### CHAPTER 69

#### CERAMIC PRODUCTS

XIII  
69-1

#### Notes

1. This chapter applies only to ceramic products which have been fired after shaping. Headings 6904 to 6914 apply only to such products other than those classifiable in headings 6901 to 6903.
2. This chapter does not cover:
  - (a) Products of heading 2844;
  - (b) Articles of chapter 71 (for example, imitation jewelry);
  - (c) Cermets of heading 8113;
  - (d) Articles of chapter 82;
  - (e) Electrical insulators (heading 8546) or fittings of insulating material (heading 8547);
  - (f) Artificial teeth (heading 9021);
  - (g) Articles of chapter 91 (for example, clocks and clock cases);
  - (h) Articles of chapter 94 (for example, furniture, lamps and lighting fittings, prefabricated buildings);
  - (i) Articles of chapter 95 (for example, toys, games and sports equipment);
  - (k) Articles of heading 9606 (for example, buttons) or of heading 9614 (for example, smoking pipes); or
  - (l) Articles of chapter 97 (for example, works of art).

#### Additional U.S. Notes

1. For the purposes of this chapter, a "ceramic article" is a shaped article having a glazed or unglazed body of crystalline or substantially crystalline structure, the body of which is composed essentially of inorganic nonmetallic substances and is formed and subsequently hardened by such heat treatment that the body, if reheated to pyrometric cone 020, would not become more dense, harder, or less porous, but does not include any glass articles.
2. For the purposes of headings 6902 and 6903, the term "refractory" is applied to articles which have a pyrometric cone equivalent of at least 1500°C when heated at 60°C per hour (pyrometric cone 18). Refractory articles have special properties of strength and resistance to thermal shock and may also have, depending upon the particular uses for which designed, other special properties such as resistance to abrasion and corrosion.
3. For the purposes of heading 6902, a brick which contains both chromium and magnesium is classifiable according to which of those components (expressed as Cr<sub>2</sub>O<sub>3</sub> or MgO, respectively) is the greater by weight.
4. For the purposes of headings 6905, 6907 and 6908, the term "tiles" does not include any article 3.2 cm or more in thickness.
5. For the purposes of headings 6909 through 6914:
  - (a) The terms "porcelain," "china" and "chinaware" embrace ceramic ware (other than stoneware), whether or not glazed or decorated, having a fired white body (unless artificially colored) which will not absorb more than 0.5 percent of its weight of water and is translucent in thicknesses of several millimeters. The term "stoneware" as used in this note, embraces ceramic ware which contains clay as an essential ingredient, is not commonly white, will absorb not more than 3 percent of its weight of water, and is naturally opaque (except in very thin pieces) even when absorption is less than 0.1 percent.
  - (b) The term "bone chinaware" embraces chinaware or porcelain the body of which contains 25 percent or more of calcined bone or tricalcium phosphate.
  - (c) The term "earthenware" embraces ceramic ware, whether or not glazed or decorated, having a fired body which contains clay as an essential ingredient, and will absorb more than 3 percent of its weight of water.
  - (d) The water absorption of a ceramic body shall be determined by ASTM test method designated C373 (except that test specimens may have a minimum weight of 10 g, and may have one large surface glazed).

## Annotated for Statistical Reporting Purposes

XIII  
69-2

6. For the purposes of headings 6911 and 6912:

- (a) The term "available in specified sets" embraces plates, cups, saucers and other articles principally used for preparing, serving or storing food or beverages, or food or beverage ingredients, which are sold or offered for sale in the same pattern, but no article is classifiable as being "available in specified sets" unless it is of a pattern in which at least the articles listed below in (b) of this note are sold or offered for sale.
- (b) If each of the following articles is sold or offered for sale in the same pattern, the classification hereunder in subheadings 6911.10.35, 6911.10.37, 6911.10.38, 6912.00.35 or 6912.00.39, of all articles of such pattern shall be governed by the aggregate value of the following articles in the quantities indicated, as determined by the appropriate customs officer under section 402 of the Tariff Act of 1930, as amended, whether or not such articles are imported in the same shipment:

- 12 plates of the size nearest to 26.7 cm in maximum dimension, sold or offered for sale,
- 12 plates of the size nearest to 15.3 cm in maximum dimension, sold or offered for sale,
- 12 tea cups and their saucers, sold or offered for sale,
- 12 soups of the size nearest to 17.8 cm in maximum dimension, sold or offered for sale,
- 12 fruits of the size nearest to 12.7 cm in maximum dimension, sold or offered for sale,
- 1 platter or chop dish of the size nearest to 38.1 cm in maximum dimension, sold or offered for sale,
- 1 open vegetable dish or bowl of the size nearest to 25.4 cm in maximum dimension, sold or offered for sale,
- 1 sugar of largest capacity, sold or offered for sale,
- 1 creamer of largest capacity, sold or offered for sale.

If either soups or fruits are not sold or offered for sale, 12 cereals of the size nearest to 15.3 cm in maximum dimension, sold or offered for sale, shall be substituted therefor.

- (c) The percentage of water absorption of cast and jiggered ceramic articles of the same pattern, which are "available in specified sets" and which are imported together in a ratio of at least 5 jiggered articles to 1 cast article in the same shipment shall be the average water absorption of such cast and jiggered articles, of the same pattern in the shipment, which average absorption shall be deemed to be equivalent to 5 percent of the water absorption of a representative sample of such cast articles plus 95 percent of the water absorption of a representative sample of such jiggered articles.
7. For the purposes of headings 6911, 6912 and 6913, those provisions which classify merchandise according to the value of each "article," an article is a single tariff entity which may consist of more than one piece. For example, a vegetable dish and its cover, or a beverage pot and its lid, imported in the same shipment, constitute an article.

### Statistical Notes

- 1. For the purposes of headings 6904 and 6905, a "heat insulating" article, whether or not shaped, is one having a specific gravity of 1.2 or less and designed to impede or resist the flow of heat at temperatures above 870°C.
- 2. For the purposes of heading 6904:
  - (a) The term "solid bricks" refers to bricks containing not more than 25 percent voids.
  - (b) The term "hollow bricks" refers to bricks containing more than 25 percent voids.

### CHAPTER 70

#### GLASS AND GLASSWARE

XIII  
70-1

#### Notes

1. This chapter does not cover:
  - (a) Goods of heading 3207 (for example, vitrifiable enamels and glazes, glass frit, other glass in the form of powder, granules or flakes);
  - (b) Articles of chapter 71 (for example, imitation jewelry);
  - (c) Optical fiber cables of heading 8544, electrical insulators (heading 8546) or fittings of insulating material of heading 8547;
  - (d) Optical fibers, optically worked optical elements, hypodermic syringes, artificial eyes, thermometers, barometers, hydrometers or other articles of chapter 90;
  - (e) Lamps or lighting fittings, illuminated signs, illuminated name-plates or the like, having a permanently fixed light source, or parts thereof of heading 9405;
  - (f) Toys, games, sports equipment, Christmas tree ornaments or other articles of chapter 95 (excluding glass eyes without mechanisms for dolls or for other articles of chapter 95); or
  - (g) Buttons, fitted vacuum flasks, scent or similar sprays or other articles of chapter 96.
2. For the purposes of headings 7003, 7004 and 7005:
  - (a) Glass is not regarded as "worked" by reason of any process it has undergone before annealing;
  - (b) Cutting to shape does not affect the classification of glass in sheets;
  - (c) The expression "absorbent or reflecting layer" means a microscopically thin coating of metal or of a chemical compound (for example, metal oxide) which absorbs, for example, infrared light or improves the reflecting qualities of the glass while still allowing it to retain a degree of transparency or translucency.
3. The products referred to in heading 7006 remain classified in that heading whether or not they have the character of articles.
4. For the purposes of heading 7019, the expression "glass wool" means:
  - (a) Mineral wools with a silica ( $\text{SiO}_2$ ) content not less than 60 percent by weight;
  - (b) Mineral wools with a silica ( $\text{SiO}_2$ ) content less than 60 percent but with an alkaline oxide ( $\text{K}_2\text{O}$  or  $\text{Na}_2\text{O}$ ) content exceeding 5 percent by weight or a boric oxide ( $\text{B}_2\text{O}_3$ ) content exceeding 2 percent by weight.

Mineral wools which do not comply with the above specifications fall in heading 6806.
5. Throughout the tariff schedule, the expression "glass" includes fused quartz and other fused silica.

#### Subheading Note

1. For the purposes of subheadings 7013.21, 7013.31 and 7013.91, the expression "lead crystal" means only glass having a minimum lead monoxide ( $\text{PbO}$ ) content by weight of 24 percent.

### Additional U.S. Notes

1. For the purposes of this chapter, the term "fused quartz or other fused silica" means glass containing more than 95 percent silica by weight.
2. For the purposes of headings 7003 through 7005, the expression "colored throughout the mass" refers to glass that has a transmittance of normally incident light of less than 66 percent at one or more wavelengths from 400 to 700 millimicrons, inclusive, or a transmittance of less than 80 percent at one or more wavelengths from 525 to 575 millimicrons, inclusive, for glass 6 mm in thickness, or of the equivalent transmittances for any other thickness, provided that, in determining such light transmittances, the effect of surface irregularities or configurations, or of other surface treatment (except flashing applied prior to solidification) and the effect of wire netting within the glass, shall be eliminated.
3. For the purposes of headings 7003 and 7004, glass of the same size and thickness imported in any shipment in quantities over 4.6 m<sup>2</sup> shall be denied entry unless it is--
  - (a) Packed in units containing, as nearly as the particular size permits, 4.6 m<sup>2</sup>, or multiples thereof; or
  - (b) Packed in units containing multiples of the number of sheets of the same size and thickness which would be contained in a unit if packed to contain, as nearly as such size permits, 4.6 or 9.3 m<sup>2</sup>; or
  - (c) Otherwise packed in a manner which conforms to the packing practices of the domestic glass industry as determined and published from time to time by the Secretary of the Treasury.
4. For the purposes of heading 7005, the expression "polished," as used with reference to glass, refers to glass one or both of the surfaces of which have been made smooth and glossy, in whole or in part, by abrasive or chemical means or by floating the glass over molten metal.
5. For the purposes of subheading 7018.10.20, the term "imitation precious or semiprecious stones" means glass made into shapes suitable for use in jewelry or for other ornamental purposes in a manner similar to natural gemstones, whether or not in imitation thereof, but does not include natural gemstones, synthetic gemstones, reconstructed natural gemstones or imitation pearls.
6. For the purposes of subheading 7019.20, the expression "narrow fabrics" covers fabrics which meet the definition of "narrow woven fabrics" in note 5 to chapter 58.

### Statistical Note

1. For the purposes of headings 7003 and 7004, in determining the surface area of cast or rolled glass having irregular surfaces (such as corrugated glass), superficial area shall be used.

In chapters 73 to 76 and 78 to 82 (but not in heading 7315) references to parts of goods do not include references to parts of general use as defined above.

Subject to the preceding paragraph and to note 1 to chapter 83, the articles of chapter 82 or 83 are excluded from chapters 72 to 76 and 78 to 81.
3. Classification of alloys (other than ferroalloys and master alloys as defined in chapters 72 and 74):
  - (a) An alloy of base metals is to be classified as an alloy of the metal which predominates by weight over each of the other metals.

## Annotated for Statistical Reporting Purposes

XV-2

### 5. Classification of composite articles:

Except where the headings otherwise require, articles of base metal (including articles of mixed materials treated as articles of base metal under the General Rules of Interpretation) containing two or more base metals are to be treated as articles of the base metal predominating by weight over each of the other metals. For this purpose:

- (a) Iron and steel, or different kinds of iron or steel, are regarded as one and the same metal;
- (b) An alloy is regarded as being entirely composed of that metal as an alloy of which, by virtue of note 3, it is classified; and
- (c) A cermet of heading 8113 is regarded as a single base metal.

### 6. In this section, the following expressions have the meanings hereby assigned to them:

#### (a) Waste and scrap

Metal waste and scrap from the manufacture or mechanical working of metals, and metal goods definitely not usable as such because of breakage, cutting-up, wear or other reasons.

#### (b) Powders

Products of which 90 percent or more by weight passes through a sieve having a mesh aperture of 1 mm.

### Additional U.S. Notes

- 1. For the purposes of the tariff schedule, the term "base metals" embraces aluminum, antimony, beryllium, bismuth, cadmium, chromium, cobalt, copper, gallium, germanium, hafnium, indium, iron and steel, lead, magnesium, manganese, molybdenum, nickel, niobium (columbium), rhenium, tantalum, thallium, tin, titanium, tungsten, vanadium, zinc and zirconium.
- 2. For the purposes of this section, the term "unwrought" refers to metal, whether or not refined, in the form of ingots, blocks, lumps, billets, cakes, slabs, pigs, cathodes, anodes, briquettes, cubes, sticks, grains, sponge, pellets, flattened pellets, rounds, rondelles, shot and similar manufactured primary forms, but does not cover rolled, forged, drawn or extruded products, tubular products or cast or sintered forms which have been machined or processed otherwise than by simple trimming, scalping or descaling.

2. For the classification of ferroalloys in the subheadings of heading 7202 the following rule should be observed:

A ferroalloy is considered as binary and classified under the relevant subheading (if it exists) if only one of the alloy elements exceeds the minimum percentage laid down in chapter note 1(c); by analogy, it is considered respectively as ternary or quaternary if two or three alloy elements exceed the minimum percentage.

For the application of this rule, the unspecified "other elements" referred to in chapter note 1(c) must each exceed 10 percent by weight.

## Annotated for Statistical Reporting Purposes

### CHAPTER 73

#### ARTICLES OF IRON OR STEEL

XV  
73-1

#### Notes

1. In this chapter the expression "cast iron" applies to products obtained by casting in which iron predominates by weight over each of the other elements and which do not comply with the chemical composition of steel as defined in Note 1(d) to chapter 72.
2. In this chapter the word "wire" means hot- or cold-formed products of any cross-sectional shape, of which no cross-sectional dimension exceeds 16 mm.

#### Additional U.S. Notes

1. For the purposes of heading 7304 or 7306, the rate of duty "Free (C)" appearing in the "Special" subcolumn applies only to tubes and pipes with attached fittings, suitable for conducting gases or liquids.
2. For the purposes of subheading 7307.19.30, the expression "ductile fittings" refers to fittings which contain over 2.5 percent carbon and over 0.02 percent of magnesium or of magnesium and cerium, by weight.

### CHAPTER 74

#### COPPER AND ARTICLES THEREOF

XV  
74-1

#### Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

##### (a) Refined copper

Metal containing at least 99.85 percent by weight of copper; or

Metal containing at least 97.5 percent by weight of copper, provided that the content by weight of any other element does not exceed the limit specified in the following table:

TABLE - Other elements

Element		Limiting content percent by weight
Ag	Silver	0.25
As	Arsenic	0.5
Cd	Cadmium	1.3
Cr	Chromium	1.4
Mg	Magnesium	0.8
Pb	Lead	1.5
S	Sulfur	0.7
Sn	Tin	0.8
Te	Tellurium	0.8
Zn	Zinc	1
Zr	Zirconium	0.3
Other elements*, each		0.3

\* Other elements are, for example, Al, Be, Co, Fe, Mn, Ni, Si.

##### (b) Copper alloys

Metallic substances other than unrefined copper in which copper predominates by weight over each of the other elements, provided that:

- (i) The content by weight of at least one of the other elements is greater than the limit specified in the foregoing table; or
- (ii) The total content by weight of such other elements exceeds 2.5 percent.

##### (c) Master alloys

Alloys containing with other elements more than 10 percent by weight of copper, not usefully malleable and commonly used as an additive in the manufacture of other alloys or as deoxidants, desulfurizing agents or for similar uses in the metallurgy of nonferrous metals. However, copper phosphide (phosphor copper) containing more than 15 percent by weight of phosphorus falls in heading 2848.

##### (d) Bars and rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

Wire bars and billets with their ends tapered or otherwise worked simply to facilitate their entry into machines for converting them into, for example, drawing stock (wire rod) or tubes, are, however, to be taken to be unwrought copper of heading 7403.

## Annotated for Statistical Reporting Purposes

XV  
74-2

### (e) Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

### (f) Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width.

In the case of heading 7414, however, the term "wire" applies only to products, whether or not in coils, of any cross-sectional shape, of which no cross-sectional dimension exceeds 6 mm.

### (g) Plates, sheets, strip and foil

Flat-surfaced products (other than the unwrought products of heading 7403), coiled or not, of solid rectangular (other than square) cross section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,
- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Headings 7409 and 7410 apply, inter alia, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, checkers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

### (h) Tubes and pipes

Hollow products, coiled or not, which have a uniform cross section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross section, which may have corners rounded along their whole length, are also to be taken to be tubes and pipes provided the inner and outer cross sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

### Subheading Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

#### (a) Copper-zinc base alloys (brasses)

Alloys of copper and zinc, with or without other elements. When other elements are present:

- zinc predominates by weight over each of such other elements;
- any nickel content by weight is less than 5 percent (see copper-nickel-zinc alloys (nickel silvers)); and
- any tin content by weight is less than 3 percent (see copper-tin alloys (bronzes)).

#### (b) Copper-tin base alloys (bronzes)

Alloys of copper and tin, with or without other elements. When other elements are present, tin predominates by weight over each of such other elements, except that when the tin content is 3 percent or more the zinc content by weight may exceed that of tin but must be less than 10 percent.

#### (c) Copper-nickel-zinc base alloys (nickel silvers)

Alloys of copper, nickel and zinc, with or without other elements. The nickel content is 5 percent or more by weight (see copper-zinc alloys (brasses)).

#### (d) Copper-nickel base alloys

Alloys of copper and nickel, with or without other elements but in any case containing by weight not more than 1 percent of zinc. When other elements are present, nickel predominates by weight over each of such other elements.

## Additional U.S. Note

1. The deduction provided for in additional U.S. note 1 to chapter 26 shall apply to cement copper and copper precipitates of subheading 7401.20.

## Statistical Note

1. For the purposes of this chapter, the term "beryllium copper master alloy" refers to master alloys which contain by weight at least 3 percent but not more than 10 percent beryllium.

### CHAPTER 75

#### NICKEL AND ARTICLES THEREOF

XV  
75-1

#### Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

(a) Bars and rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(b) Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(c) Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width.

(d) Plates, sheets, strip and foil

Flat-surfaced products (other than the unwrought products of heading 7502), coiled or not, of solid rectangular (other than square) cross section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,
- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or of products of other headings.

Heading 7506 applies, inter alia, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, checkers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or of products of other headings.

(e) Tubes and pipes

Hollow products, coiled or not, which have a uniform cross section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross section, which may have corners rounded along their whole length, are also to be taken to be tubes and pipes provided the inner and outer cross sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

- (i) The cobalt content by weight does not exceed 1.5 percent, and
- (ii) The content by weight of any other element does not exceed the limit specified in the following table:

TABLE - Other elements

Element		Limiting content percent by weight

O	Oxygen	0.4
Other elements, each		0.3

(b) Nickel alloys

Metallic substances in which nickel predominates by weight over each of the other elements provided that:

- (i) The content by weight of cobalt exceeds 1.5 percent,
- (ii) The content by weight of at least one of the other elements is greater than the limit specified in the foregoing table, or
- (iii) The total content by weight of elements other than nickel plus cobalt exceeds 1 percent.

#### Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

(a) Bars and rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(b) Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(c) Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width.

(d) Plates, sheets, strip and foil

Flat-surfaced products (other than the unwrought products of heading 7601), coiled or not, of solid rectangular (other than square) cross section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,
- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Headings 7606 and 7607 apply, inter alia, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, checkers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(e) Tubes and pipes

Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

### Subheading Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

(a) Aluminum, not alloyed

Metal containing by weight at least 99 percent of aluminum, provided that the content by weight of any other element does not exceed the limit specified in the following table:

TABLE - Other elements

Element	Limiting content percent by weight
Fe + Si (iron plus silicon)	1
Other elements <sup>(1)</sup> , each	0.1 <sup>(2)</sup>

(1) Other elements are, for example, Cr, Cu, Mg, Mn, Ni, Zn.

(2) Copper is permitted in a proportion greater than 0.1 percent but not more than 0.2 percent, provided that neither the chromium nor manganese content exceeds 0.05 percent.

(b) Aluminum alloys

Metallic substances in which aluminum predominates by weight over each of the other elements, provided that:

(i) The content by weight of at least one of the other elements or of iron plus silicon taken together is greater than the limit specified in the foregoing table; or

(ii) The total content by weight of such other elements exceeds 1 percent.

### Additional U.S. Note

1. For the purposes of heading 7608, the rate of duty "Free (C)" appearing in the "Special" subcolumn applies only to tubes and pipes with attached fittings, suitable for conducting gases or liquids.

### Statistical Notes

1. For the purposes of this chapter, the term "aluminum vanadium master alloy" refers to aluminum alloys which contain by weight 20 percent or more of vanadium.

2. For the purposes of this chapter, the term "aluminum can stock" refers to sheets and strip in coils, of alloys of aluminum in which either manganese or magnesium is the predominant alloying element, not painted, over 0.175 mm but not over 0.432 mm in thickness, and over 254 mm in width, comprising "body stock" and "lid stock" as specified below:

(a) The term "body stock" refers to aluminum can stock having manganese as the predominant alloying element and having a minimum tensile strength of 262 MPa; and

(b) The term "lid stock" refers to aluminum can stock having magnesium as the predominant alloying element and having a minimum tensile strength of 345 MPa.

### CHAPTER 78

#### LEAD AND ARTICLES THEREOF

XV  
78-1

#### Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

(a) Bar and rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(b) Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(c) Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width.

(d) Plates, sheets, strip and foil

Flat-surfaced products (other than the unwrought products of heading 7801), coiled or not, of solid rectangular (other than square) cross section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,
- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Heading 7804 applies, inter alia, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, checkers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(e) Tubes and pipes

Hollow products, coiled or not, which have a uniform cross section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

## Subheading Note

1. In this chapter the expression "refined lead" means:

Metal containing by weight at least 99.9 percent of lead, provided that the content by weight of any other element does not exceed the limit specified in the following table:

TABLE - Other elements

Element	Limiting content percent by weight
Ag Silver	0.02
As Arsenic	0.005
Bi Bismuth	0.05
Ca Calcium	0.002
Cd Cadmium	0.002
Cu Copper	0.08
Fe Iron	0.002
S Sulfur	0.002
Sb Antimony	0.005
Sn Tin	0.005
Zn Zinc	0.002
Other (for example Te), each	0.001

## Statistical Note

1. For the purposes of this chapter, "alloys of lead" are metals in which the lead content is, by weight, less than 99 percent, but not less than any other metallic element.

### CHAPTER 79

#### ZINC AND ARTICLES THEREOF

XV  
79-1

#### Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

(a) Bar and rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(b) Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(c) Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width.

(d) Plates, sheets, strip and foil

Flat-surfaced products (other than the unwrought products of heading 7901), coiled or not, of solid rectangular (other than square) cross section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,
- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Heading 7905 applies, inter alia, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, checkers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(e) Tubes and pipes

Hollow products, coiled or not, which have a uniform cross section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

## Subheading Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

(a) Zinc, not alloyed

Metal containing by weight at least 97.5 percent of zinc.

(b) Zinc alloys

Metallic substances in which zinc predominates by weight over each of the other elements, provided that the total content by weight of such other elements exceeds 2.5 percent.

(c) Zinc dust

Dust obtained by condensation of zinc vapor, consisting of spherical particles which are finer than zinc powders. At least 80 percent by weight of the particles pass through a sieve with 63 micrometers (microns) mesh. It must contain at least 85 percent by weight of metallic zinc.

## Additional U.S. Note

1. For the purposes of heading 7901, "casting-grade zinc" contains by weight at least 97.5 percent of zinc and contains by weight one or more of the following elements in the quantity indicated:

(a) more than 1.8 percent of lead,

(b) more than 1.8 percent of cadmium,

(c) more than 1.8 percent of iron,

(d) more than 0.5 percent of aluminum,

(e) more than 1 percent of copper,

(f) more than 0.08 percent of titanium,

(g) more than 0.1 percent of any other base metal, taken separately.

### CHAPTER 82

#### TOOLS, IMPLEMENTS, CUTLERY, SPOONS AND FORKS, OF BASE METAL; PARTS THEREOF OF BASE METAL

XV  
82-1

#### Notes

1. Apart from blow torches and similar self-contained torches, portable forges, grinding wheels with frameworks, manicure or pedicure sets, and goods of heading 8209, this chapter covers only articles with a blade, working edge, working surface or other working part of:
  - (a) Base metal;
  - (b) Metal carbides or cermets;
  - (c) Precious or semiprecious stones (natural, synthetic or reconstructed) on a support of base metal, metal carbide or cermet; or
  - (d) Abrasive materials on a support of base metal, provided that the articles have cutting teeth, flutes, grooves or the like, of base metal, which retain their identity and function after the application of the abrasive.
2. Parts of base metal of the articles of this chapter are to be classified with the articles of which they are parts, except parts separately specified as such and toolholders for handtools (heading 8466). However, parts of general use as defined in note 2 to section XV are in all cases excluded from this chapter.

Heads, blades and cutting plates for electric shavers and electric hair clippers are to be classified in heading 8510.
3. Sets consisting of one or more knives of heading 8211 and at least an equal number of articles of heading 8215 are to be classified in heading 8215.

#### Additional U.S. Notes

1. The provisions in this chapter which specifically refer to kitchen or tableware include articles of types which are used outdoors as well as those which are used indoors.
2. In determining the length of files and rasps (heading 8203), the tang (if any) should not be included.
3. For the purposes of determining the rate of duty applicable to sets provided for in heading 8205, 8211 or 8215, a specific rate of duty or a compound rate of duty for any article in the set shall be converted to its ad valorem equivalent rate, i.e., the ad valorem rate which, when applied to the full value of the article determined in accordance with section 402 of the Tariff Act of 1930, as amended, would provide the same amount of duties as the specific or compound rate.

#### Statistical Notes

1. For the purposes of statistical reporting of sets in heading 8205, 8206, 8211 or 8215, the number of pieces reported shall be the total number of separate pieces in the set(s).
2. For the purposes of subheading 8211.92, the term "sheath-type knives" refers to fixed-blade knives contained in a substantial holster, i.e., "sheath" and of a kind used in hunting and fishing.

### Additional U.S. Note

1. For the purposes of this section, the term "printed circuit assembly" means goods consisting of one or more printed circuits of heading 8534 with one or more active elements assembled thereon, with or without passive elements. For the purposes of this note, "active elements" means diodes, transistors and similar semiconductor devices, whether or not photosensitive, of heading 8541, and integrated circuits and microassemblies of heading 8542.

### Statistical Note

1. Provisions for semiconductor manufacturing and testing machines and apparatus cover products for the growth and processing of semiconductor materials, such as silicon and gallium arsenide, the processing of such materials into semiconductor devices and the testing of such devices (in general the testing equipment, as well as some of the processing equipment, is classified in chapter 90). More specifically the goods include the following:
  - (a) Wafer manufacturing equipment:
    - (i) Crystal growers & pullers. - used to produce extremely pure monocrystalline semiconductor boules from which wafers can be sliced. Most common methods employed in these crystal growers and pullers are the Czochralski and float zone methods.
    - (ii) Wafer preparation equipment:
      - (A) Crystal grinders - used to grind the crystal boule to precise diameter required for wafers and to grind the flats on the boule to indicate the conductivity type and resistivity of the crystal.
      - (B) Wafer slicing saws - used to slice wafers from a boule of monocrystalline semiconductor material.
      - (C) Wafer grinders, lappers and polishers - used to prepare the semiconductor wafer for the fabrication process. This involves bringing the wafer within dimensional tolerances. Especially critical is the flatness of its surface.
  - (b) Mask fabrication and repair equipment -
    - (i) Fabrication equipment - used to transfer design patterns to a mask or reticle, this equipment generally utilizes optical, electron beam or X-rays to write circuit patterns on photoresist coated substrates. After development, these substrates become the mask or reticle for wafer fabrication.
    - (ii) Repair equipment - this equipment generally utilizes focused ion beams or laser beams. They are used directly on the mask or reticle to remove chrome.
  - (c) Wafer fabrication equipment:
    - (i) Film formation equipment - used to apply or produce various films on the surface of the wafer during the fabrication process. These films serve as conductors, insulators and semiconductors on the finished device. They may include oxides and nitrides of the substrate surface, metals, and epitaxial layers. The processes and equipments listed below are not necessarily limited to the generation of a particular type of film.
      - (A) Oxidation furnaces - used to form a "film" of oxide on the wafer. The oxide is formed by the chemical reaction of the top molecular layers of the wafer with the applied oxygen or steam under heat.
      - (B) Chemical Vapor Deposition (CVD) equipment - used to deposit various types of films which are obtained by combining the appropriate gases in a reactant chamber at elevated temperatures. This constitutes a thermochemical vapor-phase reaction. Operations may take place at atmospheric or low pressure (LPCVD) and may use plasma enhancement (PECVD).
      - (C) Physical Vapor Deposition (PVD) equipment - used to deposit various types of films which are obtained by vaporizing a solid.
        - (1) Evaporation equipment - in which the film is generated by heating the source material.
        - (2) Sputtering equipment - in which the film is generated by bombarding the source material (target) with ions.
      - (D) Molecular Beam Epitaxy (MBE) equipment - used to grow epitaxial layers on a heated monocrystalline substrate in an ultrahigh vacuum using beams of molecules. The process is similar to PVD.
    - (ii) Doping equipment - which is used to introduce dopants into the wafer surface in order to modify the conductivity or other characteristics of a semiconductor layer:
      - (A) Thermal diffusion equipment - in which the dopants introduced into the surface of the wafer by the application of gases under high temperatures.
      - (B) Ion Implantation - in which the dopants are "driven" into the crystal lattice structure of the surface of the wafer in the form a beam of accelerated ions.
      - (C) Annealing furnaces - which are used to repair the crystal lattice structures of the wafer damaged by ion implantation.

XVI-3

- (iii) Etching and stripping equipment - used for etching or cleaning surfaces of the wafers.
  - (A) Wet etching equipment - in which chemical etching materials are applied by spraying or immersion. Spray etchers provide more uniform results than bath etchers, since they perform the operation on one wafer at a time.
  - (B) Dry plasma etching - in which etching materials are presented as gases within a plasma energy field, providing an anisotropic etch profile.
  - (C) Ion beam milling equipment - in which ionized gas atoms are accelerated toward the wafer surface. The impact results in the top layer being physically removed from the surface.
  - (D) Strippers or ashers - using techniques similar to etching this apparatus removes the spent photoresist from the surface of the wafer after it has served its purpose as a "stencil". This equipment is also used for removal of nitrides, oxides, and polysilicon, with an isotropic etch profile.
- (iv) Lithography equipment - used to transfer the circuit designs to the photoresist coated surface of the semiconductor wafer.
  - (A) Equipment for coating wafers with photoresist - these include the photoresist spinners which are used to apply liquid photoresist evenly over the surface of the wafer.
  - (B) Equipment for exposing the photoresist coated wafer with the circuit design (or a part thereof):
    - (1) Using a mask or reticle and exposing the photoresist to light (generally ultraviolet) or, in some instances, X-rays:
      - (a) Contact printers - where the mask or reticle is in contact with the wafer during exposure.
      - (b) Proximity aligners - similar to contact aligners except actual contact doesn't take place between the mask or reticle and the wafer.
      - (c) Scanning aligners - which use projection techniques to expose a continuously moving slit across the mask and wafer.
      - (d) Step and repeat aligners - which use projection techniques to expose the wafer a portion at a time. Exposure can be by reduction from the mask to the wafer or 1:1. Enhancements include the use of an excimer laser.
    - (2) Direct write on wafer equipment - these apparatus operate with no mask or reticle. They use a computer controlled "writing beam" (such as, an electron beam (E-beam), ion beam or laser) to "draw" the circuit design directly on the photoresist coated wafer.
  - (C) Equipment for developing exposed wafers - these include chemical baths similar to those used in photographic laboratory applications
- (d) Assembly equipment
  - (i) Dicing equipment - these include sawing machines and scribing machines (including laser scribes) and dicing accessories such as wafer breaking equipment.
  - (ii) Die bonding equipment - which installs the die to the package by soldering or gluing
  - (iii) Wire bonding equipment - used for attaching thin wires or tapes (usually of gold, aluminum or copper) from the die bonding pads to the corresponding pads on the package.
  - (iv) Packaging equipment - which are used to encapsulate or package a semiconductor device. They include sealing furnaces, lid welders, plastic encapsulation presses, lead trim and form equipment, package deflashers, and tin dip and solder plate equipment.
- (e) Testing and inspection equipment
  - (i) Optical inspection equipment - These include equipment that "examines" portions of the wafer surface and compares them either to a standard pattern or to other portions of the wafer surface.
  - (ii) Electrical testing equipment - These include computer controlled systems that test the functions and electrical specifications of semiconductor devices through the application and detection of electrical signals or patterns. Testing is performed on both unencapsulated dice and packaged integrated circuits.

5. (A) For purposes of heading 8471, the expression "automatic data processing machines" means:
- (a) Digital machines, capable of (1) storing the processing program or programs and at least the data immediately necessary for execution of the program; (2) being freely programmed in accordance with the requirements of the user; (3) performing arithmetical computations specified by the user; and, (4) executing, without human intervention, a processing program which requires them to modify their execution, by logical decision during the processing run;
  - (b) Analog machines capable of simulating mathematical models and comprising at least: analog elements, control elements and programming elements;
  - (c) Hybrid machines consisting of either a digital machine with analog elements or an analog machine with digital elements.
- (B) Automatic data processing machines may be in the form of systems consisting of a variable number of separately housed units. A unit is to be regarded as being a part of the complete system if it meets all of the following conditions:
- (a) It is connectable to the central processing unit either directly or through one or more other units; and
  - (b) It is specifically designed as part of such a system (it must, in particular, unless it is a power supply unit, be able to accept or deliver data in a form (code or signals) which can be used by the system).

Such units entered separately are also to be classified in heading 8471.

Heading 8471 does not cover machines incorporating or working in conjunction with an automatic data processing machine and performing a specific function. Such machines are classified in the headings appropriate to their respective functions or, failing that, in residual headings.

6. Heading 8482 applies, inter alia, to polished steel balls, the maximum and minimum diameters of which do not differ from the nominal diameter by more than 1 percent or by more than 0.05 mm, whichever is less. Other steel balls are to be classified under heading 7326.
7. A machine which is used for more than one purpose is, for the purposes of classification, to be treated as if its principal purpose were its sole purpose.

Subject to note 2 to this chapter and note 3 to section XVI, a machine the principal purpose of which is not described in any heading or for which no one purpose is the principal purpose is, unless the context otherwise requires, to be classified in heading 8479. Heading 8479 also covers machines for making rope or cable (for example, stranding, twisting or cabling machines) from metal wire, textile yarn or any other material or from a combination of such materials.

### Subheading Note

1. Subheading 8482.40 applies only to bearings with cylindrical rollers of a uniform diameter not exceeding 5 mm and having a length which is at least three times the diameter. The ends of the rollers may be rounded.

### Additional U.S. Note

1. For the purposes of subheadings 8479.89.10, 8479.89.65, 8479.89.95, 8479.90.40 and 8479.90.95, the rate of duty "Free (C)" appearing in the column entitled "1-Special" applies only to the following articles and their parts: nonelectric starter motors; propeller regulators, nonelectric; servo-mechanisms, nonelectric; windshield wipers, nonelectric; hydropneumatic accumulators; pneumatic starters for turbojets, turbopropellers, or other gas turbines; toilet units specially designed for aircraft; mechanical actuators for thrust reversers; air humidifiers and dehumidifiers.

- (a) Control or command assemblies, incorporating more than one of the following: printed circuit assembly, hard or flexible (floppy) disk drive, keyboard, user interface;
  - (b) Light source assemblies, incorporating more than one of the following: light emitting diode assembly, gas laser, mirror polygon assembly, base casting;
  - (c) Laser imaging assemblies, incorporating more than one of the following: photoreceptor belt or cylinder, toner receptacle unit, toner developing unit, charge/discharge units, cleaning unit;
  - (d) Image fixing assemblies, incorporating more than one of the following: fuser, pressure roller, heating element, release oil dispenser, cleaning unit, electrical control;
  - (e) Ink jet marking assemblies, incorporating more than one of the following: thermal print head, ink dispensing unit, nozzle and reservoir unit, ink heater;
  - (f) Maintenance/sealing assemblies, incorporating more than one of the following: vacuum unit, ink jet covering unit, sealing unit, purging unit;
  - (g) Paper handling assemblies, incorporating more than one of the following: paper transport belt, roller, print bar, carriage, gripper roller, paper storage unit, exit tray;
  - (h) Thermal transfer imaging assemblies, incorporating more than one of the following: thermal print head, cleaning unit, supply or take-up roller;
  - (ij) Ionographic imaging assemblies, incorporating more than one of the following: ion generation and emitting unit, air assist unit, printed circuit assembly, charge receptor belt or cylinder, toner receptacle unit, toner distribution unit, developer receptacle and distribution unit, developing unit, charge/discharge unit, cleaning unit; or
  - (k) Combinations of the above specified assemblies.

Statistical Note:

1. For the purposes of subheading 8465.93.00, the term wide belt sanders refers to those belt sanders which use a belt with a width of 30 cm or wider.

### CHAPTER 85

#### ELECTRICAL MACHINERY AND EQUIPMENT AND PARTS THEREOF; SOUND RECORDERS AND REPRODUCERS, TELEVISION IMAGE AND SOUND RECORDERS AND REPRODUCERS, AND PARTS AND ACCESSORIES OF SUCH ARTICLES

XVI  
85-1

#### Notes

1. This chapter does not cover:

- (a) Electrically warmed blankets, bed pads, foot-muffs or the like; electrically warmed clothing, footwear or ear pads or other electrically warmed articles worn on or about the person;
- (b) Articles of glass of heading 7011; or
- (c) Electrically heated furniture of chapter 94.

2. Headings 8501 to 8504 do not apply to goods described in heading 8511, 8512, 8540, 8541 or 8542.

However, metal tank mercury arc rectifiers remain classified in heading 8504.

3. Heading 8509 covers only the following electromechanical machines of the kind commonly used for domestic purposes:

- (a) Vacuum cleaners, floor polishers, food grinders, processors or mixers, and fruit or vegetable juice extractors, of any weight;
- (b) Other machines provided the weight of such machines does not exceed 20 kg, exclusive of extra interchangeable parts or detachable auxiliary devices.

The heading does not, however, apply to fans or ventilating or recycling hoods incorporating a fan, whether or not fitted with filters (heading 8414), centrifugal clothes dryers (heading 8421), dishwashing machines (heading 8422), household washing machines (heading 8450), roller or other ironing machines (heading 8420 or 8451), sewing machines (heading 8452), electric scissors (heading 8508) or to electrothermic appliances (heading 8516).

4. For the purposes of heading 8534 "printed circuits" are circuits obtained by forming on an insulating base, by any printing process (for example, embossing, plating-up, etching) or by the "film circuit" technique, conductor elements, contacts or other printed components (for example, inductances, resistors, capacitors) alone or interconnected according to a pre-established pattern, other than elements which can produce, rectify, modulate or amplify an electrical signal (for example, semiconductor elements).

The term "printed circuits" does not cover circuits combined with elements other than those obtained during the printing process. Printed circuits may, however, be fitted with non-printed connecting elements.

Thin- or thick-film circuits comprising passive and active elements obtained during the same technological process are to be classified in heading 8542.

5. For the purposes of headings 8541 and 8542:

- (a) "Diodes, transistors and similar semiconductor devices" are semiconductor devices the operation of which depends on variations in resistivity on the application of an electric field;
- (b) "Electronic integrated circuits and microassemblies" are:
  - (i) Monolithic integrated circuits in which the circuit elements (diodes, transistors, resistors, capacitors, interconnections, etc.) are created in the mass (essentially) and on the surface of a semiconductor material (doped silicon, for example) and are inseparably associated;
  - (ii) Hybrid integrated circuits in which passive elements (resistors, capacitors, interconnections, etc.) obtained by thin- or thick-film technology and active elements (diodes, transistors, monolithic integrated circuits, etc.) obtained by semiconductor technology, are combined to all intents and purposes indivisibly, on a single insulating substrate (glass, ceramic, etc.). These circuits may also include discrete components;
  - (iii) Microassemblies of the molded module, micromodule or similar types, consisting of discrete, active or both active and passive, components which are combined and interconnected.

For the classification of the articles defined in this note, headings 8541 and 8542 shall take precedence over any other heading in the tariff schedule which might cover them by reference to, in particular, their function.

6. Records, tapes and other media of heading 8523 or 8524 remain classified in those headings, whether or not they are entered with the apparatus for which they are intended.

### Statistical Notes

1. For the purposes of this chapter the terms "AM" and "FM" refer to the entertainment broadcast bands of 550-1650 kHz and 88-108 MHz, respectively.
2. For statistical reporting purposes under subheading 8539.10, the size of a sealed beam lamp unit is determined by measuring the largest diagonal dimension across the faceplate.
3. For statistical reporting purposes under subheading 8544.70, the unit of quantity "fiber m", as it pertains to optical fiber cables, is determined by multiplying the number of individual fibers contained therein by the length in meters.
4. For statistical reporting purposes under subheadings 8525.10.60, 8525.20.30 and 8527.90.90, the lowest operating frequency will determine the classification.
5. For statistical reporting purposes in subheading 8542.11.80 the following definitions will apply:
  - (a) The term "static read-write random access (SRAM)" refers to integrated circuit memory devices in which the memory cells may be addressed in any sequence, randomly, for the storage or retrieval of data and in which the stored information is retained without further intervention as long as electric power is supplied to the device.
  - (b) The term "volatile memory" refers to integrated circuit memory devices which lose all stored information in the absence of electric power.
  - (c) The term "dynamic read-write random access (DRAM)" refers to integrated circuit memory devices in which the memory cells may be addressed in any sequence, randomly, for the storage or retrieval of data and in which the stored information must continually be refreshed in order to hold the information in memory.
  - (d) The term "electrically erasable programmable read-only memory (EEPROM)" refers to user programmable integrated circuit memory devices which retain the stored information in the absence of electric power and in which the stored information may be altered electrically.
  - (e) The term "erasable (except electrically) programmable read-only memory (EPROM)" refers to user programmable integrated circuit memory devices which retain the stored information in the absence of electric power and from which the stored information may be removed (except electrically). Such devices are usually erased by exposure to ultraviolet light after which they may be rewritten with new information.
  - (f) The term "microprocessor" refers to a central processing unit (CPU) fabricated as a monolithic integrated circuit.

A part or accessory which answers to a description in two or more of the headings of those chapters is to be classified under that heading which corresponds to the principal use of that part or accessory.
4. Aircraft specially constructed so that they can also be used as road vehicles are classified as aircraft.  
Amphibious motor vehicles are classified as motor vehicles.
5. Air-cushion vehicles are to be classified within this section with the vehicles to which they are most akin as follows:
  - (a) In chapter 86 if designed to travel on a guide-track (hovertrains);
  - (b) In chapter 87 if designed to travel over land or over both land and water;
  - (c) In chapter 89 if designed to travel over water, whether or not able to land on beaches or landing-stages or also able to travel over ice.

Parts and accessories of air-cushion vehicles are to be classified in the same way as those of vehicles of the heading in which the air-cushion vehicles are classified under the above provisions.

Hovertrain track fixtures and fittings are to be classified as railway track fixtures and fittings, and signalling, safety or traffic control equipment for hovertrain transport systems as signalling, safety or traffic control equipment for railways.

### CHAPTER 87

#### VEHICLES OTHER THAN RAILWAY OR TRAMWAY ROLLING-STOCK, AND PARTS AND ACCESSORIES THEREOF

XVII  
87-1

#### Notes

1. This chapter does not cover railway or tramway rolling-stock designed solely for running on rails.
2. For the purposes of this chapter, "tractors" means vehicles constructed essentially for hauling or pushing another vehicle, appliance or load, whether or not they contain subsidiary provision for the transport, in connection with the main use of the tractor, of tools, seeds, fertilizers or other goods.
3. Motor chassis fitted with cabs fall in headings 8702 to 8704, and not in heading 8706.
4. Heading 8712 includes all children's bicycles. Other children's cycles fall in heading 9501.

#### Additional U.S. Notes

1. Road tractors, trailers and semi-trailers remain separately classified in headings 8701 and 8716, respectively, even when entered together.
2. For the purposes of classifying bicycles under the provisions therefore in heading 8712, the diameter of each wheel is the diameter measured to the outer circumference of the tire which is mounted thereon or, if none is mounted thereon, of the usual tire for such wheel.

#### Notes

1. This chapter does not cover:

- (a) Articles of a kind used in machines, appliances or for other technical uses, of vulcanized rubber other than hard rubber (heading 4016), of leather or of composition leather (heading 4204) or of textile material (heading 5911);
- (b) Supporting belts or other support articles of textile material, whose intended effect on the organ to be supported or held derives solely from their elasticity (for example, maternity belts, thoracic support bandages, abdominal support bandages, supports for joints or muscles) (section XI);
- (c) Refractory goods of heading 6903; ceramic wares for laboratory, chemical or other technical uses, of heading 6909;
- (d) Glass mirrors, not optically worked, of heading 7009, or mirrors of base metal or of precious metal, not being optical elements (heading 8306 or chapter 71);
- (e) Goods of heading 7007, 7008, 7011, 7014, 7015 or 7017;
- (f) Parts of general use, as defined in note 2 to section XV, of base metal (section XV) or similar goods of plastics (chapter 39);
- (g) Pumps incorporating measuring devices, of heading 8413; weight-operated counting or checking machinery, or separately entered weights for balances (heading 8423); lifting or handling machinery (headings 8425 to 8428); paper or paperboard cutting machines of all kinds (heading 8441); fittings for adjusting work or tools on machine tools, of heading 8466, including fittings with optical devices for reading the scale (for example, "optical" dividing heads) but not those which are in themselves essentially optical instruments (for example, alignment telescopes); calculating machines (heading 8470); valves or other appliances of heading 8481;
- (h) Searchlights or spotlights of a kind used for cycles or motor vehicles (heading 8512); portable electric lamps of heading 8513; cinematographic sound recording, reproducing or re-recording apparatus (heading 8519 or 8520); sound-heads (heading 8522); radar apparatus, radio navigational aid apparatus and radio remote control apparatus (heading 8526); sealed beam lamp units of heading 8539; optical fiber cables of heading 8544;

- (k) Articles of chapter 95;
- (l) Capacity measures, which are to be classified according to their constituent material; or
- (m) Spools, reels or similar supports (which are to be classified according to their constituent material, for example, in heading 3923 or section XV).

2. Subject to note 1 above, parts and accessories for machines, apparatus, instruments or articles of this chapter are to be classified according to the following rules:

- (a) Parts and accessories which are goods included in any of the headings of this chapter or of chapter 84, 85 or 91 (other than heading 8485, 8548 or 9033) are in all cases to be classified in their respective headings;
- (b) Other parts and accessories, if suitable for use solely or principally with a particular kind of machine, instrument or apparatus, or with a number of machines, instruments or apparatus of the same heading (including a machine, instrument or apparatus of heading 9010, 9013 or 9031) are to be classified with the machines, instruments or apparatus of that kind;
- (c) All other parts and accessories are to be classified in heading 9033.

3. The provisions of note 4 to section XVI apply also to this chapter.

4. Heading 9005 does not apply to telescopic sights for fitting to arms, periscopic telescopes for fitting to submarines or tanks, or to telescopes for machines, appliances, instruments or apparatus of this chapter or section XVI; such telescopic sights and telescopes are to be classified in heading 9013.

5. Measuring or checking optical instruments, appliances or machines which, but for this note, could be classified both in heading 9013 and in heading 9031 are to be classified in heading 9031.

6. Heading 9032 applies only to:

- (a) Instruments and apparatus for automatically controlling the flow, level, pressure or other variables of liquids or gases, or for automatically controlling temperature, whether or not their operation depends on an electrical phenomenon which varies according to the factor to be automatically controlled; and
- (b) Automatic regulators of electrical quantities, and instruments or apparatus for automatically controlling non-electrical quantities the operation of which depends on an electrical phenomenon varying according to the factor to be controlled.

### Additional U.S. Notes

1. For the purposes of headings 9001 and 9002, the term "optically worked" refers to glass the surface of which has been ground or polished in order to produce the required optical properties.
2. For the purposes of this chapter, the term "electrical" when used in reference to instruments, appliances, apparatus and machines, refers to those articles the operation of which depends on an electrical phenomenon which varies according to the factor to be ascertained.
3. For the purposes of this chapter, the terms "optical appliances" and "optical instruments" refer only to those appliances and instruments which incorporate one or more optical elements, but do not include any appliances or instruments in which the incorporated optical element or elements are solely for viewing a scale or for some other subsidiary purpose.
4. For the purposes of this chapter, the term "printed circuit assembly" means goods consisting of one or more printed circuits of heading 8534 with one or more active elements assembled thereon, with or without passive elements. For the purposes of this note, "active elements" means diodes, transistors and similar semiconductor devices, whether or not photosensitive, of heading 8541, and integrated circuits and microassemblies of heading 8542.
5. Subheadings 9009.90.10 and 9009.90.30 cover the following parts of photocopying apparatus of subheading 9009.12:

### CHAPTER 91

#### CLOCKS AND WATCHES AND PARTS THEREOF

XVIII  
91-1

#### Notes

1. This chapter does not cover:
  - (a) Clock or watch glasses or weights (classified according to their constituent material);
  - (b) Watch chains (heading 7113 or 7117, as the case may be);
  - (c) Parts of general use defined in note 2 to section XV, of base metal (section XV), or similar goods of plastics (chapter 39) or of precious metal or metal clad with precious metal (generally heading 7115); clock or watch springs are, however, to be classified as clock or watch parts (heading 9114);
  - (d) Bearing balls (heading 7326 or 8482, as the case may be);
  - (e) Articles of heading 8412 constructed to work without an escapement;
  - (f) Ball bearings (heading 8482); or
  - (g) Articles of chapter 85, not yet assembled together or with other components into watch or clock movements or into articles suitable for use solely or principally as parts of such movements (chapter 85).
2. Heading 9101 covers only watches with case wholly of precious metal or of metal clad with precious metal, or of the same materials combined with natural or cultured pearls, or precious or semiprecious stones (natural, synthetic or reconstructed) of headings 7101 to 7104. Watches with case of base metal inlaid with precious metal fall in heading 9102.
3. For the purposes of this chapter, the expression "watch movements" means devices regulated by a balance wheel and hairspring, quartz crystal or any other system capable of determining intervals of time, with a display or a system to which a mechanical display can be incorporated. Such watch movements shall not exceed 12 mm in thickness and 50 mm in width, length or diameter.
4. Except as provided in note 1, movements and other parts suitable for use both in clocks or watches and in other articles (for example, precision instruments) are to be classified in this chapter.

#### Additional U.S. Notes

1. For the purposes of this chapter:
  - (a) The term "watches" embraces timepieces (including timepieces having special features, such as chronographs, calendar watches and watches designed for use in skin diving) of a kind for wearing or carrying on the person whether or not the movement contained therein conforms to the definition of "watch movements" in note 3, above. Timepieces incorporating a stand, however simple, are not classifiable as watches.
  - (b) The term "cases" embraces inner and outer cases, containers and housings for movements, together with parts or pieces, such as, but not limited to, rings, feet, posts, bases and outer frames, and any auxiliary or incidental features, which (with appropriate movements) serve to complete the watches, clocks, time switches and other apparatus provided for in this chapter.
  - (c) The term "jewels" includes substitutes for jewels.
  - (d) The term "clock movements" means devices regulated by a balance wheel and hairspring, quartz crystal or any other system capable of determining intervals of time, with a display or a system to which a mechanical display can be incorporated. Such clock movements shall either exceed 12 mm in thickness or 50 mm in width, length or diameter, or both.
  - (e) The term "complete watch or clock movements, unassembled or partly assembled (movement sets)" refers to sets which consist of all parts necessary to assemble a watch or clock movement, except that for movements having mechanical displays the set may or may not include the dial and hands.
  - (f) The term "incomplete watch or clock movements, assembled" refers to:
    - (i) Mechanical movements which are mounted but lack certain parts other than the dial, hands or winding spindle (e.g., the escapement or the barrel bridge);
    - (ii) Battery powered movements with mechanical displays which are mounted but lack certain parts other than the dial, hands, setting spindle or battery (e.g., the motor); or
    - (iii) Other movements intended to operate with opto-electronic displays which are mounted but lack certain parts other than the battery (e.g., the display).
  - (g) The term "rough watch or clock movements" refers to sets of unassembled parts for the assembly of watch or clock movements of a kind constructed to work with an escapement. These sets do not include escapement, balance wheel and hairspring or other regulating device, mainspring, dial or hands; they therefore consist mainly of the base plate (and any additional plates), bridges, train, motion work, winding and setting mechanism and any additional mechanisms such as automatic winding device, calendar mechanisms, chronograph, alarm, etc. These sets may be entered with or without a barrel. Each element, intended for use as it is, may itself consist of one simple piece or of several parts fitted inseparably together, but such elements may not themselves be assembled to each other.

XVIII  
91-2

2. Watch straps, watch bands and watch bracelets entered with wrist watches and of a kind normally sold therewith, whether or not attached, are classified with the watch in heading 9101 or 9102. Otherwise, watch straps, watch bands and watch bracelets shall be classified in heading 9113.
3. Batteries entered with battery powered watches or clocks, or with the complete, assembled movements thereof, and intended for use therewith, are classifiable under the provision for the watch, clock or movement. Similarly, batteries entered with a complete watch or clock movement, unassembled or partly assembled (movement set) or with an incomplete watch or clock movement, assembled, and intended for use therewith, are classifiable under the provision for such movement. Batteries are otherwise classifiable in heading 8506 or 8507, whether or not suitable for use with watches or clocks.
4. Special Marking Requirements: With the following exceptions, any movement or case provided for in this chapter, whether imported separately or attached to an article provided for in this chapter, shall not be permitted to be entered unless conspicuously and indelibly marked by cutting, die-sinking, engraving, stamping or mold-marking (either indented or raised), as specified below. Movements with opto-electronic display only and cases designed for use therewith, whether entered as separate articles or as components of assembled watches or clocks, are excepted from the marking requirements set forth in this note. The special marking requirements are as follows:
  - (a) Watch movements shall be marked on one or more of the bridges or top plates to show:
    - (i) the name of the country of manufacture;
    - (ii) the name of the manufacturer or purchaser; and
    - (iii) in words, the number of jewels, if any, serving a mechanical purpose as frictional bearings.
  - (b) Clock movements shall be marked on the most visible part of the front or back plate to show:
    - (i) the name of the country of manufacture;
    - (ii) the name of the manufacturer or purchaser; and
    - (iii) the number of jewels, if any.
  - (c) Watch cases shall be marked on the inside or outside of the back to show:
    - (i) the name of the country of manufacture; and
    - (ii) the name of the manufacturer or purchaser.
  - (d) Clock cases provided for in this chapter shall be marked on the most visible part of the outside of the back to show the name of the country of manufacture.
5. Products of Insular Possessions
  - (a) Except as provided in paragraphs (b) through (j) of this note, any article provided for in this chapter which is the product of the Virgin Islands, Guam and American Samoa (hereinafter referred to as the "insular possessions") and which contains any foreign component shall be subject to duty:
    - (i) At the rates set forth in column 1, if the countries of origin of more than 50 percent in value of the foreign components are countries to products of which column 1 rates apply; and
    - (ii) At the rates set forth in column 2, if the countries of origin of 50 percent or more in value of the foreign components are countries to products of which column 2 rates apply.
  - (b) Watch movements and watches (including watch straps, watch bands, and watch bracelets assembled onto watches) that are produced or manufactured in a United States insular possession which contain any foreign component may be admitted free of duty without regard to the value of the foreign materials such watches contain if they conform with the provisions of this note, but the total quantity of such articles entered free of duty shall not exceed the amounts established by or pursuant to paragraph (d) of this note.
  - (c) Notwithstanding the provisions of paragraph (b) of this note, the provisions of this note and the benefits thereunder shall not apply to any article containing any material which is the product of any country with respect to which column 2 rates of duty apply.
  - (d)
    - (i) In calendar year 1983 the total quantity of such articles which may be entered free of duty shall not exceed 4,800,000 units.
    - (ii) In subsequent calendar years, the Secretary of Commerce and the Secretary of the Interior (hereinafter referred to as the "Secretaries"), acting jointly, shall establish a limit on the quantity which may be entered free of duty during the calendar year, and shall consider whether such limit is in the best interest of the insular possessions and not inconsistent with domestic or international trade policy considerations. The quantity the Secretaries establish in any calendar year under this paragraph shall not--
      - (A) exceed 10,000,000 units or one-ninth of apparent domestic consumption (as determined by the International Trade Commission pursuant to paragraph (e) of this note), whichever is greater;
      - (B) be decreased by more than 10 percent of the quantity established for the immediately preceding calendar year; and

- (C) be increased to more than 7,000,000 units or by more than 20 percent of the quantity established for the immediately preceding calendar year, whichever is greater.
- (e) On or before April 1 of each calendar year (beginning with the first year in which watch imports from the United States insular possessions exceed 9,000,000 units), the International Trade Commission shall determine the apparent United States consumption of watches and watch movements during the preceding calendar year, shall report such determination to the Secretaries, and shall publish such determination in the Federal Register.
- (f) (i) In calendar year 1983, not more than 3,000,000 units of the total quantity of articles described in paragraph (d) which may be entered free of duty shall be the product of the Virgin Islands, not more than 1,200,000 units shall be the product of Guam, and not more than 600,000 units shall be the product of American Samoa.
- (ii) For calendar year 1984 and thereafter, the Secretaries may establish new territorial shares of the total amount which may be entered free of duty, taking into account the capacity of each territory to produce and ship its assigned amounts. A territory's share in any year shall not be reduced:
- (A) by more than 200,000 units in calendar year 1984 or 1985; and
- (B) by more than 500,000 units in calendar year 1986 or thereafter, except that no territorial share shall be established at less than 500,000 units.
- (g) The Secretaries, acting jointly, shall allocate the calendar year duty exemptions provided by paragraphs (b), (d) and (f) of this note on a fair and equitable basis among producers located in the insular possessions, and shall issue appropriate licenses thereof. Allocations made by the Secretaries shall be final. In making the allocations, the Secretaries shall consider the potential impact of territorial production on domestic production of like articles and shall establish allocation criteria (including minimum assembly requirements) that will reasonably maximize the net amount of direct economic benefits to the insular possessions.
- (h) (i) In the case of each calendar year beginning after December 31, 1982, and before January 1, 2007, the Secretaries, acting jointly, shall:
- (A) verify the wages paid by each producer to permanent residents of the insular possessions during the preceding calendar year; and
- (B) issue to each producer (not later than March 1 of such year) a certificate for the applicable amount.
- (ii) For purposes of subparagraph (i), except as provided in subparagraphs (iii) and (iv), the term "applicable amount" means an amount equal to the sum of:
- (A) 90 percent of the producer's creditable wages on the assembly during the preceding calendar year of the first 300,000 units; plus
- (B) the applicable graduated declining percentage (determined each year by the Secretaries) of the producer's creditable wages on the assembly during the preceding calendar year of units in excess of 300,000 but not in excess of 750,000.
- (iii) The aggregate amount of all certificates which are issued during any calendar year shall not exceed an amount which bears the same ratio to \$5,000,000 as:
- (A) the gross national product of the United States (as determined by the Secretary of Commerce) for the preceding calendar year, bears to:
- (B) the gross national product of the United States (as so determined) for 1982.
- (iv) (A) Subject to the provision of clause (B), if the amount of the certificates issued under subparagraph (i) would exceed the limit under subparagraph (iii), the applicable amount of each producer's certificate shall be reduced proportionately by the amount of such excess.
- (B) The applicable amount of any producer's certificate shall not be reduced below the amount determined under subparagraph (ii)(A), except that if the application of this clause would result in the aggregate amount of the certificates exceeding the limit under subparagraph (iii), the applicable amount of each producer's certificate shall again be reduced proportionately by the amount of the excess determined after application of this clause.
- (v) Any certificate issued under subparagraph (i) shall entitle the certificate holder to secure the refund of duties equal to the face value of the certificate on watches, watch movements and, with the exception of discrete cases, parts therefor imported into the customs territory of the United States by the certificate holder. Such refunds shall be made under regulations issued by the Treasury Department. Not more than 5 percent of such refunds may be retained as a reimbursement to the Customs Service for the administrative costs of making the refunds.
- (vi) Any certificate issued under subparagraph (i), or any portion thereof, shall be negotiable.
- (vii) Any certificate issued under subparagraph (i) shall expire 1 year from the date of issuance and may be applied against duties on imports of watches and watch movements the entry of which were made within 2 years prior to the date of issuance of the certificate.

(viii) For purposes of determining the applicable amount of any producer's certificate to be issued during calendar year 1983, the greater of:

(A) the producer's creditable wages for calendar year 1982; or

(B) 60 percent of the producer's creditable wages for calendar year 1981 shall be considered the creditable wages for calendar year 1982.

(ij) the Secretaries are authorized to issue such regulations, not inconsistent with the provisions of this note, as they determine necessary to carry out their respective duties under this note. Such regulations shall include minimum assembly requirements. Any duty-free entry determined not to have been made in accordance with applicable regulations shall be subject to the applicable civil remedies and criminal sanctions, and, in addition, the Secretaries may cancel or restrict the license or certificate of any manufacturer found in willful violation of the regulations.

### Statistical Notes

1. The calculation of duties on various watches, clocks, watch movements and clock movements requires that these articles be constructively separated into their component parts and each component separately valued. The individual components shall be separately reported under the statistical suffixes show below. In each instance the sum of the values of the individual components shall be equal to the total value of the article. In those instances where the components of an article are to be separately reported under the following reporting scheme, the entry should include all the individually named components even if not included in the shipment. In such instance the entered quantity and value would be zero. For example, entry of a battery powered watch, imported without a battery, classifiable under subheading 9101.11.40 would include a line for the statistical reporting number for the battery (9101.11.4040) with the quantity and value shown as zero. To determine the proper statistical reporting number(s) for the subheadings enumerated below, the importer shall combine the applicable 8-digit subheading number with the applicable statistical suffix found below.

### CHAPTER 98

#### SPECIAL CLASSIFICATION PROVISIONS

XXII  
98-1

#### U.S. Notes

1. The provisions of this chapter are not subject to the rule of relative specificity in general rule of interpretation 3(a). Any article which is described in any provision in this chapter is classifiable in said provision if the conditions and requirements thereof and of any applicable regulations are met.
2. In the absence of a specific provision to the contrary, the tariff status of an article is not affected by the fact that it was previously imported into the customs territory of the United States and cleared through customs whether or not duty was paid upon such previous importation.
3. Any article exempted under subchapters IV through VII, inclusive, or subchapter IX from the payment of duty shall be exempt also from the payment of any internal-revenue tax imposed upon or by reason of importation.

#### Statistical Notes

1. Statistical data are not to be furnished with respect to articles classified in those headings of this chapter for which no statistical suffix is shown.
2. For articles provided for in this chapter, the rate of duty for which is derived from a provision elsewhere in the tariff schedule, the citation to be used in statistical reporting shall be the 10-digit statistical reporting number provided in this chapter followed by the reporting number of the provision from which such rate is derived. The unit of quantity reported hereunder for such articles shall be the same as the unit of quantity for the provision from which the rate was derived. For example, 10 new fully automatic arc welding machines exported for repairs or alterations pursuant to a warranty and returned to the United States the statistical reporting number shall be 9802.00.4040-8515.31.0000, with the quantity being shown as 10 and the value as dutiable value.

## NOTICE TO EXPORTERS

The statistical reporting numbers contained in this chapter apply only to imports and may not be reported on Shipper's Export Declarations. See Notice to Exporters preceding chapter 1.

### SUBCHAPTER I

#### ARTICLES EXPORTED AND RETURNED, NOT ADVANCED OR IMPROVED IN CONDITION; ANIMALS EXPORTED AND RETURNED

XXII  
98-3

#### U.S. Notes

1. The provisions in this subchapter (except subheadings 9801.00.70 and 9801.00.80) shall not apply to any article:
  - (a) Exported with benefit of drawback;
  - (b) Of a kind with respect to the importation of which an internal-revenue tax is imposed at the time such article is entered, unless such article was subject to an internal-revenue tax imposed upon production or importation at the time of its exportation from the United States and it shall be proved that such tax was paid before exportation and was not refunded; or
  - (c) Manufactured or produced in the United States in a customs bonded warehouse or under heading 9813.00.05 and exported under any provision of law.
2. For the purposes of subheadings 9801.00.70 and 9801.00.80:
  - (a) When because of the destruction of customs records or for other cause it is impracticable to establish whether drawback was allowed, or the amount allowed, on a returned article, there shall be assessed thereon an amount of duty equal to the estimated drawback and internal-revenue tax which would be allowable or refundable if the imported merchandise used in the manufacture or production of the returned article were dutiable or taxable at the rate applicable to such merchandise on the date of entry, but in no case more than the duty and tax that would apply if the article were wholly of foreign origin;
  - (b) Tobacco products and cigarette papers and tubes classifiable under such subheading may be released from customs custody, without payment of that part of duty attributable to the internal-revenue tax, for return to internal-revenue bond as provided by section 5704(d) of the Internal Revenue Code of 1954; and
  - (c) In order to facilitate the ascertainment and collection of the duty provided for, the Secretary of the Treasury is authorized to ascertain and specify the amounts of duty equal to drawback or internal-revenue tax which shall be applied to articles or classes or kinds of articles, and to exempt from the assessment of duty articles or classes or kinds of articles with respect to which the collection of such duty involves expense and inconvenience to the Government which is disproportionate to the probable amount of such duty.

### SUBCHAPTER II

#### ARTICLES EXPORTED AND RETURNED, ADVANCED OR IMPROVED ABROAD

XXII  
98-7

#### U.S. Notes

1. Except for goods subject to NAFTA drawback, this subchapter shall not apply to any article exported:
  - (a) From continuous customs custody with remission, abatement or refund of duty;
  - (b) With benefit of drawback;
  - (c) To comply with any law of the United States or regulation of any Federal agency requiring exportation; or
  - (d) After manufacture or production in the United States under heading 9813.00.05.
2. (a) Except as provided in paragraph (b), any product of the United States which is returned after having been advanced in value or improved in condition abroad by any process of manufacture or other means, or any imported article which has been assembled abroad in whole or in part of products of the United States, shall be treated for the purposes of this Act as a foreign article, and, if subject to a duty which is wholly or partly ad valorem, shall be dutiable, except as otherwise prescribed in this part, on its full value determined in accordance with section 402 of the Tariff Act of 1930, as amended. If such product or such article is dutiable at a rate dependent upon its value, the value for the purpose of determining the rate shall be its full value under the said section 402.
  - (b) No article (except a textile article, apparel article, or petroleum, or any product derived from petroleum, provided for in heading 2709 or 2710) may be treated as a foreign article, or as subject to duty, if--
    - (i) the article is--
      - (A) assembled or processed in whole of fabricated components that are a product of the United States, or
      - (B) processed in whole of ingredients (other than water) that are a product of the United States, in a beneficiary country; and
    - (ii) neither the fabricated components, materials or ingredients, after exportation from the United States, nor the article itself, before importation into the United States, enters the commerce of any foreign country other than a beneficiary country.

As used in this paragraph, the term "beneficiary country" means a country listed in general note 7(a).
3. Articles repaired, altered, processed or otherwise changed in condition abroad.--The following provisions apply only to subheadings 9802.00.40 through 9802.00.60, inclusive:
  - (a) The value of repairs, alterations, processing or other change in condition outside the United States shall be:
    - (i) The cost to the importer of such change; or
    - (ii) If no charge is made, the value of such change, as set out in the invoice and entry papers; except that, if the appraiser concludes that the amount so set out does not represent a reasonable cost or value, then the value of the change shall be determined in accordance with section 402 of the Tariff Act of 1930, as amended.
  - (b) No appraisement of the imported article in its changed condition shall be required unless necessary to a determination of the rate or rates of duty applicable to such article.
  - (c) The duty, if any, upon the value of the change in condition shall be at the rate which would apply to the article itself, as an entirety without constructive separation of its components, in its condition as imported if it were not within the purview of this subchapter. If the article, as returned to the United States, is subject to a specific or compound rate of duty, such rate shall be converted to the ad valorem rate which when applied to the full value of such article determined in accordance with said section 402 would provide the same amount of duties as the specific or compound rate. In order to compute the duties due, the ad valorem rate so obtained shall be applied to the value of the change in condition made outside the United States.
  - (d) For purposes of subheading 9802.00.60, the term "metal" covers (1) the base metals enumerated in additional U.S. note 1 to section XV; (2) arsenic, barium, boron, calcium, mercury, selenium, silicon, strontium, tellurium, thorium, uranium and the rare-earth elements; and (3) alloys of any of the foregoing.
4. Articles assembled abroad with components produced in the United States.--The following provisions apply only to headings 9802.00.80 and 9802.00.90:
  - (a) The value of the products of the United States assembled into the imported article shall be:
    - (i) The cost of such products at the time of the last purchase; or
    - (ii) If no charge is made, the value of such products at the time of the shipment for exportation, as set out in the invoice and entry papers; except that, if the appraiser concludes that the amount so set out does not represent a reasonable cost or value, then the value of such products shall be determined in accordance with section 402 of the Tariff Act of 1930, as amended.

XXII  
98-8

- (b) The duty, if any, on the imported article shall be at the rate which would apply to the imported article itself, as an entirety without constructive separation of its components, in its condition as imported if it were not within the purview of this subchapter. If the imported article is subject to a specific or compound rate of duty, the total duties shall be reduced in such proportion as the cost or value of such products of the United States bears to the full value of the imported article.
5. No imported article shall be accorded partial exemption from duty under more than one provision in this subchapter.
6. Notwithstanding the partial exemption from ordinary customs duties on the value of the metal product exported from the United States provided under subheading 9802.00.60, articles imported under subheading 9802.00.60 are subject to all other duties, and any other restrictions or limitations, imposed pursuant to title VII of the Tariff Act of 1930 (19 U.S.C. 1671 et seq.), or chapter 1 of title II or chapter 1 of title III of the Trade Act of 1974 (19 U.S.C. 2251 et seq., 19 U.S.C. 2411 et seq.).

- (a) For statistical reporting number 9802.00.6000:
- (i) The total value of the article less the value of the foreign processing; and
  - (ii) The dutiable value, i.e., the value of the foreign processing, respectively.

2. For articles for which duty free treatment is claimed under U.S. note 2(b) to subchapter II of this chapter, the citation to be used in statistical reporting shall be the 10-digit statistical reporting number provided in this subchapter followed by the reporting number of the provision in chapters 1 through 97 which would ordinarily apply to the articles. The unit of quantity reported hereunder for such articles shall be the same as the unit of quantity for the provision from chapters 1 through 97.
- For articles admitted under statistical reporting numbers 9802.00.5010 and 9802.00.8040 two values shall be reported--the first following the first statistical reporting number of the statistical citation (i.e., 9802.00.5010 or 9802.00.8040) and the second following the statistical reporting number of the provision in chapters 1-97 which would ordinarily apply:

- (b) For statistical reporting number 9802.00.8040:
- (i) The value of the U.S. fabricated components or materials; and
  - (ii) The dutiable value, i.e., the total value of the articles less the value of the U.S. fabricated components, respectively.
3. For articles admitted under statistical reporting number 9802.00.9000 the citation to be used in statistical reporting shall be 9802.00.9000 followed by the statistical reporting number of the provision in chapters 1-97 which would ordinarily apply to the articles. The unit of quantity reported hereunder for such articles shall be the same as the unit of quantity for the provision from chapters 1 to 97. In addition, two values shall be reported--the first following statistical reporting number 9802.00.9000 and the second following the statistical reporting number from chapters 1-97, as follows:
- (a) The value of the products of the United States assembled into the imported articles; and
- (b) The total value of the articles less the value of the products of the United States assembled into the imported articles, respectively.

  - (a) Substantial containers or holders which are subject to tariff treatment as imported articles and are:
    - (i) Imported empty and not within the purview of a provision which specifically exempts them from duty; or

but the term does not include materials or supplies, nor does it include ordinary equipment for use in building construction or maintenance or for use in supporting activities of the institution such as its administrative offices or its eating or religious facilities.

- (b) An institution desiring to enter an article under subheading 9810.00.60 shall make application therefor to the Secretary of the Treasury including therein (in addition to such other information as may be prescribed by regulation) a description of the article, the purposes for which the instrument or apparatus is intended to be used, the basis for the institution's belief that no instrument or apparatus of equivalent scientific value for such purposes is being manufactured in the United States, and a statement that either the institution has already placed a bona fide order for the instrument or apparatus or has a firm intention, in the event of favorable action on its application, to place such an order on or before the final day specified in paragraph (d) of this U.S. note for the placing of an order. If, at any time while its application is under consideration by the Secretary of Commerce or by the Court of Appeals for the Federal Circuit on appeal from a finding by him, an institution cancels an order for the instrument or apparatus to which its application relates or ceases to have a firm intention to order such instrument or apparatus, it shall promptly so notify the Secretary of Commerce or such Court, as the case may be.
- (c) Upon receipt of the application, the Secretary of Commerce shall, by publication in the Federal Register, afford interested persons and other Government agencies reasonable opportunity to present their views with respect to the question whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. After considering any views presented pursuant to this paragraph, including any written advice from the Secretary of Health and Human Services, the Secretary of Commerce shall determine whether an instrument or apparatus of equivalent scientific value to such article, for the purposes for which the instrument or apparatus is intended to be used, is being manufactured in the United States. Each finding by the Secretary of Commerce under this paragraph shall be promptly reported to the Secretary of the Treasury and to the applicant institution. - (d) Subheading 9810.00.60 shall not apply with respect to any instrument or apparatus unless a bona fide order therefor has been placed, by the institution making the application under this U.S. note, on or before the sixtieth day following the day on which a finding of the Secretary of Commerce favorable to the institution has become final and conclusive.
- (e) Within 20 days after the publication in the Federal Register of a finding by the Secretary of Commerce under paragraph (c) of this U.S. note, an appeal may be taken from said finding only upon a question or questions of law and only to the United States Court of Appeals for the Federal Circuit:
- (i) by the institution which made the application under paragraph (b) of this U.S. note;

- Any appeal under this paragraph shall receive a preference over all other matters before the Court and shall be heard and determined as expeditiously as the Court considers to be practicable. The judgement of the Court shall be final.

#### ARTICLES ADMITTED TEMPORARILY FREE OF DUTY UNDER BOND

XXII  
98-37

#### U.S. Notes

1. (a) The articles described in the provisions of this subchapter, when not imported for sale or for sale on approval, may be admitted into the United States without the payment of duty, under bond for their exportation within 1 year from the date of importation, which period, in the discretion of the Secretary of the Treasury, may be extended, upon application, for one or more further periods which, when added to the initial 1 year, shall not exceed a total of 3 years, except that (1) articles imported under heading 9813.00.75 shall be admitted under bond for their exportation within 6 months from the date of importation and such a 6-month period shall not be extended, and (2) in the case of professional equipment and tools of trade admitted into the United States under heading 9813.00.50 which have been seized (other than by seizure made at the suit of private persons), the requirement of reexportation shall be suspended for the duration of the seizure. For purposes of this note, an aircraft engine or propeller, or any part or accessory of either, imported under heading 9813.00.05, which is removed physically from the United States as part of an aircraft departing from the United States in international traffic shall be treated as exported.
- (b) For articles admitted into the United States under heading 9813.00.50, entry shall be made by the nonresident importing the articles or by an organization represented by the nonresident which is established under the laws of a foreign country or has its principal place of business in a foreign country.
- (c) For purposes of this subchapter, if an article imported into the United States under heading 9813.00.05 is withdrawn for exportation to the territory of Canada or of Mexico, the duty assessed shall be waived or reduced in an amount that does not exceed the lesser of the total amount of duty payable on the article that would have been payable on importation under chapters 1 through 97, inclusive, of the Harmonized Tariff Schedule of the United States or the total amount of customs duties paid to Canada or to Mexico on the exported article, unless such article is covered by section 203(a)(1) through 203(a)(8), inclusive, of the NAFTA Implementation Act. The amount of duties or refunds calculated on such articles pursuant to this note shall be adjusted to take into account any subsequent claim for preferential tariff treatment made to another NAFTA country. This note shall apply to shipments to Canada on or after January 1, 1996, and to Mexico on or after January 1, 2001.
2. Merchandise may be admitted into the United States under heading 9813.00.05 only on condition that:
  - (a) Such merchandise will not be processed into an article manufactured or produced in the United States if such article is:
    - (i) Alcohol, distilled spirits, wine, beer or any dilution or mixture of any or all of the foregoing;
    - (ii) A perfume or other commodity containing ethyl alcohol (whether or not such alcohol is denatured); or
    - (iii) A product of wheat; and
  - (b) If any processing of such merchandise results in an article (other than an article described in (a) of this U.S. note) manufactured or produced in the United States:
    - (i) A complete accounting will be made to the Customs Service for all articles, wastes and irrecoverable losses resulting from such processing; and
    - (ii) All articles and valuable wastes resulting from such processing will be exported or destroyed under customs supervision within the bonded period; except that in lieu of the exportation or destruction of valuable wastes, duties may be tendered on such wastes at rates of duties in effect for such wastes at the time of importation.
3. Upon satisfactory proof that any article admitted under heading 9813.00.30 has been destroyed because of its use for any purpose provided for therein, the obligation under the bond to export such article shall be treated as satisfied.
4. District Directors of Customs may defer the exaction of a bond for not to exceed 90 days after the date of importation for vehicles and craft entered under heading 9813.00.35 to take part in races or other specific contests for other than money purses; but unless any such vehicle or craft is exported or the bond is given within the period of such deferment, such vehicle or craft shall be subject to forfeiture.
5. Articles may be admitted under heading 9813.00.75 only on condition that the Secretary of the Treasury shall have found that the foreign country from which the articles were imported allows, or will allow, substantially reciprocal privileges in respect of similar imports to such country from the United States; and if the Secretary finds that a foreign country has discontinued, or will discontinue, the allowance of such privileges, the privileges of heading 9813.00.75 shall not apply thereafter in respect of imports from such foreign country.

#### Statistical Note

1. For any article entered under statistical reporting number 9813.00.0520, the proper citation for statistical reporting shall consist of 9813.00.0520 followed by the statistical reporting number for the provision which would have applied if such article were not classifiable in this subchapter and the unit of quantity to be reported is the unit shown for such article in such other provision.

1. The duties provided for in this subchapter are cumulative duties which apply in addition to the duties, if any, otherwise imposed on the articles involved. The duties provided for in this subchapter apply only with respect to articles entered during the period specified in the last column.
2. For purposes of heading 9901.00.50, the phrase "is suitable for any such uses" does not include ethyl alcohol (provided for in subheadings 2207.10.60 and 2207.20) that is certified by the importer of record to the satisfaction of the Commissioner of Customs (hereinafter in this note referred to as the "Commissioner") to be ethyl alcohol or a mixture containing such ethyl alcohol imported for uses other than liquid motor fuel use or use in producing liquid motor fuel related mixtures. If the importer of record certifies nonliquid motor fuel use for purposes of establishing actual use or suitability under heading 9901.00.50, the Commissioner shall not liquidate the entry of ethyl alcohol until he is satisfied that the ethyl alcohol has in fact not been used for liquid motor fuel use or use in producing liquid motor fuel related mixtures. If he is not satisfied within a reasonable period of time not less than 18 months from the date of entry, then the duties provided for in heading 9901.00.50 shall be payable retroactive to the date of entry. Such duties shall also become payable, retroactive to the date of entry, immediately upon the diversion to liquid motor fuel use of any ethyl alcohol or ethyl alcohol mixture certified upon entry as having been imported for nonliquid motor fuel use.

### SUBCHAPTER III

#### TEMPORARY MODIFICATIONS ESTABLISHED PURSUANT TO TRADE LEGISLATION

XXII  
99-19

#### U.S. Notes

1. This subchapter contains the temporary modifications of the provisions in the tariff schedule established pursuant to trade legislation. Unless otherwise stated, the modified provisions are effective until suspended or terminated. Unless the context requires otherwise, any article described in the provisions of this subchapter, for which rates of duty are herein provided, if entered during the period specified, is subject to duty at the rate set forth herein in lieu of the rate provided therefor in chapters 1 to 98.

[U.S. note 2 deleted]

3. For the purposes of subheadings 9903.41.05 and 9903.41.10, the duties provided for in this subchapter are cumulative duties which apply in addition to the duties otherwise imposed on the articles involved.

[U.S. note 4 deleted]

5. The following provisions have been suspended pursuant to executive action: subheadings 9903.04.05 and 9903.04.10, headings 9903.04.15 through 9903.04.55, inclusive, subheading 9903.23.10, subheading 9903.23.14, subheading 9903.23.18, subheading 9903.41.25, and subheadings 9903.41.35 through 9903.41.45, inclusive.
6. Import quotas for upland cotton.--The provisions of this note apply beginning August 1, 1991, to imports of upland cotton as provided in subheadings 9903.52.00 through 9903.52.20.

#### (a) Special Upland Cotton Import Quota Based on Northern Europe Prices.--

- (i) Whenever the Secretary of Agriculture determines and announces that for any consecutive 10-week period, the Friday through Thursday average price quotation for the lowest-priced United States growth, as quoted for Middling one and three-thirty-seconds inch cotton, delivered C.I.F. Northern Europe, adjusted for the value of any certificates issued under section 103B(a)(5)(E) of the Agricultural Act of 1949, as amended, exceeds the Friday through Thursday average price of the five lowest-priced growths of upland cotton, as quoted for Middling one and three-thirty-seconds inch cotton, delivered C.I.F. Northern Europe (Northern Europe price) by more than 1.25 cents per pound, there shall be in effect, as of the effective date of such announcement, a special import quota equal to 1 week's consumption of upland cotton by domestic mills at the seasonally adjusted average rate of the most recent 3 months for which data are available. During the period when both a price quotation for cotton for shipment no later than August/September of the current calendar year (current shipment price) and a price quotation for cotton for shipment no earlier than October/November of the current calendar year (forward shipment price) are available for such growths, the current shipment price shall be used. An announcement under this clause shall be known as a Special Cotton Import Quota Announcement.
- (ii) Application.--The quota shall apply to upland cotton purchased not later than 90 days after the effective date of the Secretary's announcement under clause (i) and entered into the United States not later than 180 days after such date.
- (iii) Overlap.--A quota period may be established that overlaps any existing quota period if required by clause (i), except that a quota period may not be established under this paragraph if a quota period has been established under paragraph (b) of this note.
- (iv) The Secretary of Agriculture shall inform the Secretary of the Treasury of the establishment of any special import quota under this paragraph and shall file a notice of such quota with the Federal Register.

#### (b) Upland Cotton Import Quota Based on Spot Market Prices.--

- (i) Whenever the Secretary of Agriculture determines and announces that the average price of the base quality of upland cotton, as determined by the Secretary, in the designated spot markets for a month exceeded 130 percent of the average price of such quality of cotton in such markets for the preceding 36 months, there shall immediately be in effect a limited global import quota equal to 21 days of domestic mill consumption of upland cotton at the seasonally adjusted average rate of the most recent 3 months for which data are available. An announcement under this clause shall be known as a Limited Global Cotton Import Quota Announcement.
- (ii) Quantity if prior quota.--If a quota has been established under this paragraph during the preceding 12 months, the quantity of the quota next established under this paragraph shall be the smaller of 21 days of domestic mill consumption, calculated as set forth in clause (i), or the quantity required to increase the supply to 130 percent of the demand.

(iii) Definitions.--As used in clause (ii):

(A) Supply.--The term "supply" means, using the latest official data of the Bureau of the Census, the Department of Agriculture, and the Department of the Treasury--

(I) the carry-over of upland cotton at the beginning of the marketing year (adjusted to 480-pound bales) in which the special quota is established; plus

(II) production of the current crop; plus

(III) imports to the latest date available during the marketing year.

(B) Demand.--The term "demand" means--

(I) the average seasonally adjusted annual rate of domestic mill consumption in the most recent 3 months for which data are available; plus

(II) the larger of--

(aa) average exports of upland cotton during the preceding 6 marketing years; or

(bb) cumulative exports of upland cotton plus outstanding export sales for the marketing year in which the special quota is established.

(iv) Quota entry period.--When a quota is established under this paragraph, cotton may be entered under the quota during the 90-day period beginning on the effective date of the Secretary of Agriculture's announcement of such quota.

(v) No overlap.--Notwithstanding clauses (i) through (iv), a quota period may not be established under this paragraph that overlaps an existing quota period established under this paragraph or a quota period established under paragraph (a) of this note.

(vi) The Secretary of Agriculture shall inform the Secretary of the Treasury of the establishment of any import quota under this paragraph and shall file a notice of such quota with the Federal Register.

### SUBCHAPTER IV

#### SAFEGUARD MEASURES PURSUANT TO THE AGREEMENT ON AGRICULTURE AND ADDITIONAL IMPORT RESTRICTIONS ESTABLISHED PURSUANT TO SECTION 22 OF THE AGRICULTURAL ADJUSTMENT ACT, AS AMENDED

XXII  
99-27

#### U.S. Notes

1. This subchapter contains safeguard measures established pursuant to Article 5 of the Agreement on Agriculture (as approved by section 101 of the Uruguay Round Agreements Act), which allows the imposition of additional duties based upon either the value or the quantity of goods imported into the United States for certain agricultural products. In addition, the subchapter contains provisions which may be proclaimed pursuant to section 22 of the Agricultural Adjustment Act, as amended (7 U.S.C. 624). All of the duties provided for in this subchapter are cumulative duties which apply in addition to the duties, if any, otherwise imposed in the tariff schedule on the goods described herein. Unless otherwise stated, the duties or limitations provided for in this subchapter apply until suspended or terminated. Goods of Canada (except wheat) <sup>1/</sup> or Mexico imported into the United States shall not be subject to any of the provisions, duties or limitations of this subchapter.
2. The provisions imposing safeguard duties based upon value set forth in this subchapter shall apply to all goods described herein (other than sheep meat, which is not subject to safeguard duties based upon value) except during periods announced in the Federal Register by the Secretary of Agriculture in consultation with the United States Trade Representative as the effective periods of the provisions imposing safeguard duties based upon quantity with respect to such goods, during which period the safeguard duties based upon value shall be deemed suspended and only the safeguard duties based upon quantity shall apply to such goods. Unless the Secretary of Agriculture invokes safeguard duties based upon quantity for specified goods and so announces in the Federal Register (as provided in the first sentence of this note), the tariff provisions providing for such duties shall be deemed suspended and shall not apply to the goods described herein. No safeguard duties based upon quantity shall apply to goods en route on the basis of a contract settled before the effective date of such measures specified in a notice issued by the Secretary of Agriculture.
3. For the purposes of this subchapter, imports of peanuts in the shell shall be charged against the quantities in this note on the basis of 75 kilograms for each 100 kilograms of peanuts in the shell.

<sup>1/</sup> The phrase "(except wheat)" shall be deleted from U.S. Note 1 to this subchapter effective on September 12, 1995.

### SUBCHAPTER VI

#### TEMPORARY MODIFICATIONS ESTABLISHED PURSUANT TO THE NORTH AMERICAN FREE TRADE AGREEMENT

XXII  
99-83

#### U.S. Notes

1. This subchapter contains temporary modifications of the provisions of the tariff schedule established pursuant to the North American Free Trade Agreement. Goods of Mexico, entered under the terms of general note 12 to the tariff schedule, and described in the provisions of this subchapter, for which a rate of duty followed by the symbol "(MX)" is herein provided, are subject to duty at the rate set forth in this subchapter in lieu of the rate provided therefor in chapters 1 through 97. Notwithstanding quota provisions provided for elsewhere in the tariff schedule, originating goods of Mexico shall be permitted to enter the United States to the extent allowable in the provisions of this subchapter. Furthermore, any quota quantity provided for Mexico on goods described in this subchapter (except brooms, other than whiskbrooms, wholly or in part of broomcorn) shall not be counted toward any quota or tariff-rate quota provided for such good elsewhere in the tariff schedule. No other preferential tariff treatment provided for under general notes 4 through 11, inclusive, to the tariff schedule shall be afforded to goods described in the provisions of this subchapter. Whenever the pertinent special rate or rates in provisions of chapters 1 through 97, inclusive, of the tariff schedule, shall be reduced to "free" for all of the goods described in a provision of this subchapter and entered from Mexico under the terms of general note 12 to the tariff schedule, such provision shall be deleted from this subchapter, and the appropriate subheading for the good in chapters 1 through 97 shall be modified by deleting from the Rates of Duty 1 Special subcolumn the symbol "MX" in parentheses and the phrase preceding such symbol and by inserting in a "Free" rate of duty in such subcolumn the symbol "MX", alphabetical order. Unless otherwise provided, the provisions and notes of this subchapter are effective as to such goods of Mexico entered, under general note 12 to the tariff schedule, through the close of December 31, 2008, at the close of which date this subchapter shall be deleted from the tariff schedule and shall cease to apply to any goods entered after that date.
2. For purposes of this subchapter, the rate of duty followed by the symbol "(MX)" provided for in subheadings 9906.04.01 through 9906.22.05, inclusive, in subheadings 9906.23.01, 9906.23.02, and 9906.23.03 and in subheadings 9906.52.01 through 9906.52.07, inclusive, shall apply only to qualifying goods of Mexico.
3. Whenever goods are classifiable under a provision for which the temporary modification of the applicable North American Free Trade Agreement rate of duty is provided for in a subheading in this subchapter, the reporting number, in the absence of specific instructions to the contrary, shall be the appropriate statistical reporting number for the basic provision (the appropriate provision for classification purposes in chapters 1 through 97) preceded by the subheading number of this subchapter. For statistical purposes, both the basic provision statistical reporting number and the applicable subheading number of this subchapter shall be collected by the United States Bureau of Census.

## ANNEX A

### Schedule C - Classification of Country and Territory Designations for U.S. Foreign Trade Statistics

Schedule C contains the country and territory designations for use in compiling the U.S. export and import statistics. These designations should be shown in all cases where statistical information is required. The first part of this schedule contains the country designations arranged in numeric order by continent and listed in sequence within each continent generally from north to south and west to east. Abbreviated country designations, which are used in lieu of complete country names in some foreign trade reports, are also shown. The second part contains a listing in alphabetical arrangement of the countries, territories, etc., with their numeric codes.

The names of the entities listed are generally the conventional spellings as approved by the U.S. Board on Geographic Names.

Revisions to Schedule C will be announced in the form of "special notices" to data users, as Public Bulletins to Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States, and as supplements to the Harmonized Tariff Schedule of the United States Annotated for statistical purposes (HTS). HTS also includes a list of International Standard (ISO) Country Codes to be used by importers to report country of origin.

## ANNEX C

### Schedule D - Classification of U.S. Customs Districts and Ports for U.S. Foreign Trade Statistics

Schedule D provides a list of U.S. Customs districts, the ports included under each district, and the corresponding numeric codes used in compiling the U.S. foreign trade statistics. The Schedule contains a code for each official U.S. Customs district and port, with some additional codes provided to meet specific compiling requirements of the foreign trade statistics program. The headquarters port for each district is underlined. Some Customs ports show two codes. Exporters and importers may report either code. The first part of this schedule contains the Customs districts and ports arranged in numeric order by code, while the second part lists the ports in alphabetic order.

Revisions to Schedule D will be announced in the form of "special notices" to data users, as Public Bulletins to Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States, and as supplements to the Harmonized Tariff Schedule of the United States Annotated for Statistical Purposes.
