

NOTE

The February 1986 report concludes investigation No. 332-153,
Monthly Report on Selected Steel Industry Data.

Preface

On February 16, 1983, at the request of the Subcommittee on Trade, Committee on Ways and Means, U.S. House of Representatives, and in accordance with the provisions of section 332(b) of the Tariff Act of 1930 (19 U.S.C. 1332(b)), the United States International Trade Commission instituted investigation No. 332-153, Monthly Report on Selected Steel Industry Data. The purpose of the report is to gather and compile data on the U.S. steel industry from public sources and report such data to the subcommittee on a monthly basis through December 1985.

On October 21, 1982, the Arrangement Concerning Trade in Certain Steel Products between the European Coal and Steel Community and the United States (the Arrangement) became effective. The text of the Arrangement is published in the Federal Register of October 29, 1982 (47 F.R. 49060). Under the terms of the Arrangement, exports of certain steel products from the European Community to the United States are to be limited to a percentage of apparent U.S. consumption from November 1, 1982, through December 31, 1985. The 15 steel products subject to the Arrangement (for which a concordance between shipment, import, and export data was developed), the 10 product categories into which they are grouped, and the percentages of apparent consumption to which exports are to be limited are as follows:

1. Hot-rolled sheet and strip (6.81 percent):
Hot-rolled carbon sheet and strip
Hot-rolled alloy sheet and strip
2. Cold-rolled sheet (5.11 percent):
Cold-rolled carbon sheet
Cold-rolled alloy sheet
3. Plate (5.36 percent):
Carbon plate
Alloy plate
4. Structural (9.91 percent):
Carbon structural shapes
Alloy structural shapes
5. Wire rod (4.29 percent):
Carbon wire rod
6. Hot-rolled bar (2.38 percent):
Hot-rolled carbon bar
Hot-rolled alloy bar
7. Coated sheet (3.27 percent):
Carbon and alloy coated sheet and terne plate and sheet
8. Tin plate (2.20 percent):
Tin plate
9. Rails (0.90 percent):
Carbon and alloy rails
10. Sheet piling (21.85 percent):
Carbon and alloy sheet piling.

This monthly report includes data on steel shipments, imports, exports, apparent consumption, import market share, and selected prices available for the 15 products subject to the Arrangement on monthly, quarterly and annual bases. In addition, information on total U.S. steel production, shipments, employment, imports, exports, apparent consumption, import market share, and average prices is provided so that developments regarding products subject to the Arrangement can be assessed in a broader context.

Notes on product coverage and methodology

The following points regarding product coverage should be noted. First, the Tariff Schedules of the United States Annotated (TSUSA) classifies hot- and cold-rolled alloy strip in the same TSUSA item; import data shown for hot rolled alloy sheet and strip (tables 8 and 9) are, therefore, most likely overstated. Second, certain semifinished products classified in the TSUSA as plate have been excluded from the Arrangement; since the TSUSA does not separately identify these semifinished products, import data shown for carbon plate (tables 14 and 15) and alloy plate (tables 16 and 17) may be overstated. Finally, the reclassification of carbon plate over 6 inches in thickness (TSUS item 607.6620) as a semifinished product by the American Iron & Steel Institute (ASI), effective March 1984, is not reflected in tables 14 and 15. Imports of this item totalled 116,000 net tons in 1984 (\$23.8 million). The effect of overstatement in these three product areas on the aggregate import data for the 15 products subject to the Arrangement (tables 4 and 5) is minimal. Imports of hot- and cold-rolled alloy strip represent a small portion of total imports; moreover, inquiries made by the Commission staff to Customs and industry sources indicate that imports of semifinished products classified as plate under the TSUSA probably represent a small percentage of total plate imports.

Monthly and quarterly data may not add to quarterly and annual totals, respectively, owing to rounding and data revisions. The term "negligible" in this report refers to values less than \$500, quantities less than 500 short tons (table 3), or quantities less than 0.5 short ton (tables 4-35). Unit values are calculated using unrounded data. Imports of steel mill products in tables 2 and 3 are based on a definition used by the AISI. To maintain consistency, however, the deletion by the AISI of TSUSA item 642.3560 in 1983 is not reflected. Imports of this item totaled 382 tons in 1981 (\$295,000), 1,162 tons in 1982 (\$360,000), 620 tons in 1983 (\$426,000), and 734 tons in 1984 (\$511,000).

Import values are customs value.

¹/ Mill base list prices; transaction prices are likely to differ. Prices shown for December 1985, most recent month in which price changes occurred, and October 1982.

²/ Prices based on weighted index of steel bar, shapes, plate, wire, rail, black pipe, and hot- and cold-rolled sheet and strip.

³/ Price unchanged since October 1982.

⁴/ Tin plate prices are quoted by the base box. These prices are converted to a per ton basis assuming a base box weight of 70 pounds.
