SUPPLEMENTARY INFORMATION:

Scope.-- For purposes of these investigations, Commerce has defined the subject merchandise as "The merchandise subject to this investigation is temporary steel fencing. Temporary steel fencing consists of temporary steel fence panels and temporary steel fence stands. Temporary steel fence panels, when assembled with temporary steel fence stands or other types of stands outside of the scope, with each other, or with posts, create a free-standing fence. Temporary steel fence panels are covered by the scope regardless of whether they attach to a stand or the type of stand to which they connect.

Temporary steel fence panels have a welded frame of steel tubing and an interior consisting of chain link, steel wire mesh, or other steel materials that are not more than ten millimeters in actual diameter or width. The steel tubing may surround all edges of the temporary steel fence panel or only be attached along two parallel sides of the panel. All temporary steel fence panels with at least two framed sides are covered by the scope, regardless of the number of edges framed with steel tubing.

Temporary steel fence panels are typically between 10 and 12 feet long and six to eight feet high, though all temporary steel fence panels are covered by the scope regardless of dimension or weight as long as a single panel meets each of the three following criteria: (1) it has over seven and a half square feet in actual surface area; (2) it weighs more than four pounds; and (3) it weighs less than 1.92 pounds per square foot. Temporary steel fence panels may be square, rectangular, or have rounded edges, and may or may not have gates, doors, wheels, or barbed wire or other features, though all temporary steel fence panels are covered by the scope regardless of shape and other features. Temporary steel fence panels may have one or more horizontal, vertical, or diagonal reinforcement tubes made of steel welded to the inside frame, though all temporary steel fence panels are covered by the scope regardless of the existence, number, or type of reinforcement tubes attached to the panel. Temporary steel fence panels may have extensions, pins, tubes, or holes at the bottom of the panel, but all temporary steel fence panels are covered regardless of the existence of such features.

Steel fence stands are shapes made of steel that stand flat on the ground and have one or two open tubes or solid pins into which temporary steel fence panels are inserted to stand erect. The steel fence stand may be made of welded steel tubing or may be a flat steel plate with one or two tubes or pins welded onto the plate for connecting the panels.

Temporary steel fencing is covered by the scope regardless of coating, painting, or other finish. Both temporary steel fence panels and temporary steel fence stands are covered by the scope, whether imported assembled or unassembled, and whether imported together or separately.

Subject merchandise includes material matching the above description that has been finished, assembled, or packaged in a third country, including by coating, painting, assembling, attaching to, or packaging with another product, or any other finishing, assembly, or packaging operation that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the temporary steel fencing.

Temporary steel fencing is included in the scope of this investigation whether or not imported attached to, or in conjunction with, other parts and accessories such as posts, hooks, rings, brackets, couplers, clips, connectors, handles, brackets, or latches. If temporary steel fencing is imported attached to, or in conjunction with, such non-subject merchandise, only the temporary steel fencing is included in the scope.

Excluded from the scope of this investigation are decorative steel fence panels. Decorative steel fence panels are steel fence panels that have all of the following characteristics: (i) the panel's long ends are no more than 48 inches; (ii) the panel's short ends are no more than 38 inches; (iii) the panel weighs 7 pounds or less; (iv) the panel is framed on all sides with steel tubing no wider than 10 mm; and (v) the panel's the interior contains a decorative pattern (meaning a pattern other than square, rectangular, diamond, or hexagonal meshing) accounting for at least 5 percent of the area within the frame."
