**AGENCY:** U.S. International Trade Commission.

**SUMMARY:** Notice is hereby given that the U.S. International Trade Commission has determined not to review the presiding administrative law judge's ("ALJ") initial determination ("ID") (Order No. 9) in the above-referenced investigation finding MicroJet Technology Co., Ltd. ("Microjet") in default.

**SUPPLEMENTARY INFORMATION:** The Commission instituted this investigation on June 25, 2010, based on a complaint filed by Hewlett-Packard Company of Palo Alto, California and Hewlett-Packard Development Company, L.P. of Houston, Texas (collectively, "HP"). *75 Fed. Reg.* 36442 (June 25, 2010). The complaint alleged violations of section 337 of the Tariff Act of 1930 (19 U.S.C. § 1337) in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain inkjet cartridges with printheads and components thereof by reason of infringement of United States Patent Nos. 6,234,598; 6,309,053; 6,398,347; 6,412,917; 6,481,817; and 6,402,279. The complaint named seven respondents, including Microjet.

On September 3, 2010, the ALJ issued Order No. 8 ordering Microjet to show cause why it should not be found in default for failing to respond to the complaint and notice of investigation. An informal letter was received from Microjet, but was not served on the other parties to this investigation. The ALJ found Microjet's letter to be an improper *ex parte* communication in violation of his ground rules and he declined to consider the letter on the merits.

On September 20, 2010, the ALJ issued the subject ID finding Microjet in default. No petitions for review of this ID were filed.

The Commission has determined not to review the ID.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. § 1337), and in section 210.42 of the Commission's Rules of Practice and Procedure (19 C.F.R. § 210.42).

By order of the Commission.

Secretary to the Commission
