Scope of the Order

The scope of the *Order* is PC strand. This merchandise includes, but is not limited to, PC strand produced to the American Society for Testing and Materials (ASTM) A–416 specification, or comparable domestic or foreign specifications. PC strand made from galvanized wire is excluded from the scope if the zinc and/or zinc oxide coating meets or exceeds the 0.40 oz./ft² standard set forth in ASTM–A–475.

The PC strand subject to the *Order* is currently classifiable under subheadings 7312.10.3010 and 7312.10.3012 of the Harmonized Tariff Schedule of the United States (HTSUS). Diamond Sawblades and Parts Thereof From the People's Republic of China: Final Results of Antidumping Duty Changed Circumstances Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On November 20, 2020, the Department of Commerce (Commerce) published the initiation and preliminary results of a changed circumstances review (CCR) of the antidumping duty order on diamond sawblades and parts thereof (diamond sawblades) from the People's Republic of China (China). For these final results, Commerce continues to find that Protech Diamond Tools Inc. (Protech) and Gogo International Inc. (Gogo) are affiliated. Additionally, Commerce continues to find that Protech is eligible to participate in a certification process because Protech has demonstrated that it can identify diamond sawblades that it produced in Canada using non-Chinese cores and Chinese segments.

DATES: Applicable December 31, 2020.

SUPPLEMENTARY INFORMATION:

Background

On February 20, 2020, Commerce found "that diamond sawblades made with Chinese cores and Chinese segments joined in Canada by Protech and then subsequently exported from Canada to the United States are circumventing the antidumping duty order on diamond sawblades from China."¹ In the *Final Determination*, Commerce found that diamond sawblades "assembled or completed in Canada using non-Chinese origin cores and/or non-Chinese origin segments are not subject to this anti-circumvention inquiry." However, because Protech was unable "to identify diamond sawblades produced with non-Chinese origin cores and/or non-Chinese origin segments," Commerce decided not to "implement a certification process for diamond sawblades already suspended," and required "cash deposits on all entries of diamond sawblades produced and exported by Protech in Canada."² We indicated that Protech could, at some future point request reconsideration of Commerce's denial of the certification process in, e.g., a CCR.³

On August 19, 2020, Protech submitted a request for a CCR, in which Protech claimed that it is able to identify and segregate diamond sawblades made with non-Chinese cores and Chinese segments joined in Canada by Protech and then subsequently
