OVERVIEW

On February 26, 2010, the U.S. International Trade Commission (the Commission) instituted investigation No. 1205-7, “Proposed Modifications to the Harmonized Tariff Schedule of the United States,” pursuant to section 1205 of the Omnibus Trade and Competitiveness Act of 1988. Section 1205 requires the Commission to keep the Harmonized Tariff Schedule of the United States (HTS) under continuous review and to recommend to the President modifications to the HTS in order to reflect amendments to the Harmonized Commodity Description and Coding System (the Harmonized System or HS) that are periodically recommended by the World Customs Organization (WCO), formally named the Customs Cooperation Council (CCC), for adoption by Member administrations, and as other circumstances warrant.¹

In formulating recommendations to the President, the Commission follows a two-step process: (1) it gives notice of proposed recommendations and solicits views of interested Federal agencies and the public regarding those proposed recommendations, and (2) after considering the views received in response to that notice, it makes final recommendations to the President. This report contains the Commission’s final proposed recommendations.

In addition to recommending changes reflecting those made to the international HS nomenclature by the WCO, the Commission may recommend modifications to the HTS that are in conformance with decisions taken by the WCO’s Harmonized System Committee (HSC) that affect the classification of particular goods under the HTS; such modifications to the HTS may be required in order to ensure that the subject imported goods continue to receive existing duty treatment. In this context, it has been the practice that other federal agencies, especially U.S. Customs and Border Protection (Customs), may bring to the Commission’s attention those changes in the classification of particular goods that may likewise require the creation of one or more separate tariff categories in order to continue existing U.S. duty treatment. The HTS modifications recommended in this report would, if proclaimed by the President, implement in U.S. law the amendments to the international HS nomenclature that were recommended by the WCO in June 2009 and are to become effective as of January 1, 2012.²

In accordance with section 1205, the Commission solicited, and gave consideration to, the views of interested Federal agencies and the public before recommending modifications to the HTS. This report

¹Since the implementation of the Harmonized System in 1988, the WCO has issued recommendations for amendments scheduled to take effect in 1991, 1996, 2002, and 2007. HS amendments covered by this report are scheduled for implementation on January 1, 2012.

²The lead time between the issuance of the WCO recommendation and implementation of the amendments is required by Article 16 of the HS Convention, which provides that “where the recommended amendment is notified on or after April 1, the date [of implementation] shall be the first of January of the third year following the date of such notification.” This lead time is built in to allow member administrations to translate the amendments into their national languages (the HS is legally authentic in French or English only) and to gain authorization from their own governments to implement the amendments in their national tariffs.

to the President presents the Commission's proposed recommendations, summarizes the information on which its recommendations are based, and presents concordances between present and proposed tariff categories. The report also includes a statement of the probable economic effect of recommended changes on any industry in the United States.

The information contained in the report was obtained from, or based upon, documents of the WCO, research by the Commission's staff, consultations with and communications from Government agencies, written submissions from interested parties in the private sector, and input from other sources, as appropriate. In addition to the Commission's proposed recommendations, this report includes background information on the international HS and on the procedures involved in its modification, an appendix presenting all of the recommended HTS modifications (appendix B), and correlation tables between present and recommended HTS subheadings (appendix C (sorted by proposed HTS subheading) and appendix D (sorted by current HTS subheading)). Following publication of the preliminary report, the Commission received one written comment from the Cranberry Marketing Committee, which is included as appendix E to this report.

The Commission's preliminary report (USITC Publication 4134, April 2010) was placed on the Commission's Internet website (http://www.usitc.gov/tariff_affairs/modifications_hts.htm), and this final report will be placed there, as well. It is anticipated that further information may be developed, particularly during the course of USTR's discussions at the World Trade Organization (WTO) in connection with the modification of schedules of concessions, in which case it may be necessary to reconsider the derivation of certain tariff rates and possibly to address other issues under negotiation. Accordingly, the Commission's investigation will remain open as necessary to address any such matters in order to complete the record. The recommended modifications are set out in appendix B to this report.

RECOMMENDATIONS

BACKGROUND

The Harmonized System Convention

Subtitle B of title I of the Omnibus Trade and Competitiveness Act of 1988 (the 1988 Act) approved the United States' accession to the International Convention on the Harmonized Commodity Description and Coding System (the Convention), which was completed in Brussels on June 14, 1983, under the auspices of the Customs Cooperation Council.³ The Convention established a standardized tariff nomenclature for goods in trade,⁴ the purpose of which was, and is, to facilitate international trade

³The Customs Cooperation Council (CCC) was renamed the World Customs Organization (WCO) in 1994; though it is still referred to in legal documentation as the CCC, it is commonly referred to now as the WCO.

⁴The annex to the Convention contains the Harmonized Commodity Description and Coding System, commonly referred to as the Harmonized System or HS, which includes the HS structured nomenclature, rules of interpretation, and legal notes. The 1988 Act implemented the HTS, which incorporates the structure of the HS nomenclature.

through the use of a single nomenclature structure for the description, classification, and coding of imports and exports of the contracting parties. This nomenclature, under the requirements of the Convention, assists in the collection, comparison, and analysis of international trade statistics. Article 3 of the Convention requires each contracting party to use the HS nomenclature as the basis of its customs tariff nomenclature and publication of foreign trade statistics and to apply the General Rules for the interpretation of the nomenclature in classifying goods.

The Convention created the Harmonized System Committee, comprising representatives of all the contracting parties to the Convention. Among the HSC's functions is the preparation of recommendations for achieving uniform interpretation of the HS nomenclature by the members and for keeping the HS product categories current, taking into account technological developments and changing patterns in international trade. These recommendations are issued as amendments to the Convention, especially to the HS annex, and may be reflected in one or more related publications of the WCO, notably the Explanatory Notes to the HS and the Compendium of Classification Opinions, on which the contracting parties rely for guidance in the understanding of the nomenclature. While the Explanatory Notes and Compendium are helpful and authoritative sources of such information, they are not legally binding on the contracting parties.

The amendments to the HS recommended by the WCO generally arise in two contexts: (1) the HSC's actions on classification questions or disputes initiated by members, and (2) the work of a Review Subcommittee (RSC), when its recommendations are subsequently approved by the HSC and ultimately by the WCO. The RSC was established in 1990 by the HSC to review the HS nomenclature on a regular basis and to consider possible changes needed to keep it current with changes in technology and trade patterns. These recommended amendments are set forth in a document presented to the contracting parties to the Convention under the process set forth in Article 16 to the Convention. Most of the amendments set forth in the WCO's Article 16 recommendation⁵ that is under consideration in this investigation comprise RSC proposals that resulted from its most recent review cycle.

Pursuant to Article 16, amendments to the HS that have been recommended to members by the WCO are deemed to be accepted 6 months after the date of notification of the recommendation by the Secretary General, provided that there is no objection outstanding before the WCO at the end of this period. By agreement of the members, any amendments to the Explanatory Notes or to the Compendium of Classification Opinions are deemed to be accepted when no objection is notified within 3 months of HSC approval.

Executive Authority

Section 1206 of the 1988 Act authorizes the President to proclaim certain types of modifications to the HTS, on the basis of the Commission's proposed recommendations under section 1205 of the 1988 Act, including changes needed to bring the HTS into conformity with proposed WCO amendments of the HS nomenclature. The Commission is directed by section 1205(a) to keep the HTS under continuous

⁵Article 16 of the HS Convention sets out the procedures for amending the Convention and its HS annex, including provisions for contracting parties to notify the WCO Secretary General of objections to any recommended amendment. A copy of the WCO recommendation of June 26, 2009, which is the source of the amendments proposed to the HTS in this report, can be found on the Commission's website, http://www.usitc.gov/tariff_affairs/modifications_hts.htm.

review and to recommend appropriate modifications to the President whenever amendments to the HS nomenclature are adopted by the WCO and as warranted by particular circumstances:

“[The Commission] shall recommend to the President such modifications in the Harmonized Tariff Schedule as [it] considers necessary or appropriate—

- (1) to conform the [HTS] with amendments made to the Convention;⁶
- (2) to promote the uniform application of the Convention and particularly the Annex thereto;
- (3) to ensure that the HTS is kept up-to-date in light of changes in technology or changes in patterns of international trade;
- (4) to alleviate unnecessary administrative burdens; and
- (5) to make technical rectifications.”⁷

Section 1205(d) provides that the Commission cannot recommend a modification to the HTS unless the change (1) is “consistent with the Harmonized System Convention or any amendment thereto recommended for adoption”; (2) is “consistent with sound nomenclature principles?”; and (3) “ensures substantial rate neutrality.” Any modification that would change a rate of duty must be consequent to, or be necessitated by, recommended nomenclature changes. Finally, the recommended modifications “must not alter existing conditions of competition for the affected U.S. industry, labor, or trade.”

Section 1206 of the 1988 Act authorizes the President to proclaim modifications to the HTS, on the basis of recommendations by the Commission under section 1205, if he determines that the recommended changes are in conformity with U.S. obligations under the HS Convention and do not run counter to the national economic interest of the United States. The modifications can be proclaimed only after the expiration of a 60-day layover period⁸ that begins on the date the President submits a report to the Committee on Ways and Means of the House of Representatives and to the Committee on Finance of the Senate; the report must enumerate the proposed modifications and the reasons for making them. Under the terms of the 1988 Act, such proclaimed modifications cannot become effective before the 30th day after the implementing proclamation is published in the *Federal Register*.

⁶Under the terms of article 2 of the HS Convention, the nomenclature annex is a part of the Convention, and a reference to the Convention is deemed to include a reference to the annex.

⁷Section 1202(6) of the 1988 Act limits the scope of “technical rectifications” to include clerical or typographical errors that do not affect the substance or meaning of the text, such as errors in spelling, numbering, punctuation, or indentation and also to inadvertent errors (including inadvertent omissions) in cross-references between headings, subheadings, or notes, as well as to similar errors. The Commission recommends, wherever possible, appropriate conforming changes in legal notes or other provisions of the HTS, primarily to replace superseded heading or subheading references with the corresponding new references.

⁸This period is computed based on “legislative days” and therefore excludes Saturdays and Sundays (unless Congress is in session) and any other day on which either the House or the Senate is not in session.

RECOMMENDED MODIFICATIONS TO THE HTS

Most of the recommended modifications set out in appendix B are based upon decisions taken by the HSC during its 34th through 43rd sessions (September 2004 through March 2009), following various actions of the RSC, which submitted its proposals, as they were finalized, to the HSC. While the RSC did not expressly target any particular area of the HS nomenclature for the purposes of the 2012 amendments, the largest volume of such amendments arose from a single request by the Food and Agriculture Organization for separate identification of food products in HS chapters 1 through 21. In addition, a number of amendments arose from a U.S. proposal to create a new heading 9619 to cover sanitary goods, such as diapers, tampons, and the like. Also of particular economic and technological importance are new amendments providing for separate identification in the HS for biodiesel fuels, nickel-metal hydride batteries (used in hybrid motor vehicles), and lithium-ion batteries (used to power consumer electronics products). In all, the WCO recommendation includes 204 amendments in 53 different HS chapters, affecting 108 different headings and 39 legal notes. These changes are intended to update the nomenclature or clarify the classification of particular goods. For example, babies' diapers, which were formerly classifiable in various areas of the nomenclature, depending on the essential character of their composite constituent materials, will now be combined into a single heading (9619) for more uniform and simplified classification. Certain changes in the WCO recommendation require no corresponding changes in the HTS, because the proposals either apply only to the French text of the HS⁹ or do not require the establishment of additional tariff rate lines at the 8-digit level in the HTS to continue existing U.S. duty treatment. In addition to reflecting the international HS amendments in the HTS, it has been necessary to include a number of conforming amendments to additional U.S. notes and to provisions of chapters 98 and 99, which are not part of, but are consistent with the scope of, the international HS and are used to provide particular duty treatment to specified goods, rather than to classify or reclassify them.

The duty rates set forth in appendix B reflect those which are scheduled to be in effect as of January 1, 2012, to coincide with the implementation of the amendments to the international HS. Though they are not labeled as such in appendix B, the three rate columns coincide with Column 1-General, Column 1-Special, and Column 2, as they appear in the HTS. If and when a proposed new HTS subheading represents the combination of two or more existing HTS subheadings with differing Column 1-General duty rates, the proposed General rate for the new subheading is based on that for the existing subheading or subheadings that account for a preponderance of the trade under the proposed new subheading. Any staged duty-rate reductions that have already been established by Presidential Proclamation (e.g., as a result of bilateral, regional, or multilateral trade agreements) for existing HTS provisions will continue to be applied on and after the January 1, 2012, implementation date, as appropriate under the recommended new provisions, as a result of revised staged rate reduction tables that will be included in any eventual Proclamation that may be signed by the President.¹⁰ Further, the

⁹There are two legally authentic or official language versions of the HS, French and English. All other language versions are expected to be translated from the French or English version.

¹⁰The one- or-two letter alphabetical symbols in the middle column of duty rates (representing the Column 1-Special duty rate column in the HTS) are explained in detail in the General Notes at the beginning of the HTS. See General Note 3(c)(i) of the on-line HTS, <http://www.usitc.gov/tata/hts/bychapter/index.htm> and subsequent General Notes for individual preferential duty programs.

duty rates shown may be subject to change as a result of legislation or proclamations that may take effect between the time that the Commission submits its final report to USTR and the projected implementation date of January 1, 2012; such changes will be incorporated in any final implementing proclamation before it is submitted to the President for signature.

Finally, although the amendments to the HTS that would be proclaimed by the President deal only with legal amendments to the HTS (i.e., those at the 8-digit level), this report also includes, as information to the public, projected 10-digit statistical reporting numbers that are expected to carry over from the present HTS to the 2012 version.¹¹

COMMENTS AND CHANGES FOLLOWING PUBLICATION OF THE PRELIMINARY REPORT

In addition to editorial and formatting adjustments, the following paragraphs indicate the changes made (and the reasons therefor) to appendixes B, C, and D, following the publication of the preliminary report (USITC Publication 4134, April 2010).

Corrections

Modifications were made in appendix B to correct certain column 1-general and column 1-special duty rates. Missing references were added, extraneous references were deleted, and typographical errors were corrected in the cross-reference tables (appendixes C and D).

Proposed new subheadings 0302.44.11 and 0302.44.50

In the preliminary report, fresh or chilled mackerel was provided for in a single new subheading 0302.44.00 (appendix B). However, to preserve current duty treatment, this subheading has been subdivided into new subheadings 0302.44.11 and 0302.44.50, with their appropriate duty rate structures intact (appendixes B, C, and D).

Proposed new subheadings 0302.55, 0303.67, 0304.75, 0304.94, and 0304.95

The WCO Recommendation covering Alaska pollack gave an erroneous spelling for the taxonomic name. This has been corrected to read "*Theragra chalcogramma*" in appendix B. In addition, for the sake of consistency, the spelling of "pollock" is used instead of "pollack" throughout.

Proposed new subheading 0302.83.00

Appendixes C and D in the preliminary report were missing the cross-references for this new subheading. These references have been inserted in this report.

¹¹Statistical reporting numbers appear in appendix B, in italics, directly beneath the 8-digit legal lines to which they belong. The units of quantity specified in the HTS for the reporting of goods in trade are omitted from the appendix. See Preface to the HTS for an explanation of these nonlegal provisions and the administrative process concerned.

Proposed new 6-digit subheading 0302.85

The article description for this subheading in the preliminary report (appendix B) was truncated. The complete article description now appears in appendix B.

Proposed new subheadings 0303.19.01 and 0303.29.01

Given the change in scope of present subheadings 0303.19.00 and 0303.29.00, these two subheading numbers have been amended to read 0303.19.01 and 0303.29.01, respectively (appendixes B, C, and D).

Proposed new subheading 0303.89.00

The duty rates applicable to this subheading were inadvertently omitted from appendix B in the preliminary report. The correct rates now appear in appendix B.

Proposed new subheading 0304.81

The preliminary report (appendix B) showed this subheading as an 8-digit code (0304.81.00). It has been corrected in appendix B to the 6-digit code "0304.81".

Present subheadings 0306.11, 0306.12, 0306.14, 0306.22, 0306.24, 0307.29, 0307.39, 0307.49, 0307.59, and 0307.80, and proposed new heading 0308

No amendments have been recommended by the WCO for these subheadings. However, the texts of headings 0306 and 0307 are being amended to include a reference to "the smoking process" as a form of cooking. While the crustaceans, molluscs and other aquatic invertebrates covered by these subheadings may be smoked, it is assumed that actual commercial shipments of smoked goods of this type would be relatively insignificant compared to shipments of live, fresh, chilled or frozen products of this type. For this reason, the correlation tables in appendixes C and D do not indicate any changes to these subheadings, though, theoretically speaking, there could be a transfer of goods from chapter 16 (which, at present, covers smoked crustaceans, molluscs and other aquatic invertebrates) to these subheadings, as a result of the modifications to the texts of headings 0306 and 0307. For similar reasons, no correlation is shown between new heading 0308 and present chapter 16.

Proposed new subheadings 0306.15.00 and 0306.25.00

The WCO's Harmonized System Committee and HS Review Sub-Committee determined that "Norway lobsters" were neither "lobsters" nor "shrimps and prawns," but were classifiable as "other" crustaceans for tariff purposes. Appendixes B, C, and D have been adjusted to reflect this determination. While proposed duty rates are not affected, statistical detail and cross-references are amended in this report.

Chapter 8 amendments

Items 08-9 and 08-10 in appendix B have been redesignated as 08-9 (a) and 08-9 (b), respectively, because the latter is a change consequent to the former. For similar reasons, items 08-11 and 08-12 in appendix B have been redesignated as 08-10 (a) and 08-10 (b), respectively.

Proposed new subheadings 0909.61.00 and 0909.62.00

These two subheadings, covering “Seeds of anise, badian, caraway or fennel; juniper berries,” were incorrectly designated as 0909.31.00 and 0909.32.00, respectively, in appendix B of the preliminary report. They have been corrected in this final report (appendix B).

Proposed new subheading 1207.29.00

The column 1-general duty rate shown in appendix B of the preliminary report as 0.32¢/kg has been corrected to read 0.47¢/kg.

Proposed new subheading 1207.70.00

In the preliminary report, the correlation tables cross-referenced present subheading 1207.99.02 (which is duty free) to this new subheading. However, it appears CBP has been classifying melon seeds in subheading 1209.99.40, which is not duty free. Therefore, the proposed rates for new subheading 1207.70.00 have been amended to reflect those of present subheading 1209.99.40 in appendix B. Appendixes C and D have been adjusted accordingly.

Proposed new subheadings 1605.59.05 and 1605.59.60

These two subheadings, following the 6-digit code 1605.59, had been shown erroneously in appendix B of the preliminary report as 1605.58.05 and 1605.58.60, respectively. They have been corrected in this final report.

Proposed new subheadings 2008.93 and 2009.81

A letter supporting the recommended modifications to these subheadings, covering certain prepared or preserved cranberries and cranberry juice, respectively, was received from the Cranberry Marketing Committee (www.uscranberries.com). A copy of that letter is included as appendix E to this report.

Proposed new subheadings 2852.90.05 and 2852.90.90

With the change to the text of heading 2852 to include mercury compounds, “not chemically defined,” various mercury compounds will be transferred from other subheadings to heading 2852. A separate new subheading 2852.90.05 was created to cover those transferred goods that, at present, are subject to duty-free treatment. The remaining transferred goods have roughly equivalent duty rates and are included in new subheading 2852.90.90. These amendments are reflected in appendixes B, C, and D.

Proposed new subheading 3824.90.45

In the preliminary report, this subheading number was changed to read “3824.90.46”, in order to indicate a change in its scope (see appendix B, item 38-4(b)). However, the HTS code 3824.90.46 had previously been in use in the HTS up until February 3, 2007. To avoid any confusion with using the same subheading code to reflect a different scope than before, the proposed “new” subheading 3824.90.46 was changed to read “3824.90.48” in this final report (appendixes B, C, and D).

Chapter 44

Pursuant to the insertion of a new subheading note 1 to chapter 44 (and the consequential renumbering of subsequent subheading notes in that chapter), conforming amendments have been added with regard to the superior texts preceding subheadings 4403.41.00, 4407.21.00, and 4408.31.01 and to subheading 4412.31 (appendix B).

Note 3(e) to chapter 71

Pursuant to the insertion of new note 1 to chapter 42 (and the consequential renumbering of subsequent notes in that chapter), a conforming amendment has been added with regard to Note 3(e) to chapter 71 (appendix B).

Proposed new subheadings 7615.10.70 and 7615.10.90

These subheading codes had been used previously in the HTS with a different scope. For this reason, they were changed to read 7615.10.71 and 7615.10.91, respectively (appendixes B, C, and D).

Proposed new subheading 9301.10.00

Proposed amendments for this new subheading were erroneously omitted from appendix B of the preliminary report. Those amendments have been restored in item 93-1 to appendix B to this report.

Proposed new heading 9619

New subheading 9619.00.05 was inserted to preserve duty treatment for diapers, etc., having an absorbent core of super-absorbent plastics (SAP), also called absorbent gel materials (AGM), and super-absorbent polymer foam. This modification is reflected in appendixes, B, C and D.

PROBABLE ECONOMIC EFFECT OF RECOMMENDED MODIFICATIONS

The Commission considers the recommended HTS modifications to be appropriate to provide for the goods concerned under the proper HS headings or subheadings without altering existing Customs tariff treatment.¹² Furthermore, it is believed that the modifications would not alter existing conditions of competition for the affected U.S. industries, labor, or trade. Consequently, the information collected by the Commission indicates that these modifications, if proclaimed, would ensure substantial rate neutrality and would have little or no economic effect on any U.S. industry.

¹²It should be noted that the rules of origin under various U.S. free trade or trade promotion agreements, as set out in pertinent HTS general notes for purposes of Customs administration, must be modified following appropriate procedures under each such agreement and implemented by the parties according to their national legal regimes. As a result, the HTS general notes will be modified by subsequent proclamations over time as each set of rectifications to agreement rules of origin is finalized. Administrative action by Customs is undertaken during the period leading to implementation of each set of rules of origin rectifications so as to continue the tariff commitments under each agreement.

APPENDIX A

***FEDERAL REGISTER* NOTICE CONCERNING THIS INVESTIGATION**

1. Provisions of the R&PP Act of 1926, as amended, and all applicable regulations of the Secretary of the Interior, including, but not limited to, those terms required by 43 CFR 2741.9;

2. Valid existing rights;

3. A reservation of all minerals by the United States, together with the right to prospect, mine and remove the minerals;

4. Terms and conditions identified through the site specific environmental analysis;

5. Any other rights or reservations that the authorized officer deems appropriate to ensure public access and proper management of Federal land and interest therein; and

6. An appropriate indemnification clause protecting the United States from claims arising out of the lessee's/patentee's use, occupancy, or operations on the leased/patented lands.

Upon publication of this notice in the **Federal Register**, the land described above will be segregated from all other forms of disposal or appropriation under the public land laws, including the general mining laws, except for lease or conveyance under the R&PP Act and leasing under the mineral leasing laws.

Classification Comments: Interested persons may submit comments involving the suitability of the land for boat trailer parking spaces. Comments on the classification are restricted to whether the land is physically suited for the proposal, whether the use will maximize the future use or uses of the land, whether the use is consistent with local planning and zoning, or if the use is consistent with state and Federal programs.

Application Comments: Interested persons may submit comments regarding the specific use proposed in the application and plan of development and the management plan, whether the BLM-ES followed proper administrative procedures in reaching the decision to lease and later convey under the R&PP Act, or any other factor not directly related to the suitability of the land for R&PP use.

Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Any adverse comments will be reviewed by the BLM-ES State Director. In the absence of any adverse

comments, the classification of the land described in the notice will become effective May 10, 2010. The land will not be conveyed until after the classification becomes effective.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[LLCAN00000.L18200000.XZ0000]

Notice of Resource Advisory Council Vacancies

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: Pursuant to authorities in the Federal Advisory Committee Act (FACA) and the Federal Land Policy and Management Act (FLPMA), the Bureau of Land Management (BLM) is seeking nominations to fill two vacant seats on the Northwest California Resource Advisory Council. The persons selected to fill the vacancies will complete unexpired terms ending in September 2010 and September 2011. The appointees will be eligible to compete for the full three-year terms when the current terms expire.

SUPPLEMENTARY INFORMATION: The council vacancies are in membership category one, which includes persons who hold Federal grazing permits in northwest California, or represent transportation and rights of way interests, the commercial timber industry, energy and mineral development interests, or recreational interests including off-highway vehicle users, commercial recreation, or developed recreation interests. The appointments will be made by the Secretary of the Interior pursuant to FACA (5 U.S.C. Appendix 2) and FLMPMA (43 U.S.C. 1701 *et seq.*) as are all BLM Resource Advisory Council appointments. The persons selected must have knowledge or experience in the interest area specified, and must have knowledge of the geographic area under the council's purview (Northwest California). Qualified applicants must have demonstrated a commitment to collaborate with varied interests to solve a broad spectrum of natural resource issues.

Nomination forms are available by contacting BLM Public Affairs Officer Joseph J. Fontana, 2950 Riverside Drive,

Susanville, California 96130; by telephone at (530) 252-5332; or e-mail, jfontana@ca.blm.gov. Forms can also be downloaded from the following BLM California Web site: <http://www.blm.gov/ca/st/en/info/roc/nwrac.html>. Nominations must be returned to: Bureau of Land Management, 2950 Riverside Drive, Susanville, California 96130, Attention: Public Affairs Officer, no later than April 8, 2010. Individuals can nominate themselves, or interest groups can submit nominations. Nominations must include letters of support from the interest groups the nominee will represent.

BILLING CODE 4310-40-P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 1205-7]

Proposed Modifications to the Harmonized Tariff Schedule of the United States

AGENCY: United States International Trade Commission.

ACTION: Notice of institution of investigation and request for public comment.

SUMMARY: On February 26, 2010, the Commission instituted Investigation No. 1205-7, Proposed Modifications to the Harmonized Tariff Schedule of the United States, pursuant to section 1205 of the Omnibus Trade and Competitiveness Act of 1988 (the 1988 Act). Section 1205 directs the Commission to keep the Harmonized Tariff Schedule of the United States (HTS) under continuous review and to recommend to the President modifications thereto, (1) when amendments to the international Convention on the Harmonized Commodity Description and Coding System (Harmonized System), and the Protocol thereto, are recommended by

the World Customs Organization (WCO) (formerly known as the Customs Cooperation Council) for adoption; and/or (2) as other circumstances warrant. The Commission's report will set forth the proposed changes to the HTS that would be needed to maintain conformity between the HTS and the international Harmonized System. The report will also include appropriate explanatory information on the proposed changes. In accordance with section 1206 of the 1988 Act, the President may proclaim the tariff modifications recommended by the Commission, following Congressional layover and consultation.

DATES: *April 9, 2010:* Publication of preliminary report on the USITC Web site.

May 21, 2010: Deadline for public comments on preliminary report.

June 25, 2010: Submission of final report to the President.

ADDRESSES: All Commission offices are located in the United States International Trade Commission Building, 500 E Street, SW., Washington, DC. All written submissions should be addressed to the Secretary, United States International Trade Commission, 500 E Street, SW., Washington, DC 20436. The public record for this collection of proposals may be viewed on the Commission's electronic docket (EDIS) at <http://edis.usitc.gov>.

FOR FURTHER INFORMATION CONTACT: David Beck, Director, Office of Tariff Affairs and Trade Agreements (202-205-2603, fax 202-205-2616, david.beck@usitc.gov). The media should contact Margaret O'Laughlin, Office of External Affairs (202-205-1819, margaret.olaughlin@usitc.gov). Hearing impaired individuals may obtain information on this matter by contacting the Commission's TDD terminal at 202-205-1810. General information concerning the Commission may also be obtained by accessing its Internet Web site at <http://www.usitc.gov>. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-205-2000.

Background: Section 1205(a) of the Omnibus Trade and Competitiveness Act of 1988 (the 1988 Act) (19 U.S.C. 3005(a)) provides that the Commission shall keep the HTS under continuous review and periodically recommend to the President such modifications in the HTS as the Commission considers necessary or appropriate to accomplish five general objectives. Among these stated objectives, section 1205(a)(1) of

the 1988 Act directs the Commission to conform the Harmonized Tariff Schedule with amendments made to the Harmonized System Convention, of which the United States is a signatory. Section 1205(a)(2) directs the Commission to promote the uniform application of the Harmonized System Convention and particularly the Protocol thereto, which contains the Harmonized System nomenclature structure and accompanying legal notes. Subsections (b)-(d) of section 1205 set out procedures to be utilized in formulating recommendations and the requirements that the Commission must observe with respect to the HTS modifications it may recommend.

The proposed changes included in this investigation are set out in a Recommendation promulgated by the World Customs Organization (WCO) on June 26, 2009, in order to update and clarify the international Harmonized System nomenclature. The Recommendation—the fourth in a series—is part of the WCO's long-term program to review periodically the HS nomenclature structure. In accordance with Article 16 of the Harmonized System Convention, the WCO has recommended the adoption of certain modifications to the Harmonized System nomenclature, which are scheduled to become effective on January 1, 2012. The WCO Recommendation of 26 June 2009 can be viewed on the Commission's Web site: http://www.usitc.gov/tariff_affairs/modifications_hts.htm.

The Harmonized System nomenclature provides a uniform structural basis for the customs tariffs and statistical nomenclatures of all major trading countries of the world, including the United States. The Harmonized System comprises the broadest principles of classification and levels of categories in the HTS, that is, the General Rules of Interpretation, Section and Chapter titles, Section and Chapter legal notes, and heading and subheading texts to the 6-digit level of detail. Additional U.S. notes, further subdivisions (8-digit subheadings and 10-digit statistical annotations) and statistical notes, as well as the entirety of chapters 98 and 99 and several appendixes, are national legal and statistical detail added for the administration of the U.S. tariff and statistical programs, and are not part of the international Harmonized System.

An up-to-date copy of the HTS, which incorporates the international Harmonized System in its overall structure, can be found on the Commission's Web site (<http://www.usitc.gov/tata/hts/bychapter/>

[index.htm](http://www.usitc.gov/tata/hts/bychapter/index.htm)). Hard copies and electronic copies of CD can be found at many of the 1,400 Federal Depository Libraries located throughout the United States and its territories; further information about these locations can be found at <http://www.gpoaccess.gov/fdlp.html> or by contacting GPO Access at the Government Printing Office, telephone 866-512-1800.

The Commission will prepare and make available a preliminary report and a final report. The preliminary report will be forwarded to the President via the United States Trade Representative on or about April 9, 2010. It will also be made available for public inspection (with the exception of any confidential business information) through the Commission's electronic docket (EDIS) and posted on the USITC Web site (<http://www.usitc.gov>).

The preliminary report will include proposed HTS modifications to conform the HTS to the WCO Recommendation of 26 June 2009. The public is invited to submit any comments until May 21, 2010. To assist the public in understanding the proposed changes and in developing comments, the Commission will include, in the preliminary and the final reports, a non-authoritative cross-reference table linking the proposed tariff codes to corresponding current tariff codes. Persons using the successive versions of this table should be aware that the cross-references shown are subject to change during the course of preparing for implementation of the January 2102 amendments to the HTS. U.S. Customs and Border Protection has domestic legal authority for tariff classification and may provide information, both during the course of the investigation and after the Commission's final report is submitted, that indicates different or additional tariff classifications of some goods. Moreover, the WCO Secretariat will eventually issue its own advisory cross-reference table between the 2007 HS and the 2012 HS. If necessary, the Commission's report will provide an explanation for any differences between the WCO's and the Commission's cross-reference tables; such differences would typically result from differences between WCO decisions and established U.S. customs classification of goods.

The Commission's final report, incorporating any public comments received, will be sent to the President (through USTR) on or about June 25, 2010. It will also be made available for public inspection (with the exception of any confidential business information) through the Commission's electronic docket (EDIS) and posted on the USITC Web site (<http://www.usitc.gov>).

Following Congressional layover and consultation, the President may proclaim the tariff modifications recommended, effective not before the 30th day after the date on which the text of the proclamation is published in the Federal Register.

Written Submissions: No public hearing is planned, but interested parties are invited to submit written comments, which should be addressed to the Secretary and received no later than May 21, 2010. Submissions should be marked to refer to "Investigation No. 1205-7". All written submissions must conform with the provisions of section 201.8 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.8). Section 201.8 requires that a signed original (or a copy so designated) and fourteen (14) copies of each document be filed. In the event that confidential treatment of a document is requested, at least four (4) additional copies must be filed, in which the confidential information must be deleted (see the following paragraph for further information regarding confidential business information). The Commission's rules authorize filing submissions with the Secretary by facsimile or electronic means only to the extent permitted by section 201.8 of the rules (see Handbook for Electronic Filing Procedures, http://www.usitc.gov/docket_services/documents/handbook_on_electronic_filing.pdf). Persons with questions regarding electronic filing should contact the Secretary (202-205-2000).

Any submissions that contain confidential business information must also conform with the requirements of section 201.6 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.6). Section 201.6 of the rules requires that the cover of the document and the individual pages be clearly marked as to whether they are the "confidential" or "non-confidential" version, and that the confidential business information be clearly identified by means of brackets. All written submissions, except for confidential business information, will be made available for inspection by the public. Any confidential business information that might be received in the comments may be made available to Customs, Census, or the President during the examination of these proposals. The Commission will not otherwise publish or release any confidential business information received, nor release it to other government agencies or other persons.

Issued: March 4, 2010.

By order of the Commission.
Marilyn R. Abbott,
Secretary to the Commission.

DEPARTMENT OF LABOR

Bureau of Labor Statistics

Proposed Collection, Comment Request

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. The Bureau of Labor Statistics (BLS) is soliciting comments concerning the proposed extension of the "Report on Occupational Employment and Wages." A copy of the proposed information collection request (ICR) can be obtained by contacting the individual listed below in the Addresses section of this notice.

DATES: Written comments must be submitted to the office listed in the Addresses section of this notice on or before May 10, 2010.

ADDRESSES: Send comments to Carol Rowan, BLS Clearance Officer, Division of Management Systems, Bureau of Labor Statistics, Room 4080, 2 Massachusetts Avenue, NE., Washington, DC 20212. Written comments also may be transmitted by fax to 202-691-5111 (this is not a toll free number).

FOR FURTHER INFORMATION CONTACT: Carol Rowan, BLS Clearance Officer, at 202-691-7628 (this is not a toll free number). (See ADDRESSES section.)

SUPPLEMENTARY INFORMATION:

I. Background

The Occupational Employment Statistics (OES) survey is a Federal/State establishment survey of wage and salary workers designed to produce data on current occupational employment and

wages. OES survey data assist in the development of employment and training programs established by the 1998 Workforce Investment Act (WIA) and the Perkins Vocational Education Act of 1998.

The OES program operates a periodic mail survey of a sample of non-farm establishments conducted by all fifty States, the District of Columbia, Guam, Puerto Rico, and the U.S. Virgin Islands. Over three-year periods, data on occupational employment and wages are collected by industry at the four- and five-digit North American Industry Classification System (NAICS) levels. The Department of Labor uses OES data in the administration of the Foreign Labor Certification process under the Immigration Act of 1990.

II. Current Action

Office of Management and Budget clearance is being sought for the Occupational Employment Statistics (OES) program. Occupational employment data obtained by the OES survey are used to develop information regarding current and projected employment needs and job opportunities. These data assist in the development of State vocational education plans. OES wage data provide a significant source of information to support a number of different Federal, State, and local efforts.

As part of an ongoing effort to reduce respondent burden, OES has several electronic submission options which are available to respondents. Respondents have the ability to submit data by e-mail, or fillable online forms. In many cases, a respondent can submit existing payroll records and would not need to submit a survey form.

III. Desired Focus of Comments

The Bureau of Labor Statistics is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.

- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.

- Enhance the quality, utility, and clarity of the information to be collected.

- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other

Attn: Mr. David B. Beck,
Director, Office of Tariff Affairs and Trade Agreements

Dear Madam Secretary and Mr. Beck:

I am writing on behalf of the U.S. cranberry industry regarding the Proposed Modifications to the Harmonized Tariff Schedule of the United States (Investigation No. 1205-7 (Preliminary)), which was published in April 2010.

The U.S. cranberry industry supports the proposed establishment of two new cranberry tariff lines in the U.S. Harmonized Tariff Schedule. As Mr. Beck knows from his work with private companies in the cranberry industry, U.S. cranberries have long had difficulty with tariff codes. Until recently, the only specific cranberry tariff line was HS 0810.40, which covers fresh cranberries. This tariff line does not include the majority of cranberry exports, which are juice products and sweetened, dried cranberries.

Exports are an important part of U.S. cranberry sales. Exports of sweetened, dried cranberries, cranberry fruit juices, and other cranberry products have increased from less than 10% of production to more than 25% in recent years.

Because of the lack of specific tariff lines for key export products, U.S. cranberries have been disadvantaged in trade negotiations as they were imported under "other" categories, which frequently competed with sensitive products from trading partners. The lack of specific tariff lines also hindered the ability for the industry to obtain accurate export figures for their products.

After the leadership of the U.S. government at the World Customs Organization (WCO), with the support of other countries such as Canada, the WCO proposed to establish the two new cranberry tariff lines in the global tariff schedule. We are pleased to see the U.S. adopt these tariff lines as well. HS 2009.81 for cranberry juice and HS 2008.93 for sweetened, dried cranberries will address many of the issues with tariffs that cranberry exports have faced.

Thank you to the U.S. International Trade Commission for its assistance with this issue at the WCO and for moving to adopt these tariff lines in the U.S. harmonized tariff schedule.

Please do not hesitate to contact me with any questions.

Sincerely,

David Farrimond
