Hourly costs for public housing resident focus group participants were estimated using FY 2016 HUD 30% Income Limit for All Areas calculations from the Office of Policy Development and Research through HUD’s Web site located at <https://www.huduser.gov/portal/datasets/il/il16/index.html>. This identifies income limits by county for extremely low income households earning at or below 30% of their county median income. These limits are adjusted by household sizes of up to eight household members. We averaged the county median values to produce a national average median income by

household size for extremely low income households. Based on the ROSS–SC program emphasis on increasing family self-sufficiency, and independent living and aging in place for the elderly and disabled, we estimate that:

- 20% of potential respondents will live alone (21 respondents) with an average median income of \$13,537.
- 10% will reside in a 2-person household (11 respondents) with an average median income of \$15,464.
- 30% will reside in a 3-person household (32 respondents) with an average median income of \$17,396.

- 30% will reside in a 4-person household (32 respondents) with an average median income of \$19,305.

- 10% will reside in a 5-person household (11 respondents) with an average median income of \$20,872.

To produce a basic hourly rate, we divide the average median annual income amount by 1,950 work hours per year, equaling 5 days at 37.5 hours per week for each of the 52 weeks out of the year.

All assumptions are reflected in the table below.

Information collection	Number of respondents	Frequency of response	Burden hour per response	Annual burden hours	Hourly cost per response (\$)	Total cost (\$)

¹ The full population is estimated at 1,200 service coordinators. The number of respondents is based on anticipated response rate of 70%.
