SUPPLEMENTARY INFORMATION:

Scope.-- For purposes of these investigations, Commerce has defined the subject merchandise as "sol gel alumina-based ceramic abrasive grains which are comprised of minimum 94% aluminum oxide (Al₂O₃), and may contain other compounds, including, but not limited to, titanium dioxide, silicon dioxide, calcium oxide, sodium superoxide, ferric oxide, magnesium oxide, di-aluminum magnesium tetroxide, lanthanum oxide, lanthanum magnesium oxide, zirconium dioxide, or zirconium carbonate. Grain sizes of sol gel alumina-based ceramic

abrasive grains range from 0.85 mm to 0.0395 mm (which corresponds to American National Standards Institute (ANSI) grit sizes from 20 to 280).

Shapes include but are not limited to angular, sharp, extra sharp, blocky, splintery, round stripped, triangular or shaped like extruded rods or stars.

Ceramic abrasive grains have unique crystalline structures that impart certain advanced properties, such as their extreme hardness and strength ranging between 16 and 22 gigapascals by the Vickers Diamond Indent Method, high melting point (2050°C), and a single- or multi-phase microstructure, which may contain multiple phases, having crystalline sizes ranging from 0.05 to 30 µm. These ceramic abrasive grains include but are not limited to blue, white, white-translucent, or off-white opaque colors.

Sol gel alumina-based ceramic abrasive grains are covered by the scope of these investigations, whether or not incorporated into downstream articles, including but not limited to, abrasive papers, grinding wheels, grinding cylinders, and grinding discs. When incorporated into downstream articles, only the sol gel alumina-based ceramic abrasive grains component of such articles is covered by the product scope, and not the downstream product as a whole.”

Background.--The final phase of these investigations is being scheduled pursuant to sections 705(b) and 731(b) of the Tariff Act of 1930 (19 U.S.C. 1671d(b) and 1673d(b)), as a result of an affirmative preliminary determination by Commerce that certain benefits which constitute subsidies within the meaning of § 703 of the Act (19 U.S.C. 1671b) are being provided to manufacturers, producers, or exporters in China of sol gel alumina-based ceramic abrasive grains. The investigations were requested in petitions filed on November 25, 2024, by Saint-Gobain Ceramics & Plastics, Inc., Malvern, Pennsylvania.

For further information concerning the conduct of this phase of the investigations, hearing procedures, and rules of general application, consult the Commission’s Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A and C (19 CFR part 207).

Participation in the investigations and public service list.--Persons, including industrial users of the subject merchandise and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the final phase of these investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission’s rules, no later than 21 days prior to the hearing date specified in this notice. Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, <https://edis.usitc.gov>). Authorized applicants must represent interested parties, as defined by 19 U.S.C. 1677(9), who are parties to the investigations. A party granted access to BPI in the preliminary phase of the investigations need not reapply for such access. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Staff report.--The prehearing staff report in the final phase of these investigations will be placed in the nonpublic record on July 24, 2025, and a public version will be issued thereafter, pursuant to § 207.22 of the Commission's rules.
