Note: Columns and Rows numbers relate to data entry fields only. D-GRIDs does not work with rows containing calculated fields. In relation to the table on subject purchases by importer in the U.S. producers' questionnaire (PRO II-13), the data begins on the 2<sup>nd</sup> column and any text information from the first column (importer of record) within MS Word has to be included in the D-GRIDs interaction with that data table (thus 4 columns not just the 3 relating to the numeric data) but will *not* be overwritten when data are pushed into Word using the D-GRIDs tool.

Legend
PRO = U.S. producers' questionnaire
IMP = U.S. importers' questionnaire
PUR = U.S. purchasers' questionnaire
FOR = Foreign producers' /exporters' questionnaire

The **D-GRIDs tool** is a custom MS Excel application that allows USITC questionnaire respondents (and/or their APO counsel) to extract numeric data from the standard USITC questionnaire forms in MS Word as well as populate numeric data into the standard USITC questionnaire in MS Word. This document provides the inputs needed for the D-GRIDs tool in relation to the above referenced antidumping and/or countervailing duty investigation(s).
