DEFINITIONS

Certain Standard Steel Fasteners (“CSSF”).-- The merchandise covered by the investigations consists of certain standard nuts, bolts, and cap screws of steel other than stainless steel, whether or not coated. Bolts and cap screws covered by the investigations possess either a round-shaped (i. e., dome-shaped), or hexagonal-shaped head, and have a shank or thread with a full or nominal diameter of 6 millimeters or more. Cap screws covered by the investigations typically have an attached washer face or the equivalent (e.g., chamfered corners on the underside of a fastener with a hexagonal-shaped head). Bolts and cap screws are covered by the investigations regardless of whether or not other attachments (e.g., nuts or washers) are connected to them. Nuts are covered by the investigations if they are suitable for attachment to bolts and/or cap screws covered by the investigations.

Subject merchandise is typically certified to the specifications published by one or more of the following organizations: the American Society for Testing and Materials (“ASTM”), the Society of Automotive Engineers (“SAE”), the International Organization for Standardization (“ISO”), the Industrial Fasteners Institute (“IFI”), and comparable foreign and domestic specifications (including, but not limited to, metric versions of any of the specifications below). Common specifications to which subject merchandise is certified include, but are not limited to: ASTM A194, ASTM A307, ASTM A307A, ASTM A325, ASTM A325M, ASTM A325T, ASTM A325-3, ASTM A354, ASTM A354 (grade BD), ASTM A449, ASTM A490, ASTM A490-3, ASTM A563 (grades C, C3, DH, and DH3), ASTM F568, ASTM F1852, ASTM F2280, SAE 2, SAE 5, SAE 8, SAE J429, SAE 51 199, ISO 898-1, ISO 898-2, ISO 4759-1, ISO 8992, and the IFI’s “Inch Fastener Standards,” and “Metric Fastener Standards.”

Merchandise covered by these investigations is classified in the Harmonized Tariff Schedule of the United States (“HTSUS”) in subheadings 7318.15.20, 7318.15.80, and 7318.16.00 and reported for statistical purposes under the following numbers: 7318.15.2030, 7318.15.2055, 7318.15.2065, 7318.15.8065, 7318.15.8085, and 7318.16.0085. While the HTSUS headings are provided for convenience and customs purposes, the written description of the scope is dispositive.

Standard Fasteners.—Fasteners that can be described from nationally recognized consensus standards documents and may be produced by any interested manufacturing facility. All other fasteners are specialty or nonstandard and would properly fall into three groups: (a) modified standard, (b) proprietary-patented, and (c) engineered special parts. The latter two are referred to herein as specialty/patented fasteners.

Modified Standard Steel Fasteners.—Fasteners that are standard with one or more of its features or characteristics slightly changed. Such parts are normally ordered to a customer’s print, are used by that customer in a particular application, but the parts are such that any interested manufacturer can produce them.
