BACKGROUND: As requested by the Committee, the investigation will cover unwrought (e.g., primary and secondary) and wrought (e.g., semi-finished) aluminum products. The Commission's report will provide, to the extent that information is available:

- An overview of the aluminum industry in the United States and other major global producing and exporting countries, including production, production capacity, capacity utilization, employment, wages, inventories, supply chains, domestic demand, and exports;
- Information on recent trade trends and developments in the global market for aluminum, including U.S. and other major foreign producer imports and exports, and trade flows through third countries for further processing and subsequent exports;
- A comparison of the competitive strengths and weaknesses of aluminum production and exports in the United States and other major producing and exporting countries, including such factors as producer revenue and production costs, industry structure, input prices and availability, energy costs and sources, production technology, product innovation, exchange rates, and pricing, as well as government policies and programs that directly or indirectly affect aluminum production and exporting in these countries;
- In countries where unwrought aluminum capacity has significantly increased, identify factors driving those capacity and related production changes; and
- A qualitative and, to the extent possible, quantitative assessment of the impact of government policies and programs in major foreign aluminum producing and exporting countries on their aluminum production, exports, consumption, and domestic prices, as well as on the U.S. aluminum industry and on aluminum markets worldwide.

As requested, the report will focus primarily on the 2011-2015 time period, but examine longer term trends since 2001 when appropriate.

The Committee asked that the Commission transmit its report not later than 16 months after receipt of the request, and the Commission will transmit its report by June 26, 2017.
