comments section)

Product information, including uses/applications and source(s) of imports:

The subject chemical is used in the manufacture of specialty paper products to impart certain oil- and
grease-resistant properties to the finished paper/paperboard product. Ciba Specialty Chemicals, the only
known U.S. importer, imports the subject chemical from its affiliated plant in Germany.

There is no known U.S. production of this chemical.
Estimated effect on customs revenue (shown for both duty suspension and duty reduction):

The figures for “Customs revenue loss for duty reduction” assume a duty reduction from 6 percent to 1 percent for 2005 and 2006 and from 6 percent to 1.5 percent for 2007 through 2009.

The Commission may express an opinion on the HTS classification of a product to facilitate consideration of the bill. However, by law, only the U.S. Customs Service is authorized to issue a binding ruling on this matter. The Commission believes that the U.S. Customs Service should be consulted prior to enactment of the bill.

Technical comments:3

The Commission suggests that the article description on page 1 of this report be used in the proposed new heading in order to remove the second “y” in the word “tetraflouroethylene” and to provide the CAS number for the chemical.

The Commission also notes that the bill requests temporary suspension of the duty. However, the proponent stated that a temporary reduction in duties, from 6 percent to 1 percent for 2005 and 2006 and from 6 percent to 1.5 percent for 2007 and thereafter, would be acceptable.
