ADDITIONAL ITEMS

X. HTS, Schedule B

UOM "X" Transformation

At the Committee's spring 2017 meeting, U.S. Customs and Border Protection (CBP) explained to Committee members that, for drawback duty calculations, CBP needs to have a specified unit of measure reported in every HTS tariff line order to determine a unit value (per the Trade Enforcement and Trade Facilitation Act (TFTEA) of February 2016). CBP subsequently compiled a list of tariff lines in chapters 1-98 that use "X" (some have a duty rate of "Free" and some are dutiable). In July of 2018, the U.S. International Trade Commission (USITC), through its Office of Tariff Affairs and Trade Agreements, launched a project to identify appropriate units of measure for all HTS lines using an "X" instead of a unit of measure. The USITC's Office of Industries was also enlisted to assist with this project. The USITC's recommended changes were given to CBP so its import specialists could go over the list and make suggestions and changes. Once CBP completed its review, the list was sent to Census and USITC for ratification and implementation. All of the lines with "X" as the unit of measure that have duty rates will change to the new designated units of measure on January 1, 2019. The rate lines that are "Free" will start using new units of measure on January 1, 2020.
