

(7) Plans for assuming liability for damage to the operational and structural integrity of the Uncompahgre Project caused by construction, operation, and/or maintenance of the hydropower development.

(8) Identify the organizational structure planned for the long-term O&M of any proposed hydropower development.

(9) A management plan, including schedules of these activities as applicable, to accomplish activities such as planning; NEPA, NHPA, and ESA compliance; necessary studies; LOPP project development; design, construction, safety plan, and facility testing; and the start of hydropower production.

(10) An estimate of development costs. These costs will include all investment costs such as the cost of studies to determine feasibility; NEPA, NHPA, and ESA compliance; other statutory compliance; design; construction; financing as well as the amortized annual cost of the investment; annual O&M expense for the hydropower development; lease payments to the United States; expenses associated with the Reclamation project; and anticipated return on investment. If there are additional transmission expenses associated with the development of the LOPP project, these expenses must also be included. The proposal must identify proposed methods of financing the LOPP project. The proposal must include an economic analysis that compares the present worth of all benefits and costs of the hydropower development.

#### Selection of Lessee

Reclamation will evaluate proposals received in response to this published Notice. Reclamation may request additional information from individual proposing entities and/or all proposing entities after proposals are submitted, but prior to making a selection of a lessee.

Reclamation will give more favorable consideration to proposals that (1) responsibly develop hydropower; (2) avoid, reduce, or minimize environmental impacts; (3) clearly demonstrate that the offeror is qualified to develop the hydropower facility and provide for long-term O&M; and (4) best share the economic benefits of the hydropower development among parties (including the United States) to the LOPP. A proposal will be deemed unacceptable if it is inconsistent with Uncompahgre Project purposes or interferes with UGWCD's ability to use their water allocation in Taylor Park

Reservoir, as determined by Reclamation.

Reclamation will give preference to those entities that qualify as preference entities, as defined under Proposal Content Guidelines, item (b) of this Notice, provided that they are well qualified to develop and provide for long-term O&M of the hydropower facility. If one applicant is a preference entity and the other is not, and the preference entity's proposed plans are not as well qualified as the non-preference entity's plans, Reclamation will inform the preference entity of the specific reasons why its plans are not as well qualified and afford up to 30 calendar days for the preference entity to render its plans at least as well qualified as the other plans. All other applicants will be informed of this action. If the plans of the preference entity are rendered at least as well qualified within the time allowed, Reclamation will favor the preference entity. If the preference entity's plans are not rendered at least as well qualified within the time allowed, Reclamation will favor the other applicant.

#### Notice and Time Period To Enter Into LOPP

Reclamation will notify, in writing, all entities submitting proposals of Reclamation's decision regarding selection of the potential lessee. The selected potential lessee will be provided a maximum of 24 months from the date of selection to sign the preliminary lease, complete the requirements set forth in the preliminary lease, and to sign the LOPP. The lessee will have a maximum of 1 year from the date of the execution of the LOPP to complete final designs, specifications, etc., and an additional 1 year to begin construction. A maximum of 4 years is allowed, from the date of the preliminary lease to the beginning of construction. Maximum timeframes for construction will be determined by the Regional Director, Upper Colorado Basin—Interior Region 7. The above timeframes will only be extended for just cause resulting from actions and/or circumstances that are beyond the control of Reclamation or the lessee. Just cause and timeframe adjustments will be determined solely by the Regional Director, Upper Colorado Basin—Interior Region 7.

#### Wayne G. Pullan,

*Deputy Regional Director, Upper Colorado Basin—Interior Region 7, Bureau of Reclamation.*

## INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 731-TA-1132 and 1134 (Second Review)]

### Polyethylene Terephthalate Film, Sheet, and Strip from China and the United Arab

#### Emirates; Determinations

On the basis of the record<sup>1</sup> developed in the subject five-year reviews, the United States International Trade Commission ("Commission") determines, pursuant to the Tariff Act of 1930 ("the Act"), that revocation of the antidumping duty orders on polyethylene terephthalate film, sheet, and strip from China and the United Arab Emirates would be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.

#### Background

The Commission instituted these reviews on January 2, 2020 (85 FR 114) and determined on April 6, 2020 that it would conduct expedited reviews (85 FR 42916, July 15, 2020).

The Commission made these determinations pursuant to section 751(c) of the Act (19 U.S.C. 1675(c)). It completed and filed its determinations in these reviews on August 26, 2020. The views of the Commission are contained in USITC Publication 5110 (August 2020), entitled *Polyethylene Terephthalate Film, Sheet, and Strip from China and the United Arab Emirates: Investigation Nos. 731-TA-1132 and 1134 (Second Review)*.

By order of the Commission.

Issued: August 26, 2020.

#### Lisa Barton,

*Secretary to the Commission.*
