ATTENTION QUESTIONNAIRE RESPONDENTS

Report table quantities in:

- (1) 1,000 pounds (total, on a 100 percent active ingredient basis);**
- (2) 1,000 pounds (in solution, as produced/sold); and**
- (3) 1,000 pounds (in powder, as produced/sold)**

When reporting (2) and (3), report the corresponding weighted average percentage of active ingredients contained. Quantities should be net of returns.

These quantities should reconcile as follows:

Total quantity on a 100 percent active ingredient basis should equal the sum of the quantity in solution as produced/sold multiplied by the weighted average percentage of active ingredients contained in solution, plus the quantity in powder as produced/sold multiplied by the weighted average percentage of active ingredients contained in powder.

For example, 1,000 pounds of 93 percent active ingredient powder converts to 930 pounds on a 100 percent active ingredient basis, and 1,000 pounds of 22 percent active ingredient solution converts to 220 pounds on a 100 percent active ingredient basis. Therefore, if you report 1,000 pounds of 93 percent active powder and 1,000 pounds of 22 percent active solution, you would also report a total quantity of 1,150 pounds on a 100 percent active ingredient basis.

Follow the same methodology for the reporting of all CSOBAs and Fluorescent Brightener 71.
