May 9, 2013, SGBC responded to the Department’s request.\(^3\)

**Scope of the Order**

Imports covered by the order are shipments of tapered roller bearings and parts thereof, finished and unfinished, from the People’s Republic of China; flange, take-up cartridge, and hanger units incorporating tapered roller bearings; and tapered roller housings (except pillow blocks) incorporating tapered rollers, with or without spindles, whether or not for automotive use. These products are currently classifiable under Harmonized Tariff Schedule of the United States (HTSUS) item numbers 8482.20.00, 8482.91.00.50, 8482.99.15, 8482.99.45, 8483.20.40, 8483.20.80, 8483.30.80, 8483.90.20, 8483.90.30, 8483.90.80, 8708.70.60.60, 8708.99.23.00, 8709.99.48.50, 8709.99.68.90, 8709.99.81.15, and 8709.99.81.80. Although the HTSUS item numbers are provided for convenience and customs purposes, the written description of the scope of the order is dispositive.

**Initiation of Changed Circumstances Review**

Pursuant to section 751(b)(1) of the Tariff Act of 1930, as amended (the Act), the Department will conduct a changed circumstances review upon receipt of information concerning, or a request from an interested party for a review of, an antidumping duty order which shows changed circumstances sufficient to warrant a review of the order. In accordance with 19 CFR 351.216(d), the Department finds that termination of the suspended antidumping duty investigation on lemon juice from Mexico would likely lead to continuation or recurrence of dumping at the margins indicated in the “Final Results of Review” section of this notice.

**FOR FURTHER INFORMATION CONTACT:** Maureen Price or Sally C. Gannon, Bilateral Agreements Unit, Import Administration, International Trade Administration, U.S. Department of Commerce.

**SUPPLEMENTARY INFORMATION:**

**Background**

On August 1, 2012, the Department initiated a sunset review of the suspended antidumping duty investigation on lemon juice from Mexico, pursuant to section 751(c) of the Tariff Act of 1930, as amended (“the Act”).\(^1\) The Department received a notice of intent to participate from the domestic interested party, Ventura Coastal, LLC (“Ventura”), a joint venture between Ventura Coastal and Sunkist Growers, Inc., the petitioner in the underlying investigation, within the 30-day deadline specified in 19 CFR 351.216(d)(1)(i). Ventura claimed interested party status under section 771(9)(C) of the Act as a U.S. producer of the subject merchandise. On August 31, 2012, the Department received complete substantive responses from the domestic interested party and the respondent interested parties, The Coca-Cola Company and its subsidiary, The Coca-Cola Export Corporation, Mexico Branch (collectively, “TCCC”) and Procmart Citrus (“Procmart”), within the 30-day deadline specified in 19 CFR 351.216(d)(3)(i). On September 7, 2012, the Department received timely filed rebuttals to the substantive responses from Ventura and Procmart. As a result, pursuant to 19 CFR 351.216(e)(2), the Department conducted a full sunset review.\(^2\) On December 26, 2012, the Department preliminarily determined that termination of the suspended antidumping duty investigation on lemon juice from Mexico would likely lead to continuation or recurrence of dumping.\(^3\) Procmart filed a request for a hearing on January 25, 2013, which it later withdrew.\(^4\) On February 14, 2013, the respondent interested parties submitted comments on the Preliminary Results and, on February 19, 2013, Ventura submitted rebuttal comments.\(^6\)

**Scope of the Suspended Investigation**

The merchandise covered by the suspended investigation includes certain lemon juice for further manufacture, with or without addition of preservatives, sugar, or other sweeteners, regardless of the GPL (grams per liter of citric acid) level of concentration, brix level, brix/acid ratio, pulp content, clarity, grade, horticulture method (e.g., organic or not), processed form (e.g., frozen or not-from-

\(^2\) Lemon Juice from Mexico: Preliminary Results of Full Sunset Review of the Suspended Antidumping Duty Investigation, 77 FR 75998 (December 26, 2012) (“Preliminary Results”).

\(^4\) Lemon Juice from Mexico—Rebuttal Brief on behalf of Ventura Coastal, LLC (Rebuttal Brief), February 10, 2013.
concentrate), FDA standard of identity, the size of the container in which packed, or the method of packing. Excluded from the scope are: (1) Lemon juice at any level of concentration packed in retail-sized containers ready for sale to consumers, typically at a level of concentration of 48 GPL; and (2) beverage products such as lemonade that typically contain 20% or less lemon juice as an ingredient.

Analysis of Comments Received

All issues raised in this review are addressed in the Issues and Decision Memorandum (“Decision Memorandum”) from Lynn Fischer Fox, Deputy Assistant Secretary for Policy & Negotiations, to Ronald K. Lorentzen, Acting Assistant Secretary for Import Administration, dated concurrently with this notice, which is hereby adopted by this notice. The issues discussed in the Decision Memorandum include the likelihood of continuation or recurrence of dumping, the magnitude of the margin of dumping likely to prevail if the suspended investigation were terminated, and whether to disregard Ventura’s response. Parties can find a complete discussion of all issues raised in this sunset review and the corresponding recommendations in this public memorandum, which is on file electronically via Import Administration’s Antidumping and Countervailing Duty Centralized Electronic Service System (“IA ACCESS”). Access to IA ACCESS is available to registered users at http://iaaccess.trade.gov and in the Central Records Unit (“CRU”), Room 7046 of the main Department of Commerce building. In addition, a complete version of the Decision Memorandum can be accessed directly on the Internet at http://ia.access.trade.gov. The paper copy and electronic version of the Decision Memorandum are identical in content.

Final Results of Review

Pursuant to sections 751(c)(1) and (3) of the Act, the Department determines that termination of the suspended antidumping investigation on lemon juice from Mexico would likely lead to continuation or recurrence of dumping and that the magnitude of the margin of dumping likely to prevail if the suspended investigation were terminated is 146.10 percent for The Coca-Cola Export Corporation, Mexico Branch, 205.37 percent for Citrotam Internacional S.P.R. de R.L. (Citrotam)/ Productos Naturales de Citricos (Pronatcit) and 146.10 percent for all other exporters.

Notification to Interested Parties

This notice also serves as the only reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

The Department is issuing and publishing the results and notice in accordance with sections 751(c), 752(c), and 777(i)(1) of the Act.

Dated: June 20, 2013.

Ronald K. Lorentzen,
Acting Assistant Secretary for Import Administration.

University of Hawaii at Manoa, et al.; Notice of Decision on Applications for Duty-Free Entry of Scientific Instruments

This is a decision pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, as amended by Pub. L. 106–36; 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 3720, U.S. Department of Commerce, 14th and Constitution Ave NW., Washington, DC.

Comments: None received. Decision: Approved. We know of no instruments of equivalent scientific value to the foreign instruments described below, for such purposes as this is intended to be used, that was being manufactured in the United States at the time of order.

Reasons: The instrument will be used in conjunction with the Panoramic Survey Telescope & Rapid Response System (Pan-STARRS), to discover and characterize Earth-approaching objects, both asteroids and comets that might pose a danger to the Earth, as well as a wide range of other research areas of astronomy. Critical performance characteristics include the ability to detect objects much fainter than has hitherto been possible with sufficient resolution to measure both the position and brightness levels required for precision, that the instrument be sufficiently robust and reliable that it can carry out continuous observations without direct human supervision under both benign and harsh meteorological observing conditions, and servicing and maintenance that can be performed as quickly as possible to minimize system down time. The heat released by the electrical/electronic components cannot have an impact on the system point spread function that exceeds a combined total of 0.1 arcseconds. Other key features that were not proposed by domestic vendors include the use of 36 actuators to control the shape of the telescope’s primary mirror, active cooling of the mechanical structure containing the primary mirror, design and performance analysis of the structures holding the telescope secondary mirror in position, the mechanical design and performance analysis of the telescope “truss”, active cooling of the motors that move the telescope, additional performance margin of the telescope motors to provide additional power and torque in the presence of high motor loads, and the serviceability of several key telescope components that traditionally are both prone to failure and hard to get at, as well as allowing the removal of extremely difficult components.

Docket Number: 13–009. Applicant: Max Planck Florida Institute for Neuroscience, Jupiter, FL 33458. Instrument: Serial Block face microtome. Manufacturer: Gatan, United Kingdom. Intended Use: See notice at 78 FR 27186, May 9, 2013. Comments: None received. Decision: Approved. We know of no instruments of equivalent scientific value to the foreign instruments described below, for such
