii) of headnote 3(g), became effective on August 31, 1963.

4. Modification or Amendment of Rates of Duty. Except as otherwise provided in the Appendix to the Tariff Schedules --

(a) a statutory rate of duty supersedes and terminates the existing rates of duty in both column numbered 1 and column numbered 2 unless otherwise specified in the amending statute;

(b) a rate of duty proclaimed pursuant to a concession granted in a trade agreement shall be reflected in column numbered 1 and, if higher than the then existing rate in column numbered 2, also in the latter column, and shall supersede but not terminate the then existing rate (or rates) in such column (or columns);

(c) a rate of duty proclaimed pursuant to section 336 of the Tariff Act of 1930 shall be reflected in both column numbered 1 and column numbered 2 and shall supersede but not terminate the then existing rates in such columns; and

(d) whenever a proclaimed rate is terminated or suspended, the rate shall revert, unless otherwise provided, to the next intervening proclaimed rate previously superseded but not terminated or, if none, to the statutory rate.

5. Intangibles. For the purposes of headnote 1 --

(a) corpses, together with their coffins and accompanying flowers,

(b) currency (metal or paper) in current circulation in any country and imported for monetary purposes,

(c) electricity,

(d) securities and similar evidences of value, and

(e) vessels which are not "yachts or pleasure boats" within the purview of subpart D, part 6, of schedule 6,

are not articles subject to the provisions of these schedules.

6. Containers or Holders for Imported Merchandise.

For the purposes of the tariff schedules, containers or holders are subject to tariff treatment as follows:

(a) Imported Empty: Containers or holders if imported empty are subject to tariff treatment as imported articles and as such are subject to duty unless they are within the purview of a provision which specifically exempts them from duty.

(b) Not Imported Empty: Containers or holders if imported containing or holding articles are subject to tariff treatment as follows:

(i) The usual or ordinary types of shipping or transportation containers or holders, if not designed for, or capable of, reuse, and containers of usual types ordinarily sold at retail with their contents, are not subject to treatment as imported articles. Their cost, however, is, under section 402 or section 402a of the tariff act, a part of the value of their contents and if their contents are subject to an ad valorem rate of duty such containers or holders are, in effect, dutiable at the same rate as their contents, except that their cost is deductible from dutiable value upon submission of satisfactory proof that they are products of the United States which are being returned without having been advanced in value or improved in condition by any means while abroad.

(ii) The usual or ordinary types of shipping or transportation containers or holders, if designed for, or capable of, reuse, are subject to treatment as imported articles separate and distinct from their contents. Such holders or containers are not part of the dutiable value of their contents and are separately subject to duty upon each and every importation into the customs territory of the United States unless within the scope of a provision specifically exempting them from duty.

(iii) In the absence of context which requires otherwise, all other containers or holders are subject to the same treatment as specified in (ii) above for usual or ordinary types of shipping or transportation containers or holders designed for, or capable of, reuse

7. Commingling of Articles. (a) Whenever articles subject to different rates of duty are so packed together or mingled that the quantity or value of each class of articles cannot be readily ascertained by customs officers (without physical segregation of the shipment or the contents of any entire package thereof), by one or more of the following means:

- (i) sampling,
 - (ii) verification of packing lists or other documents filed at the time of entry, or
 - (iii) evidence showing performance of commercial settlement tests generally accepted in the trade and filed in such time and manner as may be prescribed by regulations of the Secretary of the Treasury,
- the commingled articles shall be subject to the highest rate of duty applicable to any part thereof unless the consignee or his agent segregates the articles pursuant to subdivision (b) hereof.

(b) Every segregation of articles made pursuant to this headnote shall be accomplished by the consignee or his agent at the risk and expense of the consignee within 30 days (unless the Secretary authorizes in writing a longer time) after the date of personal delivery or mailing, by such employee as the Secretary of the Treasury shall designate, of written notice to the consignee that the articles are commingled and that the quantity or value of each class of articles cannot be readily ascertained by customs officers. Every such segregation shall be accomplished under customs supervision, and the compensation and expenses of the supervising customs officers shall be reimbursed to the Government by the consignee under such regulations as the Secretary of the Treasury may prescribe.

(c) The foregoing provisions of this headnote do not apply with respect to any part of a shipment if the consignee or his agent furnishes, in such time and manner as may be prescribed by regulations of the Secretary of the Treasury, satisfactory proof --

- (i) that such part (A) is commercially negligible,
- (B) is not capable of segregation without excessive cost, and (C) will not be segregated prior to its use in a manufacturing process or otherwise, and
- (ii) that the commingling was not intended to avoid the payment of lawful duties.

Any article with respect to which such proof is furnished shall be considered for all customs purposes as a part of the article, subject to the next lower rate of duty, with which it is commingled.

(d) The foregoing provisions of this headnote do not apply with respect to any shipment if the consignee or his agent shall furnish, in such time and manner as may be prescribed by regulations of the Secretary of the Treasury, satisfactory proof --

- (i) that the value of the commingled articles is less than the aggregate value would be if the shipment were segregated;
- (ii) that the shipment is not capable of segregation without excessive cost and will not be segregated prior to its use in a manufacturing process or otherwise; and

(iii) that the commingling was not intended to avoid the payment of lawful duties.

Any merchandise with respect to which such proof is furnished shall be considered for all customs purposes to be dutiable at the rate applicable to the material present in greater quantity than any other material.

(e) The provisions of this headnote shall apply only in cases where the schedules do not expressly provide a particular tariff treatment for commingled articles.

(b) the term "entered for consumption" does not include withdrawals from warehouse for consumption;

(c) the term "withdrawn for consumption" means withdrawn from warehouse for consumption and does not include articles entered for consumption;

(d) the term "rate of duty" includes a free rate of duty; rates of duty proclaimed by the President shall be referred to as "proclaimed" rates of duty; rates of duty enacted by the Congress shall be referred to as "statutory" rates of duty; and the rates of duty in column numbered 2 at the time the schedules become effective shall be referred to as "original statutory" rates of duty;

(f) the terms "of", "wholly of", "almost wholly of", "in part of" and "containing", when used between the description of an article and a material (e.g., "furniture of wood", "woven fabrics, wholly of cotton", etc.), have the following meanings:

(i) "of" means that the article is wholly or in chief value of the named material;

(ii) "wholly of" means that the article is, except for negligible or insignificant quantities of some other material or materials, composed completely of the named material;

(iii) "almost wholly of" means that the essential character of the article is imparted by the named material, notwithstanding the fact that significant quantities of some other material or materials may be present; and

(iv) "in part of" or "containing" mean that the article contains a significant quantity of the named material.

With regard to the application of the quantitative concepts specified in subparagraphs (ii) and (iv) above, it is intended that the de minimis rule apply.

General Headnotes and Rules of Interpretation

Page 6

10. General Interpretative Rules. For the purposes of these schedules --

(a) the general, schedule, part, and subpart headnotes, and the provisions describing the classes of imported articles and specifying the rates of duty or other import restrictions to be imposed thereon are subject to the rules of interpretation set forth herein and to such other rules of statutory interpretation, not inconsistent therewith, as have been or may be developed under administrative or judicial rulings;

(b) the titles of the various schedules, parts, and subparts and the footnotes therein are intended for convenience in reference only and have no legal or interpretative significance;

(c) an imported article which is described in two or more provisions of the schedules is classifiable in the provision which most specifically describes it; but, in applying this rule of interpretation, the following considerations shall govern:

(i) a superior heading cannot be enlarged by inferior headings indented under it but can be limited thereby;

(ii) comparisons are to be made only between provisions of coordinate or equal status, i.e., between the primary or main superior headings of the schedules or between coordinate inferior headings which are subordinate to the same superior heading;

(d) if two or more tariff descriptions are equally applicable to an article, such article shall be subject to duty under the description for which the original statutory rate is highest, and, should the highest original statutory rate be applicable to two or more of such descriptions, the article shall be subject to duty under that one of such descriptions which first appears in the schedules;

(e) in the absence of special language or context which otherwise requires --

(i) a tariff classification controlled by use (other than actual use) is to be determined in accordance with the use in the United States at, or immediately prior to, the date of importation, of articles of that class or kind to which the imported articles belong, and the controlling use is the chief use, i.e., the use which exceeds all other uses (if any) combined;

(ii) a tariff classification controlled by the actual use to which an imported article is put in the United States is satisfied only if such use is intended at the time of importation, the article is so used, and proof thereof is furnished within 3 years after the date the article is entered;

(f) an article is in chief value of a material if such material exceeds in value each other single component material of the article;

(g) a headnote provision which enumerates articles not included in a schedule, part, or subpart is not necessarily exhaustive, and the absence of a particular article from such headnote provision shall not be given weight in determining the relative specificity of competing provisions which describe such article;

(h) unless the context requires otherwise, a tariff description for an article covers such article, whether assembled or not assembled, and whether finished or not finished;

(ij) a provision for "parts" of an article covers a product solely or chiefly used as a part of such article, but does not prevail over a specific provision for such part.

11. Issuance of Rules and Regulations. The Secretary of the Treasury is hereby authorized to issue rules and regulations governing the admission of articles under the provisions of the schedules. The allowance of an importer's claim for classification, under any of the provisions of the schedules which provide for total or partial relief from duty or other import restrictions on the basis of facts which are not determinable from an examination of the article itself in its condition as imported, is dependent upon his complying with any rules or regulations which may be issued pursuant to this headnote.

12. The Secretary of the Treasury is authorized to prescribe methods of analyzing, testing, sampling, weighing, gauging, measuring, or other methods of ascertainment whenever he finds that such methods are necessary to determine the physical, chemical, or other properties or characteristics of articles for purposes of any law administered by the Customs Service.

General statistical headnotes:

1. Statistical Requirements for Imported Articles. Persons making customs entry or withdrawal of articles imported into the customs territory of the United States shall complete the entry or withdrawal forms, as provided herein and in regulations issued pursuant to law, to provide for statistical purposes information as follows:

(a) the number of the Customs district and of the port where the articles are being entered for consumption or warehouse, as shown in Statistical Annex A of these schedules;

(b) the name of the carrier or the means of transportation by which the articles were transported to the first port of unloading in the United States;

(c) the foreign port of lading;

(d) the United States port of unloading;

(e) the date of importation;

(f) the country of origin of the articles expressed in terms of the designation therefor in Statistical Annex B of these schedules;

(g) a description of the articles in sufficient detail to permit the classification thereof under the proper statistical reporting number in these schedules;

(h) the statistical reporting number under which the articles are classifiable;

(ij) gross weight in pounds for the articles covered by each reporting number when imported in vessels or aircraft;

(k) the net quantity in the units specified herein for the classification involved;

(l) the U.S. dollar value in accordance with the definition in Section 402 or 402a of the Tariff Act of 1930, as amended, for all merchandise including that free of duty or dutiable at specific rates; and

(m) such other information with respect to the imported articles as is provided for elsewhere in these schedules.

2. Statistical Annotations. (a) The statistical annotations to the Tariff Schedules of the United States consist of --

- (i) the 2-digit statistical suffixes,
- (ii) the indicated units of quantity,
- (iii) the statistical headnotes and annexes, and
- (iv) the italicized article descriptions.

(b) The legal text of the Tariff Schedules of the United States consists of the remaining text as more specifically identified in headnote 10(a) of the general headnotes and rules of interpretation.

(c) The statistical annotations are subordinate to the provisions of the legal text and cannot change their scope.

3. Statistical Reporting Number. (a) General Rule: Except as provided in paragraph (b) of this headnote, and in the absence of specific instructions to the contrary elsewhere, the statistical reporting number for an article consists of the 7-digit number formed by combining the 5-digit item number with the appropriate 2-digit statistical suffix. Thus, the statistical reporting number for live monkeys dutiable under item 100.95 is "100.9520".

(b) Wherever in the tariff schedules an article is classifiable under a provision which derives its rate of duty from a different provision, the statistical reporting number is, in the absence of specific instructions to the contrary elsewhere, the 7-digit number for the basic provision followed by the item number of the provision from which the rate is derived. Thus, the statistical reporting number of mixed apple and grape juices, not containing over 1.0 percent of ethyl alcohol by volume, is "165.6500-165.40".

4. Abbreviations. (a) The following symbols and abbreviations are used with the meanings respectively indicated below:

sup. ft.	-	superficial foot
oz.	-	ounces avoirdupois
fl. oz.	-	fluid ounce
oz. troy	-	troy ounce
pf. gal.	-	proof gallon

(b) An "X" appearing in the column for units of quantity means that no quantity (other than gross weight) is to be reported.

(c) Whenever two separate units of quantity are shown for the same article, the "v" following one of such units means that the value of the article is to be reported with that quantity.

		<p>Subpart B. - Lumber, Flooring, and Moldings</p> <p>Subpart B headnotes:</p> <p>1. This subpart covers lumber, wood siding, wood flooring, wood moldings, and certain wood carvings and ornaments, including such products when they have been drilled or treated.</p> <p>2. For the purposes of this part, the following terms have the meanings hereby assigned to them:</p> <p>(a) Lumber: A product of a sawmill or sawmill and planing mill derived from a log by lengthwise sawing which, in its original sawed condition, has at least 2 approximately parallel flat longitudinal sawed surfaces, and which may be rough, dressed, or worked, as set forth below:</p> <ul style="list-style-type: none"> (i) rough lumber is lumber just as it comes from the saw, whether in the original sawed size or edged, resawn, crosscut, or trimmed to smaller sizes; (ii) dressed lumber is lumber which has been dressed or surfaced by planing on at least one edge or face; and (iii) worked lumber is lumber which has been matched (provided with a tongued-and-grooved joint at the edges or ends), shiplapped (provided with a rabbeted or lapped joint at the edges), or patterned (shaped at the edges or on the faces to a patterned or molded form) on a matching machine, sticker, or molder. <p>Edge-glued or end-glued wood over 6 feet in length and not over 15 inches in width shall be classified as lumber if such wood as a solid piece without glue joints would be deemed to be lumber as defined above.</p> <p>(b) Softwood: Wood from trees of coniferous species (order Coniferae).</p> <p>(c) Hardwood: Wood from trees of non-coniferous species.</p> <p>(d) Drilled or treated: Drilled at intervals for nails, screws, or bolts, sanded or otherwise surface processed in lieu of, or in addition to, planing or working, or treated with creosote or other wood preservatives, or with fillers, sealers, waxes, oils, stains, varnishes, paints, or enamels, but not including anti-stain or other temporary applications mentioned in headnote 4 of this subpart.</p> <p>(e) Standard wood moldings: Wood moldings worked to a pattern and having the same profile in cross section throughout their length.</p> <p>3. Lumber, including certain flooring provided for in this subpart, is dutiable on the basis of "board measure" for which the unit of measurement is the board foot. For the purposes of this subpart, a board foot is the quantity of lumber contained in, or derived (by drying, dressing, or working, or any combination of these processes) from, a piece of rough green lumber 1 inch in thickness, 12 inches in width, and 1 foot in length, or the equivalent of such piece in other dimensions.</p> <p>4. The treatment of lumber or other products provided for in this subpart with anti-stain or other temporary applications which serve only for the purpose of maintaining the products in their rough, dressed, or worked condition until installation or further manufacture shall not affect their classification under any of the provisions of this subpart.</p>

Except for decalcomanias, labels, flaps, and bands, all of which are covered by the provisions therefor in this part, regardless of the nature of the printing thereon, this part covers only printed matter consisting essentially of textual or pictorial matter produced by any printing process, and similar matter in manuscript or typewritten form. The text may be set forth in any language by means of any kind of characters. With the exceptions above indicated, this part does not cover any article in which printing is merely incidental to the primary use of the article or in which printing is employed mainly for coloration or to produce a decorative or novelty effect (see part 4 of this schedule).			
		2. For the purposes of this part -- (a) the term "paper" includes paperboard; (b) the term "books" includes books, bound and not bound, and pamphlets; (c) the term "periodicals" embraces only paper-covered or unbound publications issued regularly at stated periods, such as weekly, monthly, or quarterly, and bearing the date of issue; and (d) the term "photographs" embraces only pictures other than motion pictures, produced on photo-sensitive materials, and includes positive and negative images on exposed, or exposed and developed, photographic film.			
		3. For the purposes of determining the classification of printed matter produced in whole or in part by a lithographic process, the thickness of such printed matter is that of the thinnest paper contained therein, except that the thickness of a permanently mounted lithograph is the combined thickness of the lithograph and its mounting.

Schedule 3 headnotes (con.):

- (iii) burnt-out lace;
- (iv) lace, netting, braid, fringe, edging, tucking, or trimming, or textile fabric;
- (v) any combination of the foregoing types or methods of ornamentation;
- (b) ornamentation of the types or methods covered hereby consists of ornamenting work done to a pre-existing textile fabric, whether the ornamentation was applied to such fabric --
 - (i) when it was in the piece,
 - (ii) after it had been made or cut to a size for particular furnishings, wearing apparel, or other article, or
 - (iii) after it had actually been incorporated into another article,
 and if such textile fabric remains visible, at least in significant part, after ornamentation: Provided, That lace, netting, braid, fringe, edging, tucking, trimming or ornament shall not be required to have had a separate existence from the fabric or other article on which it appears in order to constitute ornamentation for the purposes of this headnote; and
- (c) applique work, beads, bugles, spangles, bullions, and other forms of nontextile ornamentation applied to a textile fabric or other article of textile materials shall be disregarded in determining the component material of chief value of such fabric or other article.

4. For the purposes of the tariff schedules --

- (a) Except as specifically provided otherwise, in determining the yarn count of fabrics, the warp and filling yarns, whether plied or not, shall be counted as they occur in the fabric.
- (b) In determining the component fibers of chief value in coated or filled, or laminated, fabrics and articles wholly or in part thereof, the coating or filling, or the nontextile laminating substances, shall be disregarded in the absence of context to the contrary.

5. For the purposes of parts 5, 6, and 7 of this schedule and parts I (except subpart A), 4, and 12 of schedule 7, in determining the classification of any article which is wholly or in part of a fabric coated or filled, or laminated, with nontransparent rubber or plastics (which fabric is provided for in part 4C of this schedule), the fabric shall be regarded not as a textile material but as being wholly of rubber or plastics to the extent that (as used in the article) the nontransparent rubber or plastics forms either the outer surface of such article or the only exposed surface of such fabric.

6. (a) If the rate of duty in column numbered 1 applicable to wool provided for in item 306.31 is at any time increased or decreased, the specific part of the compound rate of duty in column 1 (hereinafter referred to as the compensatory part thereof) applicable to articles provided for in each item listed in paragraph (e) of this note, and so much of each specific rate in column 1 applicable to articles provided for in each item listed in paragraph (f) of this note as is therein designated as the compensatory part thereof, shall, subject to the provisions of paragraphs (b) through (d) of this note, be increased or decreased in the same proportion as such rate applicable to wool provided for in item 306.31 is increased or decreased.

- (b) The maximum and minimum levels to which the compensatory part of a rate may be increased or decreased pursuant to paragraph (a) of this note shall be 50 percent above such compensatory part "existing on July 1, 1934", or 50 percent below such part "existing on July 1, 1962", respectively, as such terms are applied for purposes of section 201(b) of the Trade Expansion Act of 1962 (19 U.S.C. (1964) 1821).

(c) Any specific part of a compound rate or any specific rate modified pursuant to paragraph (a) of this note may be rounded, by not exceeding 0.5 cent, to a whole number of cents.

(d) A rate increase or decrease pursuant to this note shall be proclaimed by the President effective on the day on which the modified rate becomes applicable to the wool provided for in item 306.31 or, with or without staging, as soon thereafter as the President determines to be practicable under United States law, but in no event later than 4 years after such modified rate becomes applicable, and shall remain in effect thereafter so long as such modified rate is applicable.

		<p align="center">PART I. - TEXTILE FIBERS AND WASTES; YARNS AND THREADS</p> <p><u>Part I headnotes:</u></p> <p>1. For the purposes of this part -- (a) the term "waste" means all fiber, yarn, and thread wastes, including wastes obtained in the production of continuous and noncontinuous fibers, yarns, and threads, such as gin motes, scutcher waste (including tow), picker waste, card waste, top waste, comber waste (including noils), hackling waste (including tow), sliver waste, roving waste, ring waste, throwster (twister or pleyer) waste, fly, sweepings, and willowed wastes, and including fiber, yarn, and thread wastes obtained in the production of other textile products (i.e., products other than fibers, yarns, or threads) or otherwise obtained; and (b) the term "advanced waste" means any of the above-mentioned wastes which have been cleaned, bleached, colored, or otherwise advanced, and includes fibers recovered by cleaning (except willowing), degumming, carbonizing, cutting, pickering, garnetting or similar processes from any of the above-mentioned wastes or from textile clippings or articles, new or used, whether or not such fibers or the wastes from which recovered have also been otherwise advanced, but does not include fibers which have been carded, combed, or similarly processed, or reuseable yarns or threads.</p> <p>2. Rags and scrap cordage are covered in part 7C of this schedule.</p> <hr/> <p align="center">Subpart A. - Cotton</p> <p><u>Subpart A headnotes:</u></p> <p>1. The term "number", as applied to yarns in this subpart, means the number of 840-yard hanks of yarn in 1 pound. To determine the number of any yarn whether single or plied, the actual yards per pound shall be divided by 840 and the quotient thereof multiplied by the number of plies in such yarn. Fractions in the resulting yarn number shall be disregarded.</p> <p>2. In this subpart, each of the rates of duty provided for yarns, wholly of cotton, not bleached, mercerized, colored, combed or plied (items 301.01 through 301.98, inclusive) is also the "base rate" for yarn of the same number covered by item 302.--. For citation purposes, the two blanks on the end of the latter item number shall be filled in with the last two digits of the item number for the applicable base rate. Thus, "item 302.28" would be the citation for bleached, mercerized, colored, combed, or plied yarns, wholly of cotton, of number 28.</p> <p>3. Under regulations prescribed by the Secretary of the Treasury, the staple length of cotton shall be determined for all customs purposes by application of the Official Cotton Standards of the United States for length of staple, as established by the Secretary of Agriculture and in effect when the determination is to be made.</p> <hr/>

PART 3. - WOVEN FABRICS								
<u>Part 3 headnote:</u> <p>1. This part covers all woven fabrics in the piece, of any width and with or without fast edges, including gauze and leno-woven fabrics, but does not include --</p> <ul style="list-style-type: none"> (i) any woven fabrics which are specially provided for in the provisions of part 4 of this schedule; (ii) certain wool fabric samples (see part 7A of this schedule); or (iii) woven fabrics in item 748.10 of part 7B of schedule 7. <hr/> <p>Subpart A. - Woven Fabrics, of Cotton</p> <u>Subpart A headnotes:</u> <p>1. (a) In the ascertainment of the condition of the fabrics or yarns upon which the duties imposed upon cotton fabrics are made to depend, the entire fabric and all parts thereof shall be included.</p> <p>(b) The term "number", as applied to woven fabrics of cotton, means the average yarn number of the yarns contained therein. In computing the average yarn number, the length of the yarn is considered to be equal to the distance covered by it in the fabric in the condition as imported, with all clipped yarn being measured as if continuous, and with the count being taken of the total single yarns in the fabric including the single yarns in any plied yarns. The weight shall be taken after any excessive sizing is removed by boiling or other suitable process. Any one of the following formulas can be used to determine the average yarn number for tariff purposes:</p> $N = \frac{BYT}{840}, \frac{24T}{352}, \frac{2BT}{1052}, \frac{3ST}{70}$ <p>when:</p> <p>N is the average yarn number, B is the breadth (width) of the fabric in inches, Y is the yards (linear) of the fabric per pound, T is the total single yarns per square inch, S is the square yards of fabric per pound, Z is the ounces per linear yard of fabric, and Z' is the ounces per square yard of fabric.</p> <p>2. In this subpart, each of the rates of duty provided for fabric, wholly of cotton, not fancy or figured, and not bleached and not colored (items 319.21 through 319.25 and items 320.01 through 320.98, both inclusive) is also the "base rate" for fabrics of the same average yarn number covered by items 319.27 and 319.29, and by items 321.-- through 331.--, inclusive, respectively. For citation purposes, the two blanks on the end of each of the latter item numbers shall be filled in with the last two digits of the item number for the applicable base rate. Thus, "item 324.45" would be the citation for woven fabrics, wholly of cotton, of number 45, fancy or figured, and bleached but not colored.</p> <p>3. The term "fancy or figured", as used in this subpart in relation to fabrics, means fabrics which have been woven with 2 or more colors or kinds of filling; with 8 or more harnesses; or with jacquard, lappet, or swivel attachments; or by any combination of these weaving methods.</p>

		<p>4. With respect only to the fabrics provided for in items 319.21 through 319.25 and 320.01 through 320.98, none of the ad valorem rates of duty, or the ad valorem parts of the compound rates of duty, shall be less than the equivalent of --</p> <ul style="list-style-type: none"> (i) 0.272 cent per number per pound in rate column 1 for items 320.01 through 320.98; (ii) 0.3 cent per number per pound in rate column 1 for items 319.21 through 319.25; and (iii) 0.55 cent per number per pound in rate column 2 for items 319.21 through 319.25 and 320.01 through 320.98. <p><u>Subpart A statistical headnotes:</u></p> <p>1. For the purposes of this schedule, the following terms relating to fabrics of cotton have the meanings hereby assigned to them. (The average yarn number referred to in certain of the definitions is the "number" ascertained by the method set forth in headnote 1 of this subpart. The yarn number (before weaving) referred to in certain of the definitions is the yarn number of the yarn before it is prepared for weaving):</p> <p>(a) <u>Duck:</u> Plain-woven fabrics made of carded yarns, not napped, woven with less than 8 harnesses and without the use of jacquard, lappet, or swivel attachments, the warp and/or filling of which consists of plied yarns or of 2 or more single yarns woven as one, having an average yarn number not over 15, weighing 5 ounces or more per square yard.</p> <p>(b) <u>Gingham:</u> Plain-woven and fancy yarn-dyed fabrics having two or more colors in the warp and/or in the filling. Include checked and plaid ginghams, gingham stripes, cloth of "haircord" construction (i.e., cloth having cord stripes in the warp which are formed by yarns woven from an extra beam), and "poplin" type fabrics with a difference in picks per inch and ends per inch of less than 40 (e.g., 90 x 60). Excluded are yarn-dyed handkerchief fabrics made in box looms. May be made with either singles or ply yarns in warp and filling. The average yarn number usually ranges between 20 and 100. 		<p>(iv) <u>Combed bed-sheeting</u>--Plain-woven fabric, not fancy or figured, not napped, made of combed singles yarn, in widths 42 inches and over, with the total yarns per square inch usually 124 or over, and having an average yarn number usually 35 or more.</p> <p>(v) <u>Other sheetings</u>--Sheeting not covered by the description for osnaburg, classes A, B, and C sheeting, soft-filled sheeting, and bed sheeting, or for which no reporting number is provided in this schedule.</p> <p>(g) <u>Shirting, jacquard and dobby</u>: Cotton fabrics, not napped, woven with jacquard or dobby attachments, measuring 3 square yards per pound or over. The following are examples (for warp-loop fabrics the figures in parentheses under warp yarn number are the yarn number of extra warp yarns; those under warp yarns per inch are ends of extra warp yarns per inch):</p> <table border="1"> <thead> <tr> <th colspan="2">(before weaving)</th> <th colspan="2">Yarns per inch</th> </tr> <tr> <th>Warp</th> <th>Filling</th> <th>Warp</th> <th>Filling</th> </tr> </thead> <tbody> <tr> <td>40s (20/2)</td> <td>40s</td> <td>74s (6)</td> <td>70s</td> </tr> <tr> <td>40s (40/2)</td> <td>40s</td> <td>79s (10)</td> <td>60s</td> </tr> <tr> <td>40s (40/2)</td> <td>40s</td> <td>72s (10)</td> <td>75s</td> </tr> </tbody> </table> <p>(h) <u>Table damask</u>: Cotton fabrics, not napped, woven with jacquard or dobby attachments characterized by elaborate decorative designs, usually of floral patterns. The designs are reversible and are formed by a warp-face satin weave and the ground by a filling-face satin weave. Table damask is generally all white, although it is sometimes made with colored stripes or in solid pastel shades.</p> <p>(ij) <u>Twills and sateens</u>:</p> <p><u>Twills</u>--Fabrics woven with a twill weave, not napped, having a more or less pronounced diagonal effect on the face of the cloth. They include fabrics known as drills, warp twills, filling twills, jeans, flannel twills, broken twills, herringbone twills, gabardines, denims, chinos, and tickings.</p> <p><u>Denims</u>--Three-harness or four-harness twill fabrics, not fancy or figured, and not piece-colored, but the warp yarns of which are colored, made of singles yarn, and having an average yarn number over 3 but not over 16.</p> <p><u>Sateens</u>--Fabrics woven with a satin weave, not napped, in which the surface of the cloth consists almost entirely of warp or filling floats, that is, in the repeat of a weave pattern, each yarn of one system passes over several yarns of the other system before interlacing; they are sometimes woven with a twill weave but the diagonal effect in these is not ordinarily discernible on the face of the cloth. The fact that the ingredients of a product are incapable of separation or have been commingled in definite proportions does not in itself affect the classification of such product as a mixture. Except as specifically set forth in the headnotes to other parts of this schedule, all products described in this part shall be classified hereunder even if more specifically described elsewhere in this schedule. Any product described in both subparts B and C of this part shall be classified in subpart C.</p> <p>2. For the purposes of this part, the term "<u>modified benzenoid</u>" describes a molecular structure having at least one six-membered heterocyclic ring which contains at least four carbon atoms and having an arrangement of molecular bonds as in the benzene ring or in the quinone ring, but does not include any such molecular structure in which one or more pyrimidine rings are the only modified benzenoid rings present.</p> <p>3. With the exception of the natural products provided for in subpart C, this part does not cover cyclic organic chemical products (such as, but not limited to, tannic, gallic and pyrogallic acids; estrone, estradiol, and corticosteroids; morphine, ergot, and cinchona alkaloids; rotenone; phenylalanine; tyrosine; epinephrine; and thymols) having a benzenoid, quinoid, or modified benzenoid structure, which are produced from animal or vegetable products in which such structure occurs naturally, unless such cyclic organic chemical products were obtained, derived, or manufactured in part from any product provided for in subpart A, B or C of this part.</p> <p>4. The ad valorem rates provided in this part shall be based upon the American selling price, as defined in section 402 or 402a of this Act, of any similar competitive article manufactured or produced in the United States. If there is no similar competitive article manufactured or produced in the United States then the ad valorem rate shall be based upon the United States value, as defined in the said section 402 or 402a.</p> <p>5. For the purposes of this part, any product provided for in this part shall be considered similar to, or competitive with, any imported product which accomplishes results substantially equal to those accomplished by the domestic product when used in substantially the same manner.</p> <hr/>

		PART 4. - SYNTHETIC RESINS AND PLASTICS MATERIALS; RUBBER			
		Subpart A. - Synthetic Resins and Plastics Materials			
		<u>Subpart A headnotes:</u>			
		1. This subpart does not cover synthetic plastics materials provided for in part 1C of this schedule, but the addition of any product described in part 1 of this schedule to a synthetic plastics material described in this subpart as an antioxidant, color, dispersing agent, emulsifier, extender, filler, pesticide, plasticizer, or stabilizer does not affect the classification of such synthetic plastics material in this subpart.			
		2. The term "synthetic plastics materials", in this subpart, embraces products formed by the condensation, polymerization, or copolymerization of organic chemicals and to which an antioxidant, color, dispersing agent, emulsifier, extender, filler, pesticide, plasticizer, or stabilizer may have been added. These products contain as an essential ingredient an organic substance of high molecular weight; are capable, at some stage during processing into finished articles, of being molded or shaped by flow; and are solid in the finished article. The term includes, but is not limited to, such products derived from esters of acrylic or methacrylic acid; vinyl acetate, vinyl chloride resins, polyvinyl alcohol, acetals, butyral, formal resins, polyvinyl ether and ester resins, and polyvinylidene chloride resins; urea and amino resins; polyethylene, polypropylene, and other polyalkene resins; siloxanes, silicones, and other organo-silicon resins; alkyd, acrylonitrile, allyl, and formaldehyde resins; and cellulosic plastics materials. These synthetic plastics materials may be in solid, semi-solid, or liquid condition such as flakes, powders, pellets, granules, solutions, emulsions, and other basic crude forms not further processed.

		<u>Subpart C headnotes:</u>			
		1. The provision in this subpart for artists', students', and children's pigments and paints assembled into sets (item 474.08) covers only pigments and paints assembled in such container and form, and with such assortment of articles, as to be suitable for sale at retail to artists, students, or children as a paint set, kit, or color outfit.			
		2. The term "paints and enamel paints" in this subpart covers dispersions of pigments or pigment-like materials with a liquid (vehicle) which are suitable for application to surfaces as a thin layer, and which dry (harden) to an opaque, solid film. The vehicle of paints consists of drying oils or resins which bind the pigment particles together in the film; and the vehicle of enamel paints is principally varnish. Paints and enamel paints may also contain thinners, driers, plasticizers, or other agents.			
		3. The term "varnishes" in this subpart covers liquid surface-coating products which contain no pigments or pigment-like materials, and which dry (harden) to a transparent or translucent film. Shellac varnishes are solutions of shellac or any other form of lac in a volatile solvent such as ethyl alcohol. Oleoresinous varnishes consist of resins dissolved in or reacted with a drying oil, to which thinners, driers, and plasticizers may be added. Cellulose-derivative varnishes (lacquers) are solutions of cellulose nitrate or other cellulose derivatives in a volatile solvent.			
		4. The term "stains" in this subpart covers liquids containing transparent or semi-transparent pigments, dyes, or chemicals, chiefly used to deepen or otherwise alter the color of wood, but which will not obscure its grain, texture, or markings.

2. For the purposes of the tariff schedules, unless the context requires otherwise --

- (a) the term "precious metal" embraces gold, silver, platinum and other metals of the platinum group (iridium, osmium, palladium, rhodium, and ruthenium), and precious-metal alloys;

(b) the term "base metal" embraces aluminum, antimony, arsenic, barium, beryllium, bismuth, boron, cadmium, calcium, chromium, cobalt, columbium, copper, gallium, germanium, hafnium, indium, iron, lead, magnesium, manganese, mercury, molybdenum, nickel, rhenium, the rare-earth metals (including scandium and yttrium), selenium, silicon, strontium, tantalum, tellurium, thallium, thorium, tin, titanium, tungsten, uranium, vanadium, zinc, and zirconium, and base-metal alloys;

(c) the term "metal" embraces precious metals, base metals, and their alloys; and

(d) in determining which of two or more equally specific provisions for articles "of iron or steel", "of copper", "of aluminum", or "of" other base metals applies to an article containing two or more base metals and wholly or in chief value thereof, the classification shall be made according to the base metal which predominates by weight over each of the other base metals rather than according to the base metal in chief value.

Schedule 6 statistical headnote:

1. When refined or smelted products are withdrawn for exportation from bonded smelting or refining warehouses established under section 312, Tariff Act of 1930, as amended, that part of each such product which entered into a bonded smelting or refining warehouse as metal-bearing material without the payment of duty thereon, must be reported separately on the warehouse withdrawal form (CF 7512) to show the statistical reporting number for the imported metal-bearing material as reported on the warehouse entry form (CF 7502).

		<p>(d) <u>Claims for Deductions:</u> The deductions provided for in 4(b) and 4(c), supra, do not apply to imported materials unless the importer, at the time entry for consumption or for warehouse is filed, makes claim therefor in writing and certifies as to the name, location, and status of the plant at which the materials are to be initially treated. If material with respect to which a certification has been filed is to be transferred to a plant for initial treatment other than the plant specified in the certification, the importer shall notify the collector at the port of entry in advance of the transfer of the material and the entry shall be liquidated or reliquidated on the basis of the allowable losses for the plant to which transfer is to be made. 		<p align="center">PART 2. - METALS, THEIR ALLOYS, AND THEIR BASIC SHAPES AND FORMS</p> <p><u>Part 2 headnotes:</u></p> <p>1. This part covers precious metals and base metals (including such metals when they are chemically pure), their alloys, and their so-called basic shapes and forms, and, in addition, covers metal waste and scrap. Unless the context requires otherwise, the provisions of this part apply to the products described by whatever process made (i.e., whether rolled, forged, drawn, extruded, cast or sintered) and whether or not such products have been subjected to treatments to improve the properties or appearance of the metals or to protect them against rusting, corrosion or other deterioration. These treatments include annealing, tempering, case-hardening and similar heat-treatments or nitriding; descaling, pickling, scraping, scalping and other processes to remove oxidation scale and crust; rough coating with oil, tar, grease, red lead, or other material to prevent rusting; polishing, burnishing, glazing, artificial oxidation, phosphatizing, and other finishing treatments; metallization by cementation, by electroplating, by immersion in a bath of molten metal, or by other means; coating with enamel, paint, lacquer, or other non-metallic substances; and cladding. This part does not include --</p> <ul style="list-style-type: none"> (i) insulated electric conductors (see part 5 of this schedule); (ii) milliners' wire and other wire covered with textile or other nonmetallic material (see part 3B of this schedule); (iii) leaf and foil (see part 3C of this schedule); or (iv) other articles specially provided for elsewhere in the tariff schedules, or parts of articles. <p>2. Alloys. -- (a) For the purposes of the tariff schedules, alloys are defined and classifiable as hereinafter set forth. Alloys are metallic substances consisting of two or more metals, or of one or more metals and one or more non-metals, intimately united, usually by having been fused together and which may or may not have been dissolved in each other when molten; they include sintered mixtures of metal powders and heterogeneous intimate mixtures obtained by fusion, but do not include substances in which the total weight of the metals does not equal or exceed the total weight of the non-metal components.</p> <p>(b) Precious-metal alloys are alloys which contain 2 percent or more by weight of one or more metals of the platinum group, of gold, or of silver. Precious-metal alloys are classifiable as --</p> <ul style="list-style-type: none"> (i) alloys of platinum, if they contain 2 percent or more by weight of one or more metals of the platinum group; (ii) alloys of gold, if they contain 2 percent or more by weight of gold, but contain no metal of the platinum group or less than 2 percent by weight thereof; and (iii) alloys of silver, if they contain 2 percent or more by weight of silver, and are not alloys of platinum or alloys of gold, as defined in (b)(i) and (b)(ii), respectively, of this headnote.

		<p>(c) <u>Base-metal alloys</u> are alloys which contain one or more base metals and are not any of the precious-metal alloys, as defined in (b) of this headnote. Base-metal alloys are classifiable as --</p> <p>(i) alloys of that base metal which predominates by weight over each of the other metallic elements contained therein, except as specified in (c)(ii) of this headnote; and</p> <p>(ii) ferroalloys (as defined in headnote 2(e) of subpart B of this part) or master alloys (as defined in headnote 2(b) of subpart C of this part) under their respective headings in subpart B or C of this part, regardless of the base metal therein which predominates by weight.</p> <p>(d) In the tariff schedules, unless the context requires otherwise, a provision for a specific metal includes that metal and its alloys.</p> <p>3. For the purposes of this part, unless the context requires otherwise --</p> <p>(a) the term "<u>unwrought</u>" refers to metal, whether or not refined, in the form of ingots, blocks, lumps, billets, cakes, slabs, pigs, cathodes, anodes, briquettes, cubes, sticks, grains, sponge, pellets, shot, and similar primary forms, but does not cover rolled, forged, drawn, or extruded products, tubular products, or cast or sintered forms which have been machined or processed otherwise than by simple trimming, scalping, or descaling;</p> <p>(b) the term "<u>waste and scrap</u>" refers to materials and articles of metal which are second-hand or waste or refuse, or are obsolete, defective or damaged, and which are fit only for the recovery of the metal content or for use in the manufacture of chemicals, and does not include metal in unwrought form or metal-bearing materials provided for in part I of this schedule;</p> <p>(c) the term "<u>wrought</u>", as applied to metal products other than wrought iron, refers to products which have been rolled, forged, drawn, or extruded, and also refers to cast or sintered products which have been machined or processed otherwise than by simple trimming, scalping, or descaling;</p> <p>(d) the term "<u>clad</u>", as applied to metal products, refers to such products with two or more layers of metal of different colors or natures which have been associated or bonded together by forging, hammering, rolling, or other mechanical or thermic process to insure welding or molecular interpenetration of the surfaces in contact; and</p> <p>(e) the term "<u>pipes and tubes and blanks therefor</u>" covers tubular products, including hollow bars and hollow billets but not including hollow drill steel, of any cross-sectional configuration, by whatever process made, whether seamless, brazed, or welded and whether with an open or lock seam or joint.</p> <p>4. No allowance or reduction of duties for partial damage or loss in consequence of discoloration or rust occurring before importation shall be made upon iron or steel or upon any article of iron or steel.</p>

For the purposes of this subpart --</p> <ul style="list-style-type: none"> (a) the term "<u>watches</u>" embraces timepieces (including timepieces having special features, such as chronographs, calendar watches, stopwatches, and watches designed for use in skindiving) suitable for wearing or carrying on or about the person, whether or not the movement therein is within the definition of "watch movement" in headnote 2(b), below; (b) the term "watch movement" means a timepiece movement measuring less than 1.77 inches in width and less than 0.50 inch in thickness; (c) the term "<u>clock movement</u>" means any movement or mechanism, other than "watch movements" as defined in headnote 2(b), above, intended or suitable for measuring time; (d) the term "<u>cases</u>" embraces inner and outer cases, containers, and housings for movements, together with parts or pieces, such as, but not limited to, rings, feet, posts, bases, and outer frames, and any auxiliary or incidental features, which (with appropriate movements) serve to complete the watches, clocks, time switches, and other apparatus provided for in this subpart; and (e) the term "<u>jewels</u>" includes substitutes for jewels. <p>3. (a) in this subpart, column 1 of the Rates of Duty columns with respect to watch movements having not over 7 jewels has been divided into two columns, viz., I-a and I-b. The rates of duty in column I-a apply to watch movements which have 7 jewels or which, if having less than 7 jewels, do not have a bushing or its equivalent (other than a substitute for a jewel) in any position customarily occupied by a jewel. The rates of duty in column I-b apply to watch movements having under 7 jewels and having a bushing or its equivalent (other than a substitute for a jewel) in any position customarily occupied by a jewel.</p> <p>(b) The complete citation for watches covered by item 715.05 and clocks covered by item 715.15 shall be each of such item numbers, followed by the appropriate item numbers for the respective movements and cases comprising such watches or clocks. Thus, item 715.05-716.08-720.20 is the correct citation for a watch in a gold case having over 17 jewels.</p>

		<p>(c) In this subpart, each of the rates of duty provided for watch movements, having no jewels or not over 17 jewels, not adjusted, not self-winding, and not constructed or designed to operate for a period in excess of 47 hours without rewinding (items 716.10 through 716.36, inclusive) is also the "base rate" for watch movements having the same width and number of jewels covered by items 717.--, 718.--, and 719.--. For citation purposes, the two blanks on the end of each of the latter item numbers shall be filled in with the last two digits of the item number for the applicable base rate. Thus, "item 717.31" would be the citation for an adjusted watch movement, 0.7 inch wide, having 17 jewels, but not self-winding and not constructed or designed to operate for a period in excess of 47 hours without rewinding.</p> <p>(d) The width of a watch or clock movement, as defined in headnote 2(b) and (c) of this subpart, is the shortest surface dimension through the center of the pillar or bottom plate, or its equivalent, not including in the measurement any portion not essential to the functioning of the movement; and the thickness of a "watch movement", as so defined, is the maximum thickness between the outside surfaces of the plate and bridges, or their equivalents.</p> <p>(e) The additional duty for adjustments to watch movements applies to each adjustment of whatever kind (treating adjustment to temperature as two adjustments), in accordance with the marking as hereinafter provided for.</p> <p>(f) Bimetallic balance wheels which are not part of balance assemblies, and mainsprings with riveted ends, are each to be considered as one part or piece, for the purposes of assessing duties on assemblies and subassemblies provided for in items 720.75, 720.80, 720.82, 720.84, and 720.86.</p> <p>4. <u>Special Marking Requirements:</u> Any movement, case, or dial provided for in this subpart, whether imported separately or attached to an article provided for in this subpart, shall not be permitted to be entered unless conspicuously and indelibly marked by cutting, die-sinking, engraving, or stamping, as specified below:</p> <p>(a) Watch movements shall be marked on one or more of the bridges or top plates to show --</p> <ul style="list-style-type: none"> (i) the name of the country of manufacture, (ii) the name of the manufacturer or purchaser, (iii) in Arabic numerals and in words, the number of jewels, if any, serving a mechanical purpose as frictional bearings; and (iv) in Arabic numerals and in words, the number and classes of adjustments, or, if unadjusted, the word "unadjusted". <p>(b) Clock movements shall be marked on the most visible part of the front or back plate to show --</p> <ul style="list-style-type: none"> (i) the name of the country of manufacture, (ii) the name of the manufacturer or purchaser, and (iii) the number of jewels, if any. <p>(c) Watch cases shall be marked on the inside or outside of the back cover to show --</p> <ul style="list-style-type: none"> (i) the name of the country of manufacture, and (ii) the name of the manufacturer or purchaser.

In such circumstances, the movement and its dial shall also be subject to the same marking requirements provided for in headnote 4 of this subpart. However, such separate assessment and special marking shall not be applicable to movements which, when imported, are installed as the usual equipment of vehicles or craft provided for in part 6 of schedule 6 or as integral and essential parts of laboratory, industrial, or commercial apparatus or equipment.</p> <p>6. <u>Products of Insular Possessions.</u>--(a) Except as provided in paragraph (b) of this headnote, any article provided for in this subpart which is the product of an insular possession of the United States outside the customs territory of the United States and which contains any foreign component shall be subject to duty--</p> <ul style="list-style-type: none"> (i) at the rates set forth in column numbered 1, if the countries of origin of more than 50 percent in value of the foreign components are countries to products of which column numbered 1 rates apply, and (ii) at the rates set forth in column numbered 2, if the countries of origin of 50 percent or more in value of the foreign components are countries to products of which column numbered 2 rates apply. <p>(b) If the requirements for free entry set forth in general headnote 3(a) are complied with, watches (provided for in item 715.05) and watch movements (provided for in items 716.08 through 719.--) which are the product of the Virgin Islands, Guam, or American Samoa and which contain any foreign component may be admitted free of duty, but the total quantity of such articles entered free of duty during each calendar year shall not exceed a number equal to 1/9 of the apparent United States consumption of watch movements during the preceding calendar year (as determined by the Tariff Commission), of which total quantity--</p> <ul style="list-style-type: none"> (i) not to exceed 87.5 percent shall be the product of the Virgin Islands, (ii) not to exceed 8.33 percent shall be the product of Guam, and (iii) not to exceed 4.17 percent shall be the product of American Samoa. <p>(c) On or before April 1 of each calendar year (beginning with 1967), the Tariff Commission shall determine the apparent United States consumption of watch movements during the preceding calendar year, shall report such determination to the Secretary of the Treasury, the Secretary of the Interior, and Secretary of Commerce, and shall publish such determination in the Federal Register, together with the number of watches and watch movements which are the product of the Virgin Islands, Guam, and American Samoa which may be entered free of duty under paragraph (b) during the calendar year.</p>

		<p>(d) The Secretary of the Interior and the Secretary of Commerce, acting jointly, shall allocate on a fair and equitable basis among producers of watches and watch movements located in the Virgin Islands, Guam, and American Samoa the quotas for each calendar year provided by paragraph (b) for articles which are the product of the Virgin Islands, Guam, and American Samoa, respectively. Allocations made by the Secretaries shall be final. The Secretaries are authorized to issue such regulations as they determine necessary to carry out their duties under this paragraph.</p> <p><u>Subpart E statistical headnote:</u></p> <p>1. (a) The statistical reporting numbers for watches (item 715.05) and for clocks containing movements measuring less than 1.77 inches in width (item 715.15) are a combination of three 7-digit numbers, viz., the 7-digit number for the imported watch (715.0500) or clock (715.1500), and the 7-digit numbers which would have applied to the movement and to the case if they had been imported separately. Thus, the correct reporting number for a watch with a 15-jewel adjusted but not self-winding movement not over 0.6 inch in width and a gold case is "715.0500-717.3015-720.2000".</p> <p>(b) The number and value of imported watches or clocks, and of their movements and cases must be reported separately with their respective 7-digit numbers.</p> <p>(c) For the statistical reporting of watch movements under items 716.30-.36 the 2-digit statistical suffix shall be the actual number of jewels in the movement. For example, the suffix for a movement having 9 jewels would be "09"; similarly, the suffix for a 15-jewel movement would be "15".</p>
