

SUMMARY: On August 1, 2011, the Department of Commerce (the Department) initiated a sunset review of the countervailing duty (CVD) order on certain lined paper products (CLPP) from India pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act). *See Initiation of Five-Year (“Sunset”) Review*, 76 FR 45778 (August 1, 2011) (*Initiation Notice*). On the basis of a notice of intent to participate and an adequate substantive response filed on behalf of domestic interested parties and an inadequate response (in this case, no response) from respondent interested parties, the Department decided to conduct an expedited sunset review of this CVD order pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C). As a result of this review, the Department finds that revocation of the CVD order would be likely to lead to continuation or recurrence of a countervailable subsidy at the level indicated in the “Final Results of Review” section of this notice.

DATES: Effective Date: December 6, 2011.

SUPPLEMENTARY INFORMATION:

Background

On August 1, 2011, the Department initiated a sunset review of the CVD order on LPP from India pursuant to section 751(c) of the Act. *See Initiation Notice*, 76 FR 45778 (August 1, 2011). The Department received a notice of intent to participate on behalf of the Association of American School Paper Suppliers (AASPS) and its individual members—MWV Consumer & Office Products (MWV), Norcom, Inc., and TopFlight, Inc. (collectively, petitioners), within the deadline specified in 19 CFR 351.218(d)(1)(i). The petitioners claimed interested party status under sections 771(9) (F) and 771(9)(C) of the Act, as an association of domestic producers of CLLP and domestic producers of CLPP, respectively.

The Department received a complete substantive response from the petitioners within the 30-day deadline specified in 19 CFR 351.218(d)(3)(i). However, the Department did not receive a substantive response from any respondent interested party to this proceeding. As a result, pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(2), the

Department conducted an expedited review of this order.

However, for measurement purposes, pages with tapered or rounded edges shall be measured at their longest and widest points. Subject lined paper products may be loose, packaged or bound using any binding method (other than case bound through the inclusion of binders board, a spine strip, and cover wrap). Subject merchandise may contain accessory or informational items including but not limited to pockets, tabs, dividers, closure devices, index cards, stencils, protractors, writing implements, reference materials such as mathematical tables, or printed items such as sticker sheets or miniature calendars, if such items are physically incorporated, included with, or attached to the product, cover and/or backing thereto.

Also excluded from the scope of this order are the following trademarked products:

- ZwipesTM: A notebook or notebook organizer made with a blended polyolefin writing surface as the cover and pocket surfaces of the notebook, suitable for writing using a specially-developed permanent marker and erase system (known as a ZwipesTM pen).

³ “Gregg ruling” consists of a single- or double-margin vertical ruling line down the center of the page. For a six-inch by nine-inch stenographic pad, the ruling would be located approximately three inches from the left of the book.

⁴ Products found to be bearing an invalidly licensed or used trademark are not excluded from the scope.

This system allows the marker portion to mark the writing surface with a permanent ink. The eraser portion of the marker dispenses a solvent capable of solubilizing the permanent ink allowing the ink to be removed. The product must bear the valid trademark ZwipesTM.⁵

- FiveStar[®] AdvanceTM: A notebook or notebook organizer bound by a continuous spiral, or helical, wire and with plastic front and rear covers made of a blended polyolefin plastic material joined by 300 denier polyester, coated on the backside with PVC (poly vinyl chloride) coating, and extending the entire length of the spiral or helical wire. The polyolefin plastic covers are of specific thickness; front cover is 0.019 inches (within normal manufacturing tolerances) and rear cover is 0.028 inches (within normal manufacturing tolerances). Integral with the stitching that attaches the polyester spine covering, is captured both ends of a 1” wide elastic fabric band. This band is located 2 3/8” from the top of the front plastic cover and provides pen or pencil storage. Both ends of the spiral wire are cut and then bent backwards to overlap with the previous coil but specifically outside the coil diameter but inside the polyester covering. During construction, the polyester covering is sewn to the front and rear covers face to face (outside to outside) so that when the book is closed, the stitching is concealed from the outside. Both free ends (the ends not sewn to the cover and back) are stitched with a turned edge construction. The flexible polyester material forms a covering over the spiral wire to protect it and provide a comfortable grip on the product. The product must bear the valid trademarks FiveStar[®] AdvanceTM.⁶

- FiveStar FlexTM: A notebook, a notebook organizer, or binder with plastic polyolefin front and rear covers joined by 300 denier polyester spine cover extending the entire length of the spine and bound by a 3-ring plastic fixture. The polyolefin plastic covers are of a specific thickness; front cover is 0.019 inches (within normal manufacturing tolerances) and rear cover is 0.028 inches (within normal manufacturing tolerances). During construction, the polyester covering is sewn to the front cover face to face (outside to outside) so that when the book is closed, the stitching is concealed from the outside. During

Both free ends (the ends not sewn to the cover and back) are stitched with a turned edge construction. Each ring within the fixture is comprised of a flexible strap portion that snaps into a stationary post which forms a closed binding ring. The ring fixture is riveted with six metal rivets and sewn to the back plastic cover and is specifically positioned on the outside back cover. The product must bear the valid trademark FiveStar FlexTM.⁷
