Note: In relation to the tables on purchases of imports from subject sources by importer in the U.S. producers' questionnaire (PRO II-14), the data begins on the 3rd column of data entry fields and any text information from the first two columns (importer of record, subject sources) within MS Word has to be included in the D-GRIDS interaction with that data table (thus 7 columns not just the 5 relating to the numeric data) but the text information in the first two columns will *not* be overwritten when data are pushed into Word using the D-GRIDs tool.

The **D-GRIDs tool** is a custom MS Excel application that allows USITC questionnaire respondents (and/or their APO counsel) to extract numeric data from the standard USITC questionnaire forms in MS Word as well as populate numeric data into the standard USITC questionnaire in MS Word. This document provides the inputs needed for the D-GRIDs tool in relation to the above referenced antidumping and/or countervailing duty investigation(s).
