MEMORANDUM ON PROPOSED TARIFF LEGISLATION
of the 109th Congress ¹

[Date approved: July 26, 2005]²

Bill No. and sponsor: H.R. 1699 (Rep. Pascrell); 109th Congress.

Proponent name, location: Association of Food Industries, Inc.
3301 RT 66, Ste. 205, Bldg. C
Neptune, NJ 07753

Retroactive effect: None.

Suggested article description(s) for enactment (including appropriate HTS subheading(s)):

Pepperoncini, prepared or preserved otherwise than by vinegar, not frozen (provided for in subheading 2005.90.55).

Check one:   __ Same as that in bill as introduced
X Different from that in bill as introduced (explain differences in Technical comments section)

Product information, including uses/applications and source(s) of imports:

Pepperoncini peppers are among the many types of peppers classified under the botanical category Capsicum annum and are known as chile peppers rather than sweet peppers. They are also known as Tuscan peppers, sweet Italian peppers, or golden Greek peppers.³ These vegetables are stubby, 2 to 5 inch long, red ripening peppers with a very mild, spicy flavor. Upon ripening, the peppers develop wrinkled skin and taper to a blunt, lobed end.⁴ They have a slightly sweet, medium to medium-hot flavor and a crunchy, salty taste.⁵ The subject goods may be dried (by the sun or by roasting) or may be dry salted or brined. Pepperoncini are commonly used in Italian and Greek cuisine;⁶ they are most often sold pickled to retailers, food service customers, and institutional users.

¹ Industry analyst preparing report: Renee Johnson (202-205-3313); Tariff Affairs contact: Jan Summers (202-205-2605).
² A copy of this memorandum is available at www.usitc.gov/tata/hts/other/rel_doc/bill_reports/index.htm.
Separate data on worldwide production and processing of pepperoncini peppers are not available. For all types of peppers, a reported 23.2 million metric tons (mt) were produced worldwide in 2003. Given the large number of different pepper types, pepperoncini likely accounts for a very small share of this overall total. Likewise, no separate U.S. import data exist for prepared and preserved pepperoncini products. Imports under the four possible tariff classifications totaled $210 million in 2004. The share attributable to pepperoncini products is not known, but likely is small.

**Estimated effect on customs revenue:**

For this analysis, it is assumed that the subject dutiable imports are imported primarily from Italy, Greece, and Spain. These three countries account for about 20 percent of total volume imports under HTS subheading 2005.90.55. Dutiable imports are estimated assuming that all imports from these three countries under statistical reporting number 2005.90.5590 approximate total U.S. pepperoncini imports under this HTS subheading.

</tbody>
</table>

1/ The AVE is the ad valorem equivalent of a specific or compound duty rate expressed as a percent, using the most recent import data available. The rate shown is the “general” or normal trade relations rate. Other preferential rates may apply to eligible products of countries entitled to “special” tariff treatment under negotiated free trade arrangements, the Generalized System of Preferences (GSP), the Caribbean Basin Economic Recovery Act (CBERA), and the Andean Trade Preference Act (ATPA).

2/ Source of estimated dutiable import data: U.S. Government statistics for 2004 with small growth factor for “other” peppers from the 3 countries named above under HTS statistical reporting number 2005.90.5590, which does not include sweet bell-type peppers of 2005.90.5510.

3/ Assumes that tariffs are suspended on imported product for the calendar years 2005 through 2009. Rounded to the nearest ten thousand.

---

7 FAOSTAT data, 2004, last updated February 2004. Includes production under the category of “Chillies & Peppers, green” but does not include production under the category of “Peppers, White, long, black.”

Contacts with domestic firms/organizations (including the proponent):

Precise information on pepperoncini production in the United States is not available. Across all types of peppers, an estimated 15,000 acres are used to grow pickling peppers, including pepperoncini, in the United States.9 Seed companies supplying pepperoncini do exist.10 Limited information suggests that pepperoncini peppers may be grown in Michigan and New Jersey, in conjunction with production of cherry peppers.11 However, there is no known commercial production of pepperoncini for use in domestic processing.12 In the past, efforts were made to grow pepperoncini for processing in the United States, but the color and taste did not meet purchaser product specifications; also, the climate conditions were not suitable and labor costs were high.13

Pepperoncini peppers may be imported to the United States in bulk containers for sale to food service firms and to food processors for remanufacturing.14 Mt. Olive, the nation’s second largest pickle company, repackages imported pepperoncini under its private label.15 Other domestic private label packers, such as Vlasic and Dean Foods, may use imported preserved pepperoncini that are not suitable for immediate consumption and further process them in the United States.16 Because pepperoncini also are imported in retail-size containers, a few food processors repackaging imported pepperoncini under a private label may be affected by a suspension of duties on imports intended for retail sale.17

The table lists the industry representatives contacted by the Commission and the submissions received in 2004, in response to similar bills of the 108th Congress. (See H.R. 5019, H.R. 5020 and H.R. 5021 (108th Congress, Rep. Garrett) available at the Commission’s website.18) All submissions received by the Commission are attached in the appendices to this report.

---

11 Telephone interview with Paul Basland, New Mexico State University, on Oct. 1, 2004. The Commission was not able to confirm production in these states.
17 Recently, U.S. imports of pepperoncini for retail sale have been shipped from Turkey.

Technical comments:¹⁹

It is suggested that the article description read as shown on page one. The addition of “not frozen” to the article description of the proposed duty suspension provision would make it track the scope of the permanent tariff category and would clarify the provision for importers. Omitting the reference to acetic acid would accord with Food and Drug regulations that do not allow acetic acid to be used on products intended for consumption as food.

¹⁹ The Commission may express an opinion on the HTS classification of a product to facilitate consideration of the bill. However, by law, only the U.S. Customs Service is authorized to issue a binding ruling on this matter. The Commission believes that the U.S. Customs Service should be consulted prior to enactment of the bill.
H. R. 1699

To suspend temporarily the duty on certain pepperoncini prepared or preserved otherwise than by vinegar or acetic acid.

IN THE HOUSE OF REPRESENTATIVES
April 19, 2005

Mr. PASCRELL introduced the following bill; which was referred to the Committee on Ways and Means

A BILL

To suspend temporarily the duty on certain pepperoncini prepared or preserved otherwise than by vinegar or acetic acid.

1 Be it enacted by the Senate and House of Representa-
2 tives of the United States of America in Congress assembled,
3 SECTION 1. CERTAIN PEPPERONCINI PREPARED OR PRE-
4 SERVED OTHERWISE THAN BY VINEGAR OR
5 ACETIC ACID.
6 (a) In General.—Subchapter II of chapter 99 of
7 the Harmonized Tariff Schedule of the United States is
8 amended by inserting in numerical sequence the following
9 new heading:

[Further text follows...]

(b) EFFECTIVE DATE.—The amendment made by subsection (a) applies to articles entered, or withdrawn from warehouse for consumption, on or after the 15th day after the date of the enactment of this Act.
