

U.S. IMPORTERS' QUESTIONNAIRE GUIDANCE

Not all questions are applicable to your firm! Use this tabulation to navigate and understand which section(s) of the U.S. importers' questionnaire are applicable to your firm's operations. All importers need to respond to questions I-1a. to II-2 (pp. 1 to 5 of the blank version of the U.S. importers' questionnaire) and questions III-3 to III-24 (pp. 159 to 170 of the blank version of the U.S. importers' questionnaire).¹ For the applicable import and pricing product data tables, you should only respond to the questions listed below if your firm actually imports from that indicated source.

Due to the file size and use of calculated fields to provide "live" feedback to firms on data errors and areas for revision, MS Word may take between 2 to 3 seconds to update the data calculations (on exiting a cell) in the grids in Part II. Users may wait for the calculations to update before continuing, or may pro-actively click into the next form field with their mouse and type while MS Word is still performing its calculations.
